About the Editor

David F. Beer earned his Bachelor of Arts in secondary education at the University of Arizona, his Masters degree in English linguistics from Arizona State University, and a Ph.D. in English from the University of New Mexico.

He taught at the University of Colorado and at Haille Sellassie I University in Ethiopia before joining the English Department at the University of Texas as an assistant professor in 1978. In 1985, he was invited to develop a technical communication program for the Department of Electrical and Computer Engineering, where he currently directs the engineering communication program. Besides teaching technical communication, he has conducted workshops at several high-tech companies in Austin, and works on a regular basis at Advanced Micro Devices, Inc.

Dr. Beer has presented papers on technical communication at IEEE and ASEE conferences and has published a number of journal articles. Besides editing the first edition of this volume, he co-authored with David McMurrey, *A Guide to Writing as an Engineer* (Wiley, 1997). He is a senior member of the IEEE Professional Communication Society and a past senior member and president of the Austin chapter of the Society for Technical Communication.
