Preface	xxxvii
1 ³Li Lithium Metallotherapeutics	1
<i>Robin S.B. Williams and Adrian J. Harwood</i>	
1.1 Introduction	1
1.2 The Inorganic Chemistry of Lithium	2
1.3 Biology of Lithium	3
1.3.1 The history of lithium therapeutics	3
1.3.2 Lithium and the body	4
1.4 Targets of Lithium	5
1.4.1 Glycogen synthase kinase-3	5
1.4.2 Inositol phosphate signalling	8
1.5 Lithium Therapeutics	10
1.5.1 Bipolar disorder and schizophrenia	10
1.5.2 Alzheimer's disease	12
1.5.3 Ischemia (stroke)	14
1.5.4 Adverse effects	14
Acknowledgements	15
References	15

2	^5B Boron Compounds as Therapeutic Drugs	19
	<i>Geeta Rana, Kamesh Vyakaranam, John A. Maguire and Narayan S. Hosmane</i>	
2.1	Boron Neutron Capture Therapy	19
2.2	Classes of Boron Compounds for Potential Use in BNCT	22
2.2.1	DNA binders	22
2.2.2	Boron-containing amino acids and related peptides	24
2.2.3	Boron-containing nucleic acid precursors	27
2.3	Phosphates, Phosphonates and Phosphoramidates	31
2.4	Amines	33
2.5	Boron Analogues of Pyrophosphates	33
2.6	Boronated Polyamines	34
2.7	Carbohydrates	36
2.8	Lipoproteins	36
2.9	Lipids and Phospholipids	37
2.10	Radiation Sensitizers	38
2.11	Cyclic Thiourea Derivatives	38
2.12	Central Nervous System (CNS) Depressants: Promazines, Hydantoins and Barbiturates	39
2.13	Hydantoins and Barbiturates	39
2.14	Oligonucleotide Antisense Agents	40
2.15	Hormones	42
2.16	Liposomes	44

2.17	Conclusions	45
	Acknowledgements	46
	References	46
3	¹²Mg The Role of Magnesium as a Metallotherapeutic Drug	51
	<i>Pietro Delva</i>	
3.1	Introduction	51
3.2	Magnesium as a Drug	53
	3.2.1 Gestational hypertension, preeclampsia and eclampsia	53
	3.2.2 Asthma	54
	3.2.3 Stroke	55
	3.2.4 Acute myocardial infarction	57
	3.2.5 Arrhythmias	60
	3.2.6 Miscellaneous	61
	References	62
4	¹³Al Aluminum Metallotherapeutics	65
	<i>Thanos Salifoglou</i>	
4.1	Introduction	65
4.2	Adjuvants	66
	4.2.1 Alum	66
	4.2.2 Al(OH) ₃	67
	4.2.3 Aluminum phosphate	69
4.3	Antacids	69
	4.3.1 Aluminum hydroxide	69
	4.3.2 Aluminum glycinate	70
	4.3.3 Peptic ulcer disease	70
	4.3.4 Bismuth aluminum carbonate	73
	4.3.5 Bismuth–magnesium–sodium alumino-silicate	73
4.4	Phosphate Binders	73
	4.4.1 Basic aluminum carbonate	75
	4.4.2 Alumino-silicates	75

4.5	Alginate Raft Formulations	75
4.6	Blistering Diseases in the Elderly	77
4.7	Metabolic Diseases and Aluminum	77
4.8	Anti-malarial Substances	78
4.9	Potential Aluminum Toxicity	79
4.10	Conclusions	80
	References	80
5	¹⁴Si Biological Activity of Organosilicon Compounds	83
	<i>Edmunds Lukevics and Luba Ignatovich</i>	
5.1	Introduction	83
5.2	Organosilicon Modification	84
	5.2.1 O-, S- and N-Silylation	84
	5.2.2 C-Silylation	89
5.3	Sila Analogues	92
5.4	Specific Organosilicon Compounds	94
	References	96
6	²⁰Ca The Role of Calcium as a Metallotherapeutic Drug	109
	<i>Mario Barbagallo and Ligia J. Dominguez</i>	
6.1	Introduction	109
6.2	Calcium Homeostasis	110
6.3	Hormonal Regulation of Calcium Metabolism	111
6.4	Optimal Amount of Dietary Calcium Intake and Benefits of Calcium Supplementation	112

6.5	Osteoporosis	115
6.6	Hypertension	116
6.7	Hypertension in Pregnancy and Preeclampsia	118
6.8	Colon Cancer	119
6.9	Weight Control and Regulation of Body Fat	119
6.10	Periodontal Disease	120
6.11	Kidney Stones	121
6.12	Calcium Supplements: Side Effects	121
6.13	Conclusions	122
	References	123
7	²²Ti Anti-tumor Titanium Drugs	125
	<i>Erich Dubler</i>	
7.1	Introduction	125
7.2	The Biochemistry of Titanium	126
7.3	Titanium Anti-cancer Drugs	127
7.4	Budotitane	130
	7.4.1 Chemistry and anti-cancer activity	130
	7.4.2 Isomer abundance of budotitane	131
	7.4.3 Reaction with biomolecules	133
	7.4.4 Animal studies	134
	7.4.5 Clinical investigations	134
7.5	Titanocene Dichloride	135
	7.5.1 Chemistry and anti-cancer activity	135
	7.5.2 Reaction with biomolecules	136
	7.5.3 Animal studies	137
	7.5.4 Clinical investigations	138
	7.5.5 Perspectives of titanocene dichloride	138

7.6	Conclusions	139
	Acknowledgements	140
