Preface	vii	22 Periodontal tissue response, healing and monitoring	44
Acknowledgements and dedications	ix	23 Role of antimicrobial therapy in periodontal diseases	46
1 Anatomy of the periodontium	2	24 Periodontal surgery	48
2 Classification of periodontal diseases	4	25 Types of periodontal surgery	50
3 Periodontal epidemiology	6	26 Regenerative periodontal therapy	52
4 Role of plaque in the aetiology of periodontal diseases	8	27 Bone defects and furcation lesions	54
5 Plaque microbiology	10	28 Dental implants and peri-implantology	56
6 Calculus	12	29 Periodontic–orthodontic interface	58
7 Host defences	14	30 Plaque-induced gingivitis	60
8 Development of periodontal diseases	16	31 Non-plaque-induced gingival conditions and lesions	62
9 Progression of periodontal diseases	18	32 Gingival recession	64
10 Risk and periodontal diseases	20	33 Gingival overgrowth	66
11 Systemic risk factors for periodontal diseases	22	34 Chronic periodontitis	68
12 Periodontal diseases and general health	24	35 Aggressive periodontitis	70
13 Diet and periodontal diseases	26	36 Periodontal management of patients who smoke	72
14 Local risk factors for periodontal diseases	28	37 Periodontal management of patients with diabetes	74
15 Occlusion and periodontal diseases	30	38 Necrotising periodontal diseases	76
16 Periodontal history, examination and diagnosis	32	39 Periodontal abscess and periodontic–endodontic lesions	78
17 Periodontal screening	34	40 Periodontal diseases in children and adolescents	80
18 Role of radiographs in periodontal diagnosis	36	41 Periodontal management of the older adult	82
19 Principles of periodontal diagnosis and treatment planning	38	42 Team working in dental care	84
20 Plaque control and non-surgical periodontal therapy	40	43 The decision to treat or refer periodontal patients	86
21 Patient communication in dental care	42	Appendix: References and further reading	88
		Index	91
