Introduction	1
I Nicolaus Copernicus: The Loss of Centrality	3
1 Ptolemy and Copernicus	3
2 A Clash of Two Worldviews	4
2.1 The geocentric worldview	5
2.2 Aristotle's cosmology	5
2.3 Ptolemy's geocentrism	9
2.4 A philosophical aside: Outlook	14
2.5 Shaking the presuppositions: Some medieval developments	17
3 The Heliocentric Worldview	20
3.1 Nicolaus Copernicus	21
3.2 The explanation of the seasons	25
3.3 Copernicus and the Copernican turn	28
3.3.1 A philosophical aside: From empirical adequacy to theoretical validity	32
3.4 Copernicus consolidated: Kepler and Galileo	32
4 Copernicus was not a Scientific Revolutionary	37
4.1 The Copernican method	39
4.2 The relativity of motion	42
5 The Transition to Newton	43
5.1 On hypotheses	45
6 Some Philosophical Lessons	47
6.1 The loss of centrality	48
6.2 Was Copernicus a realist?	51
6.2.1 Lessons for instrumentalism and realism	52

6.3	Modern realism	55
6.4	The underdetermination of theories by evidence	58
6.4.1	The Duhem–Quine thesis	59
→ 6.4.2	The power of constraints	61
→ 6.5	Theories, models, and laws	64
→ 6.5.1	Theories and models	64
→ 6.5.2	Laws of nature, laws of science	68
→ 6.5.3	Philosophical views of laws	69
→ 6.5.3.1	The inference view	69
→ 6.5.3.2	The regularity view	70
→ 6.5.3.3	The necessitarian view	73
→ 6.5.3.4	The structural view	75
7	Copernicus and Scientific Revolutions	77
8	The Anthropic Principle: A Reversal of the Copernican Turn?	83
	Reading List	87
	Essay Questions	91
II	Charles Darwin: The Loss of Rational Design	93
1	Darwin and Copernicus	93
2	Views of Organic Life	94
2.1	Teleology	94
2.1.1	The <i>Great Chain of Being</i>	97
2.1.2	Design arguments	99
2.1.3	Jean Baptiste Lamarck	104
3	Fossil Discoveries	106
3.1	Of bones and skeletons	108
3.2	The antiquity of man	110
4	Darwin’s Revolution	112
4.1	The Darwinian view of life	114
4.1.1	Principles of evolution	116
4.2	The descent of man	119
5	Philosophical Matters	124
5.1	Philosophical presuppositions: Mechanical worldview, determinism, materialism	125
5.2	From biology to the philosophy of mind	129
5.2.1	Empiricism	129
5.2.2	Philosophy of mind	132
5.2.3	Emergent minds	134
5.3	The loss of rational design	136
5.4	Intelligent design (ID)	139
6	A Question of Method	143
6.1	Darwinian inferences	143
6.2	Philosophical empiricism	147
6.3	Some principles of elimination	149
→ 6.4	Essential features of eliminative induction	150

6.5	Falsifiability or testability?	155
6.6	Explanation and prediction	157
→ 6.7	Some models of scientific explanation	159
→ 6.7.1	Hempel's models	160
→ 6.7.2	Functional models	161
→ 6.7.3	Causal models	163
6.7.3.1	A counterfactual-interventionist account	163
6.7.3.2	A conditional model of causation	165
→ 6.7.4	Structural explanations	169
6.8	A brief return to realism	172
6.9	Darwin and scientific revolutions	174
6.9.1	Philosophical consequences	176
	Reading List	177
	Essay Questions	183
III	Sigmund Freud: The Loss of Transparency	185
1	Copernicus, Darwin, and Freud	185
2	Some Views of Humankind	187
2.1	Enlightenment views of human nature	188
2.2	Nietzsche's view of human nature	190
3	Scientism and the Freudian Model of Personality	191
3.1	Freud's model of the mind	192
3.1.1	A summary of psychoanalytic theory	192
3.1.2	Analogy with physics	195
3.1.3	Freud as an Enlightenment thinker	200
3.1.4	The scientific status of the Freudian model	202
3.1.4.1	Freud's methods	202
→ 3.1.4.2	The method of eliminative induction, again	205
3.1.5	Freud stands between the empirical and the hermeneutic models	208
3.1.6	The role of mind in the social world	209
4	The Social Sciences beyond Freud	210
4.1	Two standard models of the social sciences – some history	210
4.1.1	The naturalistic model	211
4.1.2	The hermeneutic model	213
4.2	Essential features of social science models	218
4.2.1	Essential features of the naturalistic model	218
4.2.2	Essential features of the hermeneutic model	221
4.3	Questions of methodology	224
→ 4.3.1	What is <i>Verstehen</i> ?	225
→ 4.3.2	Weber's methodology of ideal types	229
→ 4.3.3	<i>Verstehen</i> and objectivity	234
→ 4.4	Causation in the social sciences	236
→ 4.4.1	Weber on causation	236
→ 4.4.2	On the existence of social laws	239

4.4.3	Explanation and prediction in the social sciences	242
4.4.4	Underdetermination	243
4.4.5	Realism and relativism	244
→ 4.4.6	Reductionism and functionalism	248
5	Evolution and the Social Sciences	253
5.1	<i>Sociobiology</i> – the fourth revolution?	254
5.2	Evolutionary psychology	257
6	Freud and Revolutions in Thought	261
6.1	Revolutions in thought vs. revolutions in science	263
	Reading List	263
	Essay Questions	269
	Name Index	271
	Subject Index	274
