- Sub-Saharan Africa: Horn of Africa ecosyndemics, 190–191; iatrogenic syndemics in, 186–187; modeling syndemic effects of malaria in, 217–218; potentially dangerous cultural practices by immigrants from, 148–149; war syndemics in, 174–176; WHO on devastating impact of HIV/AIDS in, 108
- Substance abuse: childhood neglect/physical abuse and future, 36; childhood sexual abuse and future,

- 34–35; co-occurrence of mental health disorders and, 207–208; commercial sex workers and, 49–50; crystal methamphetamine, 42; drunkorexia—eating disorders and, 72; entwined epidemics of violence, HIV/AIDS and, 39–41; illicit cocaine from Peru, 126–127; MSM and synergism of sexual risk behaviors and, 41–43; as self-medication response, 152–153; sexual orientation and adolescent, 41–42
- Superinfection: among MSM, 185; dengue hemorrhagic fever (DHF), 185; description of, 184–185; enterovirus, 185–186
- Supersyndemics, 153–154
- Suspended particulate matter (SPM), 180
- Swajalein Atoll, 130
- Swedlund, Alan, 165
- Syndemic complexity, 73
- Syndemic diversity: asthma-influenza syndemic, 65–69; diabulimia syndemic, 69–72; renocardiac syndemic, 57–60; SARS as chronic disease syndemic, 60–65
- Syndemic emergence: definition of, 179; Dhaka (Bangladesh) example of, 180–181; HIV/AIDS as, 179; iatrogenic, 186–188; from infection to, 181–184; influences on, 179; reemergent diseases and, 184; superinfection as intragenus syndemics, 184–186
- Syndemic of history: ancient Latin writings related to, 159–160; Black Death, 158–159; Gibraltar cholera syndemic (1865), 162–164; global influenza syndemic (1918), 166–169; Irish famine syndemic of 1741, 161–162; Massachusetts scarlet fever syndemic (1800s), 164–166; Mormon migration syndemics, 171–172; Native American on the American frontier, 169–171; syndemics of war, 173–176; Victorian England, 157–158
- Syndemics: biomedicine and social origins of, 208–213; biosocial connections in health foundation of, 20–23; comorbidity approach versus, 17–18; definition of, 28–29; ecosyndemics, 93; emergent, 179–195; folk, 20; future of, 220; importance of studying, 199–200; interspecies relationship understood through, 18–19; local knowledge incorporated by, 19–20; medical treatment of, 206–217; modeling, 217–220; origin and development of concept, 29–30; public health approach to preventing, 200–206; sexually transmitted, 8–9, 51, 54, 77–80, 214; supersyndemics interaction between two or more, 153–154. *See also* Disease interactions; HIV/AIDS syndemics
- Syndemics medical treatment: assessment of countersyndemics' medical value and, 213–217; avoidance of iatrogenic syndemics during, 213; bacteriophage therapy for, 216–217; biomedicine, social origins of syndemics, and, 208–213; diagnostic complications of, 206–208; five critical questions raised by, 206; Partners in Health (PIH) model of, 208–209; simultaneous, 210–213; social medicine orientation of, 209–210. *See also* Biomedicine
- Syndemics of war: connection between war and disease, 173–174; Darfur region, 174–176; overview of, 173; social suffering due to, 175
- Syndemics Prevention Network (CDC), 200–201
- Syndemics theory: lack of research on, 17; as paradigm shift, 16
- Syndemogenesis: for assessing HIV/AIDS syndemics, 76; cardiovascular diseases and HIV/AIDS, 113–115; countersyndemics and, 18, 118–119, 213–217; description of, 76; emotional and cognitive health and HIV/AIDS, 115–118; food insufficiency and HIV, 108–113; infectious and chronic diseases, 102–106*r*; kidney disease and HIV, 107–108
- Synergistic enlightenment, 28
- Syphilis: early disease theories on, 8–9; enhanced contagiousness between HIV and, 54; “fever therapy” and, 214; sex trade and spread of, 51; *Treponema pallidum* causing, 9, 214
- Syringe sharing, 81
- T**
- T-cell leukemia, 15
- T-cell lymphoma, 15
- T-cells: CD4, 90; description of, 68; *H. pylori* and induced responses of, 103; nutrition and, 109, 111; Th1 and Th2 types of, 68, 86, 94
