b
Borden field experiment 124–126
breakthrough curve behavior 125
parameters used to model 125
spatial and temporal sampling 124, 125
spatial moment behavior 125, 126
boundary conditions
Cauchy/flux boundary condition 32
Dirichlet/concentration boundary condition 31
effect on breakthrough curves 64–66
Neumann boundary condition 32
volume-averaged resident concentration vs. flux-averaged concentration 66, 67

Boussinesq equation 13

c
Cauchy/flux boundary condition 32
characteristic scale
concentration xi, 33
length xi, xii, 33, 58
time 33, 98
chemisorption 22
conceptual model 1
confined aquifer 10
contaminant remediation 121–123
cleanup time sensitivity analysis 121–124
effect of sorption rate on cleanup time 122–124
Laplace domain solutions 121, 171–174
degradation kinetics 27
Damköhler number for degradation xi, 33, 34, 60–62, 83–85, 89–92, 94, 96, 99, 101
effect on spatial moments 104–120
effect on temporal moments 88–102
first-order degradation 24, 25, 60–64, 83–85
solution to ADR with first-order degradation 149–151
solution to ADR with zeroth-order degradation 153–155
timescale 33
zeroth-order degradation 24, 25
Dirac delta function xii, 31, 45, 48, 71, 76, 81, 82, 89, 104, 105
Dirichlet/concentration boundary condition 31
dispersion 20–22, 43–48, 73–78
effect on breakthrough curves vs spatial distributions (1-D) 43–48
effect in three dimensions 73–78
Gaussian (normal) concentration profiles 46–48
molecular diffusion and mechanical dispersion 21
Peclet number xii, 33, 44, 47, 64, 67, 73, 76, 91, 93–95, 102
scale effect 22
timescale 33, 34, 44, 73
dispersivity 21
relation to cleanup time 122
drawdown 14, 15
equilibrium sorption (also see sorption distribution coefficient) 22, 28
breakthrough curve behavior 48–49, 78, 79
linear vs nonlinear 22
related to desorption rate constant 23, 48
spatial distribution behavior 50, 79, 80
spatial moment behavior 104–106
temporal moment behavior 88–97

\textbf{f}
fate and transport processes
advection 19, 20
chemical and biochemical processes 24, 25
dispersion 20–22
sorption 22–24
Fick’s first law of diffusion 21
Fick’s second law of diffusion 21, 23
flow equation 5–7
derivation using mass balance 6, 7
steady-state 7
flux-averaged concentration 66, 67
relation to resident concentration 67
Fourier transforms 103
application to solve
three-dimensional ADR equation 71
first-order degradation kinetics 149–151
zeroth-order degradation kinetics 153–155

\textbf{i}
isotropic/anisotropic medium 4

\textbf{l}
Laplace transforms 145–148
definition 129
inverse transform 40, 130, 131, 134, 135, 151, 154, 165, 167
used in AnaModelTool software 40, 41
used to evaluate temporal moments 88
used to solve one-dimensional ADR equation
first-order degradation kinetics 129–132
zeroth-order degradation kinetics 133–135
used to solve radial ADR equation 171–173
used to solve three-dimensional ADR equation
first-order degradation kinetics 149–151
zeroth-order degradation kinetics 153–155
linear equation 13

\textbf{m}
mass flux 21
model
analog model 1
conceptual model 1
definition 1
importance of assumptions 12, 22, 25, 82
mathematical model 1
model code 3
model solution 3
physical model 1
purpose 1
moments

\textbf{g}
Gaussian concentration profiles 46–48

\textbf{h}
half-life 25
Heaviside step function \(x_i\), 38, 39
Homogeneous/heterogeneous medium 4
hydraulic conductivity \(x_i\), 4
hydraulic gradient \(x_i\), 3, 4
hydraulic head \(x_i\), 3, 4
moments (contd.)
  absolute 102
  behavior
    first spatial moment behavior 106, 107, 112–115
    second spatial moment behavior 107–110, 115–119
    zeroth spatial moment behavior 106, 110–112
  central 103
definition
  absolute 102
  central 103
  normalized 103
temporal behavior
  first temporal moment behavior 91, 92, 98
  second temporal moment behavior 92–97
  zeroth temporal moment behavior 89–91, 98–102
definition
  absolute 87
  central 88
  normalized 87
evaluation using Aris’ method of moments 88, 97, 163, 164

n
Neumann boundary condition 32
nondimensionalization 32, 34
nonlinear models 13, 24
numerical methods 3
