# Contents

*Introduction* . . . . . *xix*

**Part 1      The Basics      1**

**Chapter 1    The Boot Process      3**

    Loading the Boot Sector . . . . . 4

    Loading Linux with GRUB . . . . . 6

    Loading the Kernel with LILO . . . . . 10

        LILO Configuration Options . . . . . 10

    The Linux Boot Prompt . . . . . 16

    Hardware Device Driver Initialization . . . . . 19

    Loading Linux Services—The init Process . . . . . 21

        Understanding Runlevels . . . . . 23

        Special-Purpose Entries . . . . . 26

    Startup Scripts . . . . . 27

        System Initialization . . . . . 28

        Runlevel Initialization . . . . . 28

        Controlling Scripts . . . . . 30

        The rc.local Script . . . . . 32

    Loadable Modules . . . . . 32

        Listing the Loaded Modules . . . . . 33

    In Sum . . . . . 35

**Chapter 2    The Network Interface      37**

    Configuring an Ethernet Interface . . . . . 37

        Loadable Ethernet Drivers . . . . . 38

        The *ifconfig* Command . . . . . 41

        Network Interface Configuration Tools . . . . . 45

    The Serial Interface . . . . . 47

        Connecting through the Serial Interface . . . . . 49

        Running TCP/IP Over a Serial Port . . . . . 50

	Installing PPP . . . . .	51
	The PPP Kernel Module. . . . .	52
	The PPP Daemon . . . . .	52
	Configuring a PPP Server . . . . .	54
	PPP Dial-Up Server Configuration . . . . .	55
	PPP Security . . . . .	57
	PPP Client Configuration . . . . .	59
	<i>chat</i> Scripts. . . . .	60
	Using an X Tool to Configure a PPP Client . . . . .	62
	In Sum. . . . .	64
<b>Part 2</b>	<b>Internet Server Configuration</b>	<b>65</b>
<b>Chapter 3</b>	<b>Login Services . . . . .</b>	<b>67</b>
	Starting Services On-Demand . . . . .	68
	Protocol and Port Numbers . . . . .	69
	Configuring <i>inetd</i> . . . . .	73
	Configuring <i>xinetd</i> . . . . .	75
	Creating User Accounts . . . . .	81
	The Steps to Creating a User Account . . . . .	81
	The <i>passwd</i> File . . . . .	82
	Tools to Create User Accounts . . . . .	88
	Additional FTP Configuration . . . . .	94
	The <i>ftppaccess</i> File . . . . .	96
	In Sum. . . . .	100
<b>Chapter 4</b>	<b>Linux Name Services . . . . .</b>	<b>101</b>
	The <i>hosts</i> File . . . . .	102
	Understanding DNS . . . . .	102
	The DNS Hierarchy . . . . .	103
	Answering Queries . . . . .	104
	The BIND Software. . . . .	105
	Configuring the Resolver . . . . .	105
	The Lightweight Resolver . . . . .	112

---

	Configuring a Domain Name Server . . . . .	114
	The <i>named</i> Configuration File . . . . .	115
	A Caching-Only Configuration . . . . .	120
	The Slave Server Configuration . . . . .	127
	The Master Server Configuration . . . . .	129
	Running <i>named</i> . . . . .	144
	<i>named</i> Signal Processing . . . . .	145
	The <i>named</i> Control Tools . . . . .	146
	Using the Host Table with DNS . . . . .	150
	In Sum . . . . .	155
<b>Chapter 5</b>	<b>Configuring a Mail Server . . . . .</b>	<b>157</b>
	Using Mail Aliases . . . . .	158
	Defining Personal Mail Aliases. . . . .	161
	Using <i>sendmail</i> to Receive Mail . . . . .	162
	The <i>sendmail</i> Configuration File. . . . .	163
	The Local Info Section . . . . .	163
	The Options Section . . . . .	165
	The Message Precedence Section. . . . .	166
	The Trusted Users Section . . . . .	167
	The Format of Headers Section . . . . .	167
	The Rewriting Rules Section . . . . .	169
	The Mailer Definitions Section . . . . .	172
	Configuring the <i>sendmail.cf</i> File . . . . .	175
	Testing Your New Configuration . . . . .	176
	Using <i>m4</i> to Configure <i>sendmail</i> . . . . .	180
	The <i>m4</i> Macro Control File . . . . .	181
	The Linux OSTYPE File . . . . .	182
	Creating an <i>m4</i> DOMAIN File . . . . .	184
	Building the <i>m4</i> Configuration File . . . . .	187
	Building a <i>sendmail</i> Database . . . . .	188
	Testing the <i>m4</i> Configuration . . . . .	189
	In Sum . . . . .	190

<b>Chapter 6</b>	<b>The Apache Web Server . . . . .</b>	<b>191</b>
	Installing Apache . . . . .	191
	Running <i>httpd</i> . . . . .	194
	Configuring the Apache Server. . . . .	196
	The <i>httpd.conf</i> File . . . . .	198
	Loading Dynamic Shared Objects . . . . .	201
	Basic Server Directives . . . . .	204
	Defining Where Things Are Stored . . . . .	206
	Creating a Fancy Index . . . . .	208
	Defining File Types . . . . .	208
	Managing Child Processes. . . . .	209
	Performance Tuning Directives . . . . .	211
	Caching Directives . . . . .	212
	Defining Virtual Hosts . . . . .	213
	Web Server Security . . . . .	214
	The CGI and SSI Threat. . . . .	215
	Server Options for Documents and Directories . . . . .	216
	Directory-Level Configuration Controls . . . . .	218
	Defining Access Controls . . . . .	219
	Requiring User Authentication . . . . .	221
	Configuring SSL . . . . .	224
	Managing Your Web Server. . . . .	233
	Monitoring Your Server . . . . .	233
	Apache Logging . . . . .	235
	In Sum. . . . .	238
<b>Chapter 7</b>	<b>Network Gateway Services . . . . .</b>	<b>239</b>
	Understanding Routing . . . . .	241
	Converting IP Addresses to Ethernet Addresses . . . . .	242
	Enabling IP Packet Forwarding . . . . .	245
	The Linux Routing Table . . . . .	246
	Defining Static Routes . . . . .	248
	The <i>route</i> Command . . . . .	249

	Using Dynamic Routing . . . . .	. 250
	Routing Protocols . . . . .	. 250
	Running RIP with <i>routed</i> . . . . .	. 255
	Routing with Zebra . . . . .	. 257
	Using <i>gated</i> . . . . .	. 272
	Network Address Translation. . . . .	. 282
	Configuring a Linux NAT Server . . . . .	. 284
	In Sum . . . . .	. 285
<b>Part 3</b>	<b>Departmental Server Configuration</b>	<b>287</b>
<b>Chapter 8</b>	<b>Desktop Configuration Servers . . . . .</b>	<b>. 289</b>
	Understanding Configuration Protocols . . . . .	. 290
	Bootstrap Protocol. . . . .	. 290
	Dynamic Host Configuration Protocol . . . . .	. 291
	Reverse Address Resolution Protocol . . . . .	. 292
	Installing the DHCP Server . . . . .	. 292
	Running <i>dhcpcd</i> . . . . .	. 294
	Initializing the <i>dhcpcd.leases</i> File . . . . .	. 296
	Configuring the DHCP Server. . . . .	. 297
	Controlling Server and Protocol Operations . . . . .	. 297
	<i>dhcpcd</i> Configuration Options . . . . .	. 300
	Creating a <i>dhcpcd.conf</i> File . . . . .	. 304
	Configuring a <i>dhcrelay</i> Server . . . . .	. 307
	Configuring a DHCP Client . . . . .	. 310
	Using the <i>dhcpcd</i> Client . . . . .	. 310
	Using the <i>pump</i> DHCP Client . . . . .	. 314
	Running <i>dhclient</i> Software . . . . .	. 317
	In Sum . . . . .	. 322
<b>Chapter 9</b>	<b>File Sharing . . . . .</b>	<b>. 323</b>
	Linux Filesystem . . . . .	. 324
	Linux File Permissions . . . . .	. 324
	Changing File Permissions . . . . .	. 325
	The <i>chgrp</i> Command . . . . .	. 328

Understanding NFS . . . . .	329
Installing NFS . . . . .	331
Configuring an NFS Server . . . . .	333
Mapping User IDs and Group IDs . . . . .	335
The <i>exportfs</i> Command . . . . .	338
Configuring an NFS Client . . . . .	339
The <i>mount</i> Command . . . . .	340
The <i>umount</i> Command . . . . .	342
Using <i>fstab</i> to Mount NFS Directories . . . . .	342
Automounter . . . . .	348
Understanding SMB and NetBIOS. . . . .	351
NetBIOS Name Service . . . . .	352
Installing Samba . . . . .	354
Configuring a Samba Server . . . . .	355
The <i>smb.conf</i> Variables. . . . .	356
The <i>smb.conf</i> Global Section . . . . .	358
The <i>smb.conf</i> Homes Section. . . . .	360
Sharing a Directory through Samba . . . . .	361
Using a Linux Samba Client. . . . .	363
Using <i>smbclient</i> . . . . .	364
Using <i>smbmount</i> . . . . .	365
In Sum. . . . .	367
<b>Chapter 10 Printer Services. . . . .</b>	<b>369</b>
Installing Printers . . . . .	369
Understanding <i>printcap</i> . . . . .	377
<i>printcap</i> Parameters. . . . .	378
A Sample <i>printcap</i> . . . . .	379
Sharing Printers with <i>lpd</i> . . . . .	381
Using <i>lpr</i> . . . . .	382
Managing <i>lpd</i> . . . . .	382
Sharing Printers with Samba . . . . .	386
Defining Printers in the <i>smb.conf</i> File . . . . .	387
Printers Share Section . . . . .	388

	<i>smb.conf</i> Printer Configuration Options. . . . .	389
	Using an SMB Printer. . . . .	390
	In Sum . . . . .	392
<b>Chapter 11</b>	<b>More Mail Services . . . . .</b>	<b>393</b>
	Understanding POP and IMAP . . . . .	393
	The POP Protocol . . . . .	394
	The IMAP Protocol. . . . .	397
	Running the POP and IMAP Daemons . . . . .	400
	Using POP or IMAP from a Client . . . . .	402
	Stopping Spam E-Mail . . . . .	403
	Don't Be a Spam Source. . . . .	404
	Using <i>sendmail</i> to Block Spam. . . . .	406
	Filtering Out Spam at the Mailer . . . . .	413
	In Sum . . . . .	422
<b>Part 4</b>	<b>Maintaining a Healthy Server</b>	<b>423</b>
<b>Chapter 12</b>	<b>Security. . . . .</b>	<b>425</b>
	Understanding the Threats . . . . .	426
	The Basic Threats . . . . .	426
	A Reality Check. . . . .	427
	Keeping Informed . . . . .	427
	Closing the Holes . . . . .	430
	Finding the Latest Software. . . . .	430
	Removing Unneeded Software . . . . .	432
	Controlling Access with <i>tcpd</i> . . . . .	433
	Tracking Remote Access. . . . .	434
	<i>tcpd</i> Access Control Files . . . . .	435
	Controlling Network Access with <i>xinetd</i> . . . . .	442
	Controlling Access with <i>iptables</i> . . . . .	445
	Maintaining Firewall Rules with <i>iptables</i> . . . . .	445
	Sample <i>iptables</i> Commands . . . . .	447

	Improving Authentication . . . . .	449
	Shadow Passwords . . . . .	450
	One-Time Passwords . . . . .	453
	Secure Shell . . . . .	457
	Monitoring Your System . . . . .	471
	Security Monitoring Tools . . . . .	472
	In Sum. . . . .	473
<b>Chapter 13</b>	<b>Troubleshooting . . . . .</b>	<b>475</b>
	Configuring the Linux Kernel . . . . .	476
	Configuring the Kernel with <i>xconfig</i> . . . . .	476
	Compiling and Installing the Kernel. . . . .	481
	Troubleshooting a Network Server . . . . .	483
	Diagnostic Tools . . . . .	484
	Checking the Network Interface . . . . .	485
	Checking an Ethernet Interface . . . . .	486
	Resolving Address Conflicts . . . . .	490
	Checking a PPP Interface . . . . .	495
	Testing the Connection . . . . .	498
	The Message of a Successful <i>ping</i> . . . . .	498
	The Message of a Failed <i>ping</i> . . . . .	499
	Testing Routing. . . . .	501
	Using <i>traceroute</i> . . . . .	501
	Analyzing Network Protocols . . . . .	503
	Checking Socket Status with <i>netstat</i> . . . . .	504
	Watching the Protocols with <i>tcpdump</i> . . . . .	507
	Testing Services . . . . .	511
	Testing DNS with <i>nslookup</i> . . . . .	512
	Testing DNS with <i>host</i> . . . . .	515
	Testing DNS with <i>dig</i> . . . . .	516
	In Sum. . . . .	518

<b>Appendices</b>	<b>519</b>
<b>Appendix A Installing Linux</b>	<b>521</b>
Installation Planning	523
Hardware Information	523
Network Information	525
Software Considerations	525
Selecting an Installation Method	526
Making a Boot Disk	527
Booting the Installation Program	528
Partitioning the Disk	530
Partition Planning	532
Partitioning with Disk Druid	537
Partitioning with <i>fdisk</i>	540
Installing the Boot Loader	545
Configuring the Ethernet Adapter	547
Configuring the Firewall	547
Installing the Software	551
X Windows	552
The Boot Floppy	555
In Sum	555
<b>Appendix B BIND Reference</b>	<b>557</b>
<i>named.conf</i> Commands	558
The <i>options</i> Statement	558
The <i>logging</i> Statement	568
The <i>zone</i> Statement	572
The <i>server</i> Statement	576
The <i>key</i> Statement	577
The <i>acl</i> Statement	578
The <i>trusted-keys</i> Statement	578
The <i>controls</i> Statement	579
BIND 9 <i>view</i> Statement	580

<b>Appendix C</b>	<b>The <i>m4</i> Macros for <i>sendmail</i></b>	<b>583</b>
	<i>define</i>	587
	<i>FEATURE</i>	596
	<i>OSTYPE</i>	601
	<i>DOMAIN</i>	606
	<i>MAILER</i>	609
	Local Code	611
	<i>DAEMON_OPTIONS</i>	611
	LDAP Mail Routing	613
	<i>Index</i>	614
