Introduction*xxxvii*

PART I • WINDOWS 2000 PROFESSIONAL BASICS **1**

1 Introducing Windows 2000 Professional **3**

Windows 2000 Professional, Windows 2000 Server: Which Is Which?	4
The Road to Windows 2000 Professional	5
The Beginnings	6
The Early Releases	7
What's New in Windows 2000 Professional?	8
Plug-and-Play Support	8
Partial Plug-and-Play Systems	10
Hot Plug-and-Play Support	11
Offline Files	12
Windows Management Instrumentation	12
Advanced Power Management Support	12
Encrypting File System	12
Support for Windows 2000 Server Deployment Tools	12
Microsoft Management Console	13
USB Support	13
Digital Camera Support	13
Multiple Monitor Support	13
DirectX 7	13
Advanced VPN Security	14
Recovery Console	14
Hibernation	14
Remote Desktop Sharing	15
Internet Connection Sharing	15
Fax Services	15
Internet Explorer 5	15
Internet Information Services	15
Accessibility Options	16
Telnet Server	16
Personalized Menus	16
What's Not in Windows 2000 Professional?	16
MSN Support	16
Support for MIPS or PowerPC Chips	16
Why Choose Windows 2000 Professional over Windows 98?	17
More Solid, Crashless	18

Complete Protected Mode over Protected Mode with Real-Mode Support	19
Faster	19
Home Directories	20
Error Recording	20
Multiprocessor Support over x86-Only Support	21
Separate 16-Bit Memory Spaces over Shared 16-Bit Memory Spaces	21
NT File System over FAT File System	22
Security in Windows 2000 Professional	23
Windows 2000 Professional Requires Users to Log On to a Workstation	24
Windows 2000 Professional Defines User Rights That Control a User's Actions	24
Windows 2000 Professional Uses File and Printer Permissions to Control Access	24
Windows 2000 Professional Will Optionally Log All Security Events	25
How Is Windows 2000 Professional Different from Other Operating Systems?	25
Windows 2000 Professional Compared with Windows 3.x	25
Windows 2000 Professional Compared with OS/2	26
Windows 2000 Professional Compared with Unix	26
Windows 2000 Professional Compared to Macintosh OS	26
What Are the Features of Windows 2000 Professional Architecture?	27
Kernel Mode	27
The HAL and the Kernel	27
Executive Services	28
User Mode	30
Windows 2000 Professional Weaknesses	31
Problems Related to Scale	31
Fewer Drivers Are Available	32
Not All Windows 95/98 Apps Run	32
Problems Caused by the Secure Nature of Windows 2000 Professional	33
Some DOS and Windows 3.x Apps Run Slowly	34
Some DOS and Windows Apps Will Not Run	34
Problems Related to Legacy	34
File Associations Rely on File Extensions	35
Operating System Components Are Largely Static	35
Shortcuts Don't Link Two Ways	36
No Bookmark Support Exists for Applications	36
Summary	37
2 Installing Windows 2000 Professional (and Automating Installation)	39
Knowing Your Computer Needs	40
Reviewing Your Hardware Requirements	40
Processor	40
Memory	41
Video Card	42
Consult Microsoft's Hardware Compatibility List (HCL)	42
Make Sure the Drivers You Want to Use Appear on the HCL	43

Reviewing Software Requirements	44
Make Sure the Apps Work	45
Installing Windows 2000 Professional as a Stand-Alone Workstation or Domain Member	46
Deciding Whether to Keep Other Operating Systems	46
Understanding Windows 2000 Professional Terminology	47
Installing a Stand-Alone Windows 2000 Professional Computer	48
Installing Windows 2000 Professional from a CD-ROM	48
Using the Installation Command	49
End User License Agreement	52
Where to Put Windows 2000 Professional	52
Formatting an Unpartitioned Space	52
Installation Continues	54
Regional Settings	54
Name and Organization	54
Computer Name and Administrator Password	54
Date and Time	55
Networking Settings	55
Final Phase	55
Installing to a Network	56
DHCP Service	57
Network Card	58
Network Protocol	58
Using Setup Manager to Automate Installation for Multiple Machines	58
Running the Unattended Installation	59
Using Dual Operating Systems	60
Making a Dual Boot Work	60
Obtaining Debugging Information	64
Booting Windows 2000 Professional in Safe Mode	65
Installing Fonts on Windows 2000 Professional	66
Special Topic: Using Batch Routines for Multiple Installations	66
Unattended Script Files	67
Remote Installation Service	68
SYSPREP	68
Using Unattended Installation Scripts	69
UNATTEND.TXT	69
Setup Manager	70
Custom UNATTEND.TXT Modifications	78
Tying It All Together: Launching a Windows 2000 Professional Installation	83
Using SYSPREP	84
Preparing a System to Be Cloned	84
Imaging a System and Deploying It	87
Summary	87
3 Running Your Applications	89
Eliminating Programs You Won't Need Anymore	90
TSRs	90

Disk Utilities	90
Desktop Replacements	91
Discovering Programs You Can't Run Anymore	91
Some Windows 95/98 Apps Won't Run	93
Running Programs	94
But First...The User's View of the Desktop	94
The Taskbar	94
The Start Menu	95
Shortcut Menus	96
Folders	97
Explorer	99
My Computer	99
My Network Places	100
Running Programs from the Start Menu	100
Running Programs from Explorer and Explorer-Type Windows	101
Running Programs from Search	102
Running Programs by Accessing the Files They Create	103
Running Programs from Shortcuts	104
Running Programs by Using Run	104
Running Programs Minimized	106
Special Topic: Running DOS Applications	106
Switching from One Window to Another	108
Using Alt+Tab to Switch	108
Using the Taskbar to Switch	108
Configuring the Taskbar	108
Making File Associations	109
Finding Programs	110
Installing and Removing Programs	111
Installing Programs	111
Removing Programs	113
Special Topic: Running Programs in Dual-Boot Mode with Windows 95/98	114
Summary	115
4 Organizing Programs and Documents	117
Using the Start Menu	118
Adding Your Favorite Programs to the Start Menu	119
Arranging Open Windows with the Taskbar	119
Customizing the Start Menu and Taskbar	120
The General Tab	121
The Advanced Tab	121
Removing Programs from the Start Menu	122
The Advanced Button and Explorer	123
Using Explorer	123
Opening vs. Exploring	124
Branches	125
Views	125
Toolbar	129

Using Explorer's Main Menus and Shortcut Menus	131
Using the File Menu	131
Using the Edit Menu	132
Using the View Menu	133
Using the Favorites Menu	134
Using the Tools Menu	135
Using the Help Menu	135
Using Shortcut Menus	135
Organizing Your Files and Folders	136
Creating New Folders	136
Moving Items	136
Copying Items	137
Saving Files and Folders to the Desktop	137
Dragging with the Right Mouse Button	138
Renaming Documents and Folders	138
Deleting Files and Folders	139
Sending Items to the Recycle Bin	139
Emptying the Recycle Bin	139
Restoring Items from the Recycle Bin	140
Understanding Windows 2000 Professional as a Multiuser Environment	140
User Profile Folders	140
The Windows 2000 Professional Folder	142
Summary	144
5 Setting Object Properties	145
Right-Clicking around Windows 2000 Professional	146
Using Properties Dialog Boxes	148
Deciding When to Use Properties Dialog Boxes	148
Trying Out a Few Properties Dialog Boxes	149
Changing Property Settings from My Computer	152
Summary	156
6 Customizing Your Desktop via Control Panel	157
Opening Control Panel	158
Understanding the Active Desktop	161
Using Accessibility Options	163
Using the Accessibility Options Applet	163
Using the Accessibility Accessories	165
Using the Accessibility Wizard	165
Using Magnifier	166
Running Narrator	166
Using the On-Screen Keyboard	167
Using Utility Manager	168
Setting the Date and Time	169
Customizing Your Screen Display	170
Setting the Background and Wallpaper	171

Loading a Pattern	172
Editing a Pattern	172
Loading a New Slice of Wallpaper	173
Setting the Screen Saver	174
Loading a Screen Saver	174
Adjusting the Power Settings	176
Adjusting the Appearance	177
Loading an Existing Color Scheme	178
Choosing Your Own Colors and Changing Fonts	179
Changing the Web Settings	180
Changing the Visual Effects	183
Use Transition Effects for Menus and ToolTips	184
Smooth Edges of Screen Fonts	184
Use Large Icons	185
Show Icons Using All Possible Colors	185
Show Window Contents While Dragging	185
Hide Keyboard Navigation Indicators until I Use the Alt Key	185
Adjusting the Driver Settings	185
Colors	186
Screen Area	187
Troubleshoot	188
Advanced	188
Adjusting the Mouse	190
Switching the Buttons and Setting Double-Click Speed	191
Setting Your Pointers	192
Setting the Pointer Motion	193
Mouse Hardware Settings	194
Summary	194
7 Printers and Printing	195
Printing in Windows 2000 Professional	196
Adding a New Printer	198
About Printer Installation	198
About Adding Printers	200
About Printer Drivers	201
About the Add Printer Wizard	202
Adding a Network Printer	202
Adding a Network Printer Using the Directory	206
Printing a Test Page	207
Adding a Local Printer	208
Adding a Printer That Is Not on the Windows 2000 Professional List	210
Sharing a Printer for Network Use	212
Creating a Second Printer for the Same Print Device	213
Creating a Printer Pool	214
Customizing Your Printer	214
Using the General Tab	215

Working with Port Settings	216
Adding a Port	216
Deleting a Port	217
Retrieving a Port	217
Configuring a Port	217
Scheduling Print Jobs	218
Setting Availability Times	218
Setting Printer Priorities	219
Spooling	220
Setting Up Separator Pages	220
Choosing a Separator Page	221
Creating a Separator Page	222
Setting User Permissions to the Printer	224
Changing Ownership	227
Auditing Printer Usage	228
Deleting a Printer from Your Printers Folder	232
Printing Documents from Your Programs	233
Printing from a Program	233
Printing by Dragging Files	235
Printing by Right-Clicking a Document	236
Working with the Print Queue	236
Refreshing the Network Queue Information	237
Deleting a File from the Queue	238
Canceling All Pending Print Jobs on a Printer	238
Pausing (and Resuming) the Printing Process	239
Pausing or Resuming a Specific Print Job	239
Pausing or Resuming All Jobs on a Printer	240
Printing to a Disk File	240
Troubleshooting	241
A Word about Fonts	243
Summary	244
8 Running Multimedia Applications	245
Understanding How Multimedia Works	
in Windows 2000 Professional	246
Understanding the Foundation Layer of DirectX	248
Understanding the Media Layer of DirectX	249
Installing Multimedia Hardware	250
Choosing Multimedia Hardware	250
Graphics Boards	250
Sound Cards	251
Speakers	251
Installing a Sound Card	251
Tracking Hardware Device I/O Resources	252
Installing a Sound Board in Your PC	252
Installing the Sound Card Driver	253

Troubleshooting When You Don't Hear the Start-Up Sound	256
Installing a Graphics Card	257
Assigning Sounds to System Events	259
Using Multimedia Tools	260
Audio Tools	260
Adjusting Audio Levels	261
Enabling or Disabling the Speaker Icon	262
Specifying Recording Quality	262
MIDI Tools	262
Multimedia Device Information	263
Multimedia File Information	264
Running Multimedia Applications	264
Running Media Player	264
Using Media Player Controls	265
Using Media Player Features for AVI Files	266
Running CD Player	266
Editing CD Player Information	268
Changing Time Display Options	269
Specifying CD Player Preferences	269
Running Sound Recorder	269
Running Volume Control	270
Recording Levels	271
Advanced Controls	272
Summary	272
9 Sharing Data between Applications	273
Exchanging Data	274
Using the Clipboard	275
Understanding How the Clipboard Works	275
Selecting, Copying, and Cutting in Windows Applications	275
Capturing Screens with the Clipboard	278
Working with ClipBook Viewer	279
Viewing the Clipboard's Contents	279
Storing the Clipboard's Contents in a File	281
Retrieving the Contents of a Stored Clipboard File	282
Clearing the Clipboard to Save Resources	283
Using ClipBook Instead of the Clipboard	283
Running ClipBook	284
Pasting Items into ClipBook	285
Pasting Items from ClipBook	286
Sharing Your ClipBook Pages with Network Users	287
Connecting to a Shared ClipBook Page	288
Using OLE	289
Embedding Objects	290
Linking Objects	291
Maintaining Your OLE Links	293

Manually Updating a Linked Object	293
Taking Care of Other Link-Management Tasks	294
Breaking a Link	295
Fixing Broken Links	295
Summary	297

PART II • COMMUNICATIONS AND THE INTERNET 299

10 Introduction to Communications 301

Discovering What's New in Windows 2000 Professional Communications	303
Using the Windows Telephony Interface	303
Installing a Modem	304
Changing Modem Properties	307
General Properties	308
Port	308
Speaker Volume	308
Maximum Port Speed	308
Dial Control	308
Diagnostics	309
Query Modem	309
Logging	309
Advanced Settings	310
Extra Settings	310
Change Default Preferences	311
Dialing Rules	312
Calling Card	316
Using the Internet Connection Wizard	318
Creating a New Connection to the Internet	319
Setting Up Your Connection to the Internet Manually	320
Connecting to the Internet with a Cable Modem	321
Cable Internet Access—How Does It Work?	321
How Fast Is It?	321
Cable Internet Access—Advantages and Disadvantages	322
Advantages of Cable Modem Internet Access	323
Disadvantages of Cable Modem Internet Access	323
Getting Hooked Up	323
Questions to Ask Your Provider	323
Service Delivery	324
Connecting to the Internet with DSL	325
DSL—How Does It Work?	325
How Fast Is It?	326
DSL—Advantages and Disadvantages	326
Advantages of DSL Service	327
Disadvantages of DSL Service	327
Getting Hooked Up	327

Questions to Ask Your Provider	327
Service Delivery	328
Connecting to the Internet with ISDN	328
ISDN—How Does It Work?	329
ISDN—Advantages and Disadvantages	329
Advantages of ISDN Service	329
Disadvantages of ISDN Service	330
Getting Hooked Up	330
ISDN Modem	330
You Need an ISP Too	330
Service Delivery	331
Dialing In via ISDN	331
Sharing an Internet Connection	331
Configuring Windows 2000 Professional to Share an Internet Connection	333
Configuring Clients	338
Troubleshooting Internet Connection Sharing	338
Summary	339
11 Using the Communications Programs	341
Using the Windows 2000 Professional Fax Service	342
Installing Fax	342
Configuring Windows 2000 Professional Fax	343
User Information	343
Cover Pages	343
Status Monitor	344
Advanced Options	345
Sending Faxes in Windows 2000 Professional	349
Creating a Cover Page	353
The Basics of Cover Pages	354
Advanced Cover Page Editing	356
Using Phone Dialer	360
Placing a Call	361
Configuring Phone Dialer to Link to a Directory	362
Configuring Phone Dialer for Video Calls	362
Connecting with HyperTerminal	362
Creating a New HyperTerminal Connection	363
Sending and Receiving Files	364
Communicating and Sharing with NetMeeting	364
Starting NetMeeting	365
Making a Call	366
Using the Chat Application	368
Using Directory Servers	369
Hosting a Meeting	369
Using Video	370
Sharing Applications	371

Transferring Files	371
PC Remote Control with NetMeeting	372
Setting Up Slave to Allow a Remote Computer to Control It	372
Listening for Incoming Calls	373
Setting Up Master to Control Slave	373
Summary	374
12 Web Browsing with Internet Explorer	375
Starting Internet Explorer	376
From the Desktop	377
From a Hyperlink	377
From Windows Explorer	378
Getting Help	379
A Quick Tour of Internet Explorer	379
Moving around the Web	381
Going to Specific Sites	381
Using and Managing Links	383
Moving Backward and Forward	383
Adding Your Own Links to the Links Bar	383
Keeping Track of Your Favorite Sites	384
Adding a Site to Your Favorites List	385
Maintaining Your Favorites List	386
Returning to Where You Were	387
Reading Mail and News and Sharing Pages	388
Listening to the Radio over the Internet	388
Saving and Printing Web Pages	389
Saving the Current Page	390
Saving Portions of a Page	390
Printing the Current Page	391
Working Offline	392
Finding Exactly What You Want on the Internet	393
Performing a Simple Search	394
Power Searching	395
Customizing Internet Explorer	395
Configuring the General Tab	395
Looking at the Security Tab	397
Using the Content Tab	399
Setting up the Connections Tab	400
Looking at the Programs Tab	401
Configuring the Advanced Tab	402
Using Built-In Internet Utilities	403
Address Resolution Display and Control (ARP)	404
File Transfer Protocol (FTP)	404
Finger	406
Ping	406
Protocol Statistics (Netstat)	407

Remote File Copy (RCP)	407
Remote Program Execution (REXEC)	407
Remote Shell/Script (RSH)	408
Remote Terminal (Telnet)	408
Route	408
Trace Route (tracert)	409
Trivial File Transfer Protocol (TFTP)	410
Summary	410
13 Using Outlook Express for E-mail and News	411
Using Outlook Express As Your Mail Reader	412
A Quick Tour	413
The Folders List	413
The Contacts Pane	414
Retrieving Your Mail	414
Reading and Processing Messages	415
Printing Messages	415
Marking Messages	415
Moving Messages	415
Saving Messages	415
Replying to a Message	417
Forwarding a Message	418
Deleting Messages	418
Creating and Sending Messages	419
Creating E-mail Messages with HTML	420
Adding a Picture to Your Messages	422
Adding a Background Color or Sound to Your Message	423
Including Hyperlinks in Your Message	423
Adding a Signature to Your Messages	424
Attaching Files to Your Messages	425
Applying Message Rules	426
Adding and Managing Identities	428
Using Outlook Express As Your Newsreader	429
Setting Up a Newsgroup Account	431
Connecting to Newsgroups	431
Finding a Newsgroup of Interest	432
Subscribing to a Newsgroup	432
Reading a Newsgroup	432
Posting to a Newsgroup	432
Customizing Outlook Express	433
Summary	434

PART III • NETWORKING WINDOWS 2000 PROFESSIONAL 435**14 Understanding the Architecture 437**

Understanding Rings and Things: CPU Privilege Levels	438
A Major Software Problem: Clobbering Memory	438
Anti-Clobber Features	439
Process Privilege Levels: Kernel and User Mode	439
Designing Architecture Independence	441
Architecture Independence in Windows 2000 Professional: The Big Picture	442
Minimum CPU Requirements to Be Windows 2000 Professional–Possible	442
The Windows 2000 Professional Baseline: the HAL, the Kernel, and the Drivers	443
“Open the Drive Bay Door, HAL”	443
We Have a Kernel, but Not a General	444
They’re Called Drivers Because They Can Drive You Crazy	444
Designing Robustness	445
A Basic Layered Operating System	445
A Client-Server, Microkernel Operating System	447
The Cost of Client-Server	448
The Windows 2000 Professional Compromise	449
Is the Microkernel a Bad Compromise?	452
NT 4’s Additional Architectural Change	453
Working with the Major Modules in Windows 2000 Professional	455
The HAL, Kernel, and I/O Manager	455
The Windows 2000 Professional Executive	455
Environment Subsystems	457
Win32	457
WOWEXEC	458
OS/2 and POSIX	461
Virtual DOS Machines (VDMs)	461
Managing Memory in Windows 2000 Professional	462
The Numbers behind Windows 2000 Professional’s Memory Requirements	463
Memory Mistakes That Programmers Make	464
Virtual Memory	464
Summary	466

15 An In-Depth Introduction to Networks 467

Early Networking: Sneakernet	468
LAN: The Alternative	469
File Management: Sharing and Transferring Files	470
Concurrent Use of Applications	470
Peripheral Sharing	471
Group Scheduling	472
Electronic Mail	472
Network Games	473
Networking Vocabulary	473

Basic Requirements: Hardware, Software, and Connections	475
Network Interface Cards	475
Cabling Systems	475
Topologies	475
Servers	476
Network Operating Systems	476
Network-Based Applications	476
Wireless Networks	477
Specifics: The Network Interface Card	478
IRQs	478
Base Memory Address	481
Direct Memory Access—Memory Movers	481
Cabling Considerations	481
Cost	482
Ease of Installation and Maintenance	482
Reliability	483
Speed	483
Distance	483
Attenuation	483
Possibility of Packet Collision	484
Susceptibility to RF Noise	484
Types of Cables	485
Twisted-Pair	485
Coaxial Cable	487
Understanding Bandwidth	489
Fiber-Optic Cable	490
Types of Fiber-Optic Cable	491
Advantages and Disadvantages	492
Types of Connectors	493
Connectors	493
RJ45	495
D-Shells and Data Connectors	495
Fiber-Optic Connectors	496
Wiring Systems	496
IBM Cabling System	496
Ethernet Options	498
10Base-2	498
10Base-T	498
100Base-T	499
1000Base-X	499
Summary	499
16 Network Architectures	501
Physical Topologies	502
The Star Topology	504
Getting to the Hub of the Problem	504

Star Topology Continued	506
The Bus Topology	507
Logical Topologies	509
Bus Topology	509
Token Ring Topology	511
When a Bus Is Not a Bus: 10Base-T	513
IEEE's Topological Protocols	515
The 802.3 Standard	515
Carrier Sense Multiple Access/Collision Detection (CSMA/CD)	516
The 802.4 Standard	519
The 802.5 Standard	520
Peer-to-Peer versus Client-Server	520
Client-Server Networks	521
Disk Servers	522
File Servers	523
Peer-to-Peer Networks	525
Judging Peer-to-Peer Packages	526
Understanding Peer-to-Peer Operations	526
Weighing the Advantages of Using a Peer-to-Peer Network	527
Summary	527

17 Connecting to Windows 2000

Peer-to-Peer Networks and NT4 Domains 529

Connecting Your Network	531
Configuring Your Network	532
Specifying Protocols	532
Connecting to Workgroups	534
Creating Shares	535
Attaching to Network Resources	538
Browsing My Network Places	538
Mapping a Network Drive	538
Making a Direct Connection via a UNC	539
Using Net Use: Connecting to Other Drives and Printers	541
Connecting to a Resource in the Local Domain	542
Using Long Filenames in UNC's	542
Creating a Drive Mapping for Your Home Folder	543
Connecting to a Resource in Another Domain	543
Using Other Switches	543
Using Profiles	544
Creating Hardware Profiles	544
Managing Hardware Profiles	546
Surviving User Profiles	548
Understanding Windows 2000 Professional Profiles versus 95/98 Profiles	549
Special Topic: Connecting a Windows 2000 Professional Workstation to an NT4 Domain	549
Receiving the Error Message "No Domain Server Was Available..."	551

Configuration Testing	551
Attaching to Network Resources Using Login Scripts	554
Using the Connect As Option	555
Summary	556
18 Living with Windows 2000 Professional; Strict Security	557
Understanding User Accounts in Windows 2000 Professional	558
Understanding User Rights	560
Creating a User Account	562
Creating a Group Account	566
Setting Permissions	567
Setting Share-Level Permissions	567
Types of File and Folder Permissions	570
Assigning File and Folder Permissions	573
Auditing Files and Folders	574
Understanding Ownership	579
Defining Ownership	579
Taking Ownership	580
Summary	581
19 Active Directory Essentials	583
Security: Keeping Track of Who's Allowed to Use the Network and Who Isn't	585
Maintain a "Directory" of Users and Other Network Objects	586
Centralizing the Directory and <i>Directories</i> : a "Logon Server"	587
Searching: Finding Things on the Network	588
Finding Servers: "Client-Server Rendezvous"	588
Name Resolution and DNS	589
Creating New Types of Subadministrators	590
Delegation: Subdividing Control over a Domain	591
Satisfying Political Needs	592
Connectivity and Replication Issues	593
Scalability: Building Big Networks	594
Simplifying Computer Names or "Unifying the Namespace"	595
Satisfying the Lust for Power and Control	597
Connecting a Windows 2000 Professional Machine to an AD Domain	598
Checklist	598
Connecting to AD	598
Verify Operating System Prerequisites	598
Change Computer Network Identification	599
Logging In to Active Directory	600
Summary	601
20 Connecting to Novell NetWare Networks	603
Defining Novell's Point of View: Common Terms	604
Novell Security	604

The Login Procedure	605
Trustee Rights	605
Directory Rights	605
File Attributes	606
Using the Novell Administration Utilities	606
Talking to NetWare 3 Servers versus Talking to an NDS Tree	607
Accessing a NetWare Server	608
Administering a NetWare Server from a Windows 2000 Professional Computer	608
Understanding How Windows 2000 Professional and NetWare Interact	609
Running NetWare and Windows 2000 Server Together	610
The Older Solution: Windows for Workgroups and Windows 95	610
Configuring Windows 2000 Professional to Run in Parallel with NetWare	611
Using Novell Commands Available from Windows 2000 Professional	615
Printing to Novell Printers	615
Enabling Long Filename Support on the Novell Server	616
Choosing a 32-Bit Novell Solution	616
Accessing NetWare Servers from Windows 2000 Professional Clients	618
Summary	618
21 Secure Telecommuting	619
Telecommuting Overview: Risks and Rewards	620
Protecting Against the Interception of Data	621
Securing RAS Dial-in Sessions	621
Virtual Private Networking Connections	623
VPN Performance Considerations	627
Protecting Against the Impersonation of a User	628
Common Sense Guidelines	628
Encrypted Authentication	629
Caller-ID/Callback Security	630
Third-Party Products: SecurID, SafeWord	631
Protecting Against the Abduction of Data	632
Encrypting Files with EFS	633
The Recovery Agent	634
Exporting the Recovery Agent Private Key	635
Restoring the Recovery Agent Private Key	636
Summary	636
PART IV • ADVANCED TECHNIQUES AND TROUBLESHOOTING	637
22 HTML and VBScript	639
An Overview of Internet Information Services	641
Merging the Web and the Desktop	643
Designing with HTML	645

The Absolute Essentials	648
Text Formatting Tags	651
Specifying Fonts and Color	653
Lists	654
Nested Lists	655
Images	657
Hyperlinks	659
Tables	660
Multiple Row and Multiple-Column Cells	661
Activating Web Pages with VBScript	663
Embedding Scripts in HTML Documents	664
VBScript Variables	665
VBScript Procedures	665
Controlling the Program Flow	666
Conditional Statements	666
The <i>If...Then...Else</i> Statement	667
The <i>Select Case</i> Statement	668
Looping Statements	669
The <i>For...Next</i> Loop	669
The <i>While...Wend</i> Loop	670
The <i>Do...Loop</i> Loop	671
Input/Output Functions	672
String Manipulation Functions	674
<i>LCase()</i> , <i>UCase()</i>	674
<i>Left()</i> , <i>Right()</i> , and <i>Mid()</i>	674
<i>Len()</i>	675
<i>InStr()</i>	675
Other String Manipulation Functions	675
Date/Time Functions	676
<i>Date()</i> , <i>Time()</i>	676
<i>DateAdd()</i>	676
<i>DateDiff()</i>	677
<i>Day()</i> , <i>Month()</i> , <i>Year()</i>	677
<i>Hour()</i> , <i>Minute()</i> , <i>Second()</i>	677
<i>WeekdayName()</i> , <i>MonthName()</i>	678
Forms and Controls	678
The Text Control	679
The TextArea Control	680
The CheckBox Control	680
The RadioButton Control	681
The Multiple Selection Control	681
The Command Button Control	682
The <i>FORM.HTM</i> Page	682
VBScript and HTML	686
The Properties and Methods of the <i>Document</i> Object	686
Using the <i>Document</i> Object	687

The Calendar Page	688
Summary	691
23 DHTML and VBScript	693
Extending HTML with Styles and Classes	695
Reacting to Mouse Events	696
The <DIV> Tag	698
Manipulating the Styles	701
HTML Lists	703
DHTML Lists	706
ActiveX Controls	708
The Multimedia Controls	709
The Structured Graphics Control	709
The Filter Control	711
The Lights Effect	713
The Multimedia Sequencer Control	715
Voice-Enabled Pages	720
The AXAGENT.HTM Document	722
Programming the Agent Control	723
Summary	726
24 VBScript and Windows 2000 Professional	727
Writing and Executing Scripts	728
Objects, Properties, and Methods	730
Collections and Dictionaries	732
The Files Collection	735
The FileSystemObject Object	736
The CreateTextFile Method	736
The OpenTextFile Method	737
The TextStream Object's Methods	737
Read	738
ReadAll	738
ReadLine	738
Skip	738
SkipLine	738
Write	738
WriteLine	738
WriteBlankLines	739
The TextStream Object's Properties	739
AtEndOfLine	739
AtEndOfStream	739
Column	739
Line	740
Using the TextStream Object	740
More FileSystemObject Methods	741

<i>CopyFile</i>	741
<i>CopyFolder</i>	741
<i>DeleteFile</i>	742
<i>DeleteFolder</i>	742
<i>MoveFile</i>	742
<i>MoveFolder</i>	743
<i>FileExists, FolderExists</i>	743
<i>GetFile, GetFolder</i>	743
<i>GetFileName</i>	744
<i>FileSystemObject</i> Properties	747
The <i>Drives</i> Collection	747
The <i>Drive</i> Object	748
<i>AvailableSpace</i>	748
<i>DriveLetter</i>	748
<i>DriveType</i>	749
<i>FileSystem</i>	750
<i>FreeSpace</i>	750
<i>IsReady</i>	750
<i>Path</i>	751
<i>RootFolder</i>	751
<i>SerialNumber</i>	751
<i>ShareName</i>	751
<i>TotalSize</i>	751
<i>VolumeName</i>	751
The <i>Files</i> Collection	752
The <i>File</i> Object	752
The <i>File</i> Object's Properties	752
<i>Attributes</i>	752
<i>DateCreated</i>	754
<i>DateLastAccessed</i>	754
<i>DateLastModified</i>	754
<i>Drive</i>	755
<i>Name</i>	755
<i>ParentFolder</i>	755
<i>Path</i>	755
<i>ShortName</i>	756
<i>Size</i>	756
<i>Type</i>	756
The <i>File</i> Object's Methods	756
<i>Copy</i>	756
<i>Delete</i>	756
<i>Move</i>	756
<i>OpenAsTextStream</i>	757
The <i>Folders</i> Collection	758
<i>AddFolder</i>	758
The <i>Folder</i> Object	758

<i>Attributes</i>	758
<i>DateCreated</i>	759
<i>DateLastAccessed</i>	759
<i>DateLastModified</i>	759
<i>Drive</i>	759
<i>IsRootFolder</i>	759
<i>Name</i>	759
<i>ParentFolder</i>	760
<i>Path</i>	760
<i>ShortName</i>	760
<i>ShortPath</i>	760
<i>Size</i>	760
<i>Subfolders</i>	760
Scanning a Folder Recursively	761
Automating Other Applications	763
The <i>CreateObject()</i> Function	764
The <i>GetObject()</i> Function	768
Handling Run-Time Errors	769
Trapping Errors	769
Summary	771
25 The Windows Scripting Host	773
Running a Script	774
The <i>Wscript</i> Object	775
The <i>Arguments</i> Property	775
More <i>Wscript</i> Properties	778
<i>Application</i>	778
<i>FullName</i>	778
<i>Name</i>	779
<i>Path</i>	779
<i>ScriptFullName</i>	779
<i>Version</i>	779
<i>ScriptName</i>	779
<i>Wscript</i> Methods	779
<i>Echo</i>	780
<i>Quit</i>	780
The <i>WshShell</i> Object	780
<i>Environment</i>	781
<i>SpecialFolders</i>	782
<i>CreateShortcut</i>	783
<i>Popup</i>	784
Manipulating the Registry	786
Registry Manipulation Methods	786
<i>RegRead</i>	786
<i>RegWrite</i>	788
Example: Manipulating the Shortcut Menu	788

<i>RegDelete</i>	790
<i>Run</i>	791
Starting <i>Wscript</i> from within a Script	791
The <i>WshNetwork</i> Object	792
<i>ComputerName</i>	792
<i>UserDomain</i>	792
<i>UserName</i>	792
Connecting to Network Printers	792
<i>EnumPrinterConnections</i>	793
<i>AddWindowsPrinterConnection</i>	793
<i>RemovePrinterConnection</i>	793
<i>SetDefaultPrinter</i>	794
Connecting to Network Drives	794
<i>EnumNetworkDrives</i>	794
<i>MapNetworkDrive</i>	794
<i>RemoveNetworkDrive</i>	795
The <i>WshShortcut</i> Object	796
<i>Arguments</i>	796
<i>Description</i>	796
<i>FullName</i>	796
<i>Hotkey</i>	796
<i>IconLocation</i>	797
<i>TargetPath</i>	797
<i>WindowStyle</i>	797
<i>WorkingDirectory</i>	797
<i>Save</i>	797
Example: Creating a New Shortcut	797
Summary	798
26 Supporting New Hardware and Installing Drivers	799
Display Adapters	801
SCSI Cards and Devices	802
Hard Drives and CD-ROMs	803
Tape Drives	803
Mouse Drivers	804
Keyboard Drivers	804
Sound Cards	805
EIDE and IDE Adapters	807
PCMCIA Adapters	807
Troubleshooting Drivers	808
Summary	808
27 Fixing Windows 2000 Professional When It Breaks	809
Avoiding Windows 2000 Professional Crashes	810
Buy Reliable Hardware	810

Guard against Environmental Hazards	812
Install Windows 2000 Professional Properly	813
Obtain the Latest Tested Drivers for Your Hardware	813
Always Shut Down Windows 2000 Professional Properly	813
Back Up Your Disk Regularly	813
Be Sure You're Authorized to Do Something before Doing It	814
An Ounce of Prevention... ..	814
Defragmenting Files	814
