Preface	xi
Organisation of the Book	xiii
Acknowledgments	xix
1 Introduction	1
1.1 Motivation for Listening Tests	3
1.2 Role of Standardisation	5
1.3 Role of Predictive Models	11
I Experimental Considerations	15
2 Definition of Research Question and Hypothesis	17
2.1 Principle of Empiricism	20
2.2 Principle of Rationalism	21
2.3 Other Principles of Scientific Argumentation	24
2.3.1 Probabilistic Reasoning	24
2.3.2 Argumentum ad Hominem	26
2.3.3 Conclusion by Analogy	26
2.4 Summary	27
3 Fundamentals of Experimentation	29
4 Quantification of Impression	39
4.1 Response Attribute	40
4.1.1 Perceptual Measurements	43
4.1.2 Affective Measurements	65

4.2	Response Format	67
4.2.1	Direct Scaling	69
4.2.2	Indirect Scaling	75
4.2.3	Selection of an Appropriate Scaling Procedure	80
4.2.4	Context and Bias Effects	86
4.2.5	Other Bias Effects	92
4.3	Overview of Process	96
5	Experimental Variables	97
5.1	Signal	99
5.1.1	Signal Category	99
5.1.2	Recording Technique, Storage and Encoding	101
5.1.3	Time Domain Characteristics	102
5.1.4	Spectral Characteristics	102
5.1.5	Spatial Characteristics	103
5.1.6	Reference Signals	104
5.2	Reproduction System	105
5.3	Listening Room	105
5.4	Subject Considerations	105
5.4.1	Categorisation and Applicability	106
5.4.2	Listening Panels	112
5.4.3	Subject Selection	118
5.4.4	Training and Monitoring	136
6	Statistics	141
6.1	Statistical Experimental Design	144
6.2	Statistical Analysis	161
6.2.1	Classification of Data Type	161
6.2.2	Levels of Analysis	163
6.2.3	Descriptive Level	163
6.2.4	Inferential Level	179
6.2.5	Statistical Checklist	223
II	Technical Considerations	225
7	Electroacoustic Considerations	227
7.1	Listening Rooms	228
7.1.1	IEC 60268-13 Listening Rooms	229
7.1.2	ITU-R Recommendation BS.1116-1 Listening Rooms	231

7.1.3	EBU 3276 Listening Rooms	236
7.1.4	General Characteristics	239
7.2	Listening Booths	244
7.3	Other Spaces	246
7.4	Listener and Loudspeaker Positioning	248
7.4.1	Monophonic Reproduction	249
7.4.2	Stereophonic Reproduction	252
7.4.3	Multichannel Reproduction	252
7.4.4	Separate Bass Loudspeakers	254
7.4.5	Listener Position	258
7.5	Accompanying Picture	260
7.6	Commonly Encountered Problems	261
7.7	Electrical Considerations	263
8	Calibration	265
8.1	Level Calibration	267
8.1.1	Level Calibration Methods	269
8.1.2	Level Metric Selection	276
8.1.3	Preferred Listening Levels	283
8.1.4	Reference Reproduction Levels	285
8.2	Loudspeaker Calibration	287
8.2.1	Level Calibration	288
8.3	Headphone Calibration	291
8.3.1	Headphone Types	291
8.3.2	Ear Measurement Points	293
8.3.3	Headphone Measurement	293
8.3.4	Target Frequency Response	295
8.3.5	Level Calibration	299
9	Test Planning, Administration and Reporting	301
9.1	Planning	301
9.1.1	Experimental Planning	301
9.1.2	Logistic Considerations	303
9.1.3	Ethical Considerations	306
9.2	Administration	310
9.2.1	Subject Matters	310
9.2.2	Subject Familiarisation	310
9.2.3	Listening Test Software	315
9.3	Reporting	319

III Applications	323
10 Commonly Encountered Experimental Paradigms	325
10.1 Standards	325
10.1.1 ITU-T Recommendation P.800 Methods	325
10.1.2 ITU-R Recommendation BS.1116-1	330
10.1.3 ITU-R Recommendation BS.1534-1	335
IV Appendices	339
A Standards and Recommendations	341
A.1 Audio Engineering Society	342
A.2 American National Standards Institute	342
A.3 European Broadcasting Union	342
A.4 International Electrotechnical Commission	344
A.5 The International Telecommunications Union Standards	345
A.5.1 Telecommunications Standardisation Sector . .	345
A.5.2 Radiocommunication Sector	354
B Attribute Lists	359
B.1 Speech Quality	360
B.2 Spatial Sound Quality	363
B.2.1 Loudspeakers	363
B.2.2 Headphones	366
B.3 Other Quality Attributes	370
C Audio Source and Demonstration Material	373
D A-, B-, C- and D-Weighting Curves	377
E DRP-ERP Compensation Curves	379
F Abbreviations	381
Bibliography	389
Index	435
