Introduction xxi

Part 1 • Understanding and Planning **1**

Chapter 1 • Introducing Exchange Server 2003 **3**

Exchange Server 2003 and the Era of Ubiquitous Electronic Messaging 4

Why Microsoft Released Windows 2003 and Exchange 2003 4

Exchange Server 2003 Applications 5

 E-Mail Is Only the Beginning 6

 Just a Step beyond Mail 9

 Off-the-Shelf Messaging-Enabled Applications 9

 Objects 10

 Applications Using Exchange Public Folders 12

 Electronic Forms 13

 Applications Built on APIs 13

Some Exchange Server 2003 Basics 14

 Exchange Server 2003 as a Client/Server System 14

 A Quick Take on the Outlook Client 18

 Exchange Server 2003's Dependence on Windows 2000 Server/Windows Server 2003 .. 20

 Exchange Server 2003's Object Orientation 21

 Exchange Server 2003 Scalability 22

 Exchange Server 2003 Security 22

 Exchange Server 2003 and Other Electronic Messaging Systems 22

 Third-Party Applications for Exchange Server 2003 24

Summary 24

Chapter 2 • Windows Server 2003 and Exchange Server 2003 **25**

Key Features of Windows Server 2003 26

 Active Directory, Security, and Internet Protocols 27

 New Features of Windows Server 2003 33

 What Hasn't Changed in Windows Server 2003? 33

 Windows Server 2003 Versus NT 4 Server 34

 The Four Flavors of Windows Server 2003 35

Exchange Server 2003 Features 36

 Bye-Bye, Exchange Directory Services 37

 Bye-Bye, Exchange Server Sites 39

 “New” User Interfaces 41

 Storage Groups 43

 File System Support and Full-Text Indexing 43

 Upgrades 43

 Exchange Server 2003 versus Exchange Server 5.5 44

 Getting a Handle on Exchange Server 2003 Versions 45

End-User Support Is Easy 46
 Summary 47

Chapter 3 • Two Key Architectural Components of Windows Server 2003 49

What You Need to Know about Active Directory Right Now 49
 Active Directory: Five Major Architectural Components 50
 Active Directory Is Real Stuff 56
 What You Need to Know about Windows Server 2003 Network Architecture 56
 Understanding NetBIOS, NetBEUI, and WINS 57
 An Alternative: Using DNS and DHCP 57
 Summary 59

Chapter 4 • Exchange Server 2003 Architecture 61

Key Exchange Server 2003 Organizing Components 61
 Exchange Server 2003 Core Components 67
 Information Store 68
 The Routing Engine 69
 The System Attendant 71
 Optional Exchange Server 2003 Components 71
 Microsoft Management Console Snap-Ins for Exchange Server 2003 72
 The Directory Synchronization Agent 73
 The Event Management Service 73
 The Microsoft Search (Full-Text Indexing) Service 73
 Exchange Internet Protocol Access Components 73
 Exchange Connectors 74
 Exchange Gateways 76
 Clients for Exchange 77
 The Outlook Client 77
 The Internet Browser Client 77
 POP3 and IMAP4 Clients 78
 Schedule+ Clients 78
 Microsoft Outlook Forms Designer Forms 78
 Custom Client-Based Applications 78
 Summary 79

Chapter 5 • Designing a New Exchange 2003 System 81

Taking the Large View 82
 Assigning Accountabilities for Planning, Design, and Management 83
 Assign Responsibilities for Planning and Design 83
 Assign Responsibilities for Day-to-Day Management 84
 Performing a Needs Assessment 85
 Assess User Needs 85
 Study Your Organization’s Geographic Profile 87
 Assess Your Organization’s Network 89
 Planning Your Network Configuration 90
 Establish Naming Conventions 91
 Select a Microsoft Networking Domain Model 95

Define Administrative Group Boundaries	96
Define Routing Group Boundaries	96
Plan Routing Group Links	97
Plan Servers and Internal Connections to Them	99
Plan Connections to Other Systems	103
Validate and Optimize Your Design	105
Rolling Out the Plan	106
Summary	108

Chapter 6 • Upgrading to Windows Server 2003 and Exchange Server 2003 109

Upgrading from Windows 2000 Server to Windows Server 2003	111
Checking Hardware and Software on Windows 2000 Servers to Be Upgraded to Windows 2003	112
Ensuring that Windows 2000 Servers to Be Upgraded Are Running at Least Service Pack 3	113
Upgrading the Windows 2000 Forest Schema in Active Directory	114
Upgrading Each Windows 2000 Domain in Which You Plan to Upgrade Windows 2000 Servers to Windows 2003	114
Installing Windows 2003 on Each Windows 2000 Server to Be Upgraded	115
Upgrading from Exchange 2000 Server to Exchange Server 2003	115
Preparing the Forest for Installation of Exchange 2003	116
Preparing the Domain for Installation of Exchange 2003	116
Upgrading to Exchange 2003	117
Upgrading from Windows NT Server 4 to Windows Server 2003: Processes and Techniques	117
Specifying a Windows Server 2003 Domain Structure	118
Selecting from Among Windows Server 2003 Versions	128
Checking the Readiness of Your NT Server 4 System	129
A Windows 2003 Upgrade Strategy	129
Active Directory Migration Tool	130
Upgrading from Exchange Server 5.5 to Exchange Server 2003: Processes and Techniques ..	131
Preparing Active Directory for Exchange Server 2003	131
Windows NT 4-to-2003 and Exchange 5.5-to-2003 Upgrades: Putting It All Together ..	132
A Simple NT 4-to-Windows 2003/Exchange 5.5-to-2003 Upgrade for Starters	132
More Complex Upgrades from Windows NT 4-to-2003 and Exchange 5.5-to-2003 ..	137
Summary	144

Part 2 • Installation 147

Chapter 7 • Installing Windows Server 2003 as a Domain Controller 149

Setting Up Server Hardware	150
Getting Server Components in Order	151
Testing Key Components	151
Installing Windows Server 2003 Software	153
Starting the Installation	153
Preparing Disk Partitions	154
Setup's Installation Wizard	155

- Configuring Your First Windows 2003 Server158
- Using Microsoft Management Console166
- A Quick Look at Active Directory171
- Configuring DHCP and Dynamic DNS175
 - Configuring DHCP to Automatically Assign IP Addresses to
Computers on Your Network175
 - Ensuring That Dynamic DNS Is Enabled178
 - Configuring DHCP to Automatically Assign Fixed IP Addresses to
Computers on Your Network180
- Configuring Unallocated Disk Space184
- Installing an Uninterruptible Power Supply190
 - The UPS Itself190
 - Configuring UPS Support191
- Setting Up a Windows Server 2003 Backup193
 - Hardware193
 - Setting Up a Basic Backup194
- Summary207

Chapter 8 • Installing Exchange Server 2003 209

- Installing a Windows 2003 Stand-Alone Server209
 - Verifying Server Hardware210
 - What to Install Where210
 - Installing Windows Server 2003211
- Getting Ready to Install Exchange Server 2003211
 - Security Issues212
 - Gathering Installation Information216
- Running the Exchange Server 2003 Setup Program218
- Post-Installation Activities223
 - Exchange Server 2003's Windows Program Group223
 - Verifying That Exchange Server Services Are Running224
 - Setting Up Microsoft Management Console for Exchange Server 2003226
 - Granting Permission for the Exchange Administration Group to
Manage Exchange Server229
- Mailbox-Enabling a Windows 2003 User232
- Backing Up Exchange Server 2003235
- Summary237

Part 3 • The Outlook Client 239

Chapter 9 • Installing Outlook 2003 from a Customized Server Image 241

- Customizing Outlook 2003 for Installation on User Workstations242
 - Installing Office 2003 on an Administrative Installation Point243
 - Customizing Outlook 2003245
- Installing the Outlook 2003 Client on a Workstation261
 - Updating a Custom Installation262
- Summary262

Chapter 10 • A Quick Overview of Outlook 2003 263

Starting Up and Modifying a Newly Installed Client	264
Sending and Receiving a Message with an Outlook 2003 Client	268
Outlook Profiles Continued	272
Creating a New Public Folder	276
Using Outlook 2003's E-mail Menus	280
The File Menu	280
The Edit Menu	283
The View Menu	284
The Go Menu	286
The Tools Menu	286
The Actions Menu	291
Summary	292

Part 4 • Basic Exchange Server 2003 Management 293**Chapter 11 • Managing Exchange Users, Distribution Groups, and Contacts . . . 295**

An Overview of the Active Directory Users and Computers Snap-In	296
Microsoft Management Console	296
Getting Comfortable with the Active Directory Users and Computers Snap-In	298
Preliminary Settings	300
Turning On Advanced Features	300
Default E-Mail Address Formats	303
Managing Exchange Recipients	309
Managing Exchange Users	309
Creating and Managing Mailbox-Enabled Users	310
Creating and Managing Mail-Enabled Users	330
Creating and Managing Distribution Groups	335
Creating and Managing Contacts	343
Finding Exchange Recipients	345
Summary	347

Chapter 12 • Managing the Exchange Server Hierarchy and Core Components . . 349

The Exchange Server Hierarchy	349
Managing the Organization	351
Managing Administrative Groups	352
Creating and Managing Public Folders	369
Exchange Core Components	377
The Information Store	377
The Routing Engine	404
The System Attendant	404
Summary	404

Part 5 • Expanding an Exchange Server Organization 407**Chapter 13 • Managing Exchange 2003 Internet Services 409**

How Internet Messaging Works	409
TCP/IP: The Backbone of Internet Networking	410
DNS and SMTP: The Dynamic Duo of Internet Messaging	411
Internet Messaging: Getting and Staying Connected	414
Setting Up and Managing TCP/IP	414
Setting Up and Managing DNS	416
Setting Up and Managing SMTP	419
Summary	467

Chapter 14 • Managing Exchange 2003 Services for Internet Clients 469

Virtual Servers and Front-End/Back-End Servers	469
Exchange 2003 Virtual Servers Are Not Just for SMTP	470
Front-End/Back-End Exchange Server Configurations	472
Managing Post Office Protocol Version 3 (POP3) Messaging	473
POP3 Setup: The Exchange Server Side	473
POP3 Setup: The Client Side	477
Managing Internet Message Access Protocol Version 4 (IMAP4) Messaging	485
IMAP4 Setup: The Exchange Server Side	485
IMAP4 Setup: The Client Side	487
Managing Hypertext Transport Protocol (HTTP) Messaging	491
Outlook Web Access Management: The Server Side	492
Outlook Web Access (HTTP) Setup: The Client Side	499
Managing Windows 2003 Support for the Lightweight Directory Access Protocol (LDAP)	502
LDAP Setup: The Server Side	503
LDAP Setup: The Client Side	506
Managing Exchange Server Support for the Network News Transfer Protocol (NNTP) ...	511
NNTP Setup: The Server Side	512
NNTP Setup: The Client Side	533
Summary	536

Chapter 15 • Installing and Managing Additional Exchange Servers 539

Adding an Exchange Server to a Domain's Default Administrative Group	539
Installing an Additional Windows 2003 Server	540
Installing an Additional Exchange 2003 Server	540
Managing Multiple Servers in a Domain's Default Administrative Group	542
Creating Mailbox-Enabled Windows 2003 Users	543
Enhancing Exchange Server Monitoring	545
Using System Policies	547
Implementing Full-Text Indexing	548

Creating Information Store Databases	549
Working with Public Folders	550
Moving a Mailbox from One Exchange Server to Another	553
Backing Up Exchange Databases	554
Implementing Front-End/Back-End Server Topologies	555
Adding an Exchange Server to a New Administrative Group in a Domain	559
Administrative Groups, Routing Groups, and Exchange Server 5.5 Sites	559
Adding a New Administrative Group to an Exchange Organization	560
Installing a New Exchange Server in a New Administrative Group	562
Managing Multiple Administrative Groups in a Domain	564
Delegating Control of an Administrative Group	565
Adding Subcontainers to Administrative Groups	567
Using Routing Groups and Connectors	567
Managing Public Folders	579
Installing an Exchange Server in a New Domain in the Same Windows 2003 Forest	585
Installing a Domain Controller for a New Windows 2003 Domain	586
Installing Exchange Server 2003	593
Managing Servers in Multidomain Environments	595
Cross-Domain Management of Windows 2003 Servers	595
Managing Exchange 2003 Servers in Multidomain Environments	599
Summary	602

Part 6 • Exchange and Outlook: The Next Level 605

Chapter 16 • Advanced Exchange Server Administration and Management ... 607

Tracking Messages	607
Tracking User Messages	608
Tracking System Messages	612
Adding Proxy Addresses to a Mailbox	614
Creating Proxy Addresses	614
Telling DNS about New Proxy Addresses	616
Managing Organization-Wide Settings	617
Managing Recipient Policies	617
Managing Address Lists	625
Managing Details and Address Templates	627
Managing Organization-Wide Mailbox Message Defaults	627
Monitoring Exchange Connectors	628
Active Directory Imports and Exports	631
Troubleshooting Exchange Server	633
Supporting Remote and Roving Clients	635
RPC Over HTTP	635
RCP Over TCP/IP	645
Supporting Roving Users	646
Migrating Foreign Messaging System Users to Exchange	646
Summary	647

Chapter 17 • Exchange Server Reliability and Availability	649
Redundant Systems	650
Server Redundancy	650
Network Redundancy	655
Standard Backup and Recovery vs. Disaster Recovery	656
Standard Backup and Recovery	657
Windows Server 2003 Backup	657
Exchange Backup Strategies	658
Exchange Recovery Strategies	661
Testing Backups	671
Disaster Recovery	672
Disaster Recovery Strategies	672
The Tao of Disaster Recovery	675
Summary	677
Chapter 18 • Exchange Server System Security	679
So Much Security and So Little Time to Implement It	680
Physically Protecting Computing and Networking Hardware	680
Locking It Up and Locking It Down	681
Storing Data on Servers, Not Workstations	681
Putting Exchange Servers Behind Firewalls	682
What Is A Firewall?	682
What Kind of Firewall Should I Use?	684
What Protocols Should I Use?	687
What Ports Do I Need to Open on My Firewall?	687
How Do I Test Firewall Settings?	691
Keeping Current with Microsoft Security Updates	692
Adhering to Windows and Exchange Server Security Best Practices	693
Windows Security Best Practices	693
Exchange Server Security Best Practices	694
Securing Exchange Messages	700
Logging and Monitoring Windows and Exchange Server Activities	702
Logging Exchange Virtual Server Activity	702
Using Security Scanners and Log Monitors	703
Securing Windows/Exchange Networks	703
Using Virtual Private Networks	703
Using Secure IP (IPsec)	704
Dealing with Viruses and Spam	704
Controlling Viruses	704
Controlling Spam	706
Summary	710
Chapter 19 • Wireless Access to Exchange Server 2003	713
Wireless Networking Technologies	714
Wireless WAN Technologies	714
Wireless LAN Technologies	717

- Wireless Networking Servers719
 - Exchange Server 2003719
 - Blackberry Enterprise Server723
- Wireless Networking Clients725
 - Pocket Outlook with EAS726
 - POP3 and IMAP4728
 - OMA and OWA729
- Summary732

Chapter 20 • Building, Using, and Managing Outlook Forms

Designer Applications735

- The Outlook/Exchange Application Design Environment736
- Outlook Forms Designer Basics737
 - Outlook Message Forms737
 - The Field Chooser and Control Toolbox739
 - Form and Control Properties742
- Building the Picnic Form743
 - Working with Properties743
 - Adding Controls743
 - Binding Controls to Exchange Server Data Fields747
 - Setting Initial Values for Controls748
 - Testing an Outlook Form749
- Adding More Controls to the Picnic Form749
- Publishing a New OFD Form753
 - Creating an Organizational Forms Library754
- Creating the Message Form Used to Send the Picnic Form756
- Using Forms758
- Don't Stop Here!760
- Summary760

Appendix • Cool Third-Party Applications for Exchange Server and Outlook Clients763

- Administration and Management763
- Backup and Archiving Software765
- Fax Servers766
- Network Security Monitors, Scanners, and Intrusion Detectors767
- Unified Messaging768
- Virus, Spam, and Content Control768
- Workflow770

- Index* 771
