Performance-based evaluation

- overview of, 27–28
- principles of, 27–35
- See also* Evaluation

Performance-based evaluation principles

- 1: asking the right questions, 28–32
- 2: evaluation as function of obtained results, 32–33
- 3: organizations objectives should be based on valid needs, 33–34
- 4: derive valid needs using top-down approach, 34
- 5: every organization should aim for the best, 34–35
- 6: evaluation questions drive the evaluation study, 35
