<b>Preface</b>	<b>ix</b>
<b>Notation and symbols</b>	<b>xi</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Historical perspective	1
1.2 How to use this book	10
1.3 Outline of this book	10
1.4 Notes and references	14
<b>2 Linear algebra</b>	<b>15</b>
2.1 Basic concepts in linear algebra	15
2.2 Eigenvalues and eigenvectors	21
2.3 Complex eigenvalues	23
2.4 Cayley–Hamilton theorem	31
2.5 Invariant subspaces and Jordan canonical form	34
2.6 Semi-definite matrices	42
2.7 Algebraic Riccati equations	43
2.8 Notes and references	54
2.9 Exercises	55
2.10 Appendix	59
<b>3 Dynamical systems</b>	<b>63</b>
3.1 Description of linear dynamical systems	64
3.2 Existence–uniqueness results for differential equations	70
3.2.1 General case	70
3.2.2 Control theoretic extensions	74
3.3 Stability theory: general case	78
3.4 Stability theory of planar systems	83
3.5 Geometric concepts	91
3.6 Performance specifications	96
3.7 Examples of differential games	105
3.8 Information, commitment and strategies	114
3.9 Notes and references	114
3.10 Exercises	115
3.11 Appendix	118

<b>4</b>	<b>Optimization techniques</b>	<b>121</b>
4.1	Optimization of functions	121
4.2	The Euler–Lagrange equation	125
4.3	Pontryagin’s maximum principle	133
4.4	Dynamic programming principle	154
4.5	Solving optimal control problems	162
4.6	Notes and references	162
4.7	Exercises	163
4.8	Appendix	170
<b>5</b>	<b>Regular linear quadratic optimal control</b>	<b>175</b>
5.1	Problem statement	175
5.2	Finite-planning horizon	177
5.3	Riccati differential equations	192
5.4	Infinite-planning horizon	196
5.5	Convergence results	209
5.6	Notes and references	218
5.7	Exercises	219
5.8	Appendix	224
<b>6</b>	<b>Cooperative games</b>	<b>229</b>
6.1	Pareto solutions	230
6.2	Bargaining concepts	240
6.3	Nash bargaining solution	246
6.4	Numerical solution	251
6.5	Notes and references	253
6.6	Exercises	254
6.7	Appendix	259
<b>7</b>	<b>Non-cooperative open-loop information games</b>	<b>261</b>
7.1	Introduction	264
7.2	Finite-planning horizon	265
7.3	Open-loop Nash algebraic Riccati equations	278
7.4	Infinite-planning horizon	283
7.5	Computational aspects and illustrative examples	299
7.6	Convergence results	305
7.7	Scalar case	312
7.8	Economics examples	319
	7.8.1 A simple government debt stabilization game	320
	7.8.2 A game on dynamic duopolistic competition	322
7.9	Notes and references	326
7.10	Exercises	327
7.11	Appendix	340
<b>8</b>	<b>Non-cooperative feedback information games</b>	<b>359</b>
8.1	Introduction	359
8.2	Finite-planning horizon	362

8.3	Infinite-planning horizon	371
8.4	Two-player scalar case	383
8.5	Computational aspects	389
	8.5.1 Preliminaries	390
	8.5.2 A scalar numerical algorithm: the two-player case	393
	8.5.3 The $N$ -player scalar case	399
8.6	Convergence results for the two-player scalar case	403
8.7	Notes and references	412
8.8	Exercises	413
8.9	Appendix	421
<b>9</b>	<b>Uncertain non-cooperative feedback information games</b>	<b>427</b>
	9.1 Stochastic approach	428
	9.2 Deterministic approach: introduction	433
	9.3 The one-player case	435
	9.4 The one-player scalar case	444
	9.5 The two-player case	450
	9.6 A fishery management game	455
	9.7 A scalar numerical algorithm	461
	9.8 Stochastic interpretation	472
	9.9 Notes and references	474
	9.10 Exercises	475
	9.11 Appendix	481
	<b>References</b>	<b>485</b>
	<b>Index</b>	<b>495</b>
