

INDEX

- 13, 14 and 15 times tables, 209–210
- addition, 5, 106–115
breakdown of numbers, 111–112
order of addition, 110–111
- calculators, 168
beating, 11–12
- casting out nines. *See* checking answers, substitute numbers
- checking answers, 34–42, 73–74
any size number, 38–41
casting out twos, tens and fives, 169–170
for division, 166–172
shortcut for, 38
substitute numbers, 35–42, 45–47, 113–115, 127–128, 170–172
why it works, 41–42
- combining methods, 18–20
- decimals, 77–86, 147–148, 184
rounding off, 147–148
- divisibility of numbers, 211–213
- division, 130–140, 166–172
by 9 (shortcut), 139–140
by numbers ending in 5, 144–146
changing to multiplication, 166–168
direct long division, 157–165
estimating answers, 160–162
larger numbers, 132–133
long division by factors, 141–148
long division made easy, 149–156
rounding upward, 162–165
smaller numbers, 131–132
using circles, 135–138
with decimals, 133–135
- doubling numbers, 57–58
- estimating, 160–162, 225–226
- factors, 43–45, 141–146
- fractions, 173–184
adding, 174–177
changing to decimals, 184

- fractions (*Continued*)
 dividing, 183
 multiplying, 181–183
 simplifying answers, 177–178
 subtracting, 179–181
- halving numbers, 57–58
- keeping count, 215–216
- long division. *See* division
- multiplication, 166–168
 by 5, 62–64
 by 9, 94–95
 by 11, 69–76
 by factors, 43–45
 by multiples of 11, 75–76
 direct, 185–194
 double, 18–20, 26–28
 explained, 5
 getting started, 4–12
 higher numbers, 54–56, 71–74
 lower numbers, 59–68
 numbers above 100, 21–22
 numbers above and below 20, 49–50
 numbers below 20, 47–49
 numbers in the teens, 21–24
 numbers just below 100, 9–11
 of decimals, 77–86
 two-digit numbers, 69–71
- negative numbers, 33, 191–194,
 217–218
- notes to parents and teachers, 20, 28,
 58, 74, 112, 115, 123–124, 129,
 156, 217
- numbers in circles, 6–9
 multiplying, 32–33
- percentages, 219–221
 calculating, 220–221
- positive numbers, 33, 217–218
- practice sheets, 231–238
- reference numbers, 13–17
 experimenting with, 64–68,
 99–102
 numbers above, 21–28
 numbers above and below, 29–33
 reasons for using, 14–16
 using 50, 50–53
 using 100, 16–17, 25
 using any number, 43–58
 using decimals, 102–105
 using factors as division, 96–99
 using fractions, 95–96
 using two numbers, 87–105
- remainders, 131–132, 139, 146,
 167–168
 finding with a calculator, 168
 remembering methods, 195–197
- solving problems in your head, 8–9,
 11, 17, 25–26, 27, 207–208
- speed mathematics method, 6–9
- squaring numbers ending in 5,
 227–229
- substitute numbers. *See* checking
 answers, substitute numbers
- subtraction, 116–129
 from a power of 10, 124–127
 numbers around 100, 119–121
 shortcut for, 31–32
 smaller numbers, 126–127
 written methods, 121–123
- test yourself, 8–9, 12, 16, 17, 24,
 27–28, 32, 47, 53, 57, 58, 62,
 63, 64, 70, 81, 82, 86, 105,
 107, 108, 109, 110, 118–119,
 121, 123, 126, 128, 138, 140,
 146, 148, 155, 164–165, 178,
 179, 180, 181, 229
- using the methods in class, 203–205
- working through problems,
 207–208
