Where to Go from Here.....	5

<i>Book 1: Preparations</i>	7
--	----------

Chapter 1: Planning a Web Project	9
Defining the Audience	9
Internal stakeholders	10
External audience.....	10
Setting Goals	12
Creating a Scope Document.....	13
Preparing to Get Started	13
Defining why you're doing the project	14
Brainstorming and evaluating your ideas	14
Looking at budget and timelines	14
Considering collaborations.....	15
Selling the Idea	15
Holding a Kick-Off Meeting	16
Revising Your Original Plans — Using Feedback to Improve	16
Receiving feedback	17
Giving feedback	18
Preparing to Redesign an Existing Site.....	20

Chapter 2: Build a Web Team or Go It Alone	23
Flying Solo: Skills You Need to Go It Alone	23
Managing the project	23
Serving your customer	24
Dealing with HTML, CSS, and other scripting.....	25
Using Photoshop, Fireworks, and other graphics applications	26
Developing content	28
Considering basic computer and Internet skills	28
Incorporating multimedia in your project	28
Handling a solo project.....	29
Hiring Members of the Team	29
Project manager.....	30
Web designer/new media designer	30
Web developer/programmer	31
Content developer/writer.....	31
Webmaster/host	32
Other professional help.....	32
Managing the team.....	32
Handing Off a Project to a Client.....	34
Chapter 3: Developing the Content	37
Knowing What to Put on Your Site.....	37
Finding out what your client's visitors need	38
Finding out what your client needs from site visitors	40
Reconciling the content with the goals	41
Keeping It Fresh: An Ongoing Process	42
Assigning content development tasks.....	42
Keeping the graphics fresh	42
Chapter 4: Creating Relevant Site Content	43
Portraying Your Client's Company.....	43
Defining your client's voice.....	43
Developing your client's look	45
Selling Goods or Services.....	46
Emphasizing key points.....	46
Highlighting the product	47
Providing Information.....	48
Handling large amounts of content.....	48
Presenting information	50
Including e-learning materials	52
Using Personas to Develop Content	53
Defining your client's customers.....	54
Delivering what they want	54

***Book 11: Site Design*.....55**

Chapter 1: Conceptualizing Your Site57

Deciding What Types of Pages You Need.....	57
Considering static Web pages.....	58
Freshening the content with dynamic Web pages	60
Evaluating multimedia element choices.....	61
Choosing the Right Delivery Method	64
Knowing when static pages suit your purpose	64
Using dynamic pages to manage complex information.....	65
Considering multimedia	67
Handling Printable Materials.....	67

Chapter 2: Creating Effective Layouts71

Content Is Key: Making Sure It's All Included	72
Creating Order from Chaos: Consistency Is Your Friend	73
Including Things That Every Page Needs	75
Banner.....	75
Page headline.....	76
Global navigation.....	76
Page title.....	77
Page description and keywords	77
Page footer	80
Planning How to Emphasize Important Information	81
Understanding the Basics of Usable and Accessible Design.....	83
Creating a Layout Wire Frame	85

Chapter 3: Organizing Your Content91

Considering File Management	92
Keeping It Tidy	94
Implementing Information Architecture	96
Developing section-level information architecture.....	97
Arranging page-level information.....	98
Avoiding Content Problems	99

Chapter 4: Ensuring Visual Appeal101

Colors on the Web.....	101
CMYK color	102
RGB color	102
Hexadecimal colors.....	102
Making nice with established color schemes.....	103
Web-safe colors.....	104
Getting Familiar with Graphics File Formats	107

Using Fonts Effectively on Web Sites	109
Implementing Stock Images and Other Elements	111
Facelifting an Existing Site	114
Choosing a new color scheme	114
Figuring out which graphics to replace	114
Creating a new prototype	115
Applying the new colors to your CSS file	119

***Book III: Site Construction* 121**

Chapter 1: Pulling Together Tools and Materials123

Matching the Tools to Your Needs	123
Hauling Out the Hardware	124
A computer	125
Computer monitor	125
Backups and storage	126
Printers and scanners	127
Cameras and camcorders	128
Graphics tablet	130
Setting Up Your Web Design Studio	130
Desperately Seeking Software	131
Researching software before you buy	132
Graphics software	132
Multimedia software	136
Web design software	139
Browser software	141

Chapter 2: Making a Web Page with HTML143

Getting Acquainted with the Basic Parts of an HTML Document	143
Starting Your HTML Document Right	144
The document type definition	145
The head tag and what goes in it	146
Now for some body!	149
The anatomy of a whole page	150
Controlling layouts with CSS	156
Helpful Development Practices	157

Chapter 3: Creating a Web Page Layout with HTML and CSS159

Introducing CSS	159
Understanding why CSS can help your site — and you	159
Checking the source	161
Using CSS with other tools	162
Ways of Working with CSS	163
Inline styles	164
Styles embedded in the head of the document	164

External style sheets	165
Commenting your code	166
Creating a CSS Document	167
Setting default selectors	168
Setting class and ID selectors	169
Special Effects with CSS	174
Styling your links	174
Cool headlines	175
Custom padding and margins	175
Custom borders	176

Chapter 4: Introducing Web and Graphics Software179

Choosing Graphics Software	179
Adobe Photoshop	179
Adobe Illustrator	181
Other professional-grade graphics software	182
Considering Web-Design Software	183
Deciding on Multimedia Software	184
Touring Photoshop CS2	185
The Welcome Screen	185
The default workspace	186
The work area	187
Layers and the Layer palette	188
Tools and the toolbox	190

Chapter 5: Getting Started with Dreamweaver203

Exploring the Dreamweaver Interface	203
The Start Page	205
The New Document dialog box	206
The Files panel	210
The Document window	214
The Preferences dialog box	219
The Properties inspector (panel)	220
The CSS Styles panel	221
The Insert bar	223
Creating a Web Site with Dreamweaver	223
Testing Your Pages and Validating the Code	225
Publishing Your Web Site with Dreamweaver	227

Chapter 6: Using Dreamweaver: Advanced Techniques231

Creating a Site with Prebuilt Page Designs	232
Creating Templates to Ease Site Maintenance	235
Making a template	235
Including editable regions	237

Creating a page using a template	237
Updating a template.....	238
Exploring the Assets Panel and Library Items	240
Touring the Assets panel.....	240
Discovering library items	242
Adding Functionality with Dreamweaver Behaviors	246
Including the Open Browser Window behavior	248
Editing a behavior via the Behaviors panel	252
Creating a pop-up message	253
Chapter 7: Creating a Web Page from a Photoshop File	255
Taking a Wire Frame to a Finished Design	255
Finishing the Artwork.....	261
Placing a photo in your banner	262
Creating a clipping mask	262
Implementing filters, adjustment layers, and blend modes	263
Slicing a Photoshop Document	266
Optimizing Graphics for the Web.....	268
Making a Graphic Transparent.....	272
Chapter 8: Meeting HTML's Powerful Friends	275
Web Technologies Defined.....	275
Vary your content with variables	276
Conditional statements	277
Here we go loop-de-loop.....	278
Creating functional functions	280
Looking on the Server Side.....	281
ASP/ASP.NET	281
.NET Framework.....	282
JavaScript	282
PHP	284
CGI/PERL	284
Checking Out the Client Side.....	287
Java.....	287
VBScript.....	288
Chapter 9: Web Site Usability and Accessibility	291
Ensuring Your Site Is Easy to Use.....	291
Helping Users Access Your Site.....	293
Images need alternate content	294
Use more than one method to convey your information.....	295
Pictures are important.....	296
Orientation tools are helpful.....	296
Creating Accessible Web Pages	297
Using Dreamweaver to insert accessible elements	297
Using Dreamweaver to check your site's accessibility	299

Chapter 10: Publishing the Web Site303

- Look Before You Leap: What to Do before Launch303
 - Develop a checklist303
 - Get opinions306
- Going Live308
 - Using Dreamweaver to upload content309
 - Uploading pages with an FTP client.....312
- What Next? The Launch Is Not the End of the Project314
 - Submitting the site to search engines315
 - Implementing marketing.....315
 - Requesting link exchanges316

***Book IV: Web Graphics*317**

Chapter 1: Finding Inspiration319

- Finding Fresh Ideas319
- Respecting the Copyrights of Others320
- Protecting Your Own Copyrights322
- Working with Colors (Web Safe versus Not Web Safe)322
- Creativity Tools — Color Charts and More.....325
- Font/Type Issues on Web Sites326
- Print to Web — Making Your Web Site Work
with Existing Materials327
- Understanding Image Formats for Web Design328
 - Using the GIF image file format.....328
 - Using the JPEG image file format.....330
 - Using the PNG image file format.....331

Chapter 2: Bringing Your Vision to Life333

- Introducing Fireworks 8333
 - Vector and raster images.....333
 - The PNG file format335
 - Fireworks interface mini-tour336
- Creating Art with Other Tools343
 - Adding Photoshop CS2 to your graphics toolbox.....343
 - Getting graphics ready for the Web with ImageReady344
 - Creating painterly images in Corel Painter348

Chapter 3: Workhorse Graphics351

- Creating Buttons in Fireworks351
 - Introducing the Button Editor352
 - Creating a simple two-state button352
 - Creating buttons with pizzazz356

Creating a Vertical Navigation Menu	357
Creating a Pop-Up Menu	360
Recycling — Reuse Everything	365
Making a reusable graphic template	365
Organizing a site	366
A Doodle to a Working Page — Concept to Completion	367
Mind mapping	367
Creating a client mockup	368
Optimizing Artwork in Fireworks	368
Optimizing GIF artwork	369
Optimizing JPEG artwork	370
Exporting Artwork from Fireworks	372

Chapter 4: Creating Compelling Graphics 373

Creating Banner Graphics	373
Using Photoshop to create a banner	374
Including all the important information	376
Working with an existing logo	376
Create Promotional Graphics	378
Emphasize your point	379
Complement your style	380
Creating Fast-Loading, Beautiful Photos	382
Resizing your photos for the Web	382
Using professional optimization techniques	385
Creating a Photo Gallery	390
Choosing your photos	390
Putting the photos in order	392
Using Photoshop to create a photo gallery	393
Using Dreamweaver to create a photo gallery	396

Book V: Multimedia 399

Chapter 1: Incorporating Flash Creations 401

Introducing Flash 8	401
Touring the interface	402
Getting comfortable with Flash	407
Setting up your workspace	413
Building Flashy Navigation	415
Creating the navigation menu document	415
Creating buttons in Flash	416
Assembling your menu	421
Adding functionality to the buttons	423
Publishing your file and adding it to your page	425

Flash as an Animation Tool.....	426
Create a Flash Presentation	427
Exploring the Many Tricks of Flash	428
Chapter 2: Using Sound	431
Exploring Audio Formats for the Web	431
Adding Flash Audio to a Page.....	432
Creating Flash audio	432
Adding sound to a Web page	435
Embedding a QuickTime Player in a Page	437
Adding the RealMedia Player to a Page.....	438
Adding the Windows Media Player to a Web Page	440
Delivering Your Message	443
Chapter 3: Using Web Video	445
Exploring Web Video Formats	445
Working with Digital Video.....	446
Capturing video	446
Encoding video	447
Creating and Encoding Flash Video	449
Adding Flash Video to a Web Page.....	455
Adding QuickTime Player to a Page	458
Adding Windows Media Player to a Page.....	461
Avoiding DV Pitfalls	462
Chapter 4: Slideshow Pro	465
About Slideshow Pro	465
Installing the Extension	466
Creating a Slide Show	467
Launching Slideshow Pro	467
Adding slides to your show	471
Adding text and sound to a slide.....	474
Editing a slide show	478
<i>Book VI: Audience Interaction</i>	<i>479</i>
Chapter 1: Adding Basic Interactivity with HTML Forms and JavaScript	481
Understanding Interactivity.....	481
Getting Ready to Code.....	482
Building an HTML Form	484
Form tags: <form> </form>	484
Text fields: <input type="text">	485

Submit buttons: <input type="submit">	485
Creating a simple form in Dreamweaver	485
Testing the form	490
Adding Elements to Your Form	491
Password fields	491
Hidden fields	491
Textarea form objects	493
Multiple choice types (check box and radio)	494
Drop-down lists	498
Event handlers and JavaScript	500
Making dynamic pages with server side technology	502
Chapter 2: An Introduction to ASP505
Understanding ASP	505
Creating ASP Pages and Testing Them on Your Local System	507
Working with IIS	507
Setting up the Web site	508
Defining the site in Dreamweaver	508
Creating ASP Pages in Dreamweaver	511
Using variables	513
Introducing VBScript functions	518
Discovering Cool ASP Tricks	519
Displaying a random image	520
Create a rotating ad banner	521
Chapter 3: Introduction to PHP527
What Is PHP?	527
Fulfilling PHP Server Side Requirements	528
Creating PHP Pages	528
Declaring and Using Variables	529
Working with Conditional Statements	531
Putting conditional statements into action	532
Using comparison operators	534
Using logical operators	535
Repeating Lines of Code Using Loops	535
Using the while loop	535
Using the for loop	536
Generating a Random Image	536
Chapter 4: MySQL and PHP539
Creating a Mailing List Form	540
Creating the Database	542
Creating the PHP Code	545
Retrieving Information from a Database	547

Chapter 5: Additional Site Interactivity551

- Engaging Visitors with an Online Journal (Blog)551
- Initiating Online Conversations: Forums and Message Boards553
- Establishing an Online Community: Wiki.....555
- Feeding Them Your Content: RSS.....557
 - Using an online feed reader559
 - Creating an RSS feed559
 - Validating your feed562
 - Getting your feed going565
- Branding through E-Mail566
- Keeping Them Up to Date: Newsletters568

***Book VII: E-Commerce*569**

Chapter 1: An E-Commerce Primer571

- Nailing Down E-Commerce Concepts571
 - Establishing an online identity572
 - Researching domain names572
 - Purchasing domain names574
 - Choosing an e-commerce-friendly server575
 - Planning a user-friendly site578
 - Brainstorming the site579
- Adding Basic E-Commerce with PayPal.....581
- Integrating with Credit Card Authorization Packages584
 - Solving the online payment maze585
 - Internet fraud: An e-commerce merchant's
worst nightmare.....586
- SSL — What Is It?.....586
 - Using a secure server.....587
 - Sharing an SSL certificate.....587
- E-commerce Do's and Don'ts588

Chapter 2: Building an E-Commerce Site591

- Technological Considerations591
- Usability: Thinking Like a Customer.....592
- Legal Considerations — Call a Lawyer594
 - Cookies that don't crumble.....594
 - Spam, spam, spam, spam!595
- Creating an E-Commerce Site596
 - Setting up the e-mail addresses.....596
 - Selling items with a PayPal account.....599
- Using a Shopping Cart605
 - Creating a mailing list form606
 - Forwarding the information to a database608
 - Test, test, and then test again.....610

Selling Online	611
If you build it they won't care	611
Security concerns	612
Following through on every sale	613

Chapter 3: Maintaining an E-Commerce Site 615

When Technology Breaks Down.....	615
When client-side technology runs amuck	615
Server-side technology, or code sleight of hand	616
Handling Customers	617
Getting it in writing	617
Documenting everything	619
Handling e-commerce customers.....	619
Search Engine Optimization (SEO) and Marketing	620
Optimizing the site for search engines	620
Finding sites to link to the e-commerce site	622
Danger, Will Robinson! These do not compute	623
Using search engine software	625
Marketing the site to the world	625
Figuring Out When to Upgrade.....	629
Upgrading to a more robust Web hosting package	630
Upgrading to another server	631

Book VIII: Site Management 633

Chapter 1: Helping a Site Succeed 635

Planning and Incorporating Search Engine Optimization (SEO).....	635
Seeing why SEO is essential	636
Understanding the mechanisms: Meta tags, keywords, descriptions, and alt text	636
Improving site searchability	638
Hiring the Right Professional Help	642
Deciding between SEO and paid advertising	643
Submitting your site to search engines	643
Using a service to submit your site	645
Determining If Your SEO Is Working.....	646
Reading your Web stats	646
Defining Web stat terms	646
Adjusting the site and driving traffic	648
Using Reciprocal Links to Boost the Site's Visibility	649
Promoting a Site with Traditional Marketing	650
Keeping Them Coming Back.....	650
Ongoing content development	651
Creating content to keep them coming back.....	652

Chapter 2: Maintaining a Web Site	653
Updating Pages without Destroying Them	653
Sharing the Work with Contribute	655
Creating a connection	656
Administering the Web site	659
Sending a connection key	662
Editing Web pages	665
Managing a Site with Dreamweaver	667
Editing new pages	667
Archiving pages	670
Tips for Managing Tasks	671
Simplifying repetitive tasks with Snippets	671
Taking advantage of your assets	674
Using the Dreamweaver Library	676
 Chapter 3: Expanding a Site	 681
Use It or Lose It: Should You Add On or Redesign?	681
Adding on to an existing site	681
Redesigning the site from scratch	682
Headache-Free Expansion	684
Things to consider when redesigning	684
Trauma-free site expansion	688
After Launching the Expanded Site	690

Book IX: Case Studies

Chapter 1: Personal Web Sites	695
Tailoring the Site to Your Client	695
Creating the Home Page	696
Creating Other Pages	697
The photo gallery	697
The discography page	698
The events page	698
The multimedia gallery	700
Editing a Personal Web Site	701
 Chapter 2: Blog Site	 703
Examining Blog Software and Services	703
b2evolution	704
WordPress	708
Exploring other options: Blogger.com	716
Adding a Blog to an Existing Web Site	716

Chapter 3: Online Newsletter	719
Building a Mailing List	719
Making It Easy to Add People	721
Managing the Mailing List	723
Give Subscribers Something Useful	723
Case Study: Newsletter for an Acupuncture Clinic	725
Chapter 4: Photographer/Portfolio Site	727
Defining Goals for the Site	727
Designing the Site	728
Creating the navigation menu in Fireworks	728
Optimizing images in Fireworks	730
Creating thumbnails in Fireworks	731
Creating the other assets	731
Putting it together in Dreamweaver	733
Creating the portfolio pages	735
Showing off without snootiness	737
Index	739
