agents (continued)

- proxying, 156
- SMS
 - hardware and software inventory, 185
 - installing, 183–184
 - software metering, 185–186
- AIX (IBM), Virtual Agent for, 389**
- Alert Rules, 195, 203–205**
- Alert Tuning Solution Accelerator (ATSA), 171–172**
- alerts**
 - Active Directory Replication Partner Count script, 223–224
 - custom fields, 156
 - custom views, OC, 295–296
 - defined, 294
 - displaying, 159
 - duplicate, suppressing, 307–308
 - Event Rules, 194
 - RC - Web monitoring, 301–303, 304
 - resolution states, 156
 - severity, adjusting, 172
 - tracking in OC, 166–167
 - tuning, 170–171
 - viewing, 18–19, 295–297
- anonymous relay, Exchange Server, 241**
- Application Center (AC) 2000 (Microsoft), 387**
- Application Log, 198**
- applications**
 - creating with Windows Server management packs, 274
 - monitored, MOM 2005, 36–37
- approving WSUS updates, 134**
- asterisk (*), 153**
- ATSA (Alert Tuning Solution Accelerator), 171–172**
- attributes**
 - Microsoft DNS Server, 197
 - Microsoft Operations Manager 2005 Server, 197
 - reference, SMS report queries, 343–344
- auditors, requiring proof of updates, 120–121**
- authors, MOM, permissions, 148**
- Automated Deployment Services (ADS), 388**
- automatic alert response, 172–173**
- Automatic IP Deny script, IIS, 228**
- automatic update**
 - changing, 118–120
 - rescheduling installations, 140
 - WSUS client component, 129, 136–137

- automating agent installation options, MOM 2005, 53**
- Availability Reporting Management Pack, 385**

B

- Background Intelligent Transfer Services (BITS), 130**
- batch file, executing, automatic alert response, 173**
- BEA Weblogic/Tuxedo, Virtual Agent for, 389**
- beginning of line, Computer Discovery Rules, 152**
- best practices, MOM security, 316–317**
- BITS (Background Intelligent Transfer Services), 130**
- BizTalk Server 2004, 388**
- BlackBerry, Virtual Agent for, 389**
- BladeCenter (IBM), Virtual Agent for, 389**
- Block Analysis script, SQL Server 2000, 250**
- boundary sites, SMS 2003, 65**
- buffering Management Server, 156**

C

- calling CLR assembly, 173**
- CAP (Client Access Point) system, 70**
- carat (^), 152**
- characters, Computer Discovery Rules, 152–153**
- Check Prerequisites tool, 39**
- Cisco, Virtual Agent for, 389**
- Citrix MetaFrame XP management pack, 389**
- Client Connectivity script, Active Directory, 218**
- Client GC Availability script, Active Directory, 218**
- Client PDC Response script, Active Directory, 218–219**
- Client Serverless Bind script, Active Directory, 219**
- Client Update DCs script, Active Directory, 219**
