<b>Acknowledgements</b>	<b>x</b>
<b>Foreword</b>	<b>xxiii</b>
<b>Introduction</b>	<b>xxv</b>
<b>Chapter 1: Getting Started</b>	<b>1</b>
<b>An Introduction to UNIX, Linux, and GNU</b>	<b>1</b>
What Is UNIX?	1
What Is Linux?	3
The GNU Project and the Free Software Foundation	3
Linux Distributions	4
<b>Programming Linux</b>	<b>4</b>
Linux Programs	5
Text Editors	6
The C Compiler	7
Development System Roadmap	8
<b>Getting Help</b>	<b>14</b>
<b>Summary</b>	<b>16</b>
<b>Chapter 2: Shell Programming</b>	<b>17</b>
<b>Why Program with a Shell?</b>	<b>18</b>
<b>A Bit of Philosophy</b>	<b>18</b>
<b>What Is a Shell?</b>	<b>19</b>
<b>Pipes and Redirection</b>	<b>21</b>
Redirecting Output	21
Redirecting Input	22
Pipes	22
<b>The Shell as a Programming Language</b>	<b>23</b>
Interactive Programs	23
Creating a Script	24
Making a Script Executable	25
<b>Shell Syntax</b>	<b>27</b>
Variables	27
Conditions	31
Control Structures	34
Functions	46
Commands	49
Command Execution	68

Here Documents	73
Debugging Scripts	74
<b>Going Graphical — The dialog Utility</b>	<b>75</b>
<b>Putting It All Together</b>	<b>81</b>
Requirements	82
Design	82
<b>Summary</b>	<b>91</b>
<b>Chapter 3: Working with Files</b>	<b>93</b>
<b>Linux File Structure</b>	<b>94</b>
Directories	94
Files and Devices	95
<b>System Calls and Device Drivers</b>	<b>96</b>
<b>Library Functions</b>	<b>97</b>
<b>Low-Level File Access</b>	<b>98</b>
write	98
read	99
open	100
Initial Permissions	101
Other System Calls for Managing Files	106
<b>The Standard I/O Library</b>	<b>109</b>
fopen	110
fread	110
fwrite	111
fclose	111
fflush	111
fseek	112
fgetc, getc, and getchar	112
fputc, putc, and putchar	112
fgets and gets	113
<b>Formatted Input and Output</b>	<b>113</b>
printf, fprintf, and sprintf	113
scanf, fscanf, and sscanf	115
Other Stream Functions	117
Stream Errors	119
Streams and File Descriptors	119
<b>File and Directory Maintenance</b>	<b>120</b>
chmod	120
chown	120
unlink, link, and symlink	121
mkdir and rmdir	121
chdir and getcwd	122

<b>Scanning Directories</b>	<b>122</b>
opendir	123
readdir	123
telldir	123
seekdir	124
closedir	124
<b>Errors</b>	<b>127</b>
strerror	127
perror	127
<b>The /proc File System</b>	<b>128</b>
<b>Advanced Topics: fcntl and mmap</b>	<b>132</b>
fcntl	132
mmap	133
<b>Summary</b>	<b>135</b>
<b>Chapter 4: The Linux Environment</b>	<b>137</b>
<b>Program Arguments</b>	<b>137</b>
getopt	140
getopt_long	142
<b>Environment Variables</b>	<b>144</b>
Use of Environment Variables	146
The environ Variable	147
<b>Time and Date</b>	<b>148</b>
<b>Temporary Files</b>	<b>156</b>
<b>User Information</b>	<b>158</b>
<b>Host Information</b>	<b>161</b>
<b>Logging</b>	<b>163</b>
<b>Resources and Limits</b>	<b>167</b>
<b>Summary</b>	<b>173</b>
<b>Chapter 5: Terminals</b>	<b>175</b>
<b>Reading from and Writing to the Terminal</b>	<b>175</b>
<b>Talking to the Terminal</b>	<b>180</b>
<b>The Terminal Driver and the General Terminal Interface</b>	<b>182</b>
Overview	183
Hardware Model	183
<b>The termios Structure</b>	<b>184</b>
Input Modes	186
Output Modes	186
Control Modes	187
Local Modes	188

## Contents

---

Special Control Characters	188
Terminal Speed	192
Additional Functions	192
<b>Terminal Output</b>	<b>196</b>
Terminal Type	197
Identify Your Terminal Type	197
Using terminfo Capabilities	200
<b>Detecting Keystrokes</b>	<b>205</b>
Virtual Consoles	207
Pseudo-Terminals	208
<b>Summary</b>	<b>209</b>
<b>Chapter 6: Managing Text-Based Screens with curses</b>	<b>211</b>
<b>Compiling with curses</b>	<b>212</b>
<b>Curses Terminology and Concepts</b>	<b>213</b>
<b>The Screen</b>	<b>216</b>
Output to the Screen	216
Reading from the Screen	217
Clearing the Screen	218
Moving the Cursor	218
Character Attributes	218
<b>The Keyboard</b>	<b>221</b>
Keyboard Modes	221
Keyboard Input	222
<b>Windows</b>	<b>224</b>
The WINDOW Structure	224
Generalized Functions	225
Moving and Updating a Window	225
Optimizing Screen Refreshes	229
<b>Subwindows</b>	<b>230</b>
<b>The Keypad</b>	<b>232</b>
<b>Using Color</b>	<b>235</b>
Redefining Colors	238
<b>Pads</b>	<b>238</b>
<b>The CD Collection Application</b>	<b>240</b>
Starting a New CD Collection Application	240
Looking at main	243
Building the Menu	243
Database File Manipulation	245
Querying the CD Database	250
<b>Summary</b>	<b>254</b>

<b>Chapter 7: Data Management</b>	<b>255</b>
<b>Managing Memory</b>	<b>255</b>
Simple Memory Allocation	256
Allocating Lots of Memory	257
Abusing Memory	260
The Null Pointer	261
Freeing Memory	262
Other Memory Allocation Functions	264
<b>File Locking</b>	<b>264</b>
Creating Lock Files	265
Locking Regions	268
Use of read and write with Locking	271
Competing Locks	276
Other Lock Commands	280
Deadlocks	280
<b>Databases</b>	<b>281</b>
The dbm Database	281
The dbm Routines	283
dbm Access Functions	283
Additional dbm Functions	287
<b>The CD Application</b>	<b>289</b>
Updating the Design	289
The CD Database Application Using dbm	290
<b>Summary</b>	<b>309</b>
<b>Chapter 8: MySQL</b>	<b>311</b>
<b>Installation</b>	<b>312</b>
MySQL Packages	312
Post-Install Configuration	314
Post-Installation Troubleshooting	319
<b>MySQL Administration</b>	<b>320</b>
Commands	320
Creating Users and Giving Them Permissions	325
Passwords	327
Creating a Database	328
Data Types	329
Creating a Table	330
Graphical Tools	333
<b>Accessing MySQL Data from C</b>	<b>335</b>
Connection Routines	337
Error Handling	341

## Contents

Executing SQL Statements	342
Miscellaneous Functions	357
<b>The CD Database Application</b>	<b>358</b>
Creating the Tables	359
Adding Some Data	362
Accessing the Application Data from C	364
<b>Summary</b>	<b>375</b>
<b>Chapter 9: Development Tools</b>	<b>377</b>
<b>Problems of Multiple Source Files</b>	<b>377</b>
<b>The make Command and Makefiles</b>	<b>378</b>
The Syntax of Makefiles	378
Options and Parameters to make	379
Comments in a Makefile	382
Macros in a Makefile	382
Multiple Targets	384
Built-in Rules	387
Suffix and Pattern Rules	388
Managing Libraries with make	389
Advanced Topic: Makefiles and Subdirectories	391
GNU make and gcc	391
<b>Source Code Control</b>	<b>392</b>
RCS	393
SCCS	399
Comparing RCS and SCCS	399
CVS	400
CVS Front Ends	404
Subversion	405
<b>Writing a Manual Page</b>	<b>406</b>
<b>Distributing Software</b>	<b>409</b>
The patch Program	410
Other Distribution Utilities	411
<b>RPM Packages</b>	<b>413</b>
Working with RPM Package Files	414
Installing RPM Packages	415
Building RPM Packages	415
<b>Other Package Formats</b>	<b>424</b>
<b>Development Environments</b>	<b>424</b>
KDevelop	425
Other Environments	425
<b>Summary</b>	<b>427</b>

<b>Chapter 10: Debugging</b>	<b>429</b>
<b>Types of Errors</b>	<b>429</b>
<b>General Debugging Techniques</b>	<b>430</b>
A Program with Bugs	430
Code Inspection	433
Instrumentation	434
Controlled Execution	436
<b>Debugging with gdb</b>	<b>437</b>
Starting gdb	437
Running a Program	438
Stack Trace	438
Examining Variables	439
Listing the Program	440
Setting Breakpoints	441
Patching with the Debugger	444
Learning More about gdb	445
<b>More Debugging Tools</b>	<b>445</b>
Lint: Removing the Fluff from Your Programs	446
Function Call Tools	449
Execution Profiling with prof/gprof	451
<b>Assertions</b>	<b>452</b>
<b>Memory Debugging</b>	<b>453</b>
ElectricFence	454
valgrind	455
<b>Summary</b>	<b>459</b>
<b>Chapter 11: Processes and Signals</b>	<b>461</b>
<b>What Is a Process?</b>	<b>461</b>
<b>Process Structure</b>	<b>462</b>
The Process Table	463
Viewing Processes	463
System Processes	464
Process Scheduling	467
<b>Starting New Processes</b>	<b>468</b>
Waiting for a Process	475
Zombie Processes	477
Input and Output Redirection	479
Threads	480

## Contents

---

<b>Signals</b>	<b>481</b>
Sending Signals	484
Signal Sets	489
<b>Summary</b>	<b>493</b>
<b>Chapter 12: POSIX Threads</b>	<b>495</b>
<b>What Is a Thread?</b>	<b>495</b>
<b>Advantages and Drawbacks of Threads</b>	<b>496</b>
<b>A First Threads Program</b>	<b>497</b>
<b>Simultaneous Execution</b>	<b>501</b>
<b>Synchronization</b>	<b>503</b>
Synchronization with Semaphores	503
Synchronization with Mutexes	508
<b>Thread Attributes</b>	<b>512</b>
<b>Canceling a Thread</b>	<b>517</b>
<b>Threads in Abundance</b>	<b>520</b>
<b>Summary</b>	<b>524</b>
<b>Chapter 13: Inter-Process Communication: Pipes</b>	<b>525</b>
<b>What Is a Pipe?</b>	<b>525</b>
<b>Process Pipes</b>	<b>526</b>
<b>Sending Output to popen</b>	<b>528</b>
Passing More Data	529
How popen Is Implemented	530
<b>The Pipe Call</b>	<b>531</b>
<b>Parent and Child Processes</b>	<b>535</b>
Reading Closed Pipes	536
Pipes Used as Standard Input and Output	537
<b>Named Pipes: FIFOs</b>	<b>540</b>
Accessing a FIFO	542
Advanced Topic: Client/Server Using FIFOs	549
<b>The CD Database Application</b>	<b>553</b>
Aims	554
Implementation	555
Client Interface Functions	558
The Server Interface, server.c	565
The Pipe	569
Application Summary	574
<b>Summary</b>	<b>575</b>

## Contents

<b>Chapter 14: Semaphores, Shared Memory, and Message Queues</b>	<b>577</b>
<b>Semaphores</b>	<b>577</b>
Semaphore Definition	579
A Theoretical Example	579
Linux Semaphore Facilities	580
Using Semaphores	582
<b>Shared Memory</b>	<b>586</b>
shmget	588
shmat	588
shmdt	589
shmctl	589
<b>Message Queues</b>	<b>594</b>
msgget	594
msgsnd	595
msgrcv	595
msgctl	596
<b>The CD Database Application</b>	<b>599</b>
Revising the Server Functions	600
Revising the Client Functions	602
<b>IPC Status Commands</b>	<b>604</b>
Displaying Semaphore Status	604
Displaying Shared Memory Status	604
Displaying Message Queue Status	605
<b>Summary</b>	<b>605</b>
<b>Chapter 15: Sockets</b>	<b>607</b>
<b>What Is a Socket?</b>	<b>608</b>
<b>Socket Connections</b>	<b>608</b>
Socket Attributes	612
Creating a Socket	614
Socket Addresses	615
Naming a Socket	616
Creating a Socket Queue	617
Accepting Connections	617
Requesting Connections	618
Closing a Socket	619
Socket Communications	619
Host and Network Byte Ordering	622
<b>Network Information</b>	<b>624</b>
The Internet Daemon (xinetd/inetd)	629
Socket Options	631
