<b>Preface</b>	<b>xi</b>
<b>Acknowledgments</b>	<b>xiv</b>
<b>PART I Revenue Models of High-Frequency Trading</b>	<b>1</b>
<b>CHAPTER 1 High-Frequency Trading and Existing Revenue Models</b>	<b>3</b>
What Is High-Frequency Trading?	3
Why High-Frequency Trading Is Important	5
Major High-Frequency Trading Firms in the United States	6
Existing Revenue Models of High-Frequency Trading Operations	8
Categorizing High-Frequency Trading Operations	9
Conclusion	10
<b>CHAPTER 2 Roots of High-Frequency Trading in Revenue Models of Investment Management</b>	<b>13</b>
Revenue Model 1: Investing	14
Revenue Model 2: Investment Banking	17
Revenue Model 3: Market Making	18
Revenue Model 4: Trading	18
Revenue Model 5: Cash Management	19
Revenue Model 6: Mergers and Acquisitions	20
Revenue Model 7: Back-Office Activities	20

<b>Revenue Model 8: Venture Capital</b>	<b>20</b>
<b>Creating Your Own Revenue Model</b>	<b>21</b>
<b>How to Achieve Success: Four Personal Drivers</b>	<b>22</b>
<b>Conclusion</b>	<b>27</b>
<b>CHAPTER 3 History and Future of High-Frequency Trading with Investment Management</b>	<b>29</b>
<b>Revenue Models in the Future</b>	<b>30</b>
<b>Investment Management and Financial Institutions</b>	<b>31</b>
<b>High-Frequency Trading and Investment Management</b>	<b>32</b>
<b>Technology Inventions to Drive Financial Inventions</b>	<b>34</b>
<b>The Ultimate Goal for Models and Financial Inventions</b>	<b>34</b>
<b>Conclusion</b>	<b>37</b>
<b>PART II Theoretical Models as Foundation of Computer Algos for High-Frequency Trading</b>	<b>39</b>
<hr/>	
<b>CHAPTER 4 Behavioral Economics Models on Loss Aversion</b>	<b>41</b>
<b>What Is Loss Aversion?</b>	<b>41</b>
<b>The Locus Effect</b>	<b>41</b>
<b>Theory and Hypotheses</b>	<b>45</b>
<b>Study 1: The Locus Effect on Inertia Equity</b>	<b>49</b>
<b>Study 2: Assumption <math>A_1</math> and <math>A_2</math></b>	<b>51</b>
<b>General Discussion</b>	<b>53</b>
<b>Conclusion</b>	<b>55</b>
<b>CHAPTER 5 Loss Aversion in Option Pricing: Integrating Two Nobel Models</b>	<b>57</b>
<b>Demonstrating Loss Aversion with Computer Algos</b>	<b>57</b>
<b>Visualizing the Findings</b>	<b>59</b>
<b>Computer Algos for the Finding</b>	<b>61</b>
<b>Explaining the Finding with the Black-Scholes Formula</b>	<b>63</b>
<b>Conclusion</b>	<b>64</b>

<i>Contents</i>	<b>vii</b>
<b>CHAPTER 6 Expanding the Size of Options in Option Pricing</b>	<b>65</b>
<b>The NBA Event</b>	<b>66</b>
<b>Web Data</b>	<b>67</b>
<b>Theoretical Analysis</b>	<b>69</b>
<b>The NBA Event and the Uncertainty Account</b>	<b>72</b>
<b>Controlled Offline Data</b>	<b>77</b>
<b>General Discussion</b>	<b>80</b>
<b>Conclusion</b>	<b>82</b>
<b>CHAPTER 7 Multinomial Models for Equity Returns</b>	<b>85</b>
<b>Literature Review</b>	<b>87</b>
<b>A Computational Framework: The MDP Model</b>	<b>89</b>
<b>Implicit Consumer Decision Theory</b>	<b>94</b>
<b>Empirical Approaches</b>	<b>102</b>
<b>Analysis 1: Examination of Correlations and a Regression Model</b>	<b>102</b>
<b>Analysis 2: Structural Equation Model</b>	<b>106</b>
<b>Contributions of the ICD Theory</b>	<b>111</b>
<b>Conclusion</b>	<b>115</b>
<b>CHAPTER 8 More Multinomial Models and Signal Detection Models for Risk Propensity</b>	<b>117</b>
<b>Multinomial Models for Retail Investor Growth</b>	<b>117</b>
<b>Deriving Implicit Utility Functions</b>	<b>131</b>
<b>Transforming Likeability Rating Data into Observed Frequencies</b>	<b>140</b>
<b>Signal Detection Theory</b>	<b>143</b>
<b>Assessing a Fund's Performance with SDT</b>	<b>146</b>
<b>Assessing Value at Risk with Risk Propensity of SDT for Portfolio Managers</b>	<b>147</b>
<b>Defining Risk Propensity Surface</b>	<b>148</b>
<b>Conclusion</b>	<b>149</b>

<b>CHAPTER 9 Behavioral Economics Models on Fund Switching and Reference Prices</b>	<b>151</b>
What Is <i>VisualFunds</i> for Fund Switching?	151
Behavioral Factors That Affect Fund Switching	152
Theory and Predictions	157
Study 1: Arbitrary Anchoring on Inertia Equity	164
Study 2: Anchor Competition	166
Study 3: Double Log Law	169
Conclusion	179
<b>PART III A Unique Model of Sentiment Asset Pricing Engine for Portfolio Management</b>	<b>181</b>
<hr/>	
<b>CHAPTER 10 A Sentiment Asset Pricing Model</b>	<b>185</b>
What Is the Sentiment Asset Pricing Engine?	185
Contributions of SAPE	187
Testing the Effectiveness of SAPE Algos	190
Primary Users of SAPE	191
Three Implementations of SAPE	191
SAPE Extensions: TopTickEngine, FundEngine, PortfolioEngine, and TestEngine	193
Summary on SAPE	194
Alternative Assessment Tools of Macro Investor Sentiment	194
Conclusion	200
<b>CHAPTER 11 SAPE for Portfolio Management—Effectiveness and Strategies</b>	<b>201</b>
Contributions of SAPE to Portfolio Management	202
Intraday Evidence of SAPE Effectiveness	203
Trading Strategies Based on the SAPE Funds	206
Case Study 1: Execution of SAPE Investment Strategies	206
Case Study 2: The Trading Process with SAPE	214
Case Study 3: Advanced Trading Strategies with SAPE	217

<i>Contents</i>	<b>ix</b>
<b>Creating a Successful Fund with SAPE and High-Frequency Trading</b>	<b>221</b>
<b>Conclusion</b>	<b>223</b>
<b>PART IV New Models of High-Frequency Trading</b>	<b>225</b>
<b>CHAPTER 12 Derivatives</b>	<b>227</b>
<b>What Is a Derivative?</b>	<b>228</b>
<b>Mortgage-Backed Securities: Linking Major Financial Institutions</b>	<b>229</b>
<b>Credit Default Swaps</b>	<b>230</b>
<b>Options and Option Values</b>	<b>231</b>
<b>The Benefits of Using Options</b>	<b>234</b>
<b>Profiting with Options</b>	<b>234</b>
<b>New Profitable Financial Instruments by Writing Options</b>	<b>236</b>
<b>The Black-Scholes Model as a Special Case of the Binomial Model</b>	<b>237</b>
<b>Implied Volatility</b>	<b>238</b>
<b>Volatility Smile</b>	<b>238</b>
<b>Comparing Volatilities over Time</b>	<b>239</b>
<b>Forwards and Futures</b>	<b>240</b>
<b>Pricing an Interest Rate Swap with Prospect Theory</b>	<b>241</b>
<b>Behavioral Investing Based on Behavioral Economics</b>	<b>243</b>
<b>Conclusion</b>	<b>244</b>
<b>CHAPTER 13 Technology Infrastructure for Creating Computer Algos</b>	<b>245</b>
<b>Web Hosting versus Dedicated Web Servers</b>	<b>245</b>
<b>Setting Up a Dedicated Web Server</b>	<b>246</b>
<b>Developing Computer Algos</b>	<b>248</b>
<b>Jump-Starting Algo Development with PHP Programming</b>	<b>256</b>
<b>Jump-Starting Algo Development with Java Programming</b>	<b>266</b>
<b>Jump-Starting Algo Development with C++ Programming</b>	<b>273</b>
<b>Jump-Starting Algo Development with Flex Programming</b>	<b>274</b>
<b>Jump-Starting Algo Development with SQL</b>	<b>274</b>

<b>Common UNIX/LINUX Commands for Algo Development</b>	<b>276</b>
<b>Conclusion</b>	<b>277</b>
<b>CHAPTER 14 Creating Computer Algos for High-Frequency Trading</b>	<b>279</b>
<b>Getting Probability from Z Score</b>	<b>279</b>
<b>Getting Z Scores from Probability</b>	<b>281</b>
<b>Algos for the Sharpe Ratio</b>	<b>282</b>
<b>Computing Net Present Value</b>	<b>284</b>
<b>Developing a Flex User Interface for Computer Algos</b>	<b>286</b>
<b>Algos for the Black-Scholes Model</b>	<b>290</b>
<b>Computing Volatility with the ARCH Formula</b>	<b>292</b>
<b>Algos for Monte Carlo Simulations</b>	<b>293</b>
<b>Algos for an Efficient Portfolio Frontier</b>	<b>294</b>
<b>Algos for Signal Detection Theory</b>	<b>296</b>
<b>Conclusion</b>	<b>298</b>
<b>Notes</b>	<b>299</b>
<b>References</b>	<b>303</b>
<b>About the Author</b>	<b>313</b>
<b>Index</b>	<b>315</b>
