Introduction *xix*

Part I **Setup, Startup, and (In)Stalling** **1**

Chapter 1 **The Power of Permissions: Understanding Users and Unix Organization** **3**

The Basics: Permissions, Accounts, and File Organization	3
Permissions Explained	4
Understanding User Accounts	7
Why Are There So Many Copies of So Many Folders? (OS X File/Folder Organization)	12
The Man behind the Curtain: NetInfo	16
Mastering Permissions and Accounts	22
Creating, Editing, and Deleting User Accounts	22
Getting to the Root of It: The Root Account	27
What Do You Mean I Don't Have Permission? Working with Permissions	34
How to Give Permission to More Than One Person (but Not Everyone): Groups	39
Why Did I Ever Pick That Name? (Changing Your Short Username)	45
Create a No-Password Account	49
Moving On...	50

Chapter 2 **Sensational Setup** **51**

System Preferences: Beyond the Basics	51
The System Preferences Application	52
The Personal Preferences Category	56
The Hardware Preferences Category	69
The Internet & Network Preferences Category	76
The System Preferences Category	78
The Other Preferences Category	84
Finder Preferences	86
Application Preferences	87
How Do I Access Application Preferences?	87
Customizing Toolbars	87

	Working with Preference Files	89
	Where Are My Preferences?	89
	Editing Preference Files Directly	89
	How Can a Preference Be Wrong? Troubleshooting Preference Files	91
	Moving On...	92
Chapter 3	Subjugating Startup and Leveraging Login	93
	The Boot Process	93
	Choosing a Startup Volume or System	94
	The Startup Disk System Preferences	95
	Choosing a Boot Volume at Startup	95
	Customizing the Boot Panel	98
	Changing the Boot Panel Image	98
	Customizing the Boot Strings	100
	The Login Process	102
	Login Options in Accounts Preferences	102
	The Login Items System Preferences	103
	Customizing the Login Screen	105
	Managing Startup/Login Options	106
	Managing Startup/Login Items Manually	107
	Managing Startup/Login Items Using Diablotin	108
	For Advanced Users: Disabling Services	110
	Stopping and Restarting Startup Processes	111
	Stopping and Restarting User-Level Processes	112
	Stopping and Restarting System-Level Processes	113
	Special Startup Options	114
	Single User Mode: Command+S	114
	Verbose Mode: Command+V	115
	“Safe” Startup or “Safe” Login: Shift	115
	Accessing Terminal at Login: Console Login	116
	Open Firmware: Command+Option+O+F	117
	Moving On...	117
Chapter 4	Installations, Inc.	119
	Installation Basics	119
	Where Are Things Installed?	120
	Packages	121
	Moving Installed Applications	123

Installing Third-Party Software	124
How Software Is Distributed	124
Installer Applications and Packages	125
Drag-and-Drop Installing	127
Adding Add-Ons	128
Installing Mac OS and Apple Software	132
Bending Software Update to Your Will	132
Installing Apple Software Updates Manually	137
Restoring Selected Software and Installing Parts of Updates	137
Updating/Reinstalling the Entire OS	141
Uninstalling Software	147
Uninstalling Mac OS Software	147
Uninstalling Third-Party Software	148
Transferring Mac OS X between Computers or Hard Drives	151
Transferring Mac OS X between Hard Drives	152
Transferring Mac OS X between Computers	153
Supporting “Unsupported” Stuff	154
Moving On...	155

Part II **Files, Finders, Docks, and Apps (including Classic)** **157**

Chapter 5 **Finagle Files and Foil Finder Frustration** **159**

File Basics	159
File Types, Creator Types, and File Extensions	159
The Get Info Window	162
Other File Attributes	165
Finder Preferences and View Options	167
Finder Preferences	167
View Options	170
The Desktop and the Desktop Folder	170
Where/What Is the Desktop Really?	171
View Options for the Desktop	171
Accessing the Desktop (Especially When It’s Hidden)	173
Working with Windows (Finder Windows, not Microsoft Windows)	175
The Toolbar	175
Window Views and View Options	181
Useful Window Tidbits	189

File and Folder Finesse	193
Contextual Menus	193
Copying and Moving Files	195
Opening (Files) With...	197
Go Directly to a Folder	197
Alias Action	198
Favorite Files and Folders	201
Finding Files, Folders, and Information	202
Undo	208
Super Saving (and Opening)	209
Navigating Open and Save Dialogs	209
Open/Save Dialog Delight: Default Folder	212
Moving On...	213
Chapter 6	Developing a Dynamite Dock
	215
Dock Settings and Customization	215
The Dock Preferences Pane	216
Hidden and Special Dock Preferences	218
Using and Abusing the Dock	221
Accessing and Using Dock Items	221
Customizing the Dock's Contents	223
Dock Storage: Minimizing Windows	225
Dock/Keyboard Shortcuts and Commands	226
Accessorizing Your Dock	229
Not-So-Ugly Docklings	229
(Dock) Menus to the Max	230
Double (and Triple) Docks	231
Alternatives to the Stock Dock	232
Un-Dock-Like Alternatives	232
Dock-Like Alternatives	236
Moving On...	237
Chapter 7	Apple-ication Aptitude
	239
Applications 101	239
Hiding and Minimizing Applications and Windows	240
Windowing Wiles	240
Customizing the Toolbar	240

Getting and Using Help	241
Exploring Menus and Preferences	242
Getting the Most from Mac OS X Applications and Utilities	242
Mac OS X Applications	243
The Utilities	256
Basic Application Troubleshooting	273
Dealing with Application Freezes	273
Dealing with Bad Preference Files	275
Text Testimonials: Working with Text in OS X	276
Cocoa/Carbon Text Tips	276
Other Text Tips	280
Moving On...	284
Chapter 8	
 Clobbering Classic	285
A Quick Primer on the Classic Environment	285
Classic Technical Details	286
Pros and Cons of the Classic Environment	288
Updating Classic System Software	289
The Classic System Preferences	289
The Start/Stop Tab (and How to Start Classic)	289
The Advanced Tab	291
The Memory/Versions Tab	293
Optimizing Classic	294
Customize Your System Folder for Classic	294
Partitions and Multiple System Folders	298
Buy More RAM	298
Using Classic	298
Other Ways of Starting and Stopping Classic	298
Classic Peculiarities	300
Using the Classic Apple Menu	304
Printing in Classic	304
Classic Trouble	304
Startup File Conflicts	304
Classic and Classic Application Crashes	305
Inability to Select a System Folder in Classic Preferences	306
Moving On...	306

Chapter 9	Networking Notables and Internet Illuminations	309
	Network Basics	310
	Internet and Networking Setup Subtleties	310
	The Network System Preferences	310
	The Internet System Preferences	318
	The Bluetooth System Preferences	322
	The Internet Connect Application	324
	Sharing Your Surfing Signal	328
	Better Browsing Basics	330
	Surfing with ICeCoffEE	330
	Simple (and Slick) Searching	331
	Browsing the Browsers	332
	Location Files, Part I	334
	Better Bookmarks (a.k.a. Finer Favorites)	335
	Preventing Pop-Ups (Pop-Up Ads, That Is)	338
	Setting Up Servers	339
	Moving On...	339
Chapter 10	Stellar Sharing Strategies	341
	Sharing Locally: The Public and Shared Folders	342
	What Does It Share?	342
	Who Can Access Files?	343
	How Do I Configure It?	343
	How Do Others Access Files?	343
	Sharing Files Locally Using Multiple Volumes/Drives	343
	Sharing Files Locally: Bluetooth	344
	What Does It Share?	344
	Who Can Access Files?	344
	How Do I Configure It?	345
	How Do Others Access Files?	345
	Sharing Remotely: iDisk	347
	What Does It Share?	347
	Who Can Access Files?	348
	How Do I Configure It?	348

How Do Others Access Files?	349
Sharing iDisk Files Using a Web Page	349
Sharing Remotely: Personal File Sharing	351
What Does It Share?	351
Who Can Access Files?	351
How Do You Configure It?	352
How Do Others Access Files?	357
Sharing Remotely: FTP	361
What Does It Share?	362
Who Can Access Files?	362
How Do I Configure It?	363
How Do Others Access Files?	363
Sharing Remotely: Secure FTP (SFTP)	364
What Does It Share?	365
Who Can Access Files?	365
How Do I Configure It?	365
How Do Others Access Files?	366
Sharing Remotely: Windows File Sharing (SMB)	367
What Does It Share?	367
Who Can Access Files?	367
How Do I Configure It?	368
How Do Others Access Files?	373
Sharing Remotely: Personal Web Sharing	374
What Does It Share?	374
Who Can Access Files?	376
How Do I Configure It?	376
How Do Others Access Files?	376
Quick Access to Sharing Services	377
Moving On...	377

Chapter 11 Connection Convenience and Remote Control 379

IP Addresses, URLs, and Ports	379
Servers Simplified	382
Connecting to Shares on Other Computers/Servers	382
Connecting to iDisks	384
Connecting to Personal File Sharing	386

Connecting to Windows Shares	387
Connecting to FTP/SFTP Servers	390
Connecting to NFS Servers/Shares	394
Connecting to Frequently Accessed Servers and Shares	394
Using Aliases (iDisk/AFP/SMB/NFS)	394
Using Internet Location Files (i.e., Location Files, Part II)	395
Automatically Connect to Shares/Servers at Login	399
Connecting to Virtual Private Networks (VPN)	399
Remote Access and Control	401
Remote Login	401
Desktop Control: VNC	405
Moving On...	409
Chapter 12	
 Printing Practicalities	411
<hr/>	
Printing Basics	411
Printer Types	411
Printer Connections	412
Installing “Supported” Printer Drivers and PPDs	413
Understanding CUPS	413
Printer Prep: Setting Up and Managing Printers in OS X	414
Using Print Center	415
Using the CUPS Web Interface	422
Setting Up Printers in Classic	429
Cleaning House: Removing Unnecessary Printer Drivers	431
Supporting Unsupported Printers	431
Installing and Using Gimp-Print Drivers	433
Sharing Your Printer	435
Printing Pointers	438
Saving Custom Print Job Settings	438
“Printing” to a PDF File	439
Working with PDFs: PDF Workflows	440
Creating a “Virtual” PostScript Printer (aka Printing to a PostScript File)	442
Bringing Back OS 9’s Desktop Printers	443
Printing Selectively	444
Problematic Printing	445
Moving On...	445

Chapter 13	Strengthening System Security and Fine-tuning Firewalls	449
	Security Basics	449
	Keeping Your Mac Safe: Networks and the Internet	452
	What Is a Firewall?	453
	Hardware Routers as Firewalls	454
	OS X's Built-in Firewall	457
	Third-Party Firewalls for OS X	463
	Keeping Your Mac Safe: Local Access	464
	Securing Startup: Open Firmware Password Protection	464
	Auto-Logout: Log Users Out Automatically	467
	Locking the Screen Temporarily	467
	Keeping Sensitive Data Safe	468
	The Mac OS X Keychain	469
	Encrypting Data	478
	Secure Deletion	480
	Protecting Yourself (and Your Friends) from Viruses	481
	Moving On...	482
Chapter 14	Mac Maintenance and Administrative Actions	483
	Disk Drive Diligence	483
	Doctoring Disk Directories	484
	Recovering Files	490
	Undeleting Deleted Data	490
	Defragmenting Drives	492
	Disk Drive Diagnosis	496
	Data Despair?	497
	Maintenance Magic	497
	Periodic Permissions Patching	497
	Running Routines (Unix Routines, That Is)	498
	Cache Cleaning	500
	Admin Artistry	502
	Automating Admin Actions	502
	Adjusting Application Priorities	507
	Looking over Log Files	508

	Backup Basics	509
	Backups 101	510
	Backup Utilities	515
	Moving On...	518
Chapter 15	Utilizing Unix	519
	What Is Unix Doing in Mac OS X?	519
	Understanding Unix: Philosophy and Design Decisions	520
	Some Specifics of Unix Philosophy	521
	Getting Started with Terminal and a Shell	523
	Command Structure: An Example	524
	Learning New Programs: The man Command	527
	Shells: sh versus csh	529
	Variables	531
	Wildcards	535
	Shell Scripts	536
	Program Input and Output	537
	Installing Unix-Based Software	540
	Installing Fink	543
	Using the fink Command	544
	FinkCommander	545
	Hands-On with Some Unix Programs	545
	Types of Unix Programs	545
	Text Editors	547
	Process Management: ps, top, kill, and killall (included in OS X)	548
	Packet Analysis: tcpdump (included in OS X)	549
	Network Exploration: nmap (available via Fink)	551
	File Transfer: curl (included in OS X)	551
	Directory Synchronization: rsync (included in OS X)	552
	Web Log Analysis: analog (available via Fink)	552
	Moving On...?	552
Appendix A	A Tale of Two Systems	553
	Transition Technicalities	553
	For the Stubborn: Making OS X Work Like OS 9	555
	Bringing Back the Classic Apple Menu	555

Restoring the Application Menu	556
Making Application Windows Stick Together	556
WindowShading Your Windows	557
Approximating Tabbed Windows	558
Putting the Trash on the Desktop	559
Revealing Labels	560
Hearing What You've Been Missing (Interface Sounds)	560
For the Indecisive: Tips for Those Who Switch Back and Forth	560
Switching Issues	561
Why You Should Consider Multiple OS 9 System Folders	564
Why You Should Consider Having OS 9 on a Different Partition or Drives than OS X	564
Appendix B Multiple Mounts, Various Volumes, and Divided Disks	567
Working with Multiple Volumes in OS X	567
Accessing Non-Boot Volumes	569
Copying versus Moving with Multiple Volumes	569
Permissions on Non-Boot Volumes	570
Permissions on Removable Volumes	571
Sharing a Non-Boot Volume	572
Changing the Startup Volume	572
Installing OS X on FireWire Volumes	572
Using Drive Partitions	573
Benefits of Partitioning	573
Drawbacks of Partitioning	575
Partitioning a Drive in OS X	576
Customizing OS X When Using Multiple Volumes	578
Moving a User Folder—or All User Folders— to a Non-Boot Volume	578
Using a Non-Boot Volume for System Swap Files	580
<i>Index</i>	583
