
CONTENTS

Tables, Figures, and Exhibits	xv
Preface	xix
Acknowledgments	xxi
About the Authors	xxiii
1 Introduction to Educational Research	1
Chapter Objectives	1
Educational Research Today	2
Educational Research: Using the Scientific Method	4
Philosophical Frameworks for Educational Research	6
Scientific Realism	
Social Constructivism	
Advocacy or Liberatory Framework	
Pragmatism	
Types of Approaches Used in Educational Research	10
Basic Versus Applied Research Approaches	
Quantitative Research Approaches	
Qualitative Research Approaches	

Research Approaches Using Qualitative or Quantitative Approaches (or Both)	
Chapter Summary	19
Key Concepts	19
Discussion Questions or Activities	21
Suggested Readings	21
2 Identifying and Researching a Topic	22
Chapter Objectives	22
Getting Started	23
Developing Ideas for Research Studies: Possible Topics	
From Topics to Questions	
Developing a More Focused Research Question	
Searching the Literature	31
Type of Sources	
Finding Sources	
Summarizing Information from Articles	
When Do I Have Enough?	
Chapter Summary	47
Key Concepts	47
Discussion Questions or Activities	48
Suggested Reading	48
3 The Research Proposal	49
Chapter Objectives	49
Preparing a Research Proposal	49
Why Write a Research Proposal?	
Anatomy of a Research Proposal	
Chapter Summary	63
Key Concepts	64
Discussion Questions or Activities	64
Suggested Readings	64
4 Measurement in Educational Research and Assessment: Prestablished Instruments and Archival Data	65
Chapter Objectives	65
Prestablished Instruments and Archival Data	66
Prestablished Instruments	

Types of Preestablished Measures	
Archival Data	
Scales of Measurement	72
Summarizing Data Using Descriptive Statistics	74
Frequency Distributions	
What is a Typical or Average Score? Measures of Central Tendency	
Measures of Variability	
Types of Scores Used to Compare Performance on Educational Measures	
Use of Correlational Coefficients in Evaluating Measures	
Evaluating the Quality of Educational Measures: Reliability and Validity	87
Reliability	
Validity	
Finding Preestablished Measures	
Criteria for Selecting Preestablished Instruments	
Reliability and Validity in Archival Data	
Chapter Summary	100
Key Concepts	102
Discussion Questions or Activities	103
Suggested Readings	104
5 Self-Developed Measures and Qualitative Measurement	105
Chapter Objectives	105
Self-Developed Instruments	106
Developing Scales for Use in Surveys	106
Likert Scales	
Semantic Differential Scales	
Establishing Reliability and Validity for Surveys	
Developing Observational Checklists	113
Reliability and Validity for Observational Checklists	
Developing Measurement Procedures and Tools for Qualitative Studies	116
Use of Observations	
Observational Protocols	
Use of Interviews	
Interview Protocols	
Use of Documents and Artifacts	
Developing Measurement Tools for Action Research	127

Checklists and Rating Scales	
Grading Rubrics	
Journals	
Records and Documents	
Maps, Photographs, and Artifacts	
Evaluating the Quality of Measures Used in Action Research	
Chapter Summary	135
Key Concepts	136
Discussion Questions or Activities	137
Suggested Readings	137
6 Working with Research Participants: Sampling and Ethics	139
Chapter Objectives	139
Selecting Participants	139
Sampling in Qualitative Research	
Sampling in Quantitative Research	
Types of Random Sampling	
Nonrandom Samples	
Sample Size and Survey Response Rates	
Ethical Issues and Participants	146
Ethics in Qualitative Research	
Ethics in Quantitative Research	
Chapter Summary	152
Key Concepts	153
Discussion Questions or Activities	154
Suggested Readings	154
7 Descriptive-Survey Research	155
Chapter Objectives	155
Research Vignette	155
Characteristics of Descriptive-Survey Research	156
Writing a Research Question	
Writing Subquestions	
Steps for Doing Descriptive-Survey Research	159
Step 1: Designing and Developing a Survey or Questionnaire	
Step 2: Selecting the Sample	

Step 3: Piloting the Survey	
Step 4: Administering the Survey	
Types of Survey Studies	171
Designs that Follow the Same Sample Over Time	
Designs that Select Different Samples Over Time	
Other Types of Descriptive Research	173
Chapter Summary	174
Key Concepts	175
Discussion Questions or Activities	175
Suggested Readings	176
8 Experimental Research	177
Chapter Objectives	177
Research Vignette	177
Understanding Experimental Research	178
Steps in Planning and Conducting Experimental Research	
Analyzing the Data	187
Making a Decision About the Hypothesis	
Formulating Conclusions	
Threats to Experimental Validity	188
Threats to Internal Validity	
Threats to External Validity	
Single-Subject Research Designs	200
Types of Single Subject Research	
External and Internal Validity	
Chapter Summary	204
Key Concepts	206
Discussion Questions or Activities	206
Suggested Readings	207
9 Nonexperimental Approaches: Causal-Comparative and Correlational Research	208
Chapter Objectives	208
Research Vignette	209
Causal-Comparative Research	209
Steps in Causal-Comparative Research	

Correlational Research	214
Differences Between Causal-Comparative Research and Correlational Research	
Displaying Correlational Relationships	
Relationship Studies	
Prediction Studies	
Steps in Conducting a Correlational Study	
Evaluating Correlational Studies	228
Sampling Issues	
Reliability and Validity of Measurement	
Statistical and Practical Importance	
Careful Selection of Variables	
Correlation and Causation	
Multiple Regression	236
Chapter Summary	238
Key Concepts	240
Discussion Questions or Activities	241
Suggested Readings	241
10 Analyzing Quantitative Data	242
Chapter Objectives	242
Initial Examination of Quantitative Data	243
Interpreting Graphs	
Interpreting Measures of Central Tendency and Variability	
Beyond Descriptive Statistics: Inferential Statistics	247
Underlying Concepts	247
Sampling Error	
Critical Concepts: The Null Hypothesis, Statistical Significance and Error	
Analyzing Data Using Inferential Tests	255
Step 1: Review the Null Hypothesis	
Step 2: Decide on Probability Level	
Step 3: Select the Statistical Tool	
Step 4: Calculate the Results of the Statistical Test and Make Decision About Rejecting the Null Hypothesis	
Designs with More Than One Independent or Dependent Variable	
Chapter Summary	261
Key Concepts	261

Discussion Questions or Activities	262
Suggested Readings	262
11 Qualitative Research	263
Chapter Objectives	263
Research Vignette	263
Understanding Qualitative Research	264
Steps in Conducting Qualitative Research	265
Types of Qualitative Research	267
Ethnography	
Case Study Research	
Phenomenological Research	
Grounded Theory	
Evaluating Qualitative Research	272
Credibility	
Dependability	
Transferability	
Promoting Action and Collaboration	
Chapter Summary	277
Key Concepts	278
Discussion Questions or Activities	278
Suggested Readings	279
12 Mixed-Methods and Action Research	280
Chapter Objectives	280
Research Vignette	280
Mixed-Methods Research	281
Barriers to Mixed-Methods Research	
Characteristics of Mixed-Methods Research	
Mixed-Methods Designs	
Steps in Conducting Mixed-Methods Studies	
Evaluating Mixed-Methods Research Studies	
Action Research	288
Characteristics of Action Research	
Steps in Conducting Action Research	

Types of Action Research	
Evaluating Action Research	
Chapter Summary	297
Key Concepts	297
Discussion Questions or Activities	298
Suggested Readings	298
13 Organization and Analysis of Qualitative Research Data	300
Chapter Objectives	300
Research Vignette	300
Overview of Qualitative Data Analysis	301
Preparing and Organizing the Data	
Reviewing and Exploring the Data	
Coding Data into Categories	
Constructing Descriptions of People, Places, and Activities	
Building Themes and Testing Hypotheses	
Reporting and Interpreting Data	
Chapter Summary	313
Key Concepts	314
Discussion Questions or Activities	314
Suggested Readings	314
14 Program Evaluation in Education	315
Chapter Objectives	315
Research Vignette	315
What Is Program Evaluation?	316
What Is a Program?	
Accessing the Setting and Participants	
Collecting and Using Data	
Changing Practice	
Reporting Findings and Recommendations	
Formative and Summative Evaluation	
Training in Program Evaluation	
Internal or External Evaluators	
Role of the Program Evaluator in Delivering Bad News	324
Types or Models of Program Evaluation	

Chapter Summary	327
Key Concepts	327
Discussion Questions or Activities	328
Suggested Readings	328
15 Educational Research Can Make a Difference	329
Chapter Objectives	329
Researchers Who Have Made A Difference	329
Researchers Working at Colleges and Universities	
Researchers Working in Schools and Community Organizations	
Chapter Summary	337
Discussion Questions or Activities	338
References	339
Appendix A Sample Qualitative Proposal	345
Appendix B Sample Quantitative Proposal	369
Appendix C Calculation of the Standard Deviation	393
Index	399

To our partners, Jim, Phil, and Chip, for their constant encouragement and for putting up with us over the past year as we worked to make this book a reality.
