

# CONTENTS AT A GLANCE

	<i>Introduction</i>	<i>xxiii</i>
Chapter 1	Introduction to Visual C# and the .NET Framework <i>Adapted from Mastering Visual C# .NET</i> <i>by Jason Price and Mike Gunderloy</i> <i>ISBN 0-7821-2911-0</i>	1
Chapter 2	Zen and Now: The C# Language <i>Adapted from Visual C# .NET Programming</i> <i>by Harold Davis</i> <i>ISBN 0-7821-4046-7</i>	23
Chapter 3	Strings, Dates, Times, and Time Spans <i>Adapted from Mastering Visual C# .NET</i> <i>by Jason Price and Mike Gunderloy</i> <i>ISBN 0-7821-2911-0</i>	75
Chapter 4	Object-Oriented Programming <i>Adapted from Mastering Visual C# .NET</i> <i>by Jason Price and Mike Gunderloy</i> <i>ISBN 0-7821-2911-0</i>	151
Chapter 5	Derived Classes <i>Adapted from Mastering Visual C# .NET</i> <i>by Jason Price and Mike Gunderloy</i> <i>ISBN 0-7821-2911-0</i>	215
Chapter 6	Arrays, Indexers, and Collections <i>Adapted from Visual C# .NET Programming</i> <i>by Harold Davis</i> <i>ISBN 0-7821-4046-7</i>	265
Chapter 7	Reflecting on Classes <i>Adapted from Visual C# .NET Programming</i> <i>by Harold Davis</i> <i>ISBN 0-7821-4046-7</i>	305

Chapter 8	<b>Building a Better Windows Interface</b> <i>Adapted from Visual C# .NET Programming</i> <i>by Harold Davis</i> <i>ISBN 0-7821-4046-7</i>	341
Chapter 9	<b>Building Desktop Applications</b> <i>Adapted from Visual C# .NET Developer's Handbook</i> <i>by John Paul Mueller</i> <i>ISBN 0-7821-4047-5</i>	385
Chapter 10	<b>Working with Threads</b> <i>Adapted from Visual C# .NET Developer's Handbook</i> <i>by John Paul Mueller</i> <i>ISBN 0-7821-4047-5</i>	435
Chapter 11	<b>Overview of the ADO.NET Classes</b> <i>Adapted from Mastering C# Database Programming</i> <i>by Jason Price</i> <i>ISBN 0-7821-4183-8</i>	475
Chapter 12	<b>ADO.NET Application Development</b> <i>Adapted from Visual C# .NET Developer's Handbook</i> <i>by John Paul Mueller</i> <i>ISBN 0-7821-4047-5</i>	495
Chapter 13	<b>Using DataSet Objects to Store Data</b> <i>Adapted from Mastering C# Database Programming</i> <i>by Jason Price</i> <i>ISBN 0-7821-4183-8</i>	539
Chapter 14	<b>Using DataSet Objects to Modify Data</b> <i>Adapted from Mastering C# Database Programming</i> <i>by Jason Price</i> <i>ISBN 0-7821-4183-8</i>	601
Chapter 15	<b>Introduction to C# Web Applications</b> <i>Adapted From Mastering ASP.NET with C#</i> <i>by A. Russell Jones</i> <i>ISBN 0-7821-2989-7</i>	691

Chapter 16	Using XML in Web Applications <i>Adapted from Mastering ASP.NET with C# by A. Russell Jones ISBN 0-7821-2989-7</i>	727
Chapter 17	Web Services <i>Adapted from Mastering ASP.NET with C# by A. Russell Jones ISBN 0-7821-2989-7</i>	769
Chapter 18	Building Your Own Web Controls <i>Adapted from Mastering ASP.NET with C# by A. Russell Jones ISBN 0-7821-2989-7</i>	809
Chapter 19	Overcoming Holes in the .NET Framework <i>Adapted from .NET Framework Solutions: In Search of the Lost Win32 API by John Paul Mueller 0-7821-4134-X</i>	845
Chapter 20	Overcoming Security Issues <i>Adapted from .NET Framework Solutions: In Search of the Lost Win32 API by John Paul Mueller ISBN 0-7821-4134-X</i>	865
Chapter 21	Getting Started with the Mobile Internet Toolkit <i>Adapted from .NET Wireless Programming by Mark Ridgeway ISBN 0-7821-2975-7</i>	911

# CONTENTS

*Introduction*

*xxiii*

<b>Chapter 1</b>	<b>□ Introduction to Visual C# and the .NET Framework</b>	<b>1</b>
	Developing Your First C# Program	2
	Understanding the <i>Main()</i> Method	4
	Compiling a Program	6
	Introducing the Microsoft Intermediate Language (MSIL)	9
	Introducing Visual Studio .NET	9
	Starting Visual Studio .NET and Creating a Project	11
	Compiling and Running the Program	16
	Using the .NET Documentation	17
	Accessing the Documentation Using the .NET SDK	17
	Accessing the Documentation Using VS .NET	20
	Summary	21
	What's Next	21
<b>Chapter 2</b>	<b>□ Zen and Now: The C# Language</b>	<b>23</b>
	Identifiers	24
	Keywords	25
	Variables	26
	Definite Assignment	27
	Constants	28
	Enumeration Constants	29
	Types	33
	String Variables	35
	C# Is a Strongly Typed Language	36
	Type Conversion	39
	Implicit Conversion	40
	Explicit Conversion	41
	The <i>as</i> Operator	44
	Conversion Methods	45
	Commenting Code	48
	Self-Documenting Code	49
	So, What About Comments?	49

Operators	50
Flow Control Statements	55
Flow to with <i>goto</i>	55
<i>while</i> Statements	58
<i>do while</i> Statements	58
Structs	59
Exceptions	61
Understanding Structured Exception Handling	62
Throwing Exceptions	68
Exception Objects	71
Summary	72
What's Next	73
<b>Chapter 3 □ Strings, Dates, Times, and Time Spans</b>	<b>75</b>
Using Strings	76
Creating Strings	76
Using <i>String</i> Properties and Methods	76
Creating Dynamic Strings	100
Creating <i>StringBuilder</i> Objects	101
Using <i>StringBuilder</i> Properties and Methods	102
Representing Dates and Times	110
Creating <i>DateTime</i> Instances	110
Introducing Time Spans	112
Using <i>DateTime</i> Properties and Methods	115
Using Time Spans	136
Creating <i>TimeSpan</i> Instances	136
Using <i>TimeSpan</i> Properties and Methods	137
Summary	149
What's Next	150
<b>Chapter 4 □ Object-Oriented Programming</b>	<b>151</b>
Introducing Classes and Objects	152
Declaring a Class	153
Creating Objects	155
Null Values	157
Default Field Values and Initializers	160
Using Methods	162
Defining Methods	163
Calling Methods	165

Hiding	168
The <i>this</i> Object Reference	170
More on Parameters	171
Method Overloading	178
Defining Properties	181
Working with Events	183
Declaring an Event	184
Declaring the Delegate Class Used with an Event	185
Declaring the <i>Reactor</i> Class	186
Declaring the <i>ReactorMonitor</i> Class	187
Creating and Using a <i>Reactor</i> and <i>ReactorMonitor</i> Object	188
Using Access Modifiers	192
Creating and Destroying Objects	197
Using Constructors	198
Using Destructors	207
Introducing Structs	208
Summary	212
What's Next	213

**Chapter 5 □ Derived Classes 215**

Introducing Inheritance	216
Learning about Polymorphism	221
Specifying Member Accessibility	226
Hiding Members	230
Versioning	234
Using the <i>System.Object</i> Class	238
Overriding the <i>System.Object</i> Class Methods	241
Boxing and Unboxing	243
Using Abstract Classes and Methods	245
Declaring Sealed Classes and Methods	248
Sealed Classes	248
Sealed Methods	248
Casting Objects	251
Upcasting	252
Downcasting	253
Operator Overloading	257
Overloading the Equal Operator	258
Overloading the Addition Operator	260
Overloading Other Operators	263

Summary	263
What's Next	264
<b>Chapter 6 □ Arrays, Indexers, and Collections</b>	<b>265</b>
Arrays	266
Creating an Array	268
<i>foreach</i> Statement	271
Arrays of Structs	272
<i>n</i> -Dimensional Arrays	275
Arrays of Arrays	277
Creating a Non-Zero Lower Bound	280
Indexers	282
Collection Classes	284
Collection Interfaces	286
Stacks	287
Queues	291
The <i>ArrayList</i> Element	295
Dictionaries	300
Summary	303
What's Next	303
<b>Chapter 7 □ Reflecting on Classes</b>	<b>305</b>
Assemblies and Namespaces	306
The Assembly Manifest	306
Assembly References	307
Namespaces	309
.NET Namespaces	313
Reflection	314
Tracking Members with the Class View Window	323
Navigating with the Object Browser	325
Opening the Object Browser	325
Using the Object Browser Interface	327
Creating a Class Library	330
Adding a Field	332
Adding a Property	333
Adding a Method	333
Adding an Event	333
Invoking the Class Members	336
What's Next	340

---

<b>Chapter 8 □ Building a Better Windows Interface</b>	<b>341</b>
Round Buttons Dancing	342
Making a Button Round	342
Toggling the Round Button	344
One for All and All for One	344
Animating the Controls	345
ListBoxes Listing	348
Adding an Item	348
Adding an Array	349
Positioning by Index	350
Retrieving Selected Text	352
Retrieving by Index	353
Retrieving Multiple Checked Items	353
Clearing an Item	354
Deleting Items	355
Retrieving Multiple Selections	355
Menus	359
The Auto-Generated Menu Code	361
Doing the Common Dialog Thing	368
Implementing an Edit Menu	370
The Color Dialog	371
The Font Dialog	372
The Save As and Open Dialogs	373
MDI Applications	377
Setting the Startup Object	379
Displaying Children	380
The MDI Window Menu	381
What's Next	384
<b>Chapter 9 □ Building Desktop Applications</b>	<b>385</b>
Desktop Application Types	386
Console	387
Standard Windows	388
Web-Based Applications	392
Writing Console Applications	393
Simple Example	394
Script-Based Example for Batch Jobs	397

Resource Essentials	405
Accelerators and Menus	405
Accessibility Features	408
Graphics	410
Timers	411
Toolbars	411
Writing Windows Applications	414
Dialog-Based Example	414
SDI Example	421
Application Debugging	427
Using the Debugger	427
Performing Remote Debugging	429
Performing Standard Debugging Tasks	431
Summary	434
What's Next	434

## **Chapter 10** □ **Working with Threads** **435**

An Overview of Threads	436
Uses for Threads	437
Types of Threads	444
Working with Threads	446
Desktop Application Example	446
Local DLL Example	456
Server-Based DLL Example	461
Understanding Critical Sections	470
Understanding Thread Safety	473
Using Your Knowledge	474
What's Next	474

## **Chapter 11** □ **Overview of the ADO.NET Classes** **475**

The Managed Provider and Generic Data Set Classes	476
The Managed Provider Classes	476
The Generic Data Classes	480
Performing a SQL <i>SELECT</i> Statement and Storing the Rows Locally	484
Outlining the Procedure	484
Putting It All Together	490
Summary	493
What's Next	494

---

<b>Chapter 12</b> □ <b>ADO.NET Application Development</b>	<b>495</b>
Comparing ADO to ADO.NET	496
Using <i>OleDbDataAdapter</i> for Data Transfer to ADO.NET	499
Writing a <i>DataReader</i> Application	500
Creating the Application Shell	500
Adding Some Code	502
Testing Using NUnit	507
Writing a Dataset Application	513
Coding the Grid View	513
Coding the Detail View	525
Importing and Exporting XML Example	529
Writing the Code	529
Using the Microsoft XML Notepad	531
Using <i>StringBuilder</i> to Improve Performance	534
Summary	537
What's Next	538
<b>Chapter 13</b> □ <b>Using DataSet Objects to Store Data</b>	<b>539</b>
The <i>SqlDataAdapter</i> Class	540
Creating a <i>SqlDataAdapter</i> Object	543
The <i>DataSet</i> Class	544
Creating a <i>DataSet</i> Object	548
Populating a <i>DataSet</i> Object	549
Populating a <i>DataSet</i> with Multiple <i>DataTable</i> Objects	560
Merging <i>DataRow</i> , <i>DataSet</i> , and <i>DataTable</i> Objects into Another <i>DataSet</i>	568
Writing and Reading XML Using a <i>DataSet</i> Object	572
Using the <i>WriteXml()</i> Method	572
Using the <i>WriteXmlSchema()</i> Method	575
Using the <i>ReadXml()</i> Method	576
Mapping Tables and Columns	580
Reading a Column Value Using Strongly Typed <i>DataSet</i> Classes	584
Creating a Strongly Typed <i>DataSet</i> Class	585
Using a Strongly Typed <i>DataSet</i> Class	589
Creating a <i>DataAdapter</i> Object Using Visual Studio .NET	591
Creating a <i>DataSet</i> Object Using Visual Studio .NET	596
Summary	599
What's Next	599

---

<b>Chapter 14</b> □ <b>Using <i>DataSet</i> Objects to Modify Data</b>	<b>601</b>
The <i>DataTable</i> Class	602
The <i>DataRow</i> Class	604
The <i>DataColumn</i> Class	606
Adding Restrictions to <i>DataTable</i> and <i>DataColumn</i> Objects	607
Adding the Restrictions Yourself	609
Adding Restrictions by Calling the <i>DataAdapter</i> Object's <i>FillSchema()</i> Method	622
Finding, Filtering, and Sorting Rows in a <i>DataTable</i>	628
Finding a <i>DataRow</i> in a <i>DataTable</i>	628
Filtering and Sorting <i>DataRow</i> Objects in a <i>DataTable</i>	629
Modifying Rows in a <i>DataTable</i>	636
Setting Up a <i>DataAdapter</i> to Push Changes to the Database	636
Adding a <i>DataRow</i> to a <i>DataTable</i>	641
Modifying a <i>DataRow</i> in a <i>DataTable</i>	645
Removing a <i>DataRow</i> from a <i>DataTable</i>	648
Retrieving New Identity Column Values	650
Using Stored Procedures to Add, Modify, and Remove Rows from the Database	653
Creating the Stored Procedures in the Database	654
Setting Up a <i>DataAdapter</i> to Call Stored Procedures	658
Adding a <i>DataRow</i> to a <i>DataTable</i>	661
Modifying a <i>DataRow</i> in a <i>DataTable</i>	663
Removing a <i>DataRow</i> from a <i>DataTable</i>	665
Automatically Generating SQL Statements	667
Exploring the <i>DataAdapter</i> and <i>DataTable</i> Events	669
The <i>DataAdapter</i> Events	669
The <i>DataTable</i> Events	674
Dealing with Update Failures	679
An Update Failure Scenario	679
Setting the <i>ContinueUpdateOnError</i> Property	680
Programming a Failed Update Example	681
Checking for Errors	683
Fixing the Error	684
Using Transactions with a <i>DataSet</i>	685
Using the <i>DataAdapter Command</i> Object's <i>Transaction</i> Property	685

Modifying Data Using a Strongly Typed <i>DataSet</i>	686
Summary	689
What's Next	690

**Chapter 15**   □   **Introduction to C# Web Applications**    **691**

Applications versus Websites	692
The <i>web.config</i> and <i>machine.config</i> Files	701
Is the <i>web.config</i> File Required?	701
The <i>.config</i> File Hierarchy	702
Site Hierarchy versus Directory Hierarchy	711
Inside Configuration Files	712
Creating Custom Configuration Sections	714
Creating a Custom Configuration Handler	719
Configuration File Location and Lock Settings	721
Location-Specific Tags Override Higher-Level Settings	722
What's Next	725

**Chapter 16**   □   **Using XML in Web Applications**    **727**

Introduction to the <i>System.Xml</i> Namespace	730
What Can You Do with XML?	730
Reading XML Documents	741
DOM versus SAX	741
Using <i>XmlReader</i> Classes	742
Querying XML Documents for Data	753
Using the <i>XmlDataDocument</i> Class	755
The <i>XmlException</i> Classes	759
Performing XSLT Transforms Programmatically	760
What's Next	768

**Chapter 17**   □   **Web Services**    **769**

Introduction to Web Services	770
Remote Method Calls and XML	770
Interoperating Across Applications/Platforms	772
When Should You Use Web Services?	773
How Does VS.NET Help?	774
Building a Web Service	776
The Web Service Description Language (WSDL) File	783
The WSDL Document	783

Consuming a Web Service	789
Consuming Web Services from IE	789
Consuming Web Services from a .NET Windows Forms Application	794
Cross-Platform Interface Issues	798
SOAP (Simple Object Access Protocol)	801
Benefits and Disadvantages of Using SOAP	802
SOAP Basics	803
Complex SOAP Messages	805
Secured Web Services	806
Finding Web Services (UDDI)	807
What's Next	808

## **Chapter 18 □ Building Your Own Web Controls 809**

Building a User Control	810
Loading User Controls at Runtime	819
Partial Page Caching and User Controls	819
Building a Composite Control	820
Customizing the Toolbox	828
Test the LabeledTextBox Composite Control	829
Building a Custom Server Control	830
Creating the DataTable Custom Control	831
Transferring Data Between ASP.NET Web Forms and Components	842
What's Next	843

## **Chapter 19 □ Overcoming Holes in the .NET Framework 845**

Why Access the Win32 API?	846
A Case of Missing Functionality	847
Win32 Function Types	849
Win32 Access Requirements	852
Win32 Access for C# Developers	857
Understanding the Effects of Unsafe Code	857
Understanding the Effects of Pointers	859
Advantages for the C# Developer	860
Win32 Access for Visual Basic Developers	861
Understanding Visual Basic Limitations	862
Advantages for the Visual Basic Developer	863
Summary	863
What's Next	864

---

<b>Chapter 20</b> □ <b>Overcoming Security Issues</b>	<b>865</b>
An Overview of Windows Security	866
A Detailed View of the Windows Security API	868
An Overview of the Functions	877
Using the Access Control Editor	883
Using the Security Configuration Editor	885
Understanding How .NET Role-Based Security Differs	888
Looking Up an Account SID Example	892
Using the <i>GetFileSecurity()</i> Function Example	897
Working with an ACEs Example	902
Summary	909
What's Next	909
<b>Chapter 21</b> □ <b>Getting Started with the Mobile Internet Toolkit</b>	<b>911</b>
Checking System Requirements	912
Introducing the Microsoft Mobile Internet Toolkit	912
Obtaining the Toolkit	913
Toolkit Contents	914
Toolkit Overview	914
The Openwave SDK	916
Supported Devices	918
Getting Started	919
The Toolbox	921
The Mobile Web Form Designer	922
The Properties Window	923
Testing the Application with the Emulators	925
Building a Simple Two-Card Deck	927
Using Code Behind	931
Summary	935
