## ***Introduction*** ..... **1**

About This Book.....	1
How to Use This Book .....	3
Foolish Assumptions .....	3
How This Book Is Organized.....	4
Part I: First Things First .....	4
Part II: Importing and Organizing Your Media .....	4
Part III: Editing Your Media .....	5
Part IV: Adding Pizzazz .....	5
Part V: Outputting Your Masterpiece.....	6
Part VI: The Part of Tens .....	6
Icons Used in This Book.....	6
Contacting the Author .....	7

## ***Part 1: First Things First***..... **9**

### **Chapter 1: Introducing Final Cut Pro** ..... **11**

Understanding the Purpose of Editing .....	11
Exploring the Capabilities of Final Cut Pro .....	12
Appreciating nondestructive editing .....	13
Final Cut Pro versus the competition .....	13
New in Final Cut Pro HD (and the earlier version 4).....	14
Going with the Final Cut (Work) Flow.....	16
Taking a Grand Tour of the Interface.....	17
The Browser .....	18
The Viewer .....	19
The Timeline .....	20
The Tool palette.....	21
The Canvas.....	21

### **Chapter 2: Getting Started** ..... **23**

Hardware Requirements.....	23
Selecting and Configuring a Mac.....	24
CPU speed .....	26
Memory (RAM) .....	26
Disk storage for DV video.....	27

Monitors and LCDs.....	28
Doing DV? You need a FireWire port.....	29
DV videocameras and playback decks .....	30
Other optional hardware.....	30
Getting Started .....	32
Connecting and preparing all your hardware.....	32
Launching Final Cut Pro .....	34
Choosing an initial setup.....	35
Working with Projects and Sequences .....	37
Saving and autosaving projects.....	38
Setting up the Autosave feature .....	39
Managing projects .....	40
Adjusting Your Project and Sequence Settings .....	42
Choosing a different Easy Setup.....	44
Choosing a different preset.....	44
Creating new presets .....	44

### **Chapter 3: All About HD (High Definition) ..... 47**

What Is HD?.....	48
Supersharp image quality .....	48
Wide-screen aspect ratio.....	49
The many flavors of HD.....	49
How Final Cut Works with HD.....	51
The way things were .....	51
Final Cut Pro HD makes HD easy.....	51
Creating DVCPRO HD Video.....	53
Affordable HD Cameras — the Good and the Bad News.....	53

## ***Part II: Importing and Organizing Your Media .....57***

### **Chapter 4: Capturing Media from Tape ..... 59**

Connecting a DV Camera or Deck.....	60
Understanding Timecode.....	61
Capturing in the Log and Capture Window.....	61
Navigating through a DV tape.....	62
Describing and capturing video — the long way .....	64
Logging clips .....	66
Changing your logging bin .....	67
Capturing the video — the short way .....	68
Locating captured clips .....	70
Letting Final Cut Pro Find Scenes for You.....	72
Capturing over Timecode Breaks.....	73
Batch-Capturing Clips.....	75

**Chapter 5: Importing Media That’s Already on Your Mac . . . . . 77**

Your Media Files Are Welcome Here .....77  
 Some Media May Need Rendering .....78  
 Importing Your Media into Final Cut Pro .....79  
     Importing one or more files at a time .....80  
     Importing a folder full of files (or other folders).....81  
     Importing files by dragging them from the Finder .....82  
     Importing music tracks directly from a CD .....83  
     Importing Photoshop files (layers and all) .....84  
 Converting MP3 (and Other Kinds of Audio) with QuickTime Pro.....86

**Chapter 6: Organizing Your Media . . . . . 91**

Working in the Browser .....91  
     Using bins .....93  
     Viewing clips as icons or in lists.....93  
     Figuring Out the Browser Icons .....95  
 Using Browser Columns .....96  
     Understanding the column headings.....97  
     Sorting clips by column.....98  
     Working with column headings .....98  
     Changing names and settings in a column.....99  
 Making Copies of Clips .....100  
 Adding Transitions and Effects to the Favorites Bin .....101  
 Finding Clips Fast .....102  
     Searching by clip name.....102  
     More-powerful searches .....103  
 Dealing with Offline Media .....104  
     Recapturing deleted clips .....106  
     Reconnecting an offline clip.....106

***Part III: Editing Your Media*..... 109**

**Chapter 7: Editing Basics . . . . . 111**

Understanding the Editing Process .....111  
     Getting to know the Timeline.....113  
     Playing back video: The Viewer and Canvas windows .....114  
     Looking at timecode data in the Viewer and Canvas.....116  
 Moving Clips to the Timeline.....117  
     Inserting and overwriting.....117  
     Choosing the right track on the Timeline .....119  
     Using a shortcut to insert and overwrite.....120  
     Setting a clip’s In and Out points in the Viewer .....120  
     Recycling a clip by changing its In and Out points.....122

Selecting Clips on the Timeline .....	122
Moving a Clip That's Already on the Timeline .....	125
Overwriting a moved clip .....	125
Swapping a moved clip .....	125
Inserting or overwriting a copied clip .....	126
Speeding Editing with Snapping .....	127
Resizing Clips That Are Already on the Timeline .....	127
Resizing clips directly on the Timeline .....	128
Resizing clips in the Viewer window .....	129
Understanding the limitations of resizing clips .....	131
Cutting a Clip in Two .....	132
Deleting Clips from the Timeline .....	134
Using lift edits and ripple deletes .....	135
Deleting a range of frames on multiple tracks .....	136
<b>Chapter 8: Getting to Know the Timeline .....</b>	<b>137</b>
Investigating Timeline Tracks .....	137
Locking tracks so that they can't be changed .....	138
Muting and soloing audio tracks .....	140
Hiding video tracks so that they don't play .....	141
Setting up destination tracks on the Timeline .....	141
Adding and deleting tracks from the Timeline .....	144
Customizing Your View of the Timeline .....	147
Making Timeline tracks big and small .....	148
Customizing other Timeline stuff .....	149
Navigating the Timeline .....	154
Moving the playhead anywhere on the Timeline .....	154
Moving the playhead linearly through the Timeline .....	155
Zooming In and Out of the Timeline .....	156
Some Timeline Details .....	158
<b>Chapter 9: Editing Wizardry .....</b>	<b>161</b>
Going Beyond Insert and Overwrite Edits .....	161
Replace edits .....	161
The Match Frame feature .....	163
Fit-to-fill edits .....	165
Superimpose edits .....	166
Splitting Video and Audio Edits .....	167
Splitting edits from the Viewer .....	168
Splitting edits on the Timeline .....	169
Using Advanced Editing Tools .....	170
Resizing clips with roll and ripple edits .....	171
Slip-slidin' clips .....	175

Using Markers to Highlight Important Moments .....	179
Setting markers .....	179
Renaming, deleting, and designating markers .....	182
Searching for markers .....	183
Playing a Clip Backward .....	184
Changing a Clip's Speed .....	185
Setting a constant speed .....	186
Setting a variable speed .....	187
Stopping Action with a Freeze Frame .....	191
Nesting a Sequence into Another Sequence .....	192
Adding a Voice-Over to a Sequence .....	193

***Part IV: Adding Pizzazz* ..... 197**

**Chapter 10: Audio Excellence ..... 199**

Some Audio Basics .....	200
Capturing and maintaining high-quality audio .....	200
Understanding stereo and mono audio .....	201
Rendering audio .....	202
Three Ways to Set Volume Levels .....	204
Changing the volume of audio clips in the Viewer .....	205
Adjusting the volume of clips on the Timeline .....	210
Mixing with the Audio Mixer .....	212
Panning an Audio Clip .....	217
Creating Audio Transitions .....	219
Working with Audio Filters .....	221
Applying an audio filter and changing its parameters .....	221
Changing filter parameters over time with keyframes .....	223
Disabling and deleting filters .....	226
Getting quick access to your favorite filters .....	226
Exploring Audio Filters .....	226
Equalization filters .....	227
Echoes and reverberations .....	227
Compression and expansion filters .....	228
Noise-reduction filters .....	229
Copying and Removing Audio Attributes .....	229

**Chapter 11: Composing a Soundtrack ..... 231**

Getting Started .....	232
Installing and launching .....	232
A quick overview of the interface .....	233
Creating Your Soundtrack .....	235
Getting video into soundtrack .....	235
Establishing your score's master settings .....	238

Finding the right loops .....	239
Editing loops on the Timeline .....	241
Looking at your Timeline options .....	244
Changing volume, pan, and key .....	245
Other Stuff .....	249
Markers mark important moments .....	249
Applying effects .....	251
Making your own loops and one-shots .....	252
Exporting Your Score .....	252

## **Chapter 12: Creating Transitions . . . . . 255**

Exploring the Types of Transitions in Final Cut Pro .....	255
Applying Your First Transition .....	257
Looking at the Many Ways to Apply Transitions .....	259
Dragging transitions from the Browser to the edit point on the Timeline .....	260
Using the keyboard shortcut .....	260
Copying and pasting a transition .....	261
Editing Clips and Adding Transitions .....	261
Rendering Transitions .....	263
Rendering a single transition .....	263
Rendering all transitions in a range .....	264
Modifying Transitions .....	264
Changing the duration of a transition .....	264
Changing the alignment of a transition .....	266
Moving transitions .....	267
Replacing and removing transitions .....	267
Fading In and Out .....	267
Saving and Organizing Custom Transitions .....	268
Using the Transition Editor to Customize a Transition .....	269

## **Chapter 13: Adding Text to Your Videos . . . . . 271**

Formatting Text for Display on a TV .....	271
Selecting the right font size .....	272
Avoiding thick and thin .....	272
Using textures and colors sparingly .....	273
Getting Started with a Text Generator .....	274
Creating Text with Final Cut Pro .....	275
Creating text and adding it to a video .....	275
Understanding the options on the Controls tab .....	279
Touring the text generators .....	282
Creating titles on colored backgrounds .....	285
Creating Titles with LiveType .....	286
Exporting a movie from Final Cut Pro to use with LiveType .....	287
Using LiveType to create a new title .....	288

Using Titles and Text Created Outside Final Cut Pro .....291  
 Working with Photoshop and Final Cut Pro.....291  
 Preparing Photoshop Text for Final Cut Pro.....292

**Chapter 14: Special Effects with Filters and Color Correction .....295**

Shooting Video with Effects in Mind.....296  
 Making a Colored Clip Black and White .....296  
 Getting That Old, Grainy Video Look.....298  
 Changing Colors .....300  
     Using mattes .....300  
     Using the RGB Balance tool .....302  
 Working with Color-Correction Tools .....304  
     Selecting and changing the color of an object.....307  
     Copying color-correction settings to other clips .....309  
 Fixing or Adjusting Exposures.....309  
 Comparing Results with the Frame Viewer .....312  
 Checking Out More Handy Filters .....313  
 Blurring the Action .....315  
 Saving and Applying Customized Filters.....316

**Chapter 15: Motion Effects .....319**

Manipulating Images in Wireframe Mode .....319  
     Scaling, rotating, and moving images .....321  
     Cropping or distorting an image .....322  
     Working in Wireframe mode in the Viewer .....323  
 Changing Images with the Motion Tab .....324  
 Using Keyframes to Change Motion Settings over Time.....326  
     Using keyframes to set clip opacity .....327  
     Editing existing keyframes .....329  
     Using keyframes to set other motion values .....329  
     Editing motion keyframes .....332  
 Creating a Multiple-Screen Effect .....333

**Chapter 16: Compositing .....337**

Choosing a Composite Mode.....338  
 Applying a Composite Mode.....340  
 Understanding Alpha Channels.....342  
 Compositing with Mattes and Keys .....342  
     Creating a simple matte.....343  
     Compositing with keys .....347  
     Tips for getting clean keys .....350

**Part V: Outputting Your Masterpiece .....353****Chapter 17: Recording to Tape .....355**

Setting Up for Recording .....	355
Looking out for dropped frames!.....	357
Recording to DV tape with a camera or deck.....	358
Recording to VHS.....	358
Recording to Tape .....	361
Recording directly from the Timeline.....	361
Printing to video .....	363
Editing to tape.....	365
Editing Online versus Offline.....	369

**Chapter 18: Exporting Your Movie to a Digital File .....371**

Working with QuickTime Video.....	372
Getting to Know Codecs.....	373
Looking at the Video Codecs.....	374
Looking at the Audio Codecs.....	376
Knowing Your Data Rates.....	377
Export Away!.....	378
Exporting a Batch of Movies.....	381
Easy Exporting with the Compressor Application.....	383
Exporting video from Final Cut Pro using Compressor.....	384
Batch-exporting sequences with Compressor.....	386

**Part VI: The Part of Tens .....389****Chapter 19: Ten Tips for Becoming a Better Editor .....391**

Try Out the Final Cut Pro Tutorials .....	391
Study (Don't Just Watch) Movies and Commercials .....	392
Practice on Someone Else's Real-World Footage .....	392
Go Online and Find a Community .....	392
Join a Final Cut Pro User Group .....	393
Upgrade Your Hardware.....	393
Upgrade Your Software.....	394
Curl Up with a Good Book.....	395

**Chapter 20: Almost Ten Tips for Managing Big Projects .....397**

Keep Your Media Files Organized .....	398
Use Bins — Lotsa Bins!.....	398
Keep Your Clip Names Informative.....	399
Document Your Clips.....	400

---

Use the Find Feature .....	401
Stay Oriented with Markers .....	401
Break Scenes into Sequences and Nest 'em Together .....	403
Save on Hard Drive Space .....	403
