<b>1 Putting residential development in a sustainable context</b>	<b>1</b>
Introduction	1
Definitions of sustainable development and sustainable landscape	3
Sustainable development	3
Sustainable landscape	4
Sustainable development in English planning and development	8
The key role of housing in sustainable development	12
Current concepts and initiatives for delivering sustainable homes in England	17
What impact have these initiatives had on delivering sustainable residential communities?	22
References	25
<b>2 Opportunities for improving the sustainable profile of new residential developments</b>	<b>29</b>
Introduction	29
Conservation of resources and minimisation of pollution and waste	29
Energy consumption and microclimate control	29
Encouraging walking and cycling	33
Specification and detailed design of hard landscape materials	37
Specification and detailed design of soft landscape materials – vegetation	52
Water management	63
Enhancement of site ecological function and human well-being	73
Site ecological function	73
Providing for the health and well-being of residents	79
References	89

<b>3</b>	<b>Creating a residential landscape sustainability checklist</b>	<b>99</b>
	Introduction	99
	A review of sustainable checklist tools for residential development	99
	A detailed description of the template BRE <i>EcoHomes</i> method	104
	Adapting the <i>EcoHomes</i> method for landscape assessments	106
	The Energy Category	106
	The Transport Category	108
	The Pollution Category	108
	The Materials Category	110
	The Water Category	112
	The Ecology and Land Use Category	113
	The Health and Well-Being Category	113
	Adjusting the <i>EcoHomes</i> weighting factors	116
	Setting compliance standards	116
	Judging visual qualities	117
	General limitations of the checklist assessment approach	118
	References	119
<b>4</b>	<b>Case studies: applying the Residential Landscape Sustainability Checklist</b>	<b>121</b>
	Introduction	121
	Greenwich Millennium Village, London	122
	Childwall, Liverpool	125
	Evaluation of the case studies against the Residential Landscape Sustainability Checklist	126
	The Energy Category	126
	The Transport Category	127
	The Pollution Category	128
	The Materials Category	133
	The Water Category	142
	The Ecology and Land Use Category	142
	The Health and Well-Being Category	144
	What factors encouraged and discouraged residential landscape sustainability?	150
	Factors which contribute to delivering residential landscape sustainability	151
	Factors which may undermine landscape sustainability	152
	Conclusion	155
