

Contents

CHAPTER 1

Deterministic Problems

1

- 1-1. Introduction 1
- 1-2. Formulation of Problems 2
- 1-3. Method of Moments 5
- 1-4. Point Matching 9
- 1-5. Subsectional Bases 11
- 1-6. Approximate Operators 14
- 1-7. Extended Operators 15
- 1-8. Variational Interpretation 18
- 1-9. Perturbation Solutions 19

CHAPTER 2

Electrostatic Fields

22

- 2-1. Operator Formulation 22
- 2-2. Charged Conducting Plate 24
- 2-3. Conductors of Complex Shape 28
- 2-4. Arbitrary Excitation of Conductors 31
- 2-5. Electric Polarizability 35
- 2-6. Dielectric Bodies 38

CHAPTER 3

Two-Dimensional Electromagnetic Fields

41

- 3-1. Transverse Magnetic Fields 41
- 3-2. Conducting Cylinders, TM Case 42
- 3-3. Various Approximations 47
- 3-4. Transverse Electric Fields 49
- 3-5. Conducting Cylinders, TE Case 50
- 3-6. Alternative Formulation 55
- 3-7. Dielectric Cylinders 58

CHAPTER 4

Wire Antennas and Scatterers **62**

- 4-1. Formulation of the Problem 62
- 4-2. Matrix Solution 64
- 4-3. Evaluation of Z_{mn} 67
- 4-4. Wire Antennas 68
- 4-5. Wire Scatterers 75
- 4-6. Discussion 79

CHAPTER 5

Generalized Network Parameters **82**

- 5-1. Conducting Bodies 82
- 5-2. Point-fed Antennas 89
- 5-3. Conducting Scatterers 94
- 5-4. Aperture Antennas 95
- 5-5. Dielectric Bodies 97
- 5-6. Magnetic Bodies 99
- 5-7. Bodies both Magnetic and Dielectric 101

CHAPTER 6

Multiport Systems **107**

- 6-1. Network Representation 107
- 6-2. Loaded Antennas 110
- 6-3. Loaded Scatterers 115
- 6-4. Multiple Feeds and Loads 120
- 6-5. Multiply Loaded Scatterers 123

CHAPTER 7

Eigenvalue Problems **126**

- 7-1. Introduction 126
- 7-2. Method of Moments 127
- 7-3. Nonuniform Transmission Lines 132
- 7-4. Second-order Differential Operator 134
- 7-5. First-order Differential Operator 136
- 7-6. Extended Operators 147

CHAPTER 8**Cylindrical Waveguides****151**

- 8-1. Second-order Differential Equation 151
- 8-2. Second-order Difference Operator 152
- 8-3. Moment Solutions 157
- 8-4. Extended Operators 161
- 8-5. First-order Differential Equations 162
- 8-6. Moment Solutions 164
- 8-7. Extended Operators 166
- 8-8. Use of Generalized Impedances 167

CHAPTER 9**Cavity Resonators****172**

- 9-1. Statement of the Problem 172
- 9-2. Moment Solution 174
- 9-3. Plasma-filled Rectangular Cavity 179
- 9-4. Numerical Results 182
- 9-5. Discussion 183

CHAPTER 10**Optimization****189**

- 10-1. Hermitian Forms 189
- 10-2. Optimization Procedure 191
- 10-3. Antenna Gain 194
- 10-4. Absorption Area 202
- 10-5. Bandwidth and Q 204
- 10-6. Experimental Gain Optimization 207

Appendix A. Linear Spaces and Mapping 213**Appendix B. Matrix Inversion 218****Appendix C. Matrix Eigenvalue and Eigenvectors 221****Index 225**
