

Contents

Introduction	xix
Chapter 1: A Python Primer	1
Getting Started	1
Obtaining Python and Installing It	1
The Python Interpreter	2
Your Editing/Execution Environment	2
Lexical Structure	3
Keywords	3
Lines and Indentation	4
Data Types and Identifiers	4
Operators	6
Expressions and Statements	7
Expressions	7
Statements	7
Iteration and Decision-Making	8
Iteration	9
Decision-Making	10
Functions	11
Modules	12
Importing Modules	12
How Python Finds Modules to Load	13
Classes	14
Summary	15
Part I: The Projects	17
Chapter 2: Directory/File Snapshot Program	19
Using the Program	20
Creating a Snapshot	20
Listing Snapshot Files	21
Comparing Snapshots	22

Contents

Viewing Help	23
Exiting the Program	23
Putting It All Together	24
Design	25
How It All Fits Together	25
Main Program	26
Modules	26
Code and Code Explanation	27
Snapshot.py	27
snapshothelper.py	34
Testing	42
Modifying the Program	42
Summary	42
Chapter 3: DVD Inventory System	43
<hr/>	
Using the Program	44
Installing MySQL	44
Adding a DVD to the Database	44
Searching the DVD Inventory	46
Modifying a DVD Record	50
Deleting a DVD Record	53
Exporting the List of DVDs to a CSV File	54
Design	55
How It All Fits Together	56
Modules	56
Code and Code Explanation	58
dvd.py	59
add_dvd.py	61
lookup_dvds.py	63
modify_dvd.py	68
delete_dvd.py	74
csvreport_dvd.py	77
Testing	79
Modifying the Program	79
Summary	80
Chapter 4: Web Performance Tester	81
<hr/>	
Using the Program	82
Running the Python Web Server	82
Running the Performance Profiler Client	83

Design	88
How It All Fits Together	89
Modules	89
Code and Code Explanation	90
webserver.py	90
webperf.py	92
webclient.py	95
Testing	102
Modifying the Program	102
Summary	102
Chapter 5: Customer Follow-Up System	103
<hr/>	
Using the Program	103
Preliminaries	104
Running the Program	112
Design	115
How It All Fits Together	115
Modules	116
Code and Code Explanation	117
form.html	117
form.py	118
Testing	123
Modifying the Program	123
Summary	124
Chapter 6: Test Management/Reporting System	125
<hr/>	
Using the Program	126
Running Tests	126
Listing Test Runs	129
Showing Test Results	129
Generating an HTML Test Report	130
Examining the HTML File	131
Displaying Product Help	132
Design	133
Modules	133
Code and Code Explanation	135
test_manager.py	135
test_run.py	140
test_list.py	147
test_results.py	148
test_html.py	151

Contents

Testing	155
Modifying the Program	155
Summary	155
More About the Minidom Module	156
Chapter 7: Version Management System	157
<hr/>	
Using the Program	158
Setting Up Remote Computers	158
Running the Program — Command-Line Syntax	158
Design	162
Modules	162
Code and Code Explanation	163
version_checker.py	164
check_versions.py	168
csv_report.py	173
Testing	174
Modifying the Program	175
Security Considerations	175
Summary	175
Chapter 8: Content Management System	177
<hr/>	
Plone Overview	177
What Is Plone?	177
Installing and Configuring Plone	178
Downloading Plone	179
Extracting the Plone Install	180
Running the Plone Install	181
Starting Plone	182
Discovering the Admin User Password	182
Logging In as the Admin User	182
Setting Up the E-mail Server	184
Setting Up a User	185
Logging In as the Set-Up User	186
Design	187
Navigation	189
Content Management	189
Creating a Page	189
Creating a Collection	191
User Permissions	195
Summary	196

Part II: Advanced Topics	197
Chapter 9: Interacting with the Operating System	199
Generic Operating System Services	200
The os Module — Generic OS Services	200
The time Module — Format and Manipulate System Time	201
The optparse Module — Parse Command-Line Options	203
The platform Module — Get Platform Information	204
The getpass Module — Generate and Check Passwords	204
Some Other Things You Can Do	205
Accessing Windows Services	205
The winreg Module — Manipulate the Windows Registry	205
The winsound Module	206
The win32serviceutil Module — Manage Windows Services	207
The win32net Module — Access Windows Networking Features	209
Some Other Things You Can Do	211
Accessing Unix/Linux Services	212
The termios Module — Access Unix-Style TTY Interface	212
The resource Module — Manage Unix System Resources	212
The syslog Module — Access the Unix syslog	215
The commands Module — Run Commands and Get Output	217
Some Other Things You Can Do	219
Summary	219
Chapter 10: Debugging and Testing	221
The Python Debugger	221
Running the Debugger	222
Python Test Frameworks	226
Why We Test	226
Unit Testing	227
Summary	237
Final Remarks	237
Appendix A: Where to Go From Here — Resources That Can Help	239
Appendix B: Installing Supplemental Programs	241
Index	253
