

CONTENTS

EDITORS' NOTES	1
<i>Richard M. Romano, Hirschel Kasper</i>	
1. The Economics of Community College Labor Markets: A Primer	3
<i>Hirschel Kasper</i>	
With particular reference to the community college, this chapter reviews economic and other factors that influence the demand for labor and its supply.	
2. Technological Change, Globalization, and the Community College	11
<i>Richard M. Romano, Donald A. Dellow</i>	
This chapter explores the historical impact of changing technology on the nature of work and skill requirements. Globalization in the form of job outsourcing will create a challenge for certain occupational programs.	
3. Help Wanted: Postsecondary Education and Training Required	21
<i>Anthony P. Carnevale, Jeff Strohl, Nicole Smith</i>	
The authors discuss the connection between credentials and earnings and the importance of postsecondary education as the arbiter of economic opportunity.	
4. National Labor Market Projections for Community College Students	33
<i>Dixie Sommers</i>	
This chapter presents specially prepared data from the U.S. Bureau of Labor Statistics on the average annual job growth and replacement needs for occupations for which the community college is a significant path of preparation. It explains the BLS's methodology and the risk associated with these projections.	
5. The Outlook in the Health Sciences	53
<i>Janell Lang</i>	
Building on data presented in Chapter Four, the author addresses the challenges and opportunities for students and colleges in this occupational area.	
6. The Outlook in Business and Related Fields	63
<i>Robert Walker</i>	
This chapter builds on data presented in Chapter Four and addresses the opportunities for students and colleges in this occupational area.	

7. The Outlook in Engineering-Related Technology Fields	69
<i>Peggie Weeks</i>	
This chapter builds on data presented in Chapter Four and addresses the challenges and opportunities for students and colleges in this occupational area.	
8. The Outlook in the Protective Service Fields	77
<i>Gregory Talley, Susan Korsgren</i>	
This chapter covers law enforcement, homeland security, and related fields. It builds on data presented in Chapter Four and addresses the opportunities for students and colleges in these occupational areas.	
9. The Outlook for Noncredit Workforce Education	87
<i>Michelle Van Noy, James Jacobs</i>	
Reporting on a study of short-term workforce training covering all states, this chapter discusses funding sources, outcomes, and long-term trends of these noncredit programs.	
10. How Well Do Community Colleges Respond to the Occupational Needs of Local Communities? Evidence from California	95
<i>Duane E. Leigh, Andrew M. Gill</i>	
Using large national and statewide databases, the authors examine how well community colleges respond to changing demand by providing occupational training programs that are marketable in their local economy.	
11. The Outlook for Transfer Programs and the Direction of the Community College	103
<i>Barbara K. Townsend</i>	
This chapter discusses the growth of the applied baccalaureate degree at four- and two-year colleges.
