

Table of Contents

Preface	xiii
Contributor List	xvii
Part 1 Analysis of Food and Biological Materials by Calorimetry	3
Chapter 1 Calorimetric Methods as Applied to Food: An Overview <i>Gönül Kaletunç</i>	5
Chapter 2 Methods and Applications of Microcalorimetry in Food <i>Pierre Le Parlouër and Luc Benoist</i>	15
Chapter 3 High-Pressure Differential Scanning Calorimetry <i>Günther W.H. Höhne and Gönül Kaletunç</i>	51
Chapter 4 Calorimetry of Proteins in Dilute Solution <i>G. Eric Plum</i>	67
Chapter 5 Thermal Analysis of Denaturation and Aggregation of Proteins and Protein Interactions in a Real Food System <i>Valerij Y. Grinberg, Tatiana V. Burova, and Vladimir B. Tolstoguzov</i>	87

Chapter 6	Heat-Induced Phase Transformations of Protein Solutions and Fat Droplets in Oil-in-Water Emulsions: A Thermodynamic and Kinetic Study <i>Perla Relkin</i>	119
Chapter 7	Analysis of Foodborne Bacteria by Differential Scanning Calorimetry <i>Michael H. Tunick, John S. Novak, Darrell O. Bayles, Jaesung Lee, and Gönül Kaletunç</i>	147
Chapter 8	Coupling of Differential Scanning Calorimetry and X-Ray Diffraction to Study the Crystallization Properties and Polymorphism of Triacylglycerols <i>Christelle Lopez, Daniel J.E. Kalnin, and Michel R. Ollivon</i>	169
Part 2	Calorimetry as a Tool for Process Design	199
Chapter 9	Overview of Calorimetry as a Tool for Efficient and Safe Food-Processing Design <i>Alois Raemy, Corinne Appolonia Nouzille, Pierre Lambelet, and Alejandro Marabi</i>	201
Chapter 10	Shelf Life Prediction of Complex Food Systems by Quantitative Interpretation of Isothermal Calorimetric Data <i>Simon Gaisford, Michael A.A. O'Neill, and Anthony E. Beezer</i>	237
Chapter 11	Use of Thermal Analysis to Design and Monitor Cereal Processing <i>Alberto Schiraldi, Dimitrios Fessas, and Marco Signorelli</i>	265
Chapter 12	Importance of Calorimetry in Understanding Food Dehydration and Stability <i>Yrjö H. Roos</i>	289

Table of Contents

xi

Chapter 13	High-Pressure Calorimetry and Transitiometry <i>Stanislaw L. Randzio and Alain Le Bail</i>	311
Chapter 14	Calorimetric Analysis of Starch Gelatinization by High-Pressure Processing <i>Kelley Lowe and Gönül Kaletunç</i>	341
Chapter 15	Use of Calorimetry to Evaluate Safety of Processing <i>Hans Fierz</i>	351
	Index	369
