Preface	ix
Preface to the First Edition	xi
Acknowledgments	xiii
Chapter 1 Designer Mice	1
<i>Scope and sourcebooks</i>	
Chapter 2 Of Unicorns and Chimeras	10
<i>How to generate a line of transgenic or knockout mouse for behavioral phenotyping</i>	
Chapter 3 General Health	42
<i>Give your mouse a physical</i>	
Chapter 4 Motor Functions	62
<i>Open field, holeboard, rotarod, balance, grip, circadian activity, circling, stereotypy, ataxic gait, seizures</i>	
Chapter 5 Sensory Abilities	86
<i>Olfaction, vision, hearing, taste, touch, nociception</i>	

Chapter 6 Learning and Memory	110
<i>Morris swim task, spatial mazes, cued and contextual conditioning, conditioned taste aversion, conditioned eyeblink, olfactory discrimination, social recognition, passive avoidance, schedule controlled operant tasks, motor learning, attention</i>	
Chapter 7 Feeding and Drinking	164
<i>Daily consumption, restricted access, choice tests, microstructural analysis</i>	
Chapter 8 Reproductive Behaviors	186
<i>Sexual and parental behaviors</i>	
Chapter 9 Social Behaviors	206
<i>Social interaction, nesting, grooming, juvenile play, aggression</i>	
Chapter 10 Emotional Behaviors: Animal Models of Psychiatric Diseases	226
<i>Mouse models of fear, anxiety, depression, schizophrenia</i>	
Chapter 11 Reward	266
<i>Self-administration of addictive drugs, conditioned place preference</i>	
Chapter 12 Neurodevelopment and Neurodegeneration	290
<i>Assaying behaviors in infant, juvenile, and aged mice</i>	
Chapter 13 Putting It All Together	322
<i>Choice of tests, order of testing, number of mice, equipment, housing and testing environment</i>	
Chapter 14 The Next Generation	344
<i>Conditional and inducible mutations, viral vector gene delivery, RNA silencing, quantitative trait loci analysis, DNA microarrays, chemical mutagenesis, gene therapy, ethical issues</i>	
References	383
Index	503
