Auld, M. E., 16

B

Baby-Keep-Well Stations: “contests” conducted by, 106–109; popular quiz session format adapted by, 111; summary of health education using, 112–113; test questions constructed for initial trial of, 106; transcript emphasis on physician educator role, 109–112
Baumgartner, L., 244
Becker, M. H., 13, 22–25, 28, 39
Becker, A. B., 41
Behavioral science: applied to health education research, 436–450, 450; on health attitudes/behavior and social class, 61–63; on health practices and culture, 347–348, 366–367
Behavioral Science Working Group, 45
Beliefs: assessing rural community social/religious, 366–367; tied to health practices, 347–348
Beth Israel Hospital (Boston), 446
Bogue, D. J., 302

Brown, L., 250–263

Bulletin of the World Health Organization, 362

C

Calver, H., 399

Carlyon, W., 44

CDC (Centers for Disease Control and Prevention), 16, 43, 45

Central Council of Health's Committee on Health Education, 364–365, 370

Child Health Bulletin, 5

Children: communication between school nurse and, 106; desired educational values of health service programs for, 95; forms of change in learning situations by, 104–105; health protection factors for preschool, 59–64; physician/nurse role in health education of, 103–110; provisions for family planning education of, 307–308; research on health knowledge of, 450–436; teaching health practices to, 351–352. *See also* Immunizations; School health programs; Vaccination

City Hospital (Boston), 172

Clark, N. M., 13, 25

Class stratification studies, 164–166

Commentaries by Derryberry award winners: Clark on Derryberry, 25–27; Eng on Derryberry's influence on health education, 38–41; Fishbein on contributions by Derryberry, 47–49; Freudenberg on Derryberry, 35–38; Glanz on Derryberry's vision/leadership, 27–30; Green on Derryberry's legacy and Marshall Becker, 22–25; Lorig on Derryberry, 34–35; Rimer on Derryberry and modern health behavior theory, 30–33; Sleet on Derryberry's career in changing health behavior, 43–46; Sorenson

on Derryberry's influence on Hochbaum, 19–22

Commentaries from the profession: ASTDHPPHE and enduring Derryberry legacy, 15–16; PHEHP and Mayhew Derryberry Award, 13–14; SOPHE and Derryberry legacy, 16–18

Communication: needed improvement in public health, 245–246; using past experience to improve, 246–249; practicing plain speaking, 224–225; research on arrangement of arguments in, 248–249; research on art of persuasive, 427–428; selecting best medium for public health, 249–263; shifting meaning in public health, 243–244; time factor of doctor-patient, 246

Community resources assessment, 367–368

Community-oriented primary care, 39

Community-wide health education programs, 357–360

Compliance with Therapeutic Regimens (Sackett and Haynes), 447–448

Connecticut State Medical Journal, 390

Connor, E., 39

Contingency contracting, 446

Contraception: diffusion theory regarding use of, 304, 305; educational objectives regarding, 298; hierarchy of birth planning values tool for planning, 447; multiple methods of, 287–288. *See also* Family planning

“Contraception is a family affair” concept, 306–307

The Contribution of Extension Methods and Techniques Toward the Rehabilitation of War-Torn Countries, 265
