<b><i>Introduction</i></b> .....	<b>1</b>
<b><i>Part I: Introduction to Integration</i></b> .....	<b>9</b>
Chapter 1: An Aerial View of the Area Problem .....	11
Chapter 2: Dispelling Ghosts from the Past: A Review of Pre-Calculus and Calculus I .....	37
Chapter 3: From Definite to Indefinite: The Indefinite Integral .....	73
<b><i>Part II: Indefinite Integrals</i></b> .....	<b>103</b>
Chapter 4: Instant Integration: Just Add Water (And C) .....	105
Chapter 5: Making a Fast Switch: Variable Substitution .....	117
Chapter 6: Integration by Parts .....	135
Chapter 7: Trig Substitution: Knowing All the (Tri)Angles .....	151
Chapter 8: When All Else Fails: Integration with Partial Fractions .....	173
<b><i>Part III: Intermediate Integration Topics</i></b> .....	<b>195</b>
Chapter 9: Forging into New Areas: Solving Area Problems .....	197
Chapter 10: Pump up the Volume: Using Calculus to Solve 3-D Problems .....	219
<b><i>Part IV: Infinite Series</i></b> .....	<b>241</b>
Chapter 11: Following a Sequence, Winning the Series .....	243
Chapter 12: Where Is This Going? Testing for Convergence and Divergence .....	261
Chapter 13: Dressing up Functions with the Taylor Series .....	283
<b><i>Part V: Advanced Topics</i></b> .....	<b>305</b>
Chapter 14: Multivariable Calculus .....	307
Chapter 15: What's So Different about Differential Equations? .....	327
<b><i>Part VI: The Part of Tens</i></b> .....	<b>341</b>
Chapter 16: Ten "Aha!" Insights in Calculus II .....	343
Chapter 17: Ten Tips to Take to the Test .....	349
<b><i>Index</i></b> .....	<b>353</b>

## ***Introduction* ..... 1**

About This Book .....	1
Conventions Used in This Book .....	3
What You're Not to Read .....	3
Foolish Assumptions .....	3
How This Book Is Organized .....	4
Part I: Introduction to Integration .....	4
Part II: Indefinite Integrals .....	4
Part III: Intermediate Integration Topics .....	5
Part IV: Infinite Series .....	5
Part V: Advanced Topics .....	6
Part VI: The Part of Tens .....	7
Icons Used in This Book .....	7
Where to Go from Here .....	8

## ***Part 1: Introduction to Integration* ..... 9**

### **Chapter 1: An Aerial View of the Area Problem ..... 11**

Checking out the Area .....	12
Comparing classical and analytic geometry .....	12
Discovering a new area of study .....	13
Generalizing the area problem .....	15
Finding definite answers with the definite integral .....	16
Slicing Things Up .....	19
Untangling a hairy problem by using rectangles .....	20
Building a formula for finding area .....	22
Defining the Indefinite .....	27
Solving Problems with Integration .....	28
We can work it out: Finding the area between curves .....	29
Walking the long and winding road .....	29
You say you want a revolution .....	30
Understanding Infinite Series .....	31
Distinguishing sequences and series .....	31
Evaluating series .....	32
Identifying convergent and divergent series .....	32
Advancing Forward into Advanced Math .....	33
Multivariable calculus .....	33
Differential equations .....	34
Fourier analysis .....	34
Numerical analysis .....	34

<b>Chapter 2: Dispelling Ghosts from the Past: A Review of Pre-Calculus and Calculus I</b>	<b>37</b>
Forgotten but Not Gone: A Review of Pre-Calculus	38
Knowing the facts on factorials	38
Polishing off polynomials	39
Powering through powers (exponents)	39
Noting trig notation	41
Figuring the angles with radians	42
Graphing common functions	43
Asymptotes	47
Transforming continuous functions	47
Identifying some important trig identities	48
Polar coordinates	50
Summing up sigma notation	51
Recent Memories: A Review of Calculus I	53
Knowing your limits	53
Hitting the slopes with derivatives	55
Referring to the limit formula for derivatives	56
Knowing two notations for derivatives	56
Understanding differentiation	57
Finding Limits by Using L'Hospital's Rule	64
Understanding determinate and indeterminate forms of limits	65
Introducing L'Hospital's Rule	66
Alternative indeterminate forms	68
<b>Chapter 3: From Definite to Indefinite: The Indefinite Integral</b>	<b>73</b>
Approximate Integration	74
Three ways to approximate area with rectangles	74
The slack factor	78
Two more ways to approximate area	79
Knowing Sum-Thing about Summation Formulas	83
The summation formula for counting numbers	83
The summation formula for square numbers	84
The summation formula for cubic numbers	84
As Bad as It Gets: Calculating Definite Integrals by	
Using the Riemann Sum Formula	85
Plugging in the limits of integration	86
Expressing the function as a sum in terms of $i$ and $n$	86
Calculating the sum	88
Solving the problem with a summation formula	88
Evaluating the limit	89
Light at the End of the Tunnel: The Fundamental	
Theorem of Calculus	89

Understanding the Fundamental Theorem of Calculus .....91  
 What's slope got to do with it? .....92  
 Introducing the area function .....92  
 Connecting slope and area mathematically .....94  
 Seeing a dark side of the FTC .....95  
 Your New Best Friend: The Indefinite Integral .....95  
 Introducing anti-differentiation .....96  
 Solving area problems without the Riemann sum formula .....97  
 Understanding signed area .....99  
 Distinguishing definite and indefinite integrals .....101

***Part II: Indefinite Integrals ..... 103***

**Chapter 4: Instant Integration: Just Add Water (And C) .....105**

Evaluating Basic Integrals .....106  
 Using the 17 basic anti-derivatives for integrating .....106  
 Three important integration rules .....107  
 What happened to the other rules? .....110  
 Evaluating More Difficult Integrals .....110  
 Integrating polynomials .....110  
 Integrating rational expressions .....111  
 Using identities to integrate trig functions .....112  
 Understanding Integrability .....113  
 Understanding two red herrings of integrability .....114  
 Understanding what integrable really means .....115

**Chapter 5: Making a Fast Switch: Variable Substitution .....117**

Knowing How to Use Variable Substitution .....118  
 Finding the integral of nested functions .....118  
 Finding the integral of a product .....120  
 Integrating a function multiplied  
 by a set of nested functions .....121  
 Recognizing When to Use Substitution .....123  
 Integrating nested functions .....123  
 Knowing a shortcut for nested functions .....125  
 Substitution when one part of a function  
 differentiates to the other part .....129  
 Using Substitution to Evaluate Definite Integrals .....132

**Chapter 6: Integration by Parts .....135**

Introducing Integration by Parts .....135  
 Reversing the Product Rule .....136  
 Knowing how to integrate by parts .....137  
 Knowing when to integrate by parts .....138

Integrating by Parts with the DI-agonal Method .....140  
Looking at the DI-agonal chart .....140  
Using the DI-agonal method .....140

**Chapter 7: Trig Substitution: Knowing All the (Tri)Angles .....151**

Integrating the Six Trig Functions .....151  
Integrating Powers of Sines and Cosines .....152  
    Odd powers of sines and cosines .....152  
    Even powers of sines and cosines .....154  
Integrating Powers of Tangents and Secants .....155  
    Even powers of secants with tangents .....155  
    Odd powers of tangents with secants .....156  
    Odd powers of tangents without secants .....156  
    Even powers of tangents without secants .....156  
    Even powers of secants without tangents .....157  
    Odd powers of secants without tangents .....157  
    Even powers of tangents with odd powers of secants .....158  
Integrating Powers of Cotangents and Cosecants .....159  
Integrating Weird Combinations of Trig Functions .....160  
    Using identities to tweak functions .....160  
Using Trig Substitution .....161  
    Distinguishing three cases for trig substitution .....162  
    Integrating the three cases .....163  
    Knowing when to avoid trig substitution .....171

**Chapter 8: When All Else Fails: Integration with Partial Fractions .....173**

Strange but True: Understanding Partial Fractions .....174  
    Looking at partial fractions .....174  
    Using partial fractions with rational expressions .....175  
Solving Integrals by Using Partial Fractions .....176  
    Setting up partial fractions case by case .....177  
    Knowing the ABCs of finding unknowns .....181  
    Integrating partial fractions .....184  
Integrating Improper Rationals .....187  
    Distinguishing proper and improper rational expressions .....187  
    Recalling polynomial division .....188  
    Trying out an example .....191

***Part III: Intermediate Integration Topics .....195***

**Chapter 9: Forging into New Areas: Solving Area Problems .....197**

Breaking Us in Two .....198  
Improper Integrals .....199  
    Getting horizontal .....199  
    Going vertical .....201

Solving Area Problems with More Than One Function .....	204
Finding the area under more than one function .....	205
Finding the area between two functions .....	206
Looking for a sign .....	209
Measuring unsigned area between curves with a quick trick .....	211
The Mean Value Theorem for Integrals .....	213
Calculating Arc Length .....	215

### **Chapter 10: Pump up the Volume: Using Calculus to Solve 3-D Problems .....219**

Slicing Your Way to Success .....	220
Finding the volume of a solid with congruent cross sections .....	220
Finding the volume of a solid with similar cross sections .....	221
Measuring the volume of a pyramid .....	222
Measuring the volume of a weird solid .....	224
Turning a Problem on Its Side .....	225
Two Revolutionary Problems .....	226
Solidifying your understanding of solids of revolution .....	227
Skimming the surface of revolution .....	229
Finding the Space Between .....	230
Playing the Shell Game .....	234
Peeling and measuring a can of soup .....	235
Using the shell method .....	236
Knowing When and How to Solve 3-D Problems .....	238

## ***Part IV: Infinite Series .....241***

### **Chapter 11: Following a Sequence, Winning the Series .....243**

Introducing Infinite Sequences .....	244
Understanding notations for sequences .....	244
Looking at converging and diverging sequences .....	245
Introducing Infinite Series .....	247
Getting Comfy with Sigma Notation .....	249
Writing sigma notation in expanded form .....	249
Seeing more than one way to use sigma notation .....	250
Discovering the Constant Multiple Rule for series .....	250
Examining the Sum Rule for series .....	251
Connecting a Series with Its Two Related Sequences .....	252
A series and its defining sequence .....	252
A series and its sequences of partial sums .....	253
Recognizing Geometric Series and P-Series .....	254
Getting geometric series .....	255
Pinpointing p-series .....	257

<b>Chapter 12: Where Is This Going? Testing for Convergence and Divergence</b>	<b>261</b>
Starting at the Beginning	262
Using the nth-Term Test for Divergence	263
Let Me Count the Ways	263
One-way tests	263
Two-way tests	264
Using Comparison Tests	264
Getting direct answers with the direct comparison test	265
Testing your limits with the limit comparison test	267
Two-Way Tests for Convergence and Divergence	270
Integrating a solution with the integral test	270
Rationally solving problems with the ratio test	273
Rooting out answers with the root test	274
Alternating Series	275
Eyeballing two forms of the basic alternating series	276
Making new series from old ones	276
Alternating series based on convergent positive series	277
Using the alternating series test	277
Understanding absolute and conditional convergence	280
Testing alternating series	281
<b>Chapter 13: Dressing up Functions with the Taylor Series</b>	<b>283</b>
Elementary Functions	284
Knowing two drawbacks of elementary functions	284
Appreciating why polynomials are so friendly	285
Representing elementary functions as polynomials	285
Representing elementary functions as series	285
Power Series: Polynomials on Steroids	286
Integrating power series	287
Understanding the interval of convergence	288
Expressing Functions as Series	291
Expressing $\sin x$ as a series	291
Expressing $\cos x$ as a series	293
Introducing the Maclaurin Series	293
Introducing the Taylor Series	296
Computing with the Taylor series	297
Examining convergent and divergent Taylor series	298
Expressing functions versus approximating functions	300
Calculating error bounds for Taylor polynomials	301
Understanding Why the Taylor Series Works	303

***Part V: Advanced Topics* .....305**

**Chapter 14: Multivariable Calculus .....307**

Visualizing Vectors .....308  
 Understanding vector basics .....308  
 Distinguishing vectors and scalars .....310  
 Calculating with vectors .....310  
 Leaping to Another Dimension .....314  
 Understanding 3-D Cartesian coordinates .....314  
 Using alternative 3-D coordinate systems .....316  
 Functions of Several Variables .....319  
 Partial Derivatives .....321  
 Measuring slope in three dimensions .....321  
 Evaluating partial derivatives .....322  
 Multiple Integrals .....323  
 Measuring volume under a surface .....323  
 Evaluating multiple integrals .....324

**Chapter 15: What’s so Different about Differential Equations? ... 327**

Basics of Differential Equations .....328  
 Classifying DEs .....328  
 Looking more closely at DEs .....330  
 Solving Differential Equations .....333  
 Solving separable equations .....333  
 Solving initial-value problems (IVPs) .....334  
 Using an integrating factor .....336

***Part VI: The Part of Tens* .....341**

**Chapter 16: Ten “Aha!” Insights in Calculus II .....343**

Integrating Means Finding the Area .....343  
 When You Integrate, Area Means Signed Area .....344  
 Integrating Is Just Fancy Addition .....344  
 Integration Uses Infinitely Many Infinitely Thin Slices .....344  
 Integration Contains a Slack Factor .....345  
 A Definite Integral Evaluates to a Number .....345  
 An Indefinite Integral Evaluates to a Function .....346  
 Integration Is Inverse Differentiation .....346  
 Every Infinite Series Has Two Related Sequences .....347  
 Every Infinite Series Either Converges or Diverges .....348

<b>Chapter 17: Ten Tips to Take to the Test</b> .....	<b>349</b>
Breathe .....	349
Start by Reading through the Exam .....	350
Solve the Easiest Problem First .....	350
Don't Forget to Write $dx$ and $+ C$ .....	350
Take the Easy Way Out Whenever Possible .....	350
If You Get Stuck, Scribble .....	351
If You Really Get Stuck, Move On .....	351
Check Your Answers .....	351
If an Answer Doesn't Make Sense, Acknowledge It .....	352
Repeat the Mantra "I'm Doing My Best," and Then Do Your Best .....	352
 <b><i>Index</i></b> .....	 <b>353</b>
