

CONTENTS

EDITORS' NOTES	1
<i>Sandra Johnson, Kathleen Taylor</i>	
1. Key Aspects of How the Brain Learns	3
<i>James E. Zull</i>	
An introduction to how the basic architecture of the brain undergirds memory, learning, and construction of meaning.	
2. Neuroscience and Adult Learning	11
<i>Louis Cozolino, Susan Sprokay</i>	
Understanding how learning changes the brain enables adult educators and mentors to facilitate such changes more effectively.	
3. Fear and Learning: Trauma-Related Factors in the Adult Education Process	21
<i>Bruce D. Perry</i>	
Stress-inducing experiences can affect learning throughout the lifespan, but educators can help adults overcome these effects.	
4. Brain Self-Repair in Psychotherapy: Implications for Education	29
<i>Colin A. Ross</i>	
Given that both learning and therapy can change the brain, adult educators may look to aspects of the therapeutic process as a guide to practice.	
5. The Role of Meaning and Emotion in Learning	35
<i>Pat Wolfe</i>	
Meaning is constructed as the brain creates or refines neural networks. Emotions play a role in what is learned and what is retained.	
6. Experience, Consciousness, and Learning: Implications for Instruction	43
<i>Barry G. Sheckley, Sandy Bell</i>	
Understanding the key role that experience plays in learning and in the development of consciousness can inform educators' practice.	
7. Meaningful Learning and the Executive Functions of the Brain	53
<i>Geoffrey Caine, Renate Nummela Caine</i>	
Constructivist perspectives can effectively inform teaching practice and be used to initiate and sustain "relaxed alertness" in adult learners.	

8. The Neuroscience of the Mentor-Learner Relationship	63
<i>Sandra Johnson</i>	
Using the lenses of cognitive neuroscience and social cognitive neuroscience, the chapter explores the relationship between learner and mentor.	
9. Brain Function and Adult Learning: Implications for Practice	71
<i>Kathleen Taylor</i>	
Understanding neurobiology can support adult educators' practice, particularly when their objectives include developmental growth.
