# Contents

<i>Introduction</i>		<i>xxvii</i>
<i>Assessment Test</i>		<i>xlvi</i>
<b>Chapter 1</b>	<b>Analyzing Business Models and Strategies</b>	<b>1</b>
	Assessing Your Company	2
	Overall Company Model	3
	Geographical Boundaries and Scope	7
	Examining Your Company's Processes	11
	Understanding Your Company's Information Flow	12
	Understanding Your Company's Communication Flow	12
	Understanding Product and Service Life Cycles	14
	Identifying the Decision-Making Processes	15
	Identifying Plans for the Future	16
	Strategically Planning in Heady Corporate Times	17
	Strategically Planning Your Software and Hardware Future	17
	Assessing Company Strategies	20
	Identifying Company Priorities	20
	Assessing Company Growth and Growth Strategy	24
	Assessing Risk	27
	Targeting Laws and Regulations Affecting the Company	29
	Identifying the Total Cost of Operations	32
	Summary	36
	Exam Essentials	37
	Key Terms	38
	Review Questions	39
	Answers to Review Questions	44
	The Billing Company	46
	Background	46
	Current System	46
	Envisioned System	47
	Security	47

	Availability	47
	Maintainability	47
	Performance	48
	Questions	48
	Answers	51
<b>Chapter 2</b>	<b>Analyzing Organizational and IT Management Structure</b>	<b>53</b>
	Understanding the Management Model	55
	Management Hierarchy	56
	Analyzing the Organizational Structure	59
	Organization of Management	59
	The Organization's Logical Layout	60
	Defining Your Vendor, Partner, and Customer Relationships	63
	Vendor Relationships	63
	Partner Relationships	64
	Customer Relationships	65
	Planning for Future Acquisitions	66
	Analyzing IT Management Structure	69
	Identifying Centralized and Decentralized IT Structures	70
	Analyzing Funding Models	75
	Identifying Outsourcing Risks and Strategies	79
	The Decision-Making Process	81
	The Change-Management Process	83
	Summary	85
	Exam Essentials	86
	Key Terms	87
	Review Questions	88
	Answers to Review Questions	92
	The State Revenue Agency	94
	Background	94
	Current System	94
	Availability	95
	Maintainability	95
	Performance	95

	Envisioned System and Funding	96
	Questions	97
	Answers	100
<b>Chapter 3</b>	<b>Evaluating the Technical Environment</b>	<b>103</b>
	Planning Company Resource Distribution and Management	105
	Servers and Associated Gear	106
	Routers and Associated Internetworking Gear	108
	Network Infrastructures	109
	Non-Internetworking Telephony Gear	111
	Printers and Network Printing Gear	112
	People	114
	Evaluating Centralized vs. Decentralized Resources	115
	Assessing Network Connectivity	119
	Assessing Current Connectivity	119
	Assessing User Usage Patterns	120
	Planning for the Future	121
	Assessing the Usage of Network Services	121
	E-mail/Scheduling Services	122
	File Server Services	122
	Print Server Services	123
	Application Server Services	124
	TCP/IP Configuration Services	124
	Analyzing Service Requirements	124
	Performance	125
	Availability	126
	Scalability	127
	Analyzing Network Management	128
	Physical Network Management	128
	Logical Network Management	129
	Managerial Network Management	130
	Analyzing Network Security Considerations	132
	Protecting the Network from Outside Intruders	133
	Protecting the Network from Inside Intruders	134
	Protecting the Network from Terminated Employees	135

	Summary	137
	Exam Essentials	137
	Key Terms	138
	Review Questions	139
	Answers to Review Questions	143
	The Large Corporate IT Environment	145
	Background	145
	Current System	145
	Envisioned System	146
	Performance	147
	Questions	147
	Answers	150
<b>Chapter 4</b>	<b>Anticipating the Impact of Infrastructure Design</b>	<b>153</b>
	Defining Your Enterprise Network Applications	154
	Enterprise vs. Workgroup Scope	155
	Client/Server vs. Web-Based	156
	Application Clients	159
	BackOffice and Off-the-Shelf Server Applications	160
	Evaluating the Current Network Environment	161
	Evaluating Your Infrastructure	161
	Evaluating Protocols	165
	Evaluating Hosts	167
	Assessing Network Services	169
	Network Monitoring	169
	Metrics Monitoring	170
	TCP/IP Services	171
	Security Monitoring	171
	Fault-Tolerance Monitoring	172
	Web Monitoring	172
	Assessing the TCP/IP Infrastructure	173
	Assessing Current Hardware	174
	Identifying Existing and Planned Upgrades and Rollouts	176
	Analyzing the Technical Support Structure	177

	Network Manager Support	178
	End-User Support	178
	Analyzing the Current Network Management	179
	Summary	181
	Exam Essentials	183
	Key Terms	183
	Review Questions	184
	Answers to Review Questions	188
	The State Agency with the Complicated Technical Environment	189
	Current System	189
	Problem Statement	190
	Envisioned System	190
	Security	191
	Availability	191
	Maintainability	191
	Questions	192
	Answers	195
<b>Chapter 5</b>	<b>Analyzing Client Access Requirements</b>	<b>199</b>
	Determining the Needs and Behaviors of End Users	200
	Analyzing End-User Habits	201
	Analyzing End-User Behaviors	204
	Analyzing Future Network Plans	207
	Communicating in High-Growth Environments	208
	Growing Networks with Limited Resources	209
	Planning for the Middle-of-the-Road Network	210
	Summary	212
	Exam Essentials	213
	Key Terms	213
	Review Questions	214
	Answers to Review Questions	217
	The Large Shoe Retailer	219
	Current System	219
	Problem Statement	219

	Envisioned System	219
	Availability	220
	Maintainability	220
	Questions	221
	Answers	223
<b>Chapter 6</b>	<b>Analyzing the Current Disaster Recovery Strategy</b>	<b>225</b>
	Defining Fault Tolerance and Disaster Recovery	227
	Defining Fault Tolerance	227
	Defining Disaster Recovery	230
	Establishing Fault Tolerance and Disaster Recovery for Client Computers	231
	Implementing Fault Tolerance on Client Computers	233
	Implementing Disaster Recovery on Client Computers	235
	Establishing Fault Tolerance and Disaster Recovery for Servers	237
	Implementing Fault Tolerance on Servers	238
	Implementing Disaster Recovery on Servers	239
	Establishing Fault Tolerance and Disaster Recovery for the Network	242
	Implementing Fault Tolerance on the Network	242
	Implementing Disaster Recovery on the Network	244
	Summary	246
	Exam Essentials	247
	Key Terms	247
	Review Questions	248
	Answers to Review Questions	252
	Performing a DR Test	254
	Current System	254
	Envisioned System	254
	Security	255
	Availability	255
	Maintainability	255
	Performance	255
	Funding	256
	Questions	256
	Answers	258

<b>Chapter 7</b>	<b>Designing a Management and Implementation Strategy for Windows 2000 Networks</b>	<b>261</b>
	Understanding Windows 2000 Networking Services	263
	Supporting TCP/IP in Windows 2000	263
	Supporting Telecommuters	265
	Windows 2000 Routing Protocols	266
	IP Security in the Windows 2000 Environment	266
	Managing User Internet Access	267
	Designing and Modifying a Network Topology	268
	Physical Components of a Topology	268
	Logical Components of a Topology	270
	Identifying Backbone and User Connections	272
	Dealing with Disparate Topologies	273
	Dealing with Old Topologies	274
	Monitoring and Managing Windows 2000 Network Services	275
	Global Catalog	276
	Lightweight Directory Access Protocol (LDAP)	279
	Certificate Services	281
	Name Resolution Services	283
	Internet and Remote Access Services	287
	Distributed File System	288
	Network Load Balancing	289
	Supporting Application Architectures	293
	Designing Network Services to Support Legacy Applications	294
	Designing Network Services to Support New Applications	295
	Planning for the Interaction of Windows 2000 Networking Services	297
	Backward Compatibility with NT 4 Networks and Name-Resolution Services	298
	Pure Windows 2000 Networks and Name Resolution Service Interaction	300
	Designing a Resource Strategy	301
	Planning for Placement and Management of Resources	301
	Planning for Growth	304
	Planning for Decentralized or Centralized Resources	304
	Summary	305

Exam Essentials	306	
Key Terms	308	
Review Questions	309	
Answers to Review Questions	313	
The Multinational Winery	315	
Background	315	
Problem Statement	315	
Envisioned System	315	
Funding	316	
Security	316	
Availability	316	
Maintainability	317	
Performance	317	
Questions	317	
Answers	320	
<b>Chapter 8</b>	<b>Designing TCP/IP into Your Network</b>	<b>323</b>
The Advantages of Windows 2000 TCP/IP	324	
Analyzing IP Subnets	326	
Subnetting Principles	327	
Advanced Subnetting	333	
Designing a TCP/IP Implementation	334	
Designing Remote Subnets	336	
Quality of Service Circuits	337	
Choosing Software Routing	337	
Routing Methods	339	
Routing Protocols	340	
Integrating TCP/IP into Existing WAN Environments	350	
Summary	351	
Exam Essentials	352	
Key Terms	353	
Review Questions	354	
Answers to Review Questions	358	

	The New Network Subnet Design	360
	Background	360
	Envisioned System	360
	Security	361
	Availability	361
	Performance	361
	Questions	362
	Answers	364
<b>Chapter 9</b>	<b>Building a Multi-Protocol Strategy</b>	<b>367</b>
	NetWare Systems	368
	Gateway Service for NetWare	370
	Client Service for NetWare	371
	File and Print Services for NetWare	372
	Microsoft Directory Synchronization Services	372
	Macintosh Systems	373
	AppleTalk Zones	374
	Enabling Macintosh RAS Usage	374
	Macintosh User Authentication Methods	374
	Using the Computer Management Program	376
	Unix Systems	380
	Printing	381
	File Sharing	381
	Telnet	382
	Remote Execute	382
	Remote Access Services	382
	SNA Support	383
	Third-Party Protocols	383
	Summary	384
	Exam Essentials	385

	Review Questions	387
	Answers to Review Questions	391

The Multi-Platform Network	393	
Background	393	
Current System	393	
Envisioned System	394	
Availability	394	
Maintainability	395	
Performance	395	
Questions	395	
Answers	397	
<b>Chapter 10</b>	<b>Designing a DHCP Solution</b>	<b>399</b>
Introduction to DHCP	400	
DHCP Is a Message-Based System	401	
Changes to Windows 2000 DHCP	402	
Methods of Allocating IP Addresses	406	
Interoperability with Routers	408	
Designing and Placing Servers	409	
Multiple DHCP Servers and Scope-Splitting	410	
DHCP Relay Agents	412	
DHCP Server Security	413	
Specialized DHCP Groups	414	
Active Directory and DHCP Integration	414	
High-Availability Scenarios	415	
Optimizing and Tuning DHCP	417	
Single-Server Optimization	417	
Lease Length	419	
Setting Up Multiple DHCP Servers	419	
Summary	420	
Exam Essentials	422	
Key Terms	423	
Review Questions	424	
Answers to Review Questions	428	
Building a New DHCP Infrastructure from an Old One	430	
Background	430	
Problem Statement	430	

	Envisioned System	431
	Security	431
	Availability	431
	Performance	431
	Questions	432
	Answers	434
<b>Chapter 11</b>	<b>Planning a DNS Implementation</b>	<b>437</b>
	Understanding DNS	439
	Creating an Integrated DNS Design	441
	Creating a Secure DNS Design	444
	Secure Zone Transfers	448
	Redundancy of DNS Servers	450
	Designing a DNS Implementation	452
	Selecting the Correct DNS Infrastructure for Your Network	452
	DNS in a Routed Environment	453
	Zone-Replication Security	454
	High-Availability Scenarios	454
	Optimization and Tuning of DNS	455
	Backward Compatibility Issues	456
	Summary	456
	Exam Essentials	458

	Review Questions	460
	Answers to Review Questions	464
	Integrating Windows 2000 DNS into a Legacy Environment	466
	Background	466
	Current System	466
	Envisioned System	466
	Security	467
	Availability	467
	Maintainability	467
	Performance	467
	Questions	468
	Answers	470

<b>Chapter 12</b>	<b>Designing a WINS Implementation</b>	<b>473</b>
	Creating a WINS Design	474
	Pushing and Pulling	475
	WINS Proxy Agents	476
	Multicast WINS Server Discovery	476
	Name Resolution Order	476
	LMHOSTS File	477
	Creating a Secure WINS Design	478
	Tuning and Optimizing WINS	479
	Server Optimization Techniques	480
	Client Optimization Techniques	481
	Measuring WINS Server Name Resolution Performance	483
	Designing a WINS Implementation	484
	Summary	486
	Exam Essentials	487
	Key Terms	488
	Review Questions	489
	Answers to Review Questions	493
	Integrating Windows 2000 WINS into a Legacy Environment	495
	Current System	495
	Envisioned System	495
	Availability	496
	Maintainability	496
	Performance	496
	Funding	496
	Questions	497
	Answers	499
<b>Chapter 13</b>	<b>Building a Distributed File System Strategy</b>	<b>501</b>
	Dfs Structure	503
	Creating the Dfs Root	504
	Creating Links	506
	Setting Up Replicas	508

Replicating Dfs	511	
Replicating the Root	512	
Replicating the Links	513	
Summary	514	
Exam Essentials	515
