Part 1: VoIP Essentials

Chapter 1: Reviewing VoIP Basics	9
Parts of a VoIP Call	10
Dispelling VoIP Misperceptions.....	14
Using more bandwidth.....	15
Realizing that VoIP isn't free	15
Accepting that VoIP may not be cheaper than traditional phone service	16
Worrying about compatibility.....	18
Rejoicing in good quality calls	19
Understanding the VoIP Landscape.....	19
Identifying the Hardware You Need	21
Understanding nodes	24
Dealing with SIP end points.....	24
Using the many servers.....	25
Transmitting the Non-Voice	28
Pushing touch tones.....	28
Faxing over VoIP	28
Porting Phone Numbers	29
Reviewing the LNP process	30
Understanding rejections	31
Grappling with resold accounts.....	32
Dealing with the costs	33
Identifying who's responsible for what.....	35
Ordering New Phone Numbers	36

Chapter 2: Signaling with SIP	37
Reviewing Signaling Choices	37
Introducing SIP Methods	40
Sending an INVITE.....	40
Sending another INVITE.....	45
Moving a call with REFER.....	45
Confirming a call with an ACK.....	46
Logging in with REGISTER	47
Signing off.....	48
Determining your OPTIONS.....	49
Updating your call	50
Making provisional information final	50
Spanning technologies with PINT	51
Responding to Methods.....	52
100s: Receiving information	53
200s: Achieving success.....	54
300s: Being redirected.....	55
400s: Receiving a client error	56
500s: Receiving a server failure.....	57
600s: Going nowhere with a Global Failure	58
Chapter 3: Exploring the Message Body	59
Transmitting Media with the SDP	60
Describing the SDP session	61
Gathering the media-level information	63
Responding to SDP	68
Introducing Codecs	71
Using Your Codecs Wisely.....	74
Chapter 4: Understanding the Call Plan	79
Reviewing Your Phone System	79
Basic VoIP Phone Features.....	82
Starting with voicemail	82
Building a conference (call) room	83
Establishing a call queue	84
Building out an extension	86
Advanced VoIP Phone Features.....	86
Saving money with Least Cost Routing.....	86
Assembling an Interactive Voice Response (IVR) system	92
Using VoIP to call forward	92
Turning on the lights with X10.....	93
Using the console mode of your phone system.....	94
Using your Call Detail Records.....	94

Part II: Assessing Your Network's VoIP Readiness..... 97

Chapter 5: Reviewing Your Network99

Analyzing Your Network Design 100

Introducing VoIP Lifecycle Management 102

Managing Latency 103

 Dealing with jitter 105

 Identifying flap 106

 Analyzing Your Bandwidth 107

 Pulling general information with SNMP 108

 Gathering the details with Wireshark 109

 Managing Your Bandwidth 109

 Handling latency with prioritization 110

 Resolving latency with packet shaping 111

 Separating VoIP from data with a subnet 112

 Employing a VLAN 113

Jumping In to the OSI Model 114

 Entering the first layer 116

 Moving to the second layer 116

 Sending IP on the third layer 117

 Transmitting UDP on the fourth layer 117

 Topping it off with the Session, Presentation,
 and Application Layers 118

 Introducing VoIP calls for testing 119

Coming to Grips with MOS 121

Chapter 6: Preparing Your Network for VoIP123

Determining Your Peak Call Volume 123

Calculating Calls Per Second 125

Dealing with Touch Tones 128

Determining Fax Requirements 129

 Sending uncompressed FolP with G.711 129

 Using T.37 130

 Getting the fax with T.38 131

Testing Your LAN 135

 Focusing on latency 136

 Investigating jitter 136

 Sniffing out packet loss 137

Beginning VoIP Design 138

Diving In to VoIP Network Analysis 139

 Handling systemic issues 139

 Working over intermittent problems 141

 Retesting it all again 141

 Introducing non-network issues 142

Realizing the Pros and Cons of Caller ID	142
Dialing Out to Toll-Free Numbers.....	145
Chapter 7: Providing Configuration Information	147
VoIP as Local Loop Replacement	148
Ordering VoIP.....	150
Looking at Your Standard Usage	151
Validating port quantity.....	152
Analyzing your calling profile.....	153
Listing Your Servers	154
Covering Signaling Basics.....	155
Choosing a protocol	155
Getting down to specifics	156
Agreeing on how to dial the call	157
Going with an IP provider	158
Detailing the Call Volume	158
Addressing the Non-Voice Features	159
Selecting a fax choice	160
Opening up SIP-T.....	160
Confirming Your Privacy	162
Chapter 8: Activating VoIP	165
Scheduling Your Install.....	166
Drawing Up a Test Plan.....	166
Proving out call setup and tear-down	168
Confirming treatments for failed or busy calls	169
Checking your fax transmission.....	170
Touching tones with VoIP.....	171
Testing every VoIP phone.....	173
Testing residual analog phones	174
Validating your Dial Plan features	175
Requesting a Report on the Deployment	176
Confirming Billing Structure.....	177
Chapter 9: Using Packet Island Software	179
Getting the Basics on Packet Island	180
Deploying the Software.....	182
Introducing the Packet Island GUI.....	182
Reading packets per second.....	186
Seeing the jitter	187
Losing packets on the LAN	188
Looking at call quality with MOS	190
Showing stream info	191
Analyzing Your Call Route.....	191
Monitoring Traffic Flows.....	193
Remotely Capturing Packets	195
Evaluating the VoIP Network	197

Reporting on Your VoIP LAN 199
 Generating assessment reports 199
 Requiring a verification report..... 200
 Using the SLA report on live calls..... 202
 Managing It All with Packet Island 203

Chapter 10: Investigating SIP Call Generation 205

Recognizing the International Standards 205
 Reviewing a Completed Call..... 206
 Viewing a Multi-Node Call..... 209
 Canceling a SIP Call 210
 Looking In to a Re-INVITE..... 214
 Using SIP Call Trees..... 217

Chapter 11: Analyzing Calls with Wireshark 219

Introducing Wireshark..... 219
 Installing Wireshark 221
 Downloading for Windows..... 221
 Downloading for Linux..... 222
 Installing tcpdump..... 225
 Starting and Stopping a Packet Capture..... 226
 Capturing packets with tcpdump 226
 Capturing packets with Wireshark..... 228
 Familiarizing Yourself with the Wireshark GUI..... 229
 Using the Summary window..... 231
 Branching into the protocol tree..... 232
 Finding VoIP Calls..... 232
 Graphing a call 234
 Filtering down to one call 236
 Listening to a capture..... 237
 Locating Touch Tones in a Capture 238
 Checking a T.38 Fax Call 240
 Using Wireshark to Troubleshoot 243

Part III: Maintaining Your Network and Service 247

Chapter 12: Troubleshooting Basics 249

Understanding Troubleshooting Basics 249
 Using diplomacy..... 250
 Identifying the variables 251
 Identifying the Categories of Call Problems..... 257
 Digging in to call completion issues..... 257
 Understanding call routing 261
 Analyzing call quality 262
 Identifying the Frequency of a Call Problem..... 263

Isolating a Pattern.....	265
Narrowing down the geography	265
Matching up the time of day.....	266
Performing Your Due Diligence	267
Reviewing a VoIP Curiosity	269
Using Logic when Troubleshooting	271
Chapter 13: Troubleshooting and Reporting Process	273
Investigating Carrier Trouble Reporting Structure.....	274
Providing a Call Example.....	275
Providing call example basics.....	276
Introducing VoIP-specific call example requirements	277
Providing Multiple Call Examples.....	278
Managing Trouble Tickets.....	279
Understanding the timelines	280
Working your escalation list.....	281
Troubleshooting an Outbound Call.....	282
Troubleshooting Step 1.....	283
Troubleshooting Step 2.....	288
Troubleshooting international issues	290
Troubleshooting an Inbound Call.....	291
Identifying global issues with your cell phone	293
Determining whether it's trouble or provisioning.....	294
Looking at the source.....	295
Chapter 14: Handling VoIP-Specific Problems	299
Handling One-Way Audio.....	299
Realizing Why You Have No-Way Audio	303
Working Outbound Call Failures	304
Diving In to Inbound Calling Issues	305
Looking Over Non-Voice Issues	306
Dealing with Progressively Diminishing Returns	307
Handling Curious Caller ID Names	309
Troubleshooting Wisdom.....	311
 Part IV: The Part of Tens.....	 313
Chapter 15: Ten Common Misperceptions.....	315
Banking on Saving Money.....	315
Expecting Bandwidth Savings.....	317
Believing in the Homogeneous Route Path	319
Suffering through Poor Call Quality	320
Dreading the InterOperability.....	321
Cringing at Complexity	322
Fearing Troubleshooting	324

Expecting a Simpler Phone Bill 325
 Disregarding Traditional Long-Distance Carriers..... 326
 Expecting Non-VoIP Phone Features..... 327

Chapter 16: Ten Great Advantages 329

Freeing Yourself from Your Local Carrier 329
 Enjoying VoIP Compression 331
 Growing with VoIP 331
 Finding Yourself with VoIP 333
 Taking Control of Your Phone System 334
 Analyzing Your Calls 335
 Converging Technology on Your LAN 336
 Moving Your Phone Number 337
 Recession-Proofing Your Career 338
 Enjoying VoIP’s Future 339

Chapter 17: Ten Common Pitfalls. 341

Launching Denial of Service (DOS) Attacks 341
 Manipulating Your Caller ID for Cheap Long Distance 343
 Creating One-Way Audio..... 345
 Ignoring Hidden Costs..... 347
 Sacrificing Your Carrier 348
 Forgetting that VoIP Is Still Telecom..... 350
 Expecting Uniformity of Process 350
 Planning for an InterOp Testing Environment 351
 Anticipating Use that You’ll Never Have 352
 Drowning in the Sea of VoIP 353

Chapter 18: Ten Ways to Get Help 355

Dialing Your Vendors 356
 Rallying Your Industry Buddies 356
 Digging In to the RFCs 357
 Hunting on the Internet 358
 Joining a Local Users Group..... 359
 Troubleshooting by Other Means 360
 Going for the Magic 8 Ball 360
 Runing your chances 361
 Soliciting Help from Your VoIP Carrier 362
 Pushing Through with Your Escalation List 363
 Going Back to Square One 365
