PART IV	XML Scripting and Processing	331
Chapter 12	Transforming XML: Introducing XSLT <i>Adapted from Mastering™ XML, Premium Edition</i>	333
Chapter 13	Modeling the XML Document Object <i>Adapted from XML Developer's Handbook</i>	415
Chapter 14	XML Solutions in Perl <i>Adapted from XML Processing with Perl™, Python, and PHP</i>	479
Chapter 15	Applying SOAP/XML-RPC in Perl <i>Adapted from XML Processing with Perl™, Python, and PHP</i>	505
Chapter 16	XML Solutions in Python <i>Adapted from XML Processing with Perl™, Python, and PHP</i>	527
Chapter 17	Python and Unicode <i>Adapted from XML Processing with Perl™, Python, and PHP</i>	547
Chapter 18	Applying SOAP/XML-RPC in Python <i>Adapted from XML Processing with Perl™, Python, and PHP</i>	559
Chapter 19	XML and Tcl <i>Adapted from XML Processing with Perl™, Python, and PHP</i>	577
Chapter 20	XML and PHP <i>Written for XML Complete by Martin C. Brown</i>	597
Chapter 21	Servlets, JSP, and XML <i>Adapted from Java™ Developer's Guide to Servlets and JSP</i>	629
PART V	E-Commerce Solutions with XML and JSP	673
Chapter 22	Presenting an XML Catalog Online <i>Adapted from Java™ Developer's Guide to E-Commerce with XML and JSP</i>	675
Chapter 23	Using Surveys to Know Your Customer <i>Adapted from Java™ Developer's Guide to E-Commerce with XML and JSP</i>	709
Chapter 24	And Now for the News <i>Adapted from Java™ Developer's Guide to E-Commerce with XML and JSP</i>	765

Contents at a Glance **xi****Appendices**

Appendix A	Extensible Markup Language (XML) 1.0 (Second Edition) <i>Adapted from Mastering™ XML, Premium Edition</i>	803
Appendix B	XML Schema Elements <i>Compiled for XML Complete by Chuck White</i>	865
Appendix C	SOAP Reference <i>Compiled for XML Complete by Chuck White</i>	913
	<i>Index</i>	921

CONTENTS

<i>Introduction</i>	<i>xxvii</i>
Part I ► XML Fundamentals	1
Chapter 1 Creating XML Documents	3
Creating an XML Document	4
Two Kinds of “Legal” XML	7
Well-Formed XML Documents	7
Valid XML Documents	8
Understanding General Syntax	8
The Basic Rules	9
Characters, Markup, and Tags	15
The Components of an XML Document	20
The Document Prolog	20
The Document Instance	23
Processing Instructions	32
Comments	33
Introduction to Namespaces	34
A Hypothetical Namespace Application	35
Choosing between a DTD and a Schema	37
Building a Complete XML Document	39
Summary	41
Chapter 2 Understanding and Creating Elements	43
What Is an Element?	45
Structuring Element Tags	46
Understanding the Difference between Tags and Elements	47
Following the Basic Rules	48
Creating Your First Elements	49
Using Content Models	50
Understanding Nesting and Hierarchy	57
The Role of Elements in the DOM	64
Thinking about Objects	64
Writing Well-Formed Documents	67
Common Markup Problems	67

xiv Contents

Managing Data Content within Elements	71
Getting an Element from a Database	76
Using SQL Server 2000 to Generate XML Elements	76
Mapping Elements	79
Summary	82
Chapter 3 Understanding and Creating Attributes	83
What Is an Attribute?	84
Understanding Attribute Syntax	86
Understanding Attribute Types	87
Learning about Attribute Lists	88
Managing Attribute Types	93
Putting It All Together	110
Example 1: A Simple XML Application	110
Example 2: A More Complex XML Application	117
Summary	126
Chapter 4 Understanding and Creating Entities	127
Learning the Basics about Entities	128
Using Entities	129
Making Sure Your Entity Markup Is Legal	130
Understanding General Entities	131
Using Predefined Entities	132
Working with Character References	133
Using Parsed Entities	143
Managing Unparsed Entities	146
Using Internal and External Entities	148
Harnessing the Power of Entities	150
Developing General Entities	150
Using Parameter Entities	154
Developing Parameter Entities	155
Summary	157
Part II ► XML Data Design	159
Chapter 5 XML Design Principles	161
Selecting a Design Methodology	162
The Chief Engineer Approach	162
The Facilitated Team Approach	164

The Informed Partnership Approach	165
The Functional Specification	166
Design Meetings	167
Document Analysis	168
Using Structure Charts	168
Using Reference DTDs, Schemas, or Vocabularies	170
Modeling an Existing Database	173
Basic Design Decisions	174
Modeling High-Level Structures	180
Creating Building-Block Elements	180
Using Element Classes	181
XML Usability	182
Now Throw Your Schema Away!	184
Summary	184
Chapter 6 Creating Your Own DTD	185
When to Create Your Own DTD	186
The Building Blocks	187
Processes and People	188
Getting the Right People Involved	189
Milestones	189
Change Requests	189
Making the First Draft	190
Beyond the First Draft	191
Elements and Attributes	191
XML Names	191
Declaring Elements	193
Printing Element Declarations	196
Declaring Attributes	197
Attribute Types	198
Attribute Default Values	200
When to Use Attributes	201
Printing Attribute Declarations	202
General Entities	203
Internal General Entities	203
External General Entities	204
Parameter Entities	204
Running Text	205
Using Parameter Entities in Conditional Sections	205

xvi Contents

Printing Entity Declarations	207
Unparsed Entities and Notations	207
Declaring a Notation	207
Unparsed Entities	208
Notation Attributes	208
Comments	209
Printing Comments	210
The Document Type Declaration and the Internal Subset	210
Restrictions on the Internal Subset	212
Public Identifiers	212
Overriding Entities in the Internal Subset	213
Adding Attribute Declarations in the Internal Subset	214
Tools for Understanding and Building DTDs	214
Summary	214
Chapter 7 An Introduction to XML Schemas	215
What Is an XML Schema?	216
When to Use XML Schemas	216
Features Specific to a DTD	217
Features Specific to an XML Schema	217
When to Use Both a DTD and an XML Schema	219
When to Use Neither a DTD nor an XML Schema	219
Upgrading from a DTD to an XML Schema	219
A Short Example	220
Linking a Schema and a Document	222
Summary	224
Chapter 8 Writing XML Schemas	225
Schema Variations	226
The W3C XML Schema	226
The Microsoft XML Schema	227
The RELAX Schema	227
The W3C XML Schema	227
Declaring Elements	233
Types Explained	234
Using Patterns	239
RELAX Schemas	240
Summary	242

Part III ► Working with XHTML **243**

Chapter 9 XHTML Structure and Form **245**

A Well-Formed Document	246
XML Rules	246
Parser's Response	253
Validity	255
DTDs as Applied to XHTML	256
The Heart of an XHTML DTD	256
Referencing the Three Flavors of XHTML	258
DOCTYPE Declarations	258
Syntax	259
XHTML DTDs	262
XML Namespaces	264
Default Namespaces	266
Local Namespaces	267
The Required XHTML Namespace	269
Combining Namespaces	269
Sample XHTML Documents	271
Summary	272

Chapter 10 Creating Your First XHTML Document **273**

Creating, Saving, and Viewing XHTML Documents	274
Applying Document Structure Elements	276
The DOCTYPE Declaration	277
The <i>html</i> Element	279
The <i>head</i> Element	280
The <i>body</i> Element	283
Applying Basic Elements	285
About Common Attributes	285
Deprecated Elements Abound	286
Creating Paragraphs	287
Creating Headings	289
Creating Lists	291
Including Horizontal Rules	301
Specifying Line Breaks	303
Including Fancier Formatting	303
Adding Colors	304

xviii Contents

Specifying Fonts and Font Sizes	307
Summary	310
Chapter 11 Converting HTML to XHTML	311
Why Convert Your Documents?	312
Converting Documents by Hand	313
Backward Compatibility	313
The Rules	315
Summing It Up	317
Working with Tidy	320
Using Tidy from the Windows Command Prompt	323
Using TidyGUI	325
Using Tidy in HTML-Kit	326
Using Tidy on the Mac	329
Summary	330
Part IV ► XML Scripting and Processing	331
Chapter 12 Transforming XML: Introducing XSLT	333
Defining XSLT	334
Understanding Transformations	335
Getting Started with XSLT Tools	336
Learning about XSLT Node Types	338
Learning about XSLT Formatting	340
Letting Built-In Transformations Take Over	342
What Transformations Are Not	343
Learning about Pattern Matching and Selecting	344
Understanding Selection Patterns	350
Using Expressions	350
Evaluating Expressions	351
Using Node Tests	352
Using XSLT Predicates and Expression Operators	352
Using Operators	353
Creating an XSLT Document	360
Managing XSLT Processing Instructions	360
Establishing the Root Element	361
Mastering Templates	368
Understanding the Concept of Templates	368
Using Template Elements	369

Outputting Result Trees	374
Managing Output	378
Managing Elements and Attributes	379
Managing Text	384
Importing Document Trees	388
Managing Numbers and Sorting	390
Keys and Conditional Processing	392
Using Variables in XSLT	400
Using Variable Elements	400
Using Attribute Value Templates	404
Learning about Extensions	405
Miscellaneous Elements and Attributes	406
Taking Advantage of XSLT Functions	407
Summary	413
Chapter 13 Modeling the XML Document Object	415
Understanding Object-Oriented Programming	416
The XML Document Object Model	417
Examining the XML Document	419
Loading Documents	422
Error Handling with ParseError	425
Outputting XML Files	429
Scratching the Surface	430
Working with Nodes	431
Navigating Nodes	433
Getting Nodes by Name	438
Node Types	442
Creating, Adding, and Deleting Nodes	443
Examining Text in Nodes	450
CDATA Nodes	453
Understanding Attributes	457
Attributes versus Elements	458
Attributes and Nodes	459
Using Attributes and Elements	464
Comments	468
Processing Instructions	469
Asynchronous XML and Events	473
Summary	478

Chapter 14 XML Solutions in Perl	479
Using XML::Parser	480
Using XML::Parser to Convert to HTML	481
XML::Parser Traps	490
XML Processing Using SAX	491
XML Processing Using DOM	493
Generating XML	498
Other XML Modules	500
DBIx::XML_RDB	500
XML::RSS	501
Summary	504
Chapter 15 Applying SOAP/XML-RPC in Perl	505
Introducing SOAP::Lite	506
How SOAP::Lite Works	509
SOAP Client Programming	510
Explicit Calls	510
Automatic Calls	510
Getting Multiple Return Values	511
Using Objects and Methods	513
Creating SOAP Servers	514
Dispatch Methods	514
SOAP Support Modules	517
Migrating Existing Modules	518
Debugging SOAP::Lite	519
Avoiding Problems	519
Diagnosing Problems	520
Using XML-RPC	522
Where Next with SOAP::Lite and XML-RPC	525
Summary	525
Chapter 16 XML Solutions in Python	527
The xmllib Module	528
Understanding XMLParser	529
Identifying XML Elements	531
Beyond xmllib	533
Parsing Using Expat	533
Parsing Using SAX	536

Parsing Using DOM	538
Using minidom	539
DOM in Action	542
Building XML Documents with DOM	544
Summary	546
Chapter 17 Python and Unicode	547
Creating Unicode Strings	548
Translating Unicode	549
Encoding to Unicode Formats	550
Decoding to Unicode Formats	551
Unicode and XML in Python	552
Translating Character Numbers	553
Accessing the Unicode Database	553
Writing Your Own Codec	554
Summary	558
Chapter 18 Applying SOAP/XML-RPC in Python	559
Using SOAP	560
Writing SOAP Clients	561
Writing SOAP Servers	566
Debugging	568
XML-RPC Solutions	569
XML-RPC Walkthrough	569
Debugging XML-RPC	574
Summary	576
Chapter 19 XML and Tcl	577
The TclXML Parser	578
Configuring the Parser	582
Error Handling	586
Tcl and Unicode	587
Viewing XML with Tk	588
Using XML-RPC	592
Writing an XML-RPC Client	593
Writing an XML-RPC Server	594
Summary	596

xxii Contents

Chapter 20 XML and PHP	597
Building a Simple XML Parser	598
Inside the XML Parser	604
Initial Setup	605
Supported Entity Handlers	607
Getting/Setting Options	609
Error Trapping	610
Converting XML to HTML	612
Using XML-RPC	619
Writing an XML-RPC Client	621
Writing an XML-RPC Server	625
Summary	628
Chapter 21 Servlets, JSP, and XML	629
Basic XML and Java Configurations	630
Starting an XML File	630
The DOM and SAX Programming Models	634
Programming with the DOM	636
Parsing XML to Create a DOM	636
The Java Objects in a DOM	637
Manipulating the DOM	639
Programming with SAX	640
Interfaces for Event Handlers	640
Interfaces for SAX Parsers	642
Classes for Parsers	643
A SAX Example	643
The XML Document for Errata	644
The ErrataParserBean Class	646
A DOM Example	656
The Publications DTD	656
A DOM Library Function	658
The BookDOMbean Class	662
Using BookDOMbean in a JSP Page	668
Alternatives to SAX and DOM	670
Java Document Object Model (JDOM)	670
Related Technology	670
Summary	671

Part V ▶ E-Commerce Solutions with XML and JSP	673
Chapter 22 Presenting an XML Catalog Online	675
Presentation Technologies	676
The HTTP Conversation	676
The API for Java Servlets	678
The API for JavaServer Pages	685
Organizing the Catalog	689
The W3C Document Object Model API	689
Creating the Catalog DOM	690
Creating Indexes for Product Lookup	694
Information Flow for Presentation Generation	697
Presenting Choices	697
Formatting Product Descriptions	700
Summary	708
Chapter 23 Using Surveys to Know Your Customer	709
Customer Privacy Concerns	710
Industry Standards	710
Public Interest Organizations	711
Determining the Flow of Questions	712
A Sample Survey	714
The Survey Administering Servlet	716
The Survey Servlet Code	716
Survey Analysis Options	738
XML Document Library Utility	756
Summary	763
Chapter 24 And Now for the News	765
Designing a News System	766
Flexibility of Output	766
Ease of Data Entry	769
Minimum Server Load	770
The News System	770
Web Page Presentation	771
The NewsFormatter Class	772

xxiv Contents

Using NewsFormatter	784
Adding the Latest News	790
The CompanyNewsServ Servlet	790
The NewsUpkeep Class	796
Summary	802

Appendices**Appendix A Extensible Markup Language (XML) 1.0
(Second Edition) 803**

Understanding BNF Grammar	804
Basic Notation	804
BNF Symbols and Operators	804
Extensible Markup Language (XML) 1.0 (Second Edition)	805
W3C Recommendation 6 October 2000	805
Abstract	806
Status of This Document	806
Table of Contents	807
1 Introduction	809
2 Documents	812
3 Logical Structures	824
4 Physical Structures	836
5 Conformance	849
