

## CONTENTS

Foreword	vii
Acknowledgments	xiii
About the Authors	xv
Introduction	xvii

### PART ONE

#### Preparing the New-Century Engineer

---

Chapter 1: The New-Century Engineer	3
Chapter 2: Technical Knowledge and Linear Components	11
Chapter 3: A Historical Curriculum in a New Era	18

### PART TWO

#### A Foundation to Build On

---

Chapter 4: “Knowing That” and “Knowing How”	31
Chapter 5: Listening, Seeing, Doing	39
Chapter 6: Learning for Problem Solving	46

### PART THREE

#### A Place to Explore

---

Chapter 7: Theory and Skills	61
Chapter 8: Lab in the Curriculum	69
Chapter 9: Learning in the Lab	75
Chapter 10: Lab Reports	83
Chapter 11: Making a Place to Explore Professional Practice	88

PART FOUR  
**A Way to Create**

---

Chapter 12: “Knowing To”	99
Chapter 13: Project-Centered Learning	108
Chapter 14: Assessing Design	119
Chapter 15: Making a Place to Create	127

PART FIVE  
**Affecting the World**

---

Chapter 16: A Foundation for Professional Practice	137
Chapter 17: Findings from the Study: An Uneven Base	145
Chapter 18: Preparing for New-Century Professional Practice	156

PART SIX  
**Bringing Professional Practice Forward**

---

Chapter 19: A Design for Action	173
Chapter 20: Usable Knowledge	179
Chapter 21: Toward a New Model for Engineering Education	191
Chapter 22: Getting from Here to There	207
Appendix: About the Study	213
References	217
Index	229
