Where to Go from Here.....5

Part I: Introducing . . . ASTERISK! **7**

Chapter 1: Evaluating the Possibilities with Asterisk **9**

Finding Out What You Can Do with Asterisk10
 Using Asterisk for your phone system10
 Jumping into VoIP with Asterisk.....11
 Bridging technologies of VoIP and non-VoIP.....12
 Bringing wireless into the equation12
 Running your telephony business with Asterisk.....13
 Realizing the benefits of VoIP to big businesses13
Getting Acquainted with AsteriskNOW14
Introducing the Supporting Hardware15
 Determining your analog hardware needs16
 Using analog interfaces.....16
 Going digital and dedicated17
 Sending calls out VoIP.....18
 Communicating with your phones or dialers18

Chapter 2: Installing Asterisk	21
Taking Inventory of Your Hardware and Software	21
Sharing the load with multiple servers	22
Living with Linux	23
Downloading the Asterisk Software	24
Getting a head version of Asterisk	25
Securing a stable version of Asterisk	26
Building a tarball	27
Compiling Asterisk	27
Starting with libpri	28
Moving to Zaptel	28
Bringing up Asterisk	28
Turning on sounds and add-ons	29
Overcoming Common Compiling Issues	29
Managing Server Security	30
Chapter 3: Installing AsteriskNOW	33
Downloading AsteriskNOW	33
Booting the AsteriskNOW CD	34
Choosing your variety of installation	35
Identifying your partition preference	36
Identifying network devices	36
Locating your time zone	37
Assigning a password	38
Completing the installation by rebooting	38
Arriving at the AsteriskNOW Console Menu	39
Chapter 4: Configuring the Hardware	41
Configuring Everything You Need	41
Setting Up Your Zaptel Cards	42
Building Analog Connections to Your Carrier	43
Configuring the FXO card with FXS signaling	44
Identifying your driver	46
Installing the driver	47
Validating your successful configuration	48
Building an analog connection to your phone	49
Tying the analog cards to Asterisk	50
Bringing in VoIP	53
Getting to know the sip.conf file	53
Configuring an SIP user	57
Configuring an SIP peer	58
Understanding InterAsterisk eXchange (IAX) Connections	58
Setting up an inbound IAX connection	59
Designing outbound IAX connections	62
Receiving Help with Debugging	63

Part II: Using Dialplans — the Building Blocks of Asterisk 65

Chapter 5: Comprehending Dialplan Syntax 67

Starting with a Basic Dialplan.....	67
Understanding the context	68
Identifying extensions.....	70
Utilizing priorities.....	73
Engaging an application	73
Processing Incoming Calls	77
Building Internal Options	78
Using Variables	79
Exploiting globally.....	80
Focusing on the individual call.....	81
Using local extensions	83
Concerning yourself with the environment	84
Adding Intelligence to Your Dialplan	84
Ignoring leading digits	84
Cashing in with account codes.....	85
Replacing caller ID.....	86
Dialing to the Outside World	86
Understanding pattern matching	87
Using dialstatus	89
Using 911, 411, and 611	90

Chapter 6: Adding Features to Dialplans 91

Refining Your Code with Symbols	91
Conferencing with MeetMe	92
Queuing Calls.....	95
Prioritizing calls.....	97
Penalizing extensions	97
Cascading queues.....	98
Getting music on hold.....	98
Using the GotIff() Application.....	99
Adding Voice Mail.....	100
Building a voice mailbox	101
Empowering voice mail with options	102
Building a dial-by-name directory	103
Recording your personal messages	104
Enhancing your voice mail with the GotIffTime() application.....	104
Diving In with Macros	105
Making Expressions	107
Using operators	108
Realizing the sequencing.....	112
Having Fun with Functions	113

Chapter 7: Building Dialplan Infrastructure115

Monitoring Your Channels	115
Using true channel monitoring	116
Showing your channel info	117
Checking Your Call Detail Records	120
Appending the CDR	122
Integrating MySQL into your Asterisk	123
Working with the Asterisk Database	124
Setting info into the AstDB	125
Inputting data into AstDB	126
Cleaning up the AstDB	127
Going beyond AstDB	127

Chapter 8: Operating the AsteriskNOW GUI129

Connecting to the GUI	129
Programming AsteriskNOW from the GUI	131
Establishing user extensions	131
Building conference rooms	134
Using voice mail for extensions	136
Using call queues	138
Creating trunks	140
Changing the rules	141
Designing voice menus	141
AsteriskNOW management options	143

Chapter 9: Utilizing VoIP Codecs145

Choosing a Voice Codec	146
Using uncompressed G.711	146
Compressing voice with G.729	147
Determining the number of licenses you need	147
Transmitting VoIP Faxes	149
Receiving Videos	150

***Part III: Maintaining Your Phone Service
with Asterisk 153*****Chapter 10: Troubleshooting VoIP Calls with Packet Captures155**

Understanding Packet Capture Programs	156
Acquiring the Software	156
Installing the Packet Capture Software	157
Installing Wireshark	158
Installing tcpdump	160

Starting and Stopping a Packet Capture	161
Capturing packets with tcpdump	161
Capturing packets with Wireshark	163
Reading a Packet Capture in Wireshark	164
Looking at a completed call	165
Looking at a failed call	166

Chapter 11: Maintaining Your Telecom Services169

Understanding Troubleshooting Basics	170
Analog outbound long-distance call	171
Analog inbound long-distance call	172
Analog local call (inbound or outbound)	172
Dialing someone else's toll-free number	173
Someone is dialing your analog toll-free number	173
Digital calling	174
Connecting via VoIP	175
Comparing call types	176
Narrowing carrier-level problems	178
Creating a cut sheet	179
Getting the Most from Your Carrier's Troubleshooting Department	181
Identifying your call treatment	182
Providing a call example	187
Understanding when to provide multiple call examples	188
Managing Your Trouble Tickets	189
Understanding the timelines	189
Coping with large outages	190
Troubleshooting International Calls	191
Resolving International Fax Issues	191

Chapter 12: Addressing Call-Quality Concerns and Completion Issues193

Working through Analog Issues	193
Confirming configuration and setup of analog service	194
Step 1: Bypassing the Asterisk server	194
Step 2: Checking your long-distance carrier	195
Step 3: Bypassing your long-distance carrier	196
Step 4: Using a different local carrier	197
Confirming problems on the receiving end	198
Getting Analog Toll-Free Troubleshooting Basics	199
Step 1: Dialing the number yourself	200
Step 2: Dialing the ring-to number locally	201
Step 3: Dialing the ring-to number through your long-distance carrier	203
Step 4: Dialing the ring-to number over another carrier	205
Step 5: Validating the ring-to number and RespOrg	206

Distilling the Nature of VoIP Issues.....	207
Addressing VoIP call-quality issues.....	208
Battling one-way audio	210
Troubleshooting outbound VoIP calls	210
Addressing incoming VoIP call problems.....	211
Handling IAX Issues	214
Debugging Your Devices.....	215

Chapter 13: Handling Dedicated Digital Troubles 217

Identifying the Level of Your Problem.....	217
Differentiating local from long distance	219
Identifying DS-1–level circuit variables	221
Identifying DS-0 or individual channel issues	222
Opening a Trouble Ticket for Your Dedicated Circuit.....	224
Going through the basics	224
Letting your channels be your guide.....	226
Using a T-1 test set	228
Managing Your Dedicated Trouble Ticket.....	229
Reducing the Impact of an Outage.....	229

Chapter 14: Managing Asterisk for Peak Capacity 231

Handling Carrier Connectivity Bottlenecks	231
VoIP limitations.....	232
Analog and digital limitations	232
Dealing with Internal Bottlenecks	234
Saving Capacity for a Rainy Day.....	236
Entertaining the Third-Party Software	236

Chapter 15: Providing Long-Term Health for Your Asterisk Switch . . 239

Using an Uninterruptible Power Supply.....	239
Standby UPSs	240
Online UPSs	241
Reinstalling Your Asterisk Source Code.....	241
Making a backup copy of your original Asterisk code	242
Dealing with Linux ramifications.....	243
Providing General Server Maintenance.....	244
Adding Organization to Your Dialplan.....	244
Designing a Disaster Recovery Plan	245
Securing the System	246

Part IV: The Part of Tens..... 249**Chapter 16: Ten Things You Should Never Do with Asterisk 251**

Killing Your Carrier with Calls	251
Manipulating the Origination Phone Number	253
Manipulating the Telemarketing Caller ID	254

Forgetting to Build Routes254
 Getting an Edge on Radio Call-Ins255
 Exposing Yourself to Fraud256
 Building a Dialplan of Frustration257
 Working without a Safety Net257
 Disregarding the Power of Macros258
 Ignoring the Need to Learn More258

Chapter 17: Ten Fun Things to Do with Your Asterisk261

Fending Off Telemarketers262
 Giving Your Friends Special Options262
 Setting an Extension to Call for Local Weather Reports263
 Creating a Voice Mailbox That E-Mails Everyone264
 Using the Power of VoIP from Your Cell Phone265
 Turning On Your Lights with Asterisk266
 Remote Listening.....267
 Transmitting Your Voice through Your Stereo268
 Maximizing Your Savings.....268
 Taking Charge of Your Phone System.....269

Chapter 18: Ten Places to Go for Help271

Working the Asterisk Wiki271
 Going to the Source272
 Developing Your Database Skills272
 Strengthening Programming Skills273
 Tapping All Known Resources274
 Loading Up on Linux.....274
 Entering the Digium Forum.....274

Part V: Appendixes277

Appendix A: Visualizing the Dialplan279

Taking In the 30,000-Foot View279
 Going Global283
 Maximizing DID Programming283
 Setting Up a Macro for Voice Mail284
 Dialing the Outside World285
 Integrating Direct Inward Dial Numbers287
 Routing to Extensions.....287
 Providing a Default Context.....288
 Queuing Up Company Sales.....289
 Recording a Custom Menu.....289

Appendix B: VoIP Basics	291
Finding Out How VoIP Works	291
Using SIP for VoIP	293
Building a standard VoIP call	293
Maximizing bandwidth by reinviting calls	294
Evaluating your compression options	296
Optioning for touch tones	297
Passing the InterOperability Test	298
VoIP Quality Issues	300
Moving from Non-VoIP Service to VoIP Service	300
Appendix C: Understanding Basic Linux	303
Defining Linux	304
Navigating in Linux	304
Introducing Permissions	306
Navigating Directories	307
Knowing root from root home	308
Visiting the directory neighborhood	309
Working with Files	311
Editing files	311
Saving files	311
Closing a file	312
Backing up files	312
Getting Info from the man Files	313
Searching Files and Directories	313
Index	317
