

The Best of Japan

Hardly a day goes by that you don't hear something about Japan, whether the subject is trade, travel, scandal, natural disaster, cuisine, the arts, or the nation's worst economic recession since World War II. Yet Japan remains something of an enigma to people in the Western world. What best describes this Asian nation? Is it the giant producer of cars, computers, and a whole array of sleek electronic goods that compete favorably with the best in the West? Or is it still the land of the geisha and bonsai, the punctilious tea ceremony, and the delicate art of flower arrangement? Has it become, in its outlook and popular culture, a country more Western than Asian? Or has it retained its unique ancient traditions while forging a central place in the modern industrialized world?

In fact, Japan is an intricate blend of East and West. Its cities may look Westernized—often disappointingly so—but beyond first impressions there's very little about this Asian nation that could lull you into thinking you're in the West. Yet Japan also differs greatly from its Asian neighbors. Although it borrowed much from China in its early development, including Buddhism and its writing system, the island nation remained steadfastly isolated from the rest of the world throughout much of its history, usually deliberately so. Until World War II, it had never been successfully invaded; and for more than 200 years, while the West was stirring with the awakenings of democracy and industrialism, Japan completely closed its doors to the outside world and remained a tightly structured feudalistic society with almost no outside influence.

It's been just a little more than 136 years since the Japanese opened their doors, embracing Western products wholeheartedly, yet at the same time altering them and making them unquestionably their own. Thus, that modern high-rise may look Western, but it may contain a rustic-looking restaurant with open charcoal grills, corporate offices, a pachinko parlor, a high-tech bar with views of Mount Fuji, a McDonald's, an acupuncture clinic, a computer showroom, and a rooftop shrine. Your pizza may come with octopus, beer gardens are likely to be fitted with Astroturf, and "parsley" refers to unmarried women older than 25 (because parsley is what's left on a plate). City police patrol on bicycles, garbage collectors attack their job with the vigor of a well-trained army, and white-gloved elevator operators, working in some of the world's swankiest department stores, bow and thank you as you exit.

Because of this unique synthesis of East and West into a culture that is distinctly Japanese, Japan is not easy for Westerners to comprehend. Discovering it is like peeling an onion—you uncover one layer only to discover more layers underneath. Thus, no matter how long you stay in Japan, you never stop learning something new about it—and to me that constant discovery is one of the most fascinating aspects of being here.

1 The Best Travel Experiences

Long ago, the Japanese ranked the “three best” of almost every natural wonder and attraction in their country: the three best gardens, the three best scenic spots, the three best waterfalls, even the three best bridges. But choosing the “best” of anything is inherently subjective, and decades—even centuries—have passed since some of the original “three best” were so designated. Still, lists can be useful for establishing priorities. To help you get the most out of your stay, I’ve compiled this list of what I consider the best Japan has to offer based on our many combined years of traveling through the country. From the weird to the wonderful, the profound to the profane, the obvious to the obscure, these recommendations should fire your imagination and launch you toward discoveries of your own.

- **Making a Pilgrimage to a Temple or Shrine:** From mountaintop shrines to neighborhood temples, Japan’s religious structures rank among the nation’s most popular attractions. Usually devoted to a particular deity, they’re visited for specific reasons: Shopkeepers call on Fushimi-Inari Shrine outside Kyoto, dedicated to the goddess of rice and therefore prosperity, while couples wishing for a happy marriage head to Kyoto’s Jishu Shrine, a shrine to the deity of love. Shrines and temples are also the sites for most of Japan’s major festivals. See chapter 2, the regional chapters, and “The Best Temples & Shrines” section, below, for more on Japan’s temples and shrines.
- **Taking a Communal Hot-Spring Bath:** No other people on earth bathe as enthusiastically, as frequently, and for such duration as the Japanese. Their many hot-spring resorts—thought to cure all sorts of ailments as well as simply make you feel good—range from hangarlike affairs to outdoor baths with views of the countryside. No matter what the setup, you’ll soon warm to the ritual of soaping up, rinsing off, and then soaking in near-scalding waters. See “The Best Spas & Public Baths,” later in this chapter, for specific recommendations.
- **Participating in a Festival:** With Shintoism and Buddhism as its major religions, and temples and shrines virtually everywhere, Japan has festivals literally every weekend. These celebrations, which range from huge processions of wheeled floats to those featuring horseback archery and ladder-top acrobatics, can be lots of fun; you may want to plan your trip around one. See the “Calendar of Events,” in chapter 2 for a list of some of the most popular Japanese festivals.
- **Dining on Japanese Food:** There’s more to Japanese cuisine than sushi, and part of what makes travel here so fascinating is the variety of national and regional dishes. Every prefecture, it seems, has its own style of noodles, its special vegetables, and its delicacies. If money is no object, order *kaiseki*, a complete meal of visual and culinary finesse. See the “Tips on Dining, Japanese Style” section of chapter 2, the “Where to Dine” sections in the regional chapters, and “The Best Culinary Experiences,” later in this chapter, for more on Japanese food.
- **Viewing the Cherry Blossoms:** Nothing symbolizes the coming of spring so vividly to the Japanese as the appearance of the cherry blossoms—and nothing so amazes visitors as the way the Japanese gather under the blossoms to celebrate the season with food,

drink, dance, and karaoke. See the “Calendar of Events,” in chapter 2 for cherry blossom details.

- **Riding the Shinkansen Bullet Train:** Asia’s fastest train whips you across the countryside at more than 290km (180 miles) an hour as you relax, see the country’s rural countryside, and dine on boxed meals filled with local specialties of the area through which you’re speeding. See “Getting Around Japan,” in chapter 2 for more.
 - **Staying in a Ryokan:** Japan’s legendary service reigns supreme in the ryokan, a traditional Japanese inn. Staying in a ryokan is the height of both luxury and simplicity: You’ll bathe in a Japanese tub, dine like a king in your own room, sleep on a futon, awaken to lovely views (usually a Japanese garden) past the shoji screens, and breakfast in your room to start the day. See “Tips on Accommodations,” in chapter 2 and the “Where to Stay” sections in the regional chapters for more on ryokan.
 - **Shopping in a Department Store:** Japan’s department stores are among the best in the world, offering everything from food to designer clothing to electronics to kimono and traditional crafts. Service also is among the best in the world: If you arrive when the store opens, staff will be lined up at the front door to bow as you enter. See the “Shopping” sections throughout this book.
 - **Attending a Kabuki Play:** Based on universal themes and designed to appeal to the masses, Kabuki plays are extravaganzas of theatrical displays, costumes, and scenes—but mostly they’re just plain fun.
- See “Cultural Snapshots: Japanese Arts in a Nutshell,” in appendix A and the Kabuki section of “Tokyo After Dark,” in chapter 4.
- **Strolling Through Tokyo’s Nightlife District:** Every major city in Japan has its own nightlife district, but probably none is more famous, more wicked, or more varied than Tokyo’s Kabuki-cho in Shinjuku, which offers everything from hole-in-the-wall bars to strip joints, discos, and gay clubs. See “Tokyo After Dark,” in chapter 4.
 - **Seeing Mount Fuji:** It may not seem like much of an accomplishment to see Japan’s most famous and tallest mountain, visible from 161km (100 miles) away. But the truth is: It’s hardly ever visible except during the winter months and rare occasions when the air is clear. Catching your first glimpse of the giant peak is truly breathtaking and something you’ll never forget, whether you see it from aboard the Shinkansen, from a Tokyo skyscraper, or from a nearby national park. If you want to climb it, be prepared for a group experience—600,000 people climb Mount Fuji every year. See “Climbing Japan’s Most Famous Mountain: Mount Fuji,” in chapter 5 for more information.
 - **Spending a Few Days in Kyoto:** If you see only one city in Japan, Kyoto should be it. Japan’s capital from 794 to 1868, Kyoto is one of Japan’s finest ancient cities, boasting some of the country’s best temples, Japanese-style inns, traditional restaurants, shops, and gardens. See chapter 7 for extensive information on the city.

2 The Best Temples & Shrines

- **Sensoji Temple (Tokyo):** The capital’s oldest temple is also its liveliest. Throngs of visitors and stalls selling both traditional and kitschy items lend it a festival-like atmosphere. This is the most

important temple to see in Tokyo. See p. 175.

- **Meiji Jingu Shrine** (Tokyo): Tokyo's most venerable and refined Shinto shrine honors the Emperor Meiji and his empress with simple yet dignified architecture surrounded by a dense forest. This is a great refuge in the heart of the city. See p. 175.
- **Kotokuin Temple** (Kamakura): This temple is home to the Great Buddha, Japan's second-largest bronze image, which was cast in the 13th century and sits outdoors against a magnificent wooded backdrop. The Buddha's face has a wonderful expression of contentment, serenity, and compassion. See p. 228.
- **Hase Kannon Temple** (Kamakura): Although this temple is famous for its 9m (30-ft.) tall Kannon of Mercy, the largest wooden image in Japan, it's most memorable for its thousands of small statues of Jizo, the guardian deity of children, donated by parents of miscarried, stillborn, or aborted children. It's a rather haunting vision. See p. 229.
- **Toshogu Shrine** (Nikko): Dedicated to Japan's most powerful shogun, Tokugawa Ieyasu, this shrine is the nation's most elaborate and opulent, made with 2.4 million sheets of gold leaf. It's set in a forest of cedar. See p. 234.
- **Kiyomizu Temple** (Kyoto): One of Japan's best-known temples with a structure imitated by lesser temples around the country, Kiyomizu commands an exalted spot on a steep hill with a sweeping view over Kyoto. The pathway leading to the shrine is lined with pottery and souvenir shops, and the temple grounds have open-air pavilions where you can drink beer or eat noodles. Don't neglect the smaller **Jishu Shrine** on its grounds—it's dedicated to the god of love. See p. 324.
- **Sanjusangendo Hall** (Kyoto): Japan's longest wooden building contains the spectacular sight of more than 1,000 life-size wood-carved statues, row upon row of the thousand-handed Kannon of Mercy. See p. 326.
- **Kinkakuji (Temple of the Golden Pavilion)** (Kyoto): Constructed in the 14th century as a shogun's retirement villa, this three-story pavilion shimmers in gold leaf and is topped with a bronze phoenix; it's a beautiful sight when the sun shines and the sky's blue. See p. 326.
- **Todaiji Temple** (Nara): Japan's largest bronze Buddha sits in the largest wooden structure in the world, making it the top attraction in this former capital. While not as impressive as the Great Buddha's dramatic outdoor stage in Kamakura (see above), the sheer size of Todaiji Temple and its Buddha make this a sight not to be missed if you're in the Kansai area. See p. 348.
- **Horyuji Temple** (Nara): Despite the fact that Todaiji Temple with its Great Buddha (see above) gets all the glory, true seekers of Buddhist art and history head to the sacred grounds of Horyuji Temple with its treasures and ancient buildings. See p. 346.
- **Ise Grand Shrines** (Ise): Although there's not much to see, these shrines are the most venerated Shinto shrines in all of Japan, and pilgrims have been flocking here for centuries. Amazingly, the Inner Shrine, which contains the Sacred Mirror, is razed and reconstructed on a new site every 20 years according to strict rules governing purification in the Shinto religion. Follow the age-old route of former pilgrims after you visit

the shrines, and stop for a meal in the nearby Okage Yokochō District. See p. 367.

- **Itsukushima Shrine** (Miyajima): The huge red *torii* (the traditional entry gate of a shrine) standing in the waters of the Seto Inland Sea is one of the most photographed landmarks in Japan and signals the approach to this shrine. Built over the tidal flats on a gem of an island called Miyajima, it's considered one of Japan's most scenic spots. At night, the shrine is illuminated. See p. 468.
- **Kotohiragu Shrine** (Kotohira, on Shikoku): One of Japan's oldest

and most popular shrines beckons at the top of 785 granite steps on the Yashima Plateau with great views of the Seto Inland Sea, but for most Japanese, it's the "I made it!" that counts. See p. 476.

- **Dazaifu Tenmangu Shrine** (Fukuoka): Established in 905 to deify the god of scholarship, this immensely popular shrine has a festive atmosphere and is popular with students wishing to pass school exams. The road leading to the shrine is lined with souvenir and craft shops. See p. 496.

3 The Best Gardens

- **Hama Rikyu Garden** (Tokyo): Considered by some to be the best garden in Tokyo, this peaceful oasis has origins stretching back 300 years when it served as a retreat for a former feudal lord and as duck-hunting grounds for the Tokugawa shōgun. Surrounded by water on three sides, it contains a tidal pool, moon-viewing pavilions, and teahouses. See p. 183.
- **Sankei-en Garden** (Yokohama): Historic villas, tea arbors, a farmhouse, a pagoda, and other authentic buildings, all set in a century-old landscaped garden with ponds and streams, make this one of the most interesting and picturesque gardens in Japan. See p. 242.
- **Ryoanji Temple** (Kyoto): Japan's most famous Zen rock garden, laid out at the end of the 15th century, consists of moss-covered boulders and raked pebbles enclosed by an earthen wall. It is said that it's impossible to see all 15 rocks from any vantage point; see if you can. Come early in the morning for some peaceful meditation. See p. 326.
- **Katsura Imperial Villa** (Kyoto): Designed by Japan's most famous gardener, Kobori Enshū, the garden surrounding this imperial villa is, in my view, Japan's most beautiful. A "strolling garden," its view changes with every step but is always complete, perfectly balanced, and in harmony. It's well worth the extra effort involved to see it. See p. 336.
- **Saihoji** (Kyoto): Popularly known as the Moss Temple, Saihoji is Japan's most famous moss garden, with more than 100 varieties spread throughout the grounds, giving off an iridescent glow. It's especially beautiful after a rainfall. See p. 338.
- **Kenrokuen Garden** (Kanazawa): Considered by some to be Japan's grandest landscape garden (and rated one of the "three best"), Kenrokuen is also one of the largest. The garden took 150 years to complete and consists of ponds, streams, rocks, mounds, trees, grassy expanses, and footpaths. Best of all, no tall buildings detract from the views. After Katsura (see above), this is my top choice. See p. 376.

- **Koko-en** (Himeji): It isn't old (it was laid out in 1992), but this is a wonderful surprise package of nine small gardens, each one different but typical of gardens during the Edo Period, which lasted from 1603 to 1867. Upon seeing what can be accomplished with skill and money in little more than a decade, some gardeners may turn green with envy. See p. 428.
- **Korakuen Garden** (Okayama): Rated one of Japan's three most beautiful gardens, Korakuen was completed in 1700 and incorporates the surrounding hills and Okayama Castle into its design. It's definitely worth a visit if you're in the vicinity, though personally, I like Kenrokuen (see above) more. See p. 432.
- **Ritsurin Park** (Takamatsu): Dating from the 17th century, this former private retreat of the ruling Matsudaira clan is an exquisite strolling garden that incorporates Mount Shiun in its landscaping and boasts 1,600 pine trees and 350 cherry trees. Stop for tea in the Feudal-Era teahouse and contemplate the view at leisure. See p. 474.
- **Senganen** (Kagoshima): Laid out more than 300 years ago by the Shimazu clan, this summer retreat with a 25-room villa was known for its poem-composing parties, held beside a rivulet that still exists. After touring the garden and villa, be sure to visit the nearby museum with relics belonging to the Shimazu family. This garden is one of my favorites. See p. 518.

4 The Best Castles, Palaces & Villas

- **Matsumoto Castle** (Matsumoto): Popularly known as the Crow Castle due to its black color, this small castle boasts the oldest *donjon* (keep) in Japan (400 years old). A moon-viewing room was added in 1635, and exhibited inside the castle is a superb collection of Japanese matchlocks and samurai armor dating from the mid-16th century through the Edo Period. Volunteer guides stand ready for personal tours. See p. 262.
- **Kyoto Imperial Palace** (Kyoto): Home to Japan's imperial family from the 14th century to the 19th century, this palace is praised for its Heian design and graceful garden. Good news for travelers: Guided tours of the palace are free. See p. 321.
- **Nijo Castle** (Kyoto): One of the few castles built by the mighty Tokugawa shogunate as a residence rather than for defense, Nijo Castle is where the shogun stayed whenever he was in Kyoto. It's famous for its creaking floorboards that warned of enemy intruders. The castle is considered the quintessence of Momoyama architecture. See p. 322.
- **Katsura Imperial Villa** (Kyoto): Built in the 1600s by a brother of the emperor, this villa and garden are considered to be among the best—if not the best—in traditional architecture and landscape gardening. More than anyplace else, the villa illustrates the life of refinement enjoyed by 17th-century nobility, when leisurely pursuits included such activities as moon viewing. See p. 336.
- **Osaka Castle** (Osaka): Although just a reproduction of what was once the mightiest castle in the land, Osaka Castle still impresses with its sheer size. Inside you'll find a high-tech museum detailing the life and times of Toyotomi Hideyoshi, the warrior general who built the castle. See p. 394.
- **Himeji Castle** (Himeji): Said to resemble a white heron poised in

flight over the plains, this is quite simply Japan's most beautiful castle. With its extensive gates, moats, turrets, and maze of passageways, it has survived virtually intact since feudal times. If you see only one castle in Japan, make it this one. See p. 427.

- **Matsue Castle** (Matsue): This 17th-century castle is one of Japan's few remaining original castles (not a reconstruction). It features a five-story donjon with samurai gear and artifacts belonging to the ruling Matsudaira clan. See p. 447.
- **Matsuyama Castle** (Matsuyama): Occupying a hill above the city,

this is also one of the few original castles left in Japan. It boasts good views over Matsuyama from its three-story donjon as well as a collection of armor and swords of the Matsudaira clan. See p. 482.

- **Kumamoto Castle** (Kumamoto): Although a ferroconcrete reconstruction not nearly as huge as the original, this massive castle is still an impressive sight, especially at night when it's illuminated. It's famous for its curved walls, which made invasion virtually impossible. The interior houses a museum with palanquins, armor, swords, and other artifacts of the former ruling clans. See p. 531.

5 The Best Museums

- **Tokyo National Museum** (Tokyo): Even professed museum-phobes should make a point of visiting the National Museum, the largest repository of Japanese arts in the world. Lacquerware, china, kimono, samurai armor, swords, woodblock prints, religious art, and more are on display, making this the best place in Japan to view Japanese antiques and decorative objects. If you visit only one museum in Japan, this should be the one. See p. 178.
- **Edo-Tokyo Museum** (Tokyo): Housed in a high-tech modern building, this ambitious museum chronicles the fascinating and somewhat tumultuous history of Tokyo (known as Edo during the Feudal Era) with models, replicas, artifacts, and dioramas. See p. 174.
- **Hakone Open-Air Museum** (Chokoku-no-Mori, Hakone): Beautifully landscaped grounds and spectacular scenery showcase approximately 700 20th-century sculptures, from Giacomo and Rodin to Henry Moore. Here, too, is the Picasso Pavilion, housing 200 of the artist's works. See p. 249.
- **Japan Ukiyo-e Museum** (Matsumoto): One of the best woodblock-print museums in Japan, this museum displays the largest collection of prints in the world on a rotating basis. A must-see in Matsumoto. See p. 263.
- **Hida Minzoku Mura Folk Village** (Takayama): Picturesquely situated around a pond with flowers, more than 30 shingled and thatched farmhouses—many transported from the surrounding Japan Alps—are filled with farm implements and objects of daily life, providing fascinating insight into the life and times of the extended families that once inhabited them. See p. 272.
- **Inro Museum** (Takayama): Of Takayama's many specialty museums, this one is my favorite: It houses Japan's largest collection of *inro* (small containers) with *netsuke* (toggles) that were once standard accessories of the kimono. You could spend hours looking at these miniature works of art. See p. 274.
- **Museum Meiji Mura** (Nagoya): This open-air architectural museum is an absolute treasure

with more than 60 original buildings and structures dating from the Meiji Period situated on 100 beautifully landscaped hectares (250 acres) on the shore of a lake. Western-style homes, churches, a Kabuki theater, a bathhouse, a prison, a brewery, and much more are open for viewing and filled with furniture and household items. Mail a postcard from an authentic post office, buy candy from an old candy store, and drink tea in the lobby of the original Imperial Hotel, which was designed by Frank Lloyd Wright. See p. 358.

- **Ishikawa Prefectural Museum for Traditional Products and Crafts** (Kanazawa): Kanazawa is famous for its handcrafted items, including gold leaf, umbrellas, stringed instruments, Buddhist altars, pottery, and more. English explanations, a detailed pamphlet, and an audio guide explain how they're made. See p. 377.
- **Disaster Reduction and Human Renovation Institution** (Kobe): You can't tell by its name, but this excellent museum is devoted to Kobe's 1995 earthquake, with films, dioramas, and exhibits detailing the city's destruction and rebirth. See p. 414.
- **Ohara Museum of Art** (Kurashiki): Founded in 1930, this museum just keeps getting better, with works by both Western and Japanese greats spread throughout

several buildings. Its location in the picturesque Kurashiki historic district is a bonus. See p. 440.

- **Adachi Museum** (Matsue): This museum near Matsue combines two of my passions—art and gardens—making it a winner. Japanese modern art is the focus indoors, while the perfectly landscaped garden comes into view through framed windows, making it part of the art in a very surreal way. See p. 450.
- **Louis C. Tiffany Garden Museum** (Matsue): This, one of the world's best collections of Tiffany paintings, furniture, ceramics, stained-glass windows, and jewelry, will take your breath away—and make you wonder how much insurance the museum pays in this earthquake-prone land. See p. 448.
- **Peace Memorial Museum** (Hiroshima): Japan's most thought-provoking museum contains exhibits examining Hiroshima's militaristic past, the events leading up to the explosion of the world's first atomic bomb, the city's terrible destruction, and its active anti-nuclear movement. See p. 458.
- **Fukuoka Asian Art Museum** (Fukuoka): This fascinating museum is devoted to contemporary and modern art from around Asia, including the Philippines, Indonesia, Malaysia, Thailand, China, Korea, and India. See p. 495.

6 The Best Small Towns & Villages

- **Takayama**: Located in the Japan Alps and surrounded by mountain peaks, this former castle town has a delightful historic quarter with 18th-century merchant homes, sake breweries, special-interest museums, craft shops, restaurants, and Japanese inns, all easy to explore on foot. Another highlight

is the **Hida Minzoku Mura Folk Village**, an open-air museum illustrating how local farmers once lived (see “The Best Museums,” above). See “Takayama, Little Kyoto of the Mountains,” in chapter 6.

- **Ogimachi** (Shirakawago): With its thatch-roofed farmhouses,

paddies trimmed with flower beds, roaring river, and pine-covered mountains rising on all sides, Ogimachi is one of the most picturesque rural villages in Japan. Many of the large, thatched farmhouses are now inexpensive *minshuku* (family-run inns), where you can stay and sample the local mountain cuisine. See “Rural Shirakawago & Ogimachi,” in chapter 6.

- **Tsumago:** Nestled in the Japan Alps, Tsumago served as an old post town for *daimyo* (feudal lords) and their samurai traveling between Kyoto and Edo (now Tokyo). Virtually untouched by the 20th century, it has many authentic feudal-age wooden buildings, some of which are open to the public. See “Along the Nakasendo Highway: Tsumago & Magome,” in chapter 6.
- **Nara:** This ancient capital boasts a large park with temples, shrines, museums, and the country’s

largest bronze Buddha, plus friendly free-ranging deer. See “A Side Trip to Nara,” in chapter 7.

- **Mount Koya:** This mountaintop enclave of 120 Shingon Buddhist temples is one of Japan’s most sacred places. It contains the mausoleum of Kobo Daishi, one of the most revered figures in Japanese Buddhist history, as well as an extensive burial ground of daimyo, samurai, and others who wished to be close to their leader for eternity. Following in the footsteps of emperors, nobles, and commoners who’ve made pilgrimages here over the last thousand years, you can even spend the night in one of the temples. See “The Temples of Mount Koya,” in chapter 8.
- **Uchiko** (Shikoku): This well-preserved village boasts a number of buildings dating from the Edo Period and the turn of the 20th century, including several homes now open to the public and a 1916 Kabuki theater. See p. 484.

7 The Best National Parks

- **Nikko National Park:** This 80,000-hectare (200,000-acre) national park centers on the sumptuous Toshogu Shrine with its mausoleum for Tokugawa Ieyasu, majestic cedars, and lake-side resorts. See p. 231.
- **Fuji-Hakone-Izu National Park:** Boasting magnificent Mount Fuji at its core, this popular weekend getaway beckons vacationing Tokyoites with its many hot-spring spas, stunning close-up views of Mount Fuji, sparkling lakes, historic attractions relating to the famous Feudal-Era Tokaido Highway, and coastal areas of Izu Peninsula. One of the best ways to see Hakone is via a circular route that involves travel on a two-car mountain tram, a cable car, a ropeway, and a boat; the delightful

journey offers wonderful scenery and interesting sights along the way. See p. 245.

- **Japan Alps National Park:** Encompassing Honshu’s most impressive mountain ranges and the site of the 1998 Winter Olympics, this national park offers skiing as well as unique villages worth a visit in their own right. See p. 260.
- **Ise-Shima National Park:** Boasting a rugged seascape of capes, inlets, and islets, this park is the birthplace of cultivated pearls. It’s famous for its bays dotted with pearl-cultivating oyster rafts, its female divers, a pearl museum, plus a top-notch aquarium and the Ise Grand Shrines, Japan’s most venerable shrines. Two theme parks are also located here. See p. 365.

- **Seto-Naikai (Inland Sea) National Park:** Covering 650 sq. km (251 sq. miles) of water, islands, islets, and coastline, this sea park stretches from Kobe in the east to Beppu in the west. It's studded with numerous islands of all sizes, the most famous of which is Miyajima, home of the Itsukushima Shrine. Cruises ply the waters of the Seto Inland Sea, as do regular ferries sailing between Honshu, Shikoku, and Kyushu. The adventuresome can even cycle across the Seto Inland Sea via the Shimanami Kaido route linking Honshu with Shikoku (see "The Best Outdoor Adventures," below). See p. 467.
- **Unzen-Amakusa National Park:** At western Kyushu's high-altitude national park, you can climb Mount Fugen (1,229m/4,028 ft. above sea level), relax in a hot-spring bath, golf at one of Japan's oldest public courses, and take a walk through the Hells, the park's extra-steamy sulfur springs. See p. 553.
- **Towada-Hachimantai National Park:** Tohoku's most popular park beckons with scenic lakes, rustic hot-spring spas, hiking, and skiing. See p. 569.
- **Shikotsu-Toya National Park:** This 987-sq.-km (381-sq.-mile) park in eastern Hokkaido encompasses lakes, volcanoes, and famous hot-spring resorts like Noboribetsu. See p. 594.
- **Daisetsuzan National Park:** The largest of Japan's 28 national parks—and some say Hokkaido's most beautiful—Daisetsuzan boasts three volcanic chains, fir- and birch-covered hillsides, the impressive Souunkyo Gorge, and plenty of skiing and hiking opportunities. See p. 601.
- **Akan National Park:** Popular for hiking, skiing, canoeing, and fishing, Akan National Park in Hokkaido is characterized by dense forests of subarctic primeval trees and caldera lakes, the most famous of which are Kussharo, one of Japan's largest mountain lakes, and Mashu, considered one of Japan's least-spoiled lakes and one of the world's clearest. See p. 605.

8 The Best of Old Japan

- **Splurging on a Night in a Ryokan:** If you can afford to, splurge on at least 1 night in one of the country's best ryokan, where the service is impeccable, the kaiseki meals are out of this world, and glorious views outside your tatami room are of miniature landscaped gardens. You'll be pampered in a manner befitting an emperor—many of the nation's oldest ryokan were indeed born to serve members of the imperial court and feudal lords as they traveled Japan's highways. See "Tips on Accommodations," in chapter 2; the "Where to Stay" sections in the regional chapters; and "The Best Traditional Ryokan," later in this chapter.
- **Attending a Sumo Match:** There's nothing quite like watching two monstrous sumo wrestlers square off, bluff, and grapple as they attempt to throw each other on the ground or out of the ring. Matches are great cultural events, but even if you can't attend a match, you can watch one on TV during one of the six annual 15-day tournaments. For more information, see "Spectator Sports," in chapter 4, and "Sumo," in appendix A.
- **Strolling through a Japanese Garden:** Most of Japan's famous

gardens are relics of the Edo Period, when the shogun, daimyo feudal lords, imperial family, and even samurai and Buddhist priests developed private gardens for their own viewing pleasure. Each step in a strolling garden brings a new view to die for. Refer to “The Best Gardens,” earlier in this chapter, and the “Attractions” sections in the regional chapters, to see which are heaven on earth.

- **Participating in Zazen Meditation in a Buddhist Temple:** Zazen, or sitting meditation, is practiced by Zen Buddhists as a form of spiritual training and by laypeople as a way to relieve stress and clear the mind. Several temples in Japan are willing to take in foreigners for Zazen sessions. See the “Five Unforgettable Ways to Immerse Yourself in Japanese Culture” section in chapter 4, and the “Here and Zazen: Buddhism in Japan” box on p. 614.
- **Attending a Traditional Tea Ceremony:** Developed in the 16th century as a means to achieve inner harmony with nature, the highly ritualized ceremony is carried out in teahouses throughout the country, including those set in Japan’s many parks and gardens. Several Tokyo hotels offer instruction in the tea ceremony in English. See p. 181.
- **Getting a Shiatsu Massage:** Shiatsu, or pressure-point massage, is available in virtually all first-class accommodations in Japan and at most moderately priced ones as well. After a hard day of work or sightseeing, nothing beats a relaxing massage and a hot bath.
- **Relaxing at a Hot-Spring Resort:** No country in the world boasts more natural hot springs than Japan, which has 19,500 different springs. Hot-spring spas are found in virtually all regions of

the country and feature everything from hot-sand baths to open-air baths. See “The Best Spas & Public Baths,” below, as well as the regional chapters.

- **Spending a Day in Asakusa** (Tokyo): Asakusa is the best place to experience Tokyo’s old downtown, with its popular Sensoji Temple, Nakamise shopping lane with crafts and kitsch, and casual traditional restaurants. As in days of yore, arrive by boat on the Sumida River. See chapter 4.
- **Exploring Kyoto’s Higashiyama-ku District:** Kyoto’s eastern sector is a lovely combination of wooded hills, temples, shrines, museums, shops, and traditional restaurants, making it one of the best neighborhoods in Japan for a stroll. See “A Stroll Through Higashiyama-ku,” in chapter 7.
- **Visiting Kyoto’s Gion District:** Japan’s most famous geisha houses may be off-limits to anyone without a proper introduction, but an early-evening stroll through this enclave of wooden homes and plain facades is like a journey back in time. You might even catch a glimpse of an elaborately made-up *maiko* (apprentice) on her way to an appointment or hear strains of a *shamisen* (a traditional three-stringed Japanese instrument) played behind closed doors. See chapter 7.
- **Watching Cormorant Fishing:** Every night in summer, wooden boats gaily decorated with paper lanterns will take you out on rivers outside Kyoto and Nagoya for an up-close look at cormorant fishing. The birds, maneuvered by fishermen in traditional garb, have tight collars around their necks to prevent them from swallowing their catch. Drinking and dining on board contribute to the festive air. See p. 337 and 360.

- **Walking to Kobo Daishi's Mausoleum on Mount Koya:** Ever since the 9th century, when Buddhist leader Kobo Daishi was laid to rest at Okunion on Mount Koya, his faithful followers have followed him to their graves—and now tomb after tomb line a 1.6km

(1-mile) pathway to Daishi's mausoleum. Cypress trees, moss-covered stone lanterns, and thousands upon thousands of tombs make this the most impressive graveyard stroll in Japan, especially at night. See "Exploring Mount Koya," in chapter 8.

9 The Best of Modern Japan

- **Attending a Baseball Game** (Tokyo): After sumo, baseball is Japan's most popular spectator sport. Watching a game with a stadium full of avid fans can be quite fun and can shed new light on America's favorite pastime. See the "For It's Ichi, Ni, San Strikes You're Out . . ." box on p. 200 and the "Take Me Out to the Ballgame" box on p. 496.
- **Visiting Tsukiji Fish Market** (Tokyo): One of the largest wholesale fish markets in the world, this indoor market bustles with activity from about 3am on as frozen tuna is unloaded from boats, auctions are held, and vendors sell octopus, fish, squid, and everything else from the sea that's edible to the city's restaurants. Be sure to bring your camera. See p. 180.
- **Seeing Tokyo from the TMG:** On the 45th floor of the Tokyo Metropolitan Government Office (TMG), designed by well-known architect Kenzo Tange, an observatory offers a bird's-eye view of Shinjuku's cluster of skyscrapers, the never-ending metropolis and, on fine winter days, Mount Fuji. Best of all, it's free. See p. 188.
- **Hanging Out in Harajuku** (Tokyo): Nothing beats Sunday in Harajuku, where you can begin the day leisurely with brunch and then stroll the promenade of Omote Sando Dori, shop the area's many boutiques, take in a museum or two and perhaps a flea

market, and then relax over drinks at a sidewalk cafe and watch the never-ending parade of humanity. See "A Stroll through Harajuku & Aoyama," in chapter 4.

- **Shopping for Japanese Designer Clothes** (Tokyo): Japanese designer clothing is often outrageous, occasionally practical, but mostly just fun. Department stores and designer boutiques in Aoyama are the places to try on the styles if you have both the money and the figure for them. See "Shopping," in chapter 4.
- **Spending an Evening in an Entertainment District:** A spin through one of Japan's famous nightlife districts, such as **Shinjuku** or **Roppongi** in Tokyo or **Dotombori** in Osaka, is a colorful way to rub elbows with the natives as you explore narrow streets with their whirls of neon, tiny hole-in-the-wall bars and restaurants, and all-night amusement spots. See "Tokyo After Dark," in chapter 4 and "Osaka After Dark," in chapter 8.
- **Seeing Fish Eye-to-Eye in an Aquarium** (Nagoya, Toba, Osaka, Kagoshima): Because Japan is surrounded by sea, it's no surprise that it has more than its fair share of aquariums. Several have made splashy debuts in the past decade with innovative displays that put you eye-to-eye with the creatures of the deep. My favorite is the one in Osaka. See p. 357, 370, 395, and 519.

• **Visiting Holland, Spain, Outer Space, or the Edo Period Without Leaving Japan:** Theme parks are big business in Japan, many of them quite sophisticated and realistic down to the tiniest detail. **Huis Ten Bosch** (Nagasaki) is a reproduction of a Dutch village with shops, restaurants, museums, and much more; **Parque España** (Ise-Shima) takes a similar approach but with a Spanish theme. **Edo Wonderland Ise** (Ise-Shima) evokes the Warring States

Period of Japanese history, while the **Edo Wonderland Noboribetsu** (Noboribetsu) is an Edo-Era park; both have staff dressed in period costumes, theatrical events, and museums. **Space World** (Kita-Kyushu) is an amusement park based on space travel, while **Ocean Dome** (Miyazaki) is the world's largest indoor water park. All of these are great fun and a must if you're traveling with children. See p. 546, 371, 369, 597, 497, and 511 respectively.

10 The Best Spas & Public Baths

- **Oedo-Onsen Monogatari** (Tokyo): Hot water pumped from the deep supplies this unique hot-spring bath, modeled after bathhouses of the Edo Period. A visit here is both relaxing and a cultural experience. See p. 182.
- **Hakone:** Hakone abounds in hot-spring spas and ryokan along the old Tokaido Highway, which originated to serve the needs of feudal lords traveling to Edo (now Tokyo). Its proximity to Tokyo makes it my number one choice for a weekend hot-spring getaway. The most famous public bathhouse in Hakone is the state-of-the-art **Yunessun**, with its wide variety of indoor and outdoor baths. The timid should take heart—you wear a bathing suit to most of them. See “Hakone: By Mountain Tram, Cable Car, Ropeway & Boat,” in chapter 5.
- **Spa World** (Osaka): You could easily spend a whole day at this lavishly decorated, international-themed, hot-spring bathing facility: Travel the world with a bath in the German sector, a sauna in the Finnish room, and an outdoor soak in the Japanese area. Swim in the rooftop pool, relax on the sun terrace, and have a massage. See p. 395.
- **Thalassa Shima:** Set on the dramatic coastline of Ise Shima Bay, this modern resort combines the Japanese love for taking the waters with French thalasso therapy (seawater, sea mud, and seaweed treatments). A pool overlooking the bay, rooms with seaside views, and French and Japanese restaurants make this a great sophisticated getaway. See p. 372.
- **Dogo Onsen Honkan** (Matsuyama): Located in Japan's oldest hot-spring spa, this century-old bathhouse gets my vote for the country's most delightful. It's a wonderful traditional wooden structure with baths and a communal tatami area where you can relax afterwards in a *yukata* (cotton robe) and drink tea. It's all very civilized. See p. 483.
- **Beppu:** This king of hot-spring spas offers 168 public bathhouses and baths in water, mud, and sand. **Suginoi Palace** is Beppu's most elaborate—huge pools of various sizes and temperatures. **Takegawara Bathhouse**, built in 1879, is the place to go for hot black sand—you'll be buried up to your neck. See p. 502 and 503.
- **Nyuto Onsen:** This valley in Tohoku's Towada-Hachimantai National Park is about as remote as

you can get, with a string of rustic Japanese inns and outdoor baths nestled in the wooded hills. Difficult to get to, but an experience you won't easily forget. See p. 570.

- **Noboribetsu Onsen:** Hokkaido's most popular resort and one of

Japan's best-known spas, Noboribetsu offers 11 different kinds of hot water. Foremost among the many public bathing facilities is **Daiichi Takimotokan**, with some 20 pools. See p. 595.

11 The Best Outdoor Adventures

- **Climbing Mount Fuji:** Okay, so climbing Japan's tallest—3,716m (12,388 ft.) high—and most famous mountain is not the solitary, athletic pursuit you may have envisioned—but with 600,000 people climbing it annually, it's a great, culturally enriching group activity. The most recent trend is to climb through the night with a flashlight and then cheer the sunrise from the top of the mountain. See "Climbing Japan's Most Famous Mountain: Mount Fuji," in chapter 5.
- **Hiking the Old Nakasendo Highway** (Japan Alps): Back in the days of the shogun, feudal lords were required to return to Edo (now Tokyo) every other year, traveling designated highways. Nakasendo was one of these highways, and an 8km (5-mile) stretch through a valley still exists between the old post towns of **Magome** and **Tsumago**. It's a beautiful walk, and the towns are historic relics. See p. 268.
- **Skiing in Honshu & Hokkaido:** Host of two winter Olympics (in Sapporo in 1972 and Nagano in 1998) and riddled with mountain chains, Japan is a great destination for skiing, the most popular winter sport in the country. The Japan

Alps in Central Honshu and the mountains of Tohoku and Hokkaido are popular destinations. See chapters 6, 11, and 12.

If you'd rather leave the planning to someone else, join a trip sponsored by the **Shinyi Ski Club**; contact Julia Nolet (☎ 03/3423-8858) from 10am to 10pm Tokyo time; fax 03/3423-8859; jnworwor@gol.com.

- **Cycling** (Matsuyama and Hiroshima): Hard to believe, but you can bike between Shikoku and Hiroshima Prefecture via the 69km (43-mile) Shimanami Kaido route, which actually comprises 10 bridges and six islands in the Seto Inland Sea. A well-maintained, dedicated biking path makes cycling one of Japan's best outdoor activities. See "Cycling the Shimanami Kaido," in chapter 9 and "Seeing the Seto Inland Sea," in chapter 8.
- **Shooting the Kumagawa Rapids** (Kumamoto): You can glide down one of Japan's most rapid rivers in a long, traditional wooden boat or opt for a more adventurous journey on a raft guided by professionals. Either way, the scenery is great. See "Shooting the Kumagawa Rapids," under "Kumamoto," in chapter 10.

Tips Active Vacations

For more information on outdoor activities in Japan, including hiking, skiing, cycling, windsurfing, rock climbing, and even hot-spring spas, see www.outdoorjapan.com and www.skijapanguide.com.

- **Fishing:** Most foreigners laugh when they see Japanese fishing spots—a stocked pool in the middle of Tokyo or a cement-banked river, lined elbow to elbow with fishermen. For more sporting

conditions, head to Lake Akan in Hokkaido's **Akan National Park**, where you can fish for rainbow trout or white spotted char. See “Akanko Spa & Akan National Park,” in chapter 12.

12 The Best Traditional Ryokan

- **Hiiragiya Ryokan** (Kyoto; ☎ 075/221-1136): If ever there was an example of the quintessential ryokan, Hiiragiya is it. Located in the heart of old Kyoto, it's the ultimate in tatami luxury: a dignified enclave of polished woods and rooms with antique furnishings overlooking private gardens. Six generations of the same family have provided impeccable service and hospitality here since 1861. See p. 298.
- **Tawaraya** (Kyoto; ☎ 075/211-5566): This venerable inn has been owned and operated by the same family since it opened in the first decade of the 1700s; it's now in its 11th generation of innkeepers. Located in old Kyoto, its guest list reads like a Who's Who of visitors to Japan, including Leonard Bernstein, the king of Sweden, Alfred Hitchcock, and Saul Bellow. See p. 299.
- **Ryokan Kurashiki** (Kurashiki; ☎ 086/422-0730): Located right beside the willow-lined canal of Kurashiki's famous historic district, this ryokan occupies an old mansion and three 250-year-old antiques-filled warehouses. It's a great place to explore as you

wander the corridors and peek into nooks and crannies, admiring all the antiques. See p. 442.

- **Mitakiso** (Hiroshima; ☎ 082/237-1402): The tatami rooms of this traditional inn are spread among an exquisite landscape garden of stunted pines, ponds, Japanese maples, stone lanterns, and meandering streams. See p. 461.
- **Iwaso Ryokan** (Miyajima; ☎ 0829/44-2233): The setting here is as romantic as any you'll find in Japan. If you can afford it, stay in one of the ryokan's 80-year-old cottages, where you'll have a view of maples and a gurgling brook on one of Japan's most scenic and famous islands. If staying here doesn't make you feel like a samurai or a geisha, nothing will. See p. 469.
- **Kannawaen** (Beppu; ☎ 0977/66-2111): This century-old ryokan spreads through lush and carefully tended gardens. Its tatami rooms with shoji screens look out onto hot springs, bamboo, streams, bonsai, stone lanterns, and flowers. It's the perfect place to escape the crowds and relax in the traditional bathhouse or the open-air hot springs. See p. 505.

13 The Best Western-Style Hotels

- **Park Hyatt Tokyo** (Tokyo; ☎ 800/233-1234 in the U.S. and Canada): Occupying the 39th to 52nd floors of a skyscraper designed by Kenzo Tange, this might well be the most gorgeous and sophisticated hotel in all of

Japan, if not the world. Offering unparalleled views of the city, one of Tokyo's hottest restaurants, rooms you could live in, and legendary service, it's a must for anyone who can afford it. See p. 121.

- **Four Seasons Hotel Tokyo at Chinzan-so** (Tokyo; ☎ 800/332-3442): Surrounded by a lush, 7-hectare (17-acre) garden, this top-rated hotel is a wonderful respite in one of the world's most crowded cities, with its impeccable service and a terrific spa and health club free for hotel guests. See p. 123.
- **Nikko Kanaya Hotel** (Nikko; ☎ 0288/54-0001): Dating from the 19th century, this rambling, old-fashioned hotel combines the rustic charm of a European country lodge with design elements of old Japan—and it's just a 15-minute walk from Toshogu Shrine. See p. 235.
- **The Fujiya Hotel** (Hakone; ☎ 0460/2-2211): Established in 1878 and nestled on a wooded hillside, the Fujiya is one of Japan's oldest, grandest, and most majestic Western-style hotels. Resembling a Japanese ryokan from the outside, it boasts a comfortable interior of detailed woodwork, old-fashioned antiques-filled guest rooms, and a delightful 1930s dining hall. It also offers indoor/outdoor pools, extensive landscaping, and hot-spring baths. A stay here makes you feel like you've traveled not just to Hakone but to another decade. See p. 252.
- **Kawana Hotel** (Ito; ☎ 0557/45-1111): Built in 1936 to resemble an English country estate, this relaxed yet refined hotel boasts large, manicured lawns that slope to the sea, and two famous 18-hole golf courses. It's a great getaway from Tokyo. See p. 258.
- **The Westin Miyako** (Kyoto; ☎ 800/WESTIN-1 in the U.S. and Canada): First built in 1890 but completely remodeled, this smartly appointed hotel sprawls across more than 6.4 hectares (16 acres) of hilltop on the eastern edge of town near many famous temples. Good views, a satellite check-in counter at Kyoto Station, free shuttle service to the hotel, indoor/outdoor swimming pools, a children's day-care center, a tea-ceremony room, and a Japanese garden make this a winner. There's even an annex with Japanese-style rooms as well. See p. 303.
- **Nara Hotel** (Nara; ☎ 0742/26-3300): From far away, this 1909 building just a short walk from Nara Park resembles a palace. Rooms in the main building have high ceilings, antique light fixtures, and old-fashioned decor. See p. 350.
- **The Ritz-Carlton, Osaka** (Osaka; ☎ 800/241-3333 in the U.S. and Canada): This chain's first venture in Japan has the company's trademark antiques, artwork, and intimate public spaces, as well as such pluses as free access to its fitness center and large, well-appointed rooms. It's not far from Osaka Station. See p. 398.
- **Unzen Kanko Hotel** (Unzen; ☎ 0957/73-3263): This rustic mountain lodge of ivy-covered wood and stone was built in 1935 to cater to foreigners in search of Mount Unzen's cooler climate. It offers a casual and relaxed atmosphere, hot-spring baths, and comfortable, old-fashioned rooms not far from the Hells. See p. 556.

14 The Best Affordable Japanese-Style Places to Stay

- **Homeikan** (Tokyo; ☎ 03/3811-1181): Although it's a bit far from Tokyo's main attractions, this is my top pick for an affordable, authentic Japanese inn. Rooms do not have private bathrooms, but

- pluses include a Japanese garden, nice public baths, and detailed tatami rooms adorned with traditional architectural features. Meals (optional) are served in your room. Another great plus: The owner speaks English. See p. 138.
- **Ryokan Fujioto** (Tsumago; ☎ 0264/57-3009): This 100-year-old inn is nestled back from the main street of Tsumago, a delightful village on the Edo-Era Nakasendo Highway. Meals feature local specialties. The owner speaks English; his daughter volunteers to guide visitors for free (you can request her services when making reservations). See p. 270.
 - **Antique Inn Sumiyoshi** (Takayama; ☎ 0577/32-0228): Located in the heart of Takayama on the banks of the Miyagawa River, this 90-year-old former silkworm factory features an *irori* (open-hearth fireplace) in the high-ceilinged communal room, antiques and painted screens throughout, and simple but delightfully old-fashioned tatami rooms overlooking the river. See p. 276.
 - **Minshuku in Shirakawago's Ogimachi**: Nestled in a narrow valley of the Japan Alps, Ogimachi is a small village of paddies, flowers, irrigation canals, and 200-year-old thatched farmhouses, about two dozen of which offer simple tatami accommodations and meals featuring local cuisine. This is a great, inexpensive escape. See p. 282.
 - **Matsubaya Ryokan** (Kyoto; ☎ 075/351-3727): Opened in 1885 and owned and managed by friendly Mrs. Hayabashi, the fifth generation of innkeepers, this wooden ryokan has rooms with balconies facing a miniature inner courtyard, and rooms facing a tiny enclosed garden. See p. 297.
 - **Temple Accommodations on Mount Koya**: If your vision of Japan includes temples, towering cypress trees, shaven-headed monks, and religious chanting at the crack of dawn, head for the religious sanctuary atop Mount Koya, where some 50 Buddhist temples offer tatami accommodations—some with garden views—and two vegetarian meals a day. See “The Temples of Mount Koya,” in chapter 8.
 - **International Villas** (Okayama Prefecture): Financed and maintained by Okayama Prefecture, International Villas are six exceptional—and exceptionally inexpensive—accommodations in delightful and rural settings. One, located in a mountain village, is modeled after a traditional soy-sauce warehouse; two are in 19th century—renovated thatched farmhouses; two more are in open and airy modern buildings with views of the Seto Inland Sea; and the last is at a hot-spring spa. See the box “Countryside Delights: Okayama Prefecture’s International Villas,” in chapter 8.
 - **Miyajima Morinoyado** (Miyajima; ☎ 0829/44-0430): This public people’s lodge on picturesque Miyajima island is modern yet traditional and would easily cost four times as much if it were privately owned. See p. 470.
 - **Tsuru-no-yu Onsen** (Nyuto Onsen; ☎ 0187/46-2139): This rustic inn, with a history stretching back to the Edo Period, thatched-roof building, and outdoor hot-spring baths, is as close as you can get to time travel. To really save money, opt for the self-cooking wing and prepare your own meals. See p. 572.

15 The Best Culinary Experiences

- **Experiencing a Kaiseki Feast:** The ultimate in Japanese cuisine, *kaiseki* is a feast for the senses and the spirit. Consisting of a variety of exquisitely prepared and arranged dishes, a kaiseki meal is a multicourse event to be savored slowly. Both the ingredients and the dishes they comprise are chosen with great care to complement the season. There are hundreds of exceptional kaiseki restaurants in Japan, from old-world traditional to sleek modern; two standouts are **Takamura** in Tokyo and **Kagetsu** in Nagasaki. Traditional ryokan also serve kaiseki. See p. 163 and 550 respectively as well as “Tips on Dining, Japanese Style,” in chapter 2.
- **Spending an Evening in a Robatayaki:** Harking back to the olden days when the Japanese cooked over an open fireplace, a *robatayaki* is a convivial place for a meal and drinks. One of the most famous is **Inakaya** in Tokyo, where diners sit at a counter; on the other side are two cooks, grills, and mountains of food. You’ll love the drama of this place. See p. 163 as well as “Tips on Dining, Japanese Style,” in chapter 2.
- **Dining on Western Food in Modern Settings:** Japan has no lack of great Western food, and some of the best places to dine are its first-class hotels. The **New York Grill**, on the 52nd floor of the Park Hyatt in Tokyo, epitomizes the best of the West with its sophisticated setting, great views, great food, and great jazz. See p. 155.
- **Buying Prepared Meals at a Department Store:** The basement floors of department stores are almost always devoted to food-stuffs, including takeout foods. Shopping for your meal is a fun experience: Hawkers yell their wares, samples are set out for you to nibble, and you can choose anything from tempura and sushi to boxed meals. See chapter 4, the regional chapters, and “Tips on Dining, Japanese Style,” in chapter 2.
- **Slurping Noodles in a Noodle Shop:** You’re supposed to slurp when eating Japanese noodles, which are prepared in almost as many different ways as there are regions. Noodle shops range from stand-up counters to traditional restaurants; one of my favorites is **Raitei** in Kamakura. See p. 230 as well as “Tips on Dining, Japanese Style,” in chapter 2 and the “Where to Dine” sections in regional chapters.
- **Rubbing Elbows in a Yakitori-ya:** Yakitori-ya are the pubs of Japan—usually tiny affairs with just a counter, serving up skewered grilled chicken. They’re good places to meet the natives and are inexpensive as well. You’ll find them in every nightlife district in the country. See the regional chapters and also “Tips on Dining, Japanese Style,” in chapter 2.

16 The Best Destinations for Serious Shoppers

- **For Everything:** Japanese department stores are microcosms of practically everything Japan produces, from the food halls in the basement to the departments selling clothing, accessories, office supplies, souvenirs, pottery, household goods, and cameras, to rooftop garden centers. What’s more, service is great, and purchases are

beautifully wrapped. You'll be spoiled for life. See "Shopping," in chapter 4.

- **For Designer Fashions:** Tokyo's **Shibuya District** has the most designer boutiques in town, while **Aoyama** boasts main shops for all the big-name designers, including Issey Miyake and Comme des Garçons. Department stores also carry big-name designers; their annual summer sales are mob scenes. See "Shopping," in chapter 4.
- **For Souvenirs:** The Japanese are avid souvenir shoppers when they travel, so souvenirs are sold literally everywhere, even near shrines and temples. **Nakamise Dori**, a pedestrian lane leading to Tokyo's Sensoji Temple, is one of Japan's most colorful places to shop for paper umbrellas, toys, and other souvenirs. The two best places for one-stop memento shopping are the **Oriental Bazaar** (p. 204) in Tokyo and the **Kyoto Handicraft Center** (p. 340), both of which offer several floors of everything from fans to woodblock prints.
- **For Traditional Crafts:** Japan treasures its artisans so highly that it designates the best as National Living Treasures. The two best shops for a varied inventory of traditional crafts, from knives and baskets to lacquerware and ceramics, are the **Japan Traditional Craft Center** in Tokyo and the **Kyoto Craft Center**. Department stores also offer an excellent collection of traditional crafts. See "Shopping," in chapters 4 and 7 as well as p. 204 and 340 respectively.
- **For Antiques & Curios:** Flea markets are great for browsing; you'll see everything from used kimono to Edo-Era teapots for sale. Japan's largest and one of its oldest monthly markets is held the 21st of each month at **Toji Temple** in Kyoto. (A lesser flea market is held there the 1st Sun of each month.) **Tokyo** also has great weekend markets. See chapters 4 and 7.
- **For Electronics:** Looking for that perfect digital camera, CD player, calculator, or rice cooker? Then join everyone else in the country by going to one of the nation's two largest electronics and electrical-appliance districts. In Tokyo, it's **Akihabara**, where open-fronted shops beckon up to 50,000 week-day shoppers with whirring fans, blaring radios, and sales pitches. In Osaka, head to **Den Den Town**. Be sure to comparison-shop and bargain. See "Shopping," in chapters 4 and 8.
- **For Local Specialties:** Many prefecture capitals have a government-owned exhibition hall where local products are displayed for sale. Often called a *kanko bussankan*, the hall may have everything from locally produced pottery to folk toys and foodstuffs. Cities with kanko bussankan include **Kanazawa**, **Okayama**, **Matsuyama**, **Kumamoto**, and **Kagoshima**. See chapters 8, 9, and 10.
- **For Porcelain & Pottery:** Porcelain and pottery are produced seemingly everywhere in Japan. Some of the more famous centers include **Nagoya**, home to Noritake, Japan's largest chinaware company; **Kanazawa**, known for its Kutani pottery with its distinctive colorful glaze; **Matsuyama**, famous for its Tobe pottery (white porcelain with cobalt-blue designs); and **Kagoshima**, with its Satsuma pottery, which comes in white (used by the upper class in feudal Japan) and black (used by the common people). See chapters 8, 9, and 10.
