<i>Introduction</i>	<i>xvii</i>
Chapter 1 Project Archaeology	1
Scout the Site: Define Client Needs	2
Getting the Lay of the Land: The Site Survey	3
Excavation: The Interview	4
Piece Together the Artifacts: Determine the Appropriate Solution	5
Anticipate the Pitfalls	6
Construct the Project Map: The Proposal	8
Price It Right	11
Offer Alternate Routes	12
Summary	13
Chapter 2 Raw Materials: Encoding Basics	15
Footage Fundamentals	16
Receiving Source Video from Your Client	16
Producing Your Own Video	17
Getting Fancy: Transparent Video	19
How Do I Create FLVs?	21
Helpful Tips, No Matter What Encoder You Use	24
Obtaining and Encoding Video	26
Your Handy-Dandy Encoding Reference	26
Where the Rubber Hits the Road: Let's Encode	29
Summary	35
Chapter 3 Creating a Video Delivery Roadmap	37
Functionality and Flow	38
Flow Chart	39
Start Building	40
Testing 1, 2, 3	40
Back Button Considerations	40
Flash Player Detection	41
Flash Video Navigation	42
Keep It Simple	42
Progressive or Streaming? That Is the Question	42
Embed Video in SWF	43
Progressive Download	44
Streaming	44

On to the ActionScript!.....	46
Progressive Delivery: AS2.....	46
Progressive Delivery: AS3.....	48
Streaming Delivery: AS2.....	50
Streaming Delivery: AS3.....	51
Publishing and Hosting Choices	52
What Is a CDN, and Why Do I Need One?.....	53
What Is an FVSS?.....	53
What If I Need More Services?.....	54
What About Offline Video? FLV to DVD.....	54
Don't Copy That Floppy: Digital Rights Management	55
Summary.....	56
Chapter 4 OOP and the Video Application	57
Why All This Hoopla About OOP?	58
What Is OOP?.....	58
What Are the Key Elements of OOP?.....	58
Why Is OOP So Useful in Flash Development?.....	59
And What Does OOP Have to Do with Flash Video?.....	59
Design Patterns and Flash Video.....	59
Model-View-Controller (MVC).....	60
State Design Pattern (SDP).....	62
The Fork in the Road: AS2 vs. AS3	64
Which Language Do You Speak Fluently?.....	64
What Does Your Application Have to Do?.....	65
What's Your Target Player?.....	65
Setting Up Your Work Environment	66
Doing It Our Way: Setting Up Eclipse, FDT, and MTASC for AS2 Development	67
Viva la Open Source!	73
Summary.....	74
Chapter 5 The Video Player	75
So You Need to Play a Video—Where to Begin	76
Creating a Player Using Components	76
What the FLVPlayback Component Can Do.....	77
What It Can't Do.....	77
Using the FLVPlayback Component in Flash CS3.....	78
Roll Your Own: Creating a Custom Player.....	86
Our Player Structure.....	89
Dissecting the Code.....	92
Skin It!.....	98
Summary.....	99

Chapter 6	Getting It Out There: Test, Optimize, and Deploy	101
	Test It, Then Test It Again. Repeat.	102
	Test-Driven Development vs. Testing While Coding	102
	Tests, Tests, and More Tests	104
	Nobody Likes to Wait: Bandwidth Considerations	109
	Video Buffering: Not If, but How Much	109
	Bandwidth Detection: How Much Can We Push Through That Pipe?	110
	3, 2, 1... Ready to Launch!	118
	Progressive Deployment	119
	Streaming Deployment	121
	But Wait, There's More: Project Wrap-up	124
	Revisiting the Spec Sheet	125
	Final Walkthrough	126
	Launching	126
	Deliverables: Documentation and Asset Files	126
	Schedule a Meeting	127
	Archiving	127
	Summary	128
Chapter 7	Dynamic Playlists	129
	When Clients Attack: Handling Content Updates	130
	Playlists in the Wild: Your Options	131
	PlaylistListBox fla: Simple Array into a ListBox	137
	PlaylistListBox_XML fla: XML Data into a ListBox	139
	Mixing It Up: Sequential and Shuffle Playback	144
	PlaylistAutoPlay fla: Sequential Playback	145
	PlaylistShuffle fla: Playing Random Videos from Your Playlist	146
	Integrating an XML Playlist into the MVC Player	148
	test_playlist.xml	148
	AS2: MediaPlayer.as	149
	AS3: Main.as	152
	Summary	154
Chapter 8	Demystifying Metadata and Cue Points	155
	Metadata Magic	156
	Reading Metadata	159
	How Long Is This Video?	161
	Cue Point Power	165
	Why Would You Want to Use Cue Points?	165
	What Data Does a Cue Point Contain?	165
	Now That You Want to Use Cue Points, How Do You Add Them?	166
	What Are the Three Types of Cue Points Used For?	167
	How to Read Cue Points on a NetStream	168

Adding Dynamic ActionScript Cue Points	170
Adding Captions	173
Adding Chapter Links	177
Progressive Sleight-of-Hand: Scripted Psuedo-Streaming.	184
Traditional Progressive Download	184
Scripted Pseudo-Streaming	185
Now That You're Enlightened...	189
Summary	189
Chapter 9 Bending Pixels with Filters and Masks	191
What Can I Do to My Video?	192
One Video, Many Masks	192
ActionScript 2: FunWithMasks.as	193
ActionScript 3: FunWithMasks.as	199
Alpha Channels, Revisited.	207
Fun with Filters and Tints	208
ActionScript 2: FunWithFilters.as	210
ActionScript 3: FunWithFilters.as	215
Lost in Transitions	220
ActionScript 2: FunWithTransitions.as	221
ActionScript 3: FunWithTransitions.as	225
Summary	230
Chapter 10 Video and the BitmapData Object	231
What Is This BitmapData Object, and Why Should I Care?	232
Dynamic Thumbnails: Video Snapshots	235
ActionScript 2: FLVBitmapThumb	235
ActionScript 3: FLVBitmapThumb	239
Transitions and Dissolves	246
ActionScript 2: FLVBitmapTransition	247
ActionScript 3: FLVBitmapTransition	258
The FotoBooth Application.	265
ActionScript 2: FotoBooth Application	266
ActionScript 3: FotoBooth Application	270
Summary	280
Chapter 11 Live Video and Webcams: FMS	281
The Video Revolution Will Be...Webcast	282
What FMS Is and How It Works	282
Why It's So Cool	283
Where/How You Can Use It	283

FMS2 Live! What You Need to Know	283
Hosting: Choices, Choices, Choices	284
Setting Up a Development Environment	287
File Structure	288
The Basics	289
The Media Classes	291
From Your Webcam to the World	293
videoConf.flv	293
What Else Can This FMS2 Thing Do?	306
File Class	306
Server-Side Data Manipulation	306
Server-to-Server Communication	307
Bandwidth Management	307
Server-Side Streaming	308
Load Balancing	308
Control Access to Streams and Recording	308
Secure Applications	309
Smart Bandwidth Streaming	310
FMS Hit List: Lisa's Tips and Tricks	311
Summary	313
Appendix: Real-World Deployment of an MVC Media Player	315
Our Client's Requirements	316
Refactoring Higher-Level Framework Code	317
Implementing EventBroadcaster	317
Using a Code-Based Animation Library	318
Refactoring MVC Media Player Code	318
Changing How MVC Connections Are Made	318
Adding Necessary Methods to the Interfaces	320
Implementing New Methods in the Classes	324
Adding Multiple Components to the View	331
Core Component Class	332
Elapsed/Total Time Display	335
Mute/Unmute Buttons	336
Fast-Forward and Rewind Buttons	337
Play/Pause Button	339
Volume Slider	342
Seek Bar	343
Download Progress Bar	343
Media Player Wrapup – MVC pays off!	344
Taking It to the Next Level	345
<i>Index</i>	349
