

Contents

Contributors	viii
1. Dedication: Fredrick A. Bliss Teacher, Researcher, and Director of Plant Breeding <i>Thomas C. Osborn</i>	1
2. Sugarcane Improvement through Breeding and Biotechnology <i>Ray Ming, Paul H. Moore, Kuo-Kao Wu, Angélique D'Hont, Jean C. Glaszmann, Thomas L. Tew, T. Erik Mirkov, Jorge da Silva, John Jifon, Mamta Rai, Raymond J. Schnell, Stevens M. Brumbley, Prakash Lakshmanan, Jack C. Comstock, and Andrew H. Paterson</i>	15
I. Introduction	18
II. Sugarcane Breeding	20
III. Sugarcane Improvement Through Biotechnology	57
Literature Cited	100
3. Breeding for Resistance to Maize Foliar Pathogens <i>Richard C. Pratt and Stuart G. Gordon</i>	119
I. Introduction	121
II. Diseases Incited by Fungal Pathogens	125
III. Diseases Incited by Viral Pathogens	142
IV. Diseases Incited by Bacterial Pathogens	156
V. Summary	159
Literature Cited	162

4. Synteny in the Rosaceae	175
<i>Pere Arús, Toshiya Yamamoto, Elisabeth Dirlewanger, and Albert G. Abbott</i>	
I. Introduction	176
II. Genetic Maps in the Main Rosaceae Species	177
III. Map Comparisons	191
IV. Other Genetic Resources of Interest for Map Comparison	202
V. Future Prospects	203
Literature Cited	205
5. Genetic Mapping and Molecular Breeding in Cucurbits	213
<i>Yi-Hong Wang, Ralph A. Dean, and Tarek Joobeur</i>	
I. Introduction	214
II. Classic Genetic Maps	215
III. Molecular Genetic Maps	216
IV. Gene Tagging	219
V. QTL Mapping	226
VI. Molecular Breeding	233
VII. Gene Cloning	235
VIII. Cucurbit Genomics	236
IX. Future Prospects	237
Literature Cited	239
6. Breeding Douglas-Fir	245
<i>Glenn T. Howe, Keith Jayawickrama, Marilyn Cherry, G. R. Johnson, and Nicholas C. Wheeler</i>	
I. Abbreviations	246
II. Introduction	247
III. Distinctive Characteristics of Forest Trees	249
IV. Douglas-Fir: The Species	251
V. Factors That Influence Douglas-Fir Breeding	254
VI. Breeding Goals and Objectives	279
VII. Overview of Tree Breeding Methods	286
VIII. Breeding Programs	289

IX. Breeding and Testing Methods	296
X. Production of Improved Materials for Reforestation	319
XI. Biotechnology	331
XII. Gene Conservation	337
XIII. Acknowledgments	339
Literature Cited	339
Subject Index	354
Cumulative Subject Index	355
Cumulative Contributor Index	371
