

Contents at a Glance

<i>Introduction</i>	1
<i>Part I: Understanding Sales Forecasting and How Excel Can Help</i>	7
Chapter 1: A Forecasting Overview	9
Chapter 2: Forecasting: The Basic Issues	25
Chapter 3: Understanding Baselines	43
Chapter 4: Predicting the Future: Why Forecasting Works	55
<i>Part II: Organizing the Data</i>	71
Chapter 5: Choosing Your Data: How to Get a Good Baseline	73
Chapter 6: Setting Up Lists in Excel	89
Chapter 7: Working with Lists in Excel	103
<i>Part III: Making a Basic Forecast</i>	115
Chapter 8: Summarizing Sales Data with Pivot Tables	117
Chapter 9: Charting Your Baseline: It's a Good Idea	137
Chapter 10: Forecasting with Excel's Analysis ToolPak	161
Chapter 11: Basing Forecasts on Regression	177
<i>Part IV: Making Advanced Forecasts</i>	193
Chapter 12: Entering the Formulas Yourself	195
Chapter 13: Using Moving Averages	223
Chapter 14: Evaluating a Moving Average	239
Chapter 15: Smoothing: How You Profit from Your Mistakes	261
Chapter 16: Fine-Tuning a Regression Forecast	285
Chapter 17: Managing Trends	311
Chapter 18: Same Time Last Year: Forecasting Seasonal Sales	329
<i>Part V: The Part of Tens</i>	349
Chapter 19: Ten Pivot Table Troubles — and How to Overcome Them	351
Chapter 20: The Ten Best Excel Tools	361
<i>Index</i>	369

Table of Contents

<i>Introduction</i>	1
About This Book	1
Foolish Assumptions	2
How to Use This Book	2
How This Book Is Organized	3
Part I: Understanding Sales Forecasting and How Excel Can Help ..3	
Part II: Organizing the Data	3
Part III: Making a Basic Forecast	3
Part IV: Making Advanced Forecasts	4
Part V: The Part of Tens	4
Icons Used in This Book	4
Where to Go from Here	5
<i>Part 1: Understanding Sales Forecasting and How Excel Can Help</i>	7
Chapter 1: A Forecasting Overview	9
Understanding Excel Forecasts	10
Method #1: Moving averages	10
Method #2: Exponential smoothing	11
Method #3: Regression	11
Getting the Data Ready	11
Using lists	12
Ordering your data	12
Making Basic Forecasts	14
Putting moving averages to work for you	15
Making sense of exponential smoothing	17
Using regression to get what you want	18
Charting Your Data	20
Forecasting with Advanced Tools	22
Chapter 2: Forecasting: The Basic Issues	25
Why Forecast?	26
To plan sales strategies	26
To size inventories	27
Talking the Talk: Basic Forecasting Lingo	28
Autoregressive integrated moving averages (ARIMA)	28
Baseline	29
Correlation	29
Cycle	29

Damping factor	30
Exponential smoothing	30
Forecast period	30
Moving average	30
Predictor variable	31
Regression	31
Seasonality	31
Trend	32
Understanding the Baseline	32
Charting the baseline	33
Looking for trends	35
Setting Up Your Forecast	36
Smoothing data	36
Regression: It's all about relationships	36
Using Your Revenue and Cost Data	38
Chapter 3: Understanding Baselines	43
Using Qualitative Data	43
Asking the right questions	44
Keeping your eye on the ball: The purpose of your forecast	45
Recovering from Mistakes in Sales Forecasting	47
Getting over it	47
Using revenue targets as forecasts	48
Recognizing Trends and Seasons	49
Identifying trends	51
Understanding seasonality	52
Chapter 4: Predicting the Future: Why Forecasting Works	55
Understanding Trends	55
Watching revenues go up — and down	57
Testing for trends	60
Matchmaker, Matchmaker: Finding Relationships in the Data	64
Choosing the predictors	65
Analyzing the correlations	68
Part II: Organizing the Data	71
Chapter 5: Choosing Your Data: How to Get a Good Baseline	73
Early to Bed: Getting Your Figures in Order	74
Why order matters: Moving averages	74
Why order matters: Exponential smoothing	77
Why order doesn't matter: Regression	78
Staying Inside the Lines: Why Time Periods Matter	80
Deciding how far to forecast	80

Choosing your time periods83
 Spacing Time Periods Equally85
 Using periodic relationships85
 When missing data causes unequal time periods87

Chapter 6: Setting Up Lists in Excel89

Understanding List Structures89
 The List Command92
 Using the Total Row94
 Trying out other new List features96
 Filtering Lists97
 Using Excel's AutoFilter97
 Using the Advanced Filter99
 Importing Data from a Database to an Excel List101

Chapter 7: Working with Lists in Excel103

Turning Lists into Charts103
 Understanding chart types104
 Creating the chart from your list107
 Refining charts109
 Using the Analysis ToolPak with Lists111
 Avoiding the Analysis ToolPak's Traps113

Part III: Making a Basic Forecast 115

Chapter 8: Summarizing Sales Data with Pivot Tables117

Understanding Pivot Tables117
 Making baselines out of sales data119
 Totaling up the data123
 Building the Pivot Table126
 Grouping Records130
 Knowing when to group records130
 Creating the groups130
 Avoiding Grief in Excel Pivot Tables132
 Don't use blank dates132
 Putting dates in the Row area133
 Making multiple groups134

Chapter 9: Charting Your Baseline: It's a Good Idea137

Digging into a Baseline138
 Using date and time data in Excel138
 Charting dates and times in Excel139
 Using Line charts142
 Using XY (Scatter) charts146
 Making Your Data Dance with Pivot Charts148
 Building a pivot chart149
 Dealing with pivot chart annoyances154
 Using Two Value Axes157

Chapter 10: Forecasting with Excel's Analysis ToolPak	161
Installing Add-ins	162
Off the CD, onto the C: drive	162
From the C: drive to Excel	165
Using Moving Averages	166
Moving day: Getting from here to there	166
Moving averages and stationary baselines	168
Using Exponential Smoothing	170
Using the Regression Tool	173
Chapter 11: Basing Forecasts on Regression	177
Deciding to Use the Regression Tool	177
Adopting the Regression approach	180
Using more than one predictor variable	181
Understanding the Analysis ToolPak's Regression Tool	182
Checking the forecast errors	185
Plotting your actual revenues	187
Understanding confidence levels	188
Avoiding a zero constant	189
Using Multiple Regression	190
New predictor with forecast variable	192
New predictor with existing variable	192
Part IV: Making Advanced Forecasts	193
Chapter 12: Entering the Formulas Yourself	195
About Excel Formulas	195
Doing it yourself: Why bother?	196
Getting the syntax right	201
Using Insert Function	203
Understanding Array Formulas	209
Choosing the range for the array formula	209
Excel's three-finger salute: Ctrl+Shift+Enter	211
Recognizing array formulas	211
A special problem with array formulas	212
Using the Regression Functions	213
Using the LINEST function	213
Selecting the right range of cells	216
Getting the statistics right	217
Using the TREND function	219
Chapter 13: Using Moving Averages	223
Choosing the Length of the Moving Average	223
Signaling: Left turn coming up?	224
A little less noise, please	225
Stepping it up	228

Reacting Quickly versus Modeling Noise	230
Getting a smoother picture	230
Calculating and charting moving averages	232
Using the Analysis ToolPak to Get Moving Averages	233
Using the ATP's Moving Average tool	233
Charting residuals	237
Chapter 14: Evaluating a Moving Average	239
Losing Early Averages	239
Understanding Correlation	241
When did they start going together?	242
Charting correlated data	245
Understanding Autocorrelation	246
Calculating autocorrelation	255
Diagnosing autocorrelation	256
Chapter 15: Smoothing: How You Profit from Your Mistakes	261
Correcting Errors: The Idea Behind Smoothing	262
Adjusting the forecast	262
Why they call it "exponential smoothing"	264
Fooling around with the smoothing constant	266
Using the Smoothing Tool's Formula	270
Getting a forecast from the Exponential Smoothing tool	270
Modifying the smoothing constant	274
Finding the Smoothing Constant	276
Developing the yardstick	276
Minimizing the square root of the mean square error	279
Problems with Exponential Smoothing	283
Losing an observation at the start	283
The ATP's standard errors: They're wrong	284
Chapter 16: Fine-Tuning a Regression Forecast	285
Doing Multiple Regression	285
Using more than one predictor	286
The thinking person's approach to multiple regression	291
Interpreting the coefficients and their standard errors	295
Getting a Regression Trendline into a Chart	300
Evaluating Regression Forecasts	305
Using autoregression	305
Regressing one trend onto another	309
Chapter 17: Managing Trends	311
Knowing Why You May Want to Remove the Trend from a Baseline	312
Understanding why trend is a problem	312
Diagnosing a trend	313
Getting a Baseline to Stand Still	316
Subtracting one value from the next value	316
Dividing one value by another	318

Getting rates321
 The downside of differencing322
 And All the King’s Men: Putting a Baseline Together Again326

Chapter 18: Same Time Last Year: Forecasting Seasonal Sales . . . 329

Doing Simple Seasonal Exponential Smoothing330
 Relating a season to its ancestors330
 Using the smoothing constants334
 Getting Farther into the Baseline337
 Calculating the first forecast337
 Smoothing through the baseline level341
 ’Tis the seasonal component342
 Finishing the Forecast344
 Modifying the formulas344
 Using the worksheet346
 Using the workbook347

***Part V: The Part of Tens*349**

Chapter 19: Ten Pivot Table Troubles — and How to Overcome Them 351

Importing External Data351
 Saving the Password352
 Refreshing the Data when the File Opens353
 Drilling to Details354
 Formatting Fields355
 Pivot Tables: Things That Go Bump in the Day355
 Naming Fields356
 Calculating Fields357
 Calculating Items358
 Subtotaling Inner Fields359
 Managing the Data Cache360

Chapter 20: The Ten Best Excel Tools 361

Cell Comments361
 AutoComplete363
 Macro Security363
 The Customizable Toolbar364
 Evaluate Formula365
 Worksheet Protection365
 Unique Records Only366
 List Management366
 Quick Data Summaries367
 Help with Functions367

***Index*.....369**
