- Acronyms, 148
 - Age of Data, 169
 - AI (artificial insemination), 148
 - AI (artificial intelligence), 115, 148
 - Allen, Jeff, 64, 74–75
 - Amazon, 63
 - Angels: on Board of Directors, 34; defined, 27; NetApp funding from, 28, 30–31, 44
 - AOL, 63
 - Apple, 128, 169; Newton, 16, 19
 - Appliance, NetApp conceived as, 23–25, 139
 - Aristotle, 13
 - Auspex Systems: as competitor for NetApp, 24, 62, 182; hiring practices of, 29; Hitz at, 15–16, 17, 18, 26, 29; legal threat from, 18, 24; NSA contract won by, 85–86, 96; Pawlowski's attacks on, 88; performance bake-off against, 34–36, 38
 - Axelrod, Robert, 95
- B**
- Backups, 104–105, 145
 - Behavior, and values, 84, 138
 - Ben & Jerry's, 76
 - Bezos, Jeff, 14
 - Bittner, Kathy, 74
 - Board of Directors: chairman of, 26; NetApp's early, 34; power of, 47–48; Warmenhoven's relationship with, 151
 - Bradley, Helen, 69, 102–103, 104
 - Brown-nose rule, 162–163
 - Business plan: Future History approach to, 163–166; NetApp's original (1992), 27–28, 177–185; “stupidest,” for growth, 77
- C**
- Castrating bulls, 12, 15, 17, 171
 - CEO (chief executive officer): Board of Directors' power over, 47–48; joke about engineer and, 102; Malcolm as, 44–47, 52, 56; replacing NetApp's first, 39, 43–45, 48, 49, 50. *See also* Warmenhoven, Dan
 - Chambers, Jeff, 48
 - Chan, Florence, 81
 - Change: behavioral, 138; cultural, 84; and enterprise customers, 133–134; resistance to, 126; of sales strategies, 127–129, 147–156
 - Christensen, Clayton, 123–125
 - Circle of simplicity, 140–141
 - Cirrus Logic, 38
 - Cisco, 64, 71, 169; as customer of NetApp, 38, 130, 131–132; as model for NetApp, 25–26
 - Clarke, Arthur C., 115
 - Clarke, Bruce, 46–47
 - Coca-Cola, 76
 - Communication, and building culture, 90–93
 - Company culture. *See* Culture
 - Compaq, 36, 169
 - Computer programming: at Auspex, 15–16; early, for NetApp, 26–27; Hitz's first experiences doing, 7, 15
 - Computer science, as Hitz's major, 14
 - Consensus, 109–111
 - Conti, Isabella, 112
 - CTO (chief technology officer): Kleiman as, 103; Lau as, 66; Pawlowski as, 88
 - Culture: and benefits and perks, 93; communication for building, 90–93; defined, 84; employee as representative of, 88–90; and hypergrowth, 72–74; necessity of changing, 84; and policies, 86–88
 - Customers: failure experience of, 137–138; Internet customers, 63, 129–132; low-end vs. high-end, 24, 124–125; military as, 22, 138; shift in size of, 127–129; suggesting NetApp sell SAN, 148–149; thinking focused on, 105–107, 131; time for buying by, 107, 134; understanding, of start-ups, 26; valuing, after start up, 66–68. *See also* Enterprise customers
- D**
- Data: Age of, 169; importance of, 168–169; and legal system, 171–173; lost, 170–171; sources of, 170
 - Decision-making: and delegating ownership of decisions, 109–111; focus on process of, 51–53; management's options for, 111–112; team, Dr. Death moment in, 113–115
 - Deep Springs College: founding of, 11–12; lessons learned at, 12–13, 167; ranch work at, 12, 168; stories told by ranch manager at, 46, 148
 - Dell, 36, 180
 - Diamond, Jared, 65
 - Dot-com boom: NetApp's growth during, 63–64; stock price during, 64; wave analogy for, 76–77. *See also* Hypergrowth; Internet
 - Dot-com bust: decline in sales after, 75, 91; as good for NetApp, 134; layoffs after, 75–76, 91–93; reasons NetApp survived, 55–56, 77–78; stock price decline with, 74, 92

Doubling: as goal, 62, 68–69; and magic, 115; problems inevitable during, 69–71; reasons to pursue, 71–72. *See also* Hypergrowth

Dr. Death moment, 113–115

E

EarthLink, 63

Eating your own dog food, 32

Edison, Thomas, 11

Ehrmantraut, Brian, 70–71

Ellison, Larry, 72

EMC, 125, 133, 143, 156

Employees: boss's interests as focus of, 162–163; doubling, with hypergrowth, 67, 68–69, 71; explaining decision to sell SAN to, 152–154; laying off, 75–76, 91–93; motivating, 93–95; number of, at NetApp, 33, 45, 72; as representative of NetApp culture, 88–90; rule of thumb on revenue per, 65; sharing Future History paper with, 164; size of working groups of, 65–66; values as tool for, 86

Engineering workgroups, as customers, 105, 127–128

Engineers: jokes about, 33, 102, 105; thinking style of, 102–105, 106

Enterprise customers: conservatism of, 133–134; described, 132–133; selling to non-tech, 134–137; and simplicity, 139–141; vendor cooperation demanded by, 141–143

Enterprise-class equipment, 132

EO, 16

Ethernet, 64, 156

The Evolution of Cooperation (Axelrod), 95

F

Failure experience, 137–138

Fraud, 82, 87

Fry's, 27

Future History project, 163–166, 173

The Future of Management (Hamel), 174

G

Game theory, 68, 95

George Washington University (GW), 9–10

Georgia Pacific, 134–135

Go (corporation), 16

Goals: big long-range, 66; clarifying, after dot-com bust, 161–165, 166; for hypergrowth, 61–63

Going public, 53–56, 61

Goodness oversupply, 124

Google, 169

Growth: Internet as driving, 63–64, 132; necessity of, 164; rules for revenue, 65; sales figures on, 63; “stupidest” business plan for, 77. *See also* Hypergrowth
Guns, Germs, and Steel (Diamond), 65

H

Hair color, 89, 90, 131

Hamel, Gary, 174

Heinlein, Robert, 163

Hitz, Dave: at Auspex Systems, 15–16, 17, 18, 26, 29; as champion of NAS, 149–151, 152–154; college experiences of, 9–14; dot-com wealth loss by, 74; first computer of, 7; as founder of NetApp, 23–25; high school experience of, 1, 8–10; life story of, 1, 8–9; risks taken by, 17–18; roles of, at NetApp, 2, 66, 67–69, 101–102, 173–174

Holmes, Oliver Wendell, 140

Horton, Bill, 112–113

HP (Hewlett-Packard), 49, 125

Hustler.com, 63

Hypergrowth: and culture, 72–74; doubling employees with, 67, 68–69, 71; goals for, 61–63; problems inevitable with, 69–71; reasons to pursue, 71–72

I

IBM, 49, 86–87, 125

Industrial Light & Magic, 170

Ingres, 72

The Innovator's Dilemma (Christensen), 123–125

Inside the Tornado (Moore), 72, 123, 125–126

Internet, 63–64, 132. *See also* Dot-com boom; Dot-com bust

Internet customers, 63, 129–132

Investment banks, 54, 55

IPO (initial public offering), 53–56, 61

IT (information technology): historical eras of, 169; spending on, and hypergrowth, 73–74. *See also* Technologies

J

Jason (customer), 148–149, 155

K

Kleiman, Steve, 103, 104–105

L

Lau, James: at Auspex, 16, 29; as founder of NetApp, 23–25, 66; pen-based computer applications start-up with, 16–17, 18–19; and simplicity, 83; supported NetApp selling SAN, 147, 150, 151
Layoffs, 75–76, 91–93

Leaders: Pawlowski's test for, 90; role of, 187

Legal system: and data, 171–173; and morality, 97–99

Liberal arts, 10; at Deep Springs College, 11, 12

Linux, 67, 123

Litigation: against NetApp, 97; threatened by Auspex, 18, 24

Love Program, 131–132
 Lucas, George, 162–163

M

Magic, 115–116
 Malcolm, Mike: at Auspex, 16, 23; background of, 16; contribution of, 38–39, 50; firing, 39, 43–45, 48, 49, 50; as founder of NetApp, 19, 23–25; help requested by, 50; management style of, 44–47, 52, 111; on profit, 56; supported direct sales method, 37
 Management: advice on, 111–113; applying engineering-style thinking to, 102–103, 104; difference between engineers and, 103–104; focusing on interests of, 162–163; of large group, 101; Mendoza's algorithm for, 107–109; ownership of decisions delegated by, 109–111; whining by, 161–162
 Management coach, 111–112
 Management-centric thinking, 103–104, 106, 107
 Manuals: customer service, 138–139; outdated, with growth, 70–71; user's, 33
 Markets: converging, and sales strategy, 154–156; low-end vs. high-end, 24, 124–125
 Maslow, Abraham, 94, 167
 Mead, Margaret, 116
 Media, mass, and risk assessment, 144–145
 Meetings, tip on ending, 112
 Mehta, Varun, 137–138
 Mendoza, Kathy, 37
 Mendoza, Tom, 47, 54; attempted sales to Wall Street, 133, 134; management algorithm of, 107–109; presentation by, on layoffs, 91–93; public-speaking skill of, 57–58, 90–91; reacted to sales goal, 62–63; sales strategy altered by, 37–38, 127–129; and values, 83, 85, 95, 187; on when customers buy, 107, 134
 Microsoft, 31, 169; Pen Windows, 16, 19; Windows, 123, 141, 155
 Milestones, early, 112–113
 Military, 22, 138
 MindSpring, 63
 MIPS Computer Systems, 15, 17, 19, 26, 28, 29
 Momenta, 16
 Moore, Geoffrey, 72, 123, 125–126
 MOs (management orgasms), 103–104
 Mother: on computers as career, 7–8, 25, 175; and her children's education, 8–10; listening to, 3, 7, 175; opium use by, 1, 8–9
 Motivation: early milestones as, 112; of employees, 93–95; teams with, 116; vision as, 162
 Mr. Coffee, 139

Mulligan, Deirdre, 172
 Mulroney, Patrick, 32–33

N

NAS (Network-Attached Storage), 24; Ethernet as increasing demand for, 64; goal of creating new market called, 62; Hitz as champion of, 149–151; SAN contrasted to, 147–148, 155–156; understanding success of, 124–125
 Needs, human, 94, 167
 NET, 49, 81–82
 NetApp: eras of history of, 165–166; first product of, 31, 32–33; as a *Fortune's* “best company to work for”, 175; name of, 25; number of employees of, 33, 45, 72; origin of, 19, 23–25; what company does, 2–3, 21–22
 Networking Age, 169
 Newton, Isaac, 68
 NFS (Network File System), 24, 88
Nonzero (Wright), 68
 NSA (National Security Agency), 85–86, 96
 Nunn, L. L., 11–12

O

Opium, 1, 8–9
 Oracle, 71, 72, 142–143
 Organizational culture. *See* Culture

P

Parents, 1, 9. *See also* Mother
 Pawlowski, Brian, 88–90
 Pen-based computers, start-up developing applications for, 16–17, 18–19
 Performance testing: bake-off comparing approaches to, 34–36; at Fry's, 27
 Perrell, Charlie, 28–29, 31, 37
 Personal Computing Age, 169
 Pharaohs data storage lessons from, 41–42
 Physics, as Hitz's major, 13–14
 Pickering, Laura, 113–114
 Pixie dust, 39, 43, 53, 116
 Policies and procedures, 86–88
 Politics, defined, 53
 Presentations, tips on, 57–58, 79–80
 Princeton, 13–14
 Product marketing/management, 106
 Profit, CEOs' sayings on, 56
 Public speaking, tips on, 57–58, 79–80
 Pyramids, data storage lessons from, 41–42

R

RAID, 135
 Recursion, 109
 Redundancy, in pyramids, 42
 Response time, 34
 Résumés, 15
 Risk: assessing, and mass media, 144–145; and enterprise customers, 133; taking, 17–18

S

Sales: of both NAS and SAN, 147–156; direct vs. indirect, 28–29, 36–38; after dot-com bust, 75, 91; goal for, after IPO, 62–63; to large companies, 127–129; to non-tech companies, 134–137; of stock for equipment, 84–85

Salespeople, 24–25, 28–29

Salmon, Rob, 91, 135–137

SAN (Storage Area Network): decision to begin selling, 147–156; NAS contrasted to, 147–148, 155–156; NAS in competition with, 125, 143

Santora, Mark, 163

Seed-round investment, 27–28

Self-hosting, 32

Sequoia Capital, 49

Shark Island parable, 144–145

Simplicity: of appliances, 23–24, 139; circle of, 140–141; as company value, 83, 187; and enterprise customers, 139–141; and oversimplification, 119

Southwest Airlines, 2, 133, 170

Start-ups: attractiveness of working at, 15–16, 94–95; developing pen-based computer applications, 16–17, 18–19; equipment-buying scheme of, 84–85; Hitz's first experience at, 15–16; procedure for funding, 27–28; understanding customers of, 26

Stock: and dot-com boom, 64; and dot-com bust, 74, 92; equipment acquired for, 84–85; shift in ownership of, 34

Strategic thinking, books on, 123–126

Sun Microsystems, 71, 128, 169; and Cisco, 25–26; as competitor for NetApp, 181–182; network storage system of, 15, 24; and origin of NetApp, 26, 28; Pawlowski at, 88; performance bake-off with, 34–36; Perrell at, 28, 29; user's manuals of, 33

Swarthmore College, 10

Synopsis, performance bake-off at, 35–36

Sysadmins (system administrators), 32–33, 140

T

Teams: and magic, 115–116; size of, and growth, 65

Tech crash. *See* Dot-com bust

Technologies: adoption of, and organizational strategies, 125–126; low-end replacing high-end, 123–125; thinking focused on, 102–105, 106. *See also* IT (information technology)

Thinking: customer-centric, 105–107, 131; engineers' style of, 102–105, 106;

management-centric, 103–104, 106, 107; speckled-egg, 157–158; strategic, books on, 123–126; technology-centric, 102–105, 106

Throughput, 34

TOs (technical orgasms), 103

Training: about laying people off, 75–76; during doubling, 71

Travel policy, 87–88

Trust: as company value, 186; and Men-doza's management algorithm, 108–109

Truth, scientific vs. useful, 117–119

U

UNIX, 26, 123, 141, 155

V

Valentine, Don, 48–49, 50, 53–54, 151

Values: applications of, at NetApp, 84–86; and behaviors, 84, 138; and company travel policy, 87–88; list of company, 81–84, 186–187; long-term effects of, 95–96

Varteressian, Armen, 119

VCS (venture capitalists): areas considered by, 107; on Board of Directors, 34; defined, 27; funding from, 34, 45, 48–49; and NetApp as start-up, 28, 29, 107; and pen-based computer applications start-up, 18–19

Vision, 162

VMware, 143

W

WAFI, 135

Wall, Bob, 45, 48

Wall Street, 133, 134

Warmenhoven, Dan, 56, 84, 175; and changing sales strategies, 134, 151; on decision-making, 109–111, 112; hired as new CEO, 49–50, 53–54; and layoffs after dot-com bust, 75, 93; list of company values created by, 81–84, 186–187; management advice from, 101–102; management style of, 51–53, 86, 90; took NetApp public, 53–55, 61

Waterloo Microsystems, 16

Watson, Andy, 153–154

Western Digital, 38

Westinghouse, George, 11

Whining, 162

Windows, 123, 141, 155

Wooten, Kentucky, 9

Wright, Robert, 68

Y

Yahoo, 21, 63, 130, 131–132, 170
