KPIs (key performance indicators)

- defining with MDX, 314–315
- definition of, 324, 377

• L •

- labels in report (Textbox control), 75–78
- large reports, configuring and running, 266–268
- Last function, 118
- layout of report. *See* design of report
- layout properties of report items, 75
- Layout view, Report Designer
 - designing report, 56–59
 - formatting report, 59–62
- legal issues, 14. *See also* security
- line chart, 87
- Line control, 82–83
- linked reports
 - bookmark links, 282–283
 - creating, 234–235
 - definition of, 191
 - drill and pivot analysis, 293–297
 - drilling options, multiple, 303–305
 - drill-through reports, 290–293
 - hyperlinks, 283
 - navigation links to other reports, 300–303
- LinkTarget setting, HTML rendering, 173
- List control
 - adding to report, 82
 - definition of, 81
 - grouping levels supported by, 102–103
 - grouping on, 106–109
 - nested lists, grouping on, 108–109
 - page breaks before or after, 133
- list footers, 131
- list headers, 131
- logs
 - application log, 258
 - execution log, 239–242
 - of performance, 262
 - security log, 258
 - system log, 258
 - trace files, 238–239

• M •

- Management Studio (SQL)
 - accessing, 228
 - cached instance of report, creating, 186
 - creating report history, 195
 - creating subscriptions, 203–204
 - definition of, 227
 - executing reports on demand, 182–184
 - features of, 228–230
 - item-level roles, modifying, 249–252
 - item-level roles, viewing, 249
 - role assignments, creating, 248
 - setting query parameters, 190–191
 - storing login credentials in ReportServer database, 188
 - viewing report history, 196
- managing reports (Report Manager)
 - accessing, 159–160, 230–231
 - cached instance of report, creating, 185
 - creating report history, 178–180, 193–196
 - creating subscriptions, 203–204, 211–212
 - definition of, 17, 22, 227
 - executing report on demand, 182
 - exporting reports, 165–167
 - features of, 230–232
 - future of, 154
 - icon for, changing, 371
 - item-level roles, modifying, 251
 - item-level roles, viewing, 249
 - managing subscriptions, 222
 - navigating folder hierarchy in, 236
 - printing a report, 164
 - publishing Report Builder reports to, 154
 - role assignments, creating, 247–248
 - running Report Builder from, 147
 - setting query parameters, 190–191
 - storing login credentials in ReportServer database, 187
 - system requirements for, 159
 - uploading reports to, 160–161

- as user interface for report server, 159
- viewing a report, 161–162
- viewing a report in HTML, 163–164
- many-to-one relationships, 31
- Matrix control
 - adding to report, 79–80
 - definition of, 79
 - grouping based on columns, 105–106
 - grouping based on rows, 103–105
 - grouping levels supported by, 102–103
 - headers and footers, 131
 - HTML rendering of, 171
 - page breaks before or after, 133
- matrix footers, 131
- matrix headers, 131
- matrix report, Report Wizard, 69
- Max function, 118
- .mdb files, 355
- MDX (Multidimensional eXpressions)
 - defining calculations using, 314
 - defining KPIs using, 314–315
 - defining queries using, 313–314
 - resources for, 382
- Me keyword, in expressions, 136
- medium for report distribution, 12. *See also* formats for reports
- Memory Cache Hits/Sec counter, 261
- Memory Cache Misses/Sec counter, 261
- menus for reports, 305–306
- MHTML (MIME Encapsulation of Aggregate HTML), 166, 174
- MHTMLFragment setting, MHTML rendering, 174
- Microsoft Access
 - ad hoc reporting features, 347
 - data retrieval features, 343
 - database, converting to SQL Server, 361–363
 - definition of, 341–342
 - feature summary of, 353
 - information security features, 350
 - interactive report features, 351
 - objects not supported by Reporting Services, 358
 - publishing features, 348
 - report-building tools for, 344
 - reports, importing into Reporting Services, 355–360
 - reports on demand features, 348
 - style and formatting features, 345
 - wizard features for, 344
- Microsoft Analysis Services, 310–312, 375–376
- Microsoft Office, integration with, 378
- Microsoft Report Packs, 380
- Microsoft Reporting Services
 - comparing to other reporting tools, 343–354
 - configuring, 266–269
 - features of, 15–23, 343, 354, 376
 - history of, 1–2
 - importing Access reports into, 355–360
 - price of, 353
 - site settings for, 229, 232
 - support for, 379–382
 - third-party tools to use with, 383–387
- Microsoft SharePoint Portal Server, 378
- Microsoft SQL Server. *See also* Reporting Services
 - converting Access database to, 362–363
 - features of, 361–362
 - history of, 1
 - Web site for, 379
- Microsoft Windows, versions supported, 5
- migrating Access reports to Reporting Services, 355–360
- MIME Encapsulation of Aggregate HTML (MHTML), 166, 174
- MIMETYPE setting, XML rendering, 176
- Min function, 118
- Model Builder utility, 17

- model project
 - creating, 140
 - data source for, 140–142
 - data source view for, 142–143
 - definition of, 140
 - publishing to report server, 145–146
 - report model in, defining, 143–145
- multi-column reports, 134–135
- Multidimensional eXpressions (MDX)
 - defining calculations using, 314
 - defining KPIs using, 314–315
 - defining queries using, 313–314
 - resources for, 382
- My Reports folder, 236–237
- My Subscriptions, 222

• N •

- navigating report. *See also* linked reports
 - bookmark links, 282–283
 - Document Map for, 19–20, 283–286
 - for executive reports, 326–327
 - hyperlinks, 283
- nested groupings, 99–102
- nested lists, grouping on, 108–109
- newsgroup for Reporting Services, 381
- Next Session Requests/Sec counter, 261
- NoHeader setting, CSV rendering, 175
- Northwind sample database, 380
- Nothing keyword, for function
 - scope, 119
- null delivery of subscriptions,
 - 207, 218–219

• O •

- Object Linking and Embedding database (OLE DB), 17

 - data transformation, 309
 - definition of, 307–308
 - dimensional model, 308–309
 - dimensions, 309–310
 - fact table, 308, 309
 - KPIs, defining with MDX, 314–315
 - MDX calculations, 314
 - MDX queries, 313–314
 - resources for, 381–382
 - star schema, 309
- OLE DB (Object Linking and Embedding database), 17
- OmitDocumentMap setting, Excel
 - rendering, 174
- OmitFormulas setting, Excel
 - rendering, 174
- OmitSchema setting, XML rendering, 176
- on-demand reports
 - definition of, 23, 181
 - executing, 182–184
- One-Click Cube, 377
- one-to-one relationships, 31
- online analytical processing (OLAP) data
 - sources
 - Analysis Services for, 310–312
 - connecting to, 316
 - creating reports from, 316–322
 - cubes, 310
 - data transformation, 309
 - definition of, 307–308
 - dimensional model, 308–309
 - dimensions, 309–310
 - fact table, 308, 309
 - KPIs, defining with MDX, 314–315
 - MDX calculations, 314
 - MDX queries, 313–314
 - resources for, 381–382

- online reports, viewing, 24–27
 - Open API formats, 21
 - Open Database Connectivity (ODBC), 17
 - operating system requirements, 5
 - ORDER BY clause, SELECT statement, 39
 - OutlookSoft CPM, 385
 - OutputFormat setting, TIFF
 - rendering, 171
 - OWC (Office Web Components), 165, 171
- p ●**
- Padding property, 75
 - page breaks, 133–134, 368
 - page footers, 131
 - page headers, 131–133
 - page size, setting, 134
 - Panorama Software, 386
 - parameters
 - for All values selected, 369–370
 - cascading parameters, 128–130
 - converting from Access to Reporting Services, 357
 - definition of, 19, 117
 - for destination of drill-through report, 290–293
 - example using, 123–128
 - execution parameters for subscriptions, 206
 - performance and, 268
 - query parameters, 19, 123, 186, 190–191, 357, 371
 - report parameters, 19, 122–123, 368–369
 - storage space used by parameterized reports, 265
 - for stored procedures, 42
 - support for, in other reporting tools, 346
 - URL parameters, 167–168
 - UserID parameter, 372–373
 - Parameters setting, HTML rendering, 173
 - password. *See* authorization model;
 - credentials for data source
 - PDF format for report
 - definition of, 165
 - for large documents, 268
 - printing, 164
 - settings for, 168–170
 - pencil and tables icon, 54
 - %3A, semicolon in URL request, 167
 - %20, space character in URL request, 167
 - performance
 - benchmarking, 263
 - bottlenecks, reasons for, 263
 - caching and, 269
 - configuration affecting, 266–269
 - corporate performance, measuring, 324–325
 - enterprise performance, monitoring, 323–325
 - features for, 377
 - filters and, 268
 - improving, 373–374
 - measuring, 373–374
 - parameters and, 268
 - of report server, monitoring, 257–262
 - snapshots and, 269
 - of SQL Server, 361
 - storage requirements and, 264–266
 - tuning, 263–264
 - Performance console, 259–262
 - performance counters, 261–262
 - performance log, creating, 262
 - performance objects, 259
 - permissions. *See* role-based security
 - pictures (images)
 - adding to report, 20, 83–86
 - as background of report item, 74
 - converting from Access, 357
 - file formats for, 83
 - pie chart
 - definition of, 87
 - grouping on, 110
 - pivoting when drilling down, 293–297
 - plus sign (+), space character in URL parameter, 167
 - previewing a report
 - features for, 21
 - offline, 336

- previewing a report (*continued*)
 - procedure for, 24–27
 - in Report Designer, 58–59
 - in Report Manager, 161–162
- prices of reporting tools, 352–353
- primary key, 30
- printing a report
 - advantages and disadvantages of, 24
 - in Report Designer, 62
 - in Report Manager, 164
- proactive caching, 377–378
- procedures, stored SQL, 42–45
- ProClarity Analytics Server, 386
- project
 - creating, 48–49
 - definition of, 16
 - images stored in, 85
 - location of, choosing, 49
 - naming, 48
 - properties, 20, 21
- properties. *See also specific properties*
 - of Chart control, 89–91
 - of project, 20, 21
 - for report history, 179–180
 - of report items, 74–75
 - for reports, 20, 22, 25, 137
- Proposition Report Adapter, 386–387
- publishing data sources, 22
- publishing reports. *See also* formats for reports; subscriptions
 - definition of, 182
 - for executives, 336
 - features for, 23
 - as online report, 24–27
 - as printed report, 24, 62, 164
 - from Report Builder to Report Manager, 154
 - with Report Manager, 160–161
 - to report server, 145–146
 - support for, in other reporting tools, 347–348
- pubs sample database, 380
- pull model, 3, 181. *See also* on-demand reports

- push model, 3. *See also* publishing reports; subscriptions

- query, SQL
 - comments in, 36
 - creating in Generic Query Designer, 95, 371
 - creating in Query Analyzer, 34–37
 - creating in Report Designer, 53–55
 - creating in Report Wizard, 67–68
 - definition of, 33
 - dynamically creating, 371
 - executing in Report Designer, 55
 - for execution log, 240–242
 - filtering data in, 95, 113
 - grouping results of, 39–40
 - parameters for, 19, 123
 - SELECT statement, 33–42
 - sorting results of, 39
 - in stored procedures, 42–45
 - viewing in Generic Query Designer, 54–55
- query timeout value, 238

● R ●

- rc prefix, in URL parameter, 167, 168
- .rdl file extension, 52

- RDL (Report Definition Language)
 - definition of, 21, 52, 62
 - importing Access reports into, 355–360
- RecordDelimiter setting, CSV
 - rendering, 175
- recoverability, of SQL Server, 362
- Rectangle control
 - adding to report, 81
 - definition of, 80–81
 - page breaks before or after, 133
- referential integrity, 31
- relational database, 31. *See also* database
- RemoveSpace setting, Excel
 - rendering, 175
- rendered reports, 182
- rendering formats. *See* formats for reports
- RepeatOnNewPage property, 131
- Report Adapter, Proposion, 386–387
- Report Builder
 - accessing, 146–147
 - compared to Report Designer, 139
 - creating ad hoc reports, 147–150, 335
 - definition of, 17, 139
 - deploying a report, 158
 - drill-down analysis using, 151–154
 - filtering report data, 150–151
 - formulas in, 150, 152
 - grouping report data, 150–151
 - history of, 2
 - publishing reports to Report Manager, 154
 - report model project for, 140–146
 - saving a report, 159
 - sorting report data, 150–151
- report controls, 17. *See also specific controls*
- Report Definition Language (RDL)
 - definition of, 21, 52, 62
 - importing Access reports into, 355–360
- Report Designer
 - compared to Report Builder, 139
 - creating query, 53–55
 - creating report, 52–59
 - definition of, 16
 - deploying to report server, 158
 - designing report, 56–59
 - filtering report data in, 113–116
 - formatting report, 59–62
 - previewing a report, 58–59
 - printing report, 62
 - report items in, 74–75
 - saving report, 62
 - Shared Data Source, specifying, 50–51
 - sorting report data in, 96–97
 - report execution timeout value, 238
 - report footers, 60, 131
 - report headers, 60, 131
 - report history
 - creating, 178–179, 193–195
 - creating snapshot in, 195–197
 - definition of, 177, 193
 - deleting snapshots in, 197
 - limiting number of snapshots stored in, 197
 - rendering as a URL, 198
 - server-level properties for, 179–180
 - storage space used by, 265
 - report items. *See also specific controls*

- embedded, stored with snapshot, 178, 195
- importing from Access, 357
- listing in Report Manager, 160
- in Report Server database, 243
- storage space used by, 265
- uploading, 232

resources (system). *See also* performance
bottlenecks and, 263

- scheduling snapshot generation based on, 189

- timeouts and, 237–238

Results pane, Report Designer, 55

reverse engineering a database, 32

role-based security

- definition of, 22
- item-level security, 248–252
- Report Manager access determined by, 230
- role assignments for, creating, 246–248

RowNumber function, 119

rows in data region. *See* detail lines of
report

rows in matrix, grouping on, 103–105

rows in table, 30

rs prefix, in URL parameter, 167, 168

RS Web Service, 259

RS Windows Service, 259

RSExecution_LogUpdate.dts
package, 240

running totals, 368

RunningValue function, 119, 121

• S •

sample databases, 380

sample report sets, 380

saving a report

- for archiving, 177
- format for, 21
- in Report Builder, 159
- in Report Designer, 62

scalability

- of BI platform, 377
- of SQL Server, 361

scatter chart, 87

Schema setting, XML rendering, 176

scope argument, for aggregate
functions, 119

scorecard perspective of performance
reporting, 324–325

Section setting, HTML rendering, 173

security

- authentication, 246
- authorization model, 246–253
- data security, 255–256
- for data source, 141, 186–188, 193, 254
- for external users, 255
- features for, 22, 245
- integrated security, 254
- item-level security, 248–252
- protecting against an attack, 253–256
- for report information, UserID for, 372–373
- for reports, appropriateness of, 14
- role assignments for users, 246–248
- of SQL Server, 361
- system-level security, 252–253

security log, 258

SELECT statement

- aliases in, 38
- AS keyword, 40
- comments in, 36
- creating in Query Analyzer, 34–37
- definition of, 33
- FROM clause, 33
- functions in, 40–41
- GROUP BY clause, 39–40

- HAVING clause, 40–42
- ORDER BY clause, 39
- WHERE clause, 37–39
- self-service reporting, 15. *See also* on-demand reports
- Semantic Model Definition Language (SMDL), 140
- semicolon in URL request, replacement for, 167
- sending reports. *See* publishing reports
- series group in a chart, 110, 111
- server. *See* report server
- server-level properties for report history, 179–180
- session cache, 185
- session state information, 265
- Shared Data Source
 - specifying in Report Designer, 50–51
 - specifying in Report Wizard, 66–67
- SharePoint Portal Server, Microsoft, 378
- site settings for Reporting Services, 229, 232
- .smdl files, 140, 144
- SMDL (Semantic Model Definition Language), 140
- snapshots. *See* report snapshots
- SoftArtisans software vendor
 - Excel and Word renderers by, 167
 - OfficeWriter by, 387
- Solution Explorer pane, BI Development Studio
 - accessing, 48, 49
 - pinning and unpinning, 53
 - viewing project folders, 49
- sorting report data
 - based on groups, 98–99
 - on Chart control, 110–113
 - definition of, 19, 93–94
 - interactively, 287–288, 368–369
 - procedure for, 94–97
 - in Report Builder, 150–151
 - sorting results of query, 39
 - space character in URL request, replacement for, 167
- special analyses reports, 337
- SQL pane, Report Designer, 55
- SQL query
 - comments in, 36
 - creating in Generic Query Designer, 95, 371
 - creating in Query Analyzer, 34–37
 - creating in Report Designer, 53–55
 - creating in Report Wizard, 67–68
 - definition of, 33
 - dynamically creating, 371
 - executing in Report Designer, 55
 - for execution log, 240–242
 - filtering data in, 95, 113
 - grouping results of, 39–40
 - parameters for, 19, 123
 - SELECT statement, 33–42
 - sorting results of, 39
 - in stored procedures, 42–45
 - viewing in Generic Query Designer, 54–55
- SQL Server. *See also* Reporting Services
 - converting Access database to, 362–363
 - features of, 361–362
 - history of, 1
 - Web site for, 379
- SQL Server BI platform, 375–378
- SQL Server Development Center, 382
- SQL Server magazine, 382
- SQL Server Management Studio
 - accessing, 228
 - cached instance of report, creating, 186
 - creating report history, 195
 - creating subscriptions, 203–204
 - definition of, 227
 - executing reports on demand, 182–184
 - features of, 228–230
 - item-level roles, modifying, 249–252
 - item-level roles, viewing, 249
 - role assignments, creating, 248
 - setting query parameters, 190–191

- SQL Server Management Studio (*continued*)
 - storing login credentials in ReportServer database, 188
 - viewing report history, 196
 - standard deviation, functions related to, 119
 - standard subscriptions, 206–210
 - star schema, 309
 - StartFind setting, HTML rendering, 173
 - StartPage setting
 - PDF rendering, 170
 - TIFF rendering, 171
 - StDev function, 119
 - StDevP function, 119
 - stick pin icon, 73
 - stock chart, 87
 - stored procedures, SQL, 42–45
 - StreamRoot setting, HTML rendering, 173
 - string functions, 135
 - Structured Query Language. *See* SQL query styles. *See* data regions
 - StyleStream setting, HTML rendering, 173
 - subreports
 - adding to report, 82
 - definition of, 82
 - for dynamically visible data regions, 279–281
 - subscriptions
 - for bursting reports, 221
 - business scenarios using, 220–221
 - creating, 203–204
 - creating data-driven subscriptions, 210–219
 - creating standard subscriptions, 206–210
 - definition of, 23, 201–203
 - delivery method for, 202, 204–205
 - e-mail delivery of, 204–205, 207, 217–218, 222–223
 - for exception reports, 220
 - execution parameters for, 206
 - execution properties for, changing, 222
 - execution properties for, specifying, 206

 - inactive, 221
 - maintaining, 221–222
 - managing with My Subscriptions, 222
 - null delivery of, 207, 218–219
 - preloading snapshot reports for, 220
 - rendering format for, 205
 - scheduling, 202, 206
 - Success Audit event, in Event Viewer, 258
 - Sum function
 - definition of, 119
 - for grouping, 99
 - for nested grouping, 99–101
 - SUM function, SQL, 40–41
 - support for Reporting Services, 379–382
 - SuppressLineBreaks setting, CSV rendering, 175
 - System Administrator role, 252
 - system log, 258
 - system resources. *See also* performance bottlenecks and, 263
 - scheduling snapshot generation based on, 189
 - timeouts and, 237–238
 - System User role, 252
 - system-level security, 252–253
- 7 ●
- Table control
 - adding to report, 56–58, 78–79
 - definition of, 78
 - grouping levels supported by, 102–103
 - grouping on, 97–99
 - image in cell of, 83
 - page breaks before or after, 133
 - table data region. *See* Table control
 - table footers, 131
 - table headers, 60, 131
 - table of contents for report (Document Map)
 - creating, 284–286
 - definition of, 19–20, 283

- tables in database
 - aliases for, in SQL query, 38
 - definition of, 29–30
 - header for, 60
 - joining in WHERE clause, 37–39, 42
 - primary key for, 30
 - relationships between, 31–33
 - tabular report, Report Wizard, 69
 - Tag Image File Format (TIFF), 164, 165, 170–171
 - Task Manager, monitoring performance using, 258
 - task-based security, 22
 - templates
 - for reports, 48, 52, 70, 148
 - for stored procedures, 43
 - Text control, 59
 - text properties, 20
 - Textbox control, 75–78
 - thin applications, 17
 - third-party tools to use with Reporting Services, 383–387
 - TIFF (Tag Image File Format), 164, 165, 170–171
 - timeouts for execution of report, 237–238
 - title of report, 59–60. *See also* Textbox control
 - Today function, 135
 - Toolbar setting, HTML rendering, 173
 - Toolbox pane, Report Designer
 - accessing, 71, 72
 - closing automatically, 72
 - data regions in, 17, 56, 78–82, 86–91
 - hiding, 73
 - moving, 72
 - report items in, 74–75
 - reset default settings, 73
 - selecting report items from, 56
 - using, 71–73
 - ToolTips, 286–287
 - top ten lists in a report, 115–116
 - TopN operator, 116
 - Total Cache Hits counter, 261
