

# Contents

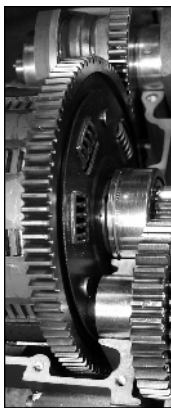

<i>Introduction</i>	<i>xv</i>
<b>Chapter 1 What's Involved: Defining the Position</b>	<b>1</b>
Overview of Tasks . . . . .	2
The Real Tasks	3
More Examples	4
Task List Conclusions	5
Understanding the Users' Perspective . . . . .	6
Management's Perspective . . . . .	7
You're Never Done, Though	8
Balancing Tasks and Perspectives . . . . .	9
Simplifying Your CAD Management Equation	9
The Business Angle: Money Talks! . . . . .	11
A Quick Example	12
Evaluating Tasks Based on Finances	13
Gaining the Power to Do Your Job . . . . .	14
Making It Happen . . . . .	16
<b>Chapter 2 Taking Stock of Your Current Situation</b>	<b>17</b>
User Skills Assessment . . . . .	18
Deploying a Test	19
Interpreting Results	19
Attitudinal and Management Issues	21
Drawing Conclusions	21
Software Assessment . . . . .	22
Summarizing Your Findings	22
Hardware Assessment . . . . .	23
Example Case Revisited	24
Drawing Conclusions	24
IT Assessments . . . . .	26
Network Changes	26
File Sharing/Security	27
The Working Relationship	28
Finding Red Flags in Your Assessment	29
Conclusions Drawn	29

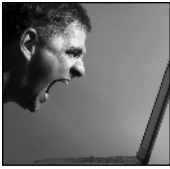

Budgetary Assessment . . . . .	29
Making the Assessment	30
Find the Disconnects	31
Drawing Conclusions	32
Standards/Process Assessments . . . . .	32
A Formulaic Approach	33
Getting Ideas	34
No Shortcuts	34
Drawing Conclusions	35
Prioritizing Based on Need . . . . .	35

<b>Chapter 3 Managing Your Management</b>	<b>37</b>
Manage: Not Manipulate . . . . .	38
Debunking the Myths . . . . .	39
Why Management Is out of the Technology Loop . . . . .	42
Meeting Company Needs—Not User Wants . . . . .	42
Explaining Standards to Management . . . . .	44
Managing Management’s Expectations . . . . .	46
Reporting to Your Management . . . . .	46
Why Reporting Matters so Much	48
Avoiding the Technology vs. Management Trap via Clear Communication . . . . .	48
It’s All About Balance	49

<b>Chapter 4 Managing Standards</b>	<b>51</b>
Formulating and Writing Standards . . . . .	52
Existing Standards: AIA, U.S. National CAD Standard, and Others . . . . .	54
Information Exchange . . . . .	56
Vendor Control via Standards . . . . .	57
Auditing and Taking Control	59
Working to Client Standards . . . . .	60
Getting Started	61
Outsourcing Control . . . . .	62
Standard Application Deployment . . . . .	64
Managing the Multi-CAD Office . . . . .	65
Processes Will Change; React Accordingly	66
Documenting What You’ve Found	68
Standards Enforcement via Management . . . . .	68
Getting Help with Enforcement	69
Bringing It All Together . . . . .	70

**Chapter 5 Training, Hiring, and Managing Users 73**

Training Methodology . . . . . 74  
 Sorting Out the Methods . . . . . 77

Building a Training Plan . . . . . 78  
 Identifying Training Needs . . . . . 78  
 Connecting Training and Standards . . . . . 79  
 Fixing Processes/Standards (If Required) . . . . . 80

Delivering Your Own Training . . . . . 80  
 Prepare with Good Materials . . . . . 80  
 Delivering Training . . . . . 81  
 Recycling Training for Maximum Effect . . . . . 83

Hiring and Testing Staff . . . . . 84  
 Avoiding Bad Hires . . . . . 85  
 Prioritizing the Candidates . . . . . 87  
 Selling the Value . . . . . 88

Diagnosing Existing User Skills . . . . . 88

Encouraging Self Study . . . . . 89

Making the Most of Your Power Users . . . . . 90

Creating Junior CAD Managers . . . . . 92

Handling Renegade Users . . . . . 93

Summary . . . . . 96

**Chapter 6 Managing Software (and Change) 97**

Changing Methods . . . . . 98

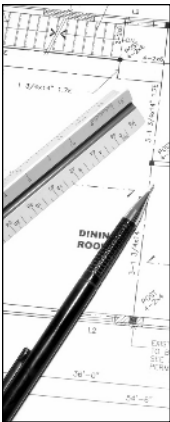

Understanding Software Licensing . . . . . 99  
 It's Not Really Your Software . . . . . 99  
 It's Really a Lease . . . . . 100  
 Licensing Limitations . . . . . 101

Purchasing Software . . . . . 102  
 Informing Management . . . . . 105

Performing Upgrades . . . . . 105  
 Understanding the True Cost . . . . . 105  
 Computing the Benefits . . . . . 106  
 Making the Decision . . . . . 107  
 Upgrade Barriers . . . . . 108  
 Training Notes . . . . . 109  
 Closing Thoughts . . . . . 109

Easing the Transition . . . . . 110  
 Juggling It All . . . . . 111

Analyzing 3D Migration . . . . . 111  
 Handling Objections . . . . . 112  
 Knowing What to Buy . . . . . 115  
 Setting Management's Expectations . . . . . 116

Budgeting Notes	117
Setting the Time Table	118
Managing Complex File Relationships	118
Putting It All Together	119
Summary . . . . .	120

**Chapter 7 Understanding Financial Processes 121**

Budgeting . . . . .	122
Managing Perception	122
Gathering Data	123
Changing Parameters	123
Using a Disciplined Approach	125
The Faster/Cheaper Paradigm . . . . .	127
Examining Old Projects	127
Faster or Cheaper, or (We Hope) Both	128
Faster/Cheaper Data	129
Thinking Like Management	130
Finding the Faster/Cheaper	131
Planning for the Future (via the Past)	132
Faster/Cheaper Internet . . . . .	132
The Possibilities	133
Using ROI Metrics . . . . .	134
Defining ROI	134
Computing a Quick Example	135
Drawing Conclusions	137
Putting ROI to Use	138
Performing Bottleneck Analyses . . . . .	138
Building Your Own Case	140
Bottlenecking Conclusions	140

**Chapter 8 Building a Long-Term Plan 141**

Capturing Good Ideas . . . . .	143
Prioritizing Ideas on a Cost Basis . . . . .	145
Prioritizing Ideas on a Complexity Basis . . . . .	146
Prioritizing Ideas on a Cost-Savings Basis . . . . .	147
Documenting Your Processes . . . . .	148
Plan the Work, Work the Plan . . . . .	150
Sequencing Your Approach . . . . .	151
Writing an ROI-Focused Summary of Your Plan . . . . .	153
Selling Users . . . . .	154
If You Can't Sell It, Watch Out	155
Implementing Your Plan One Step at a Time . . . . .	156
It All Comes Together	157

**Chapter 9 Managing Networks, IT, and Hardware 159**

How Much IT Do You Need to Know? . . . . . 160

Quantifying Networks: A Facilitating Tool or a  
Barrier to Productivity? . . . . . 161

Understanding the Environment . . . . . 162

Storing Data . . . . . 163

Running Software . . . . . 165

Buying the Right Hardware . . . . . 166

Justifying Fast Hardware . . . . . 168

Summing Up . . . . . 169

Getting Involved with IT Planning . . . . . 170

Planning for Survival . . . . . 171

Operating Systems. . . . . 171

**Chapter 10 Building Crucial Skills 173**

Assessing Your Learning Style . . . . . 174

Learning Efficiently Is Essential. . . . . 175

Learning Methods and Resources . . . . . 175

Peer Activities . . . . . 178

Learning What to Manage . . . . . 179

Building Your Management Style . . . . . 183

Understanding Your Company . . . . . 185

Selling Yourself . . . . . 185

Writing Better . . . . . 185

Speaking Better . . . . . 186

Reporting Effectively . . . . . 188

Documenting ROI . . . . . 189

Learning Programming . . . . . 191

Visual Basic and AutoLISP . . . . . 192

AutoLISP Resources . . . . . 193

Visual Basic Resources . . . . . 194

**Chapter 11 Protecting Your Data 195**

Identifying Intellectual Property . . . . . 196

Locating Intellectual Property . . . . . 197

Securing Files . . . . . 197

Securing In-House Data . . . . . 198

Limiting What You Share via Formats . . . . . 199

Limiting What You Share via Tools . . . . . 200

Contractually Binding Agreements . . . . . 202

In Conclusion . . . . . 202

Controlling Projects with Contracts . . . . . 202

Bonus: Document-Management Overview .....	204
Defining EDM/PDM/PLM	205
Identifying System Types	206
Identifying Scalability	207
Identifying System Components	209
Evaluating Costs	212
Going Shopping	215
Justifying Costs with Savings	215
EDM Wrap Up	218
Summing Up .....	218

**Appendix A: Optimizing Software Performance 219**

Identifying Software Types .....	220
Networking Factors .....	220
Understanding the Environment	221
Storing Data .....	223
Harmonizing Software with Networks	224
Summary .....	226

**Appendix B: Tips for AutoCAD Environments 227**

**Appendix C: Tips for Manufacturing Environments 231**

**Appendix D: Tips for AEC Environments 235**

**Appendix E Tips for Civil Engineering Environments 239**

**Appendix F: Tips for mixed Autodesk Environments  
(AutoCAD, Revit, Inventor, Civil 3D) 243**

**Appendix G: Tips for SolidWorks-Based Environments 247**
