Preface	vii
Acknowledgments	ix
Statement regarding the use of pictures	x
Statement regarding nomenclature	xii
PART I INTRODUCTION TO THE PIGMENTARY SYSTEM	1
1 Introduction to the Pigmentary System	3
1.1 Introduction	3
1.2 Colors of vertebrate animals	4
1.3 Other pigment cells	12
1.4 The epidermal melanin unit	12
1.5 Mammalian hair	13
1.6 Melanosome biogenesis and translocation	14
1.7 Melanin	15
1.8 Hair growth	15
1.9 Hair growth cycles	17
1.10 Embryonic development of the pigment cell lineage	18
1.11 Pigment cells in culture	18
1.12 Conclusion	19
Appendix: color loci of the mouse	20
PART II THE PIGMENTARY LOCI	49
2 Introduction to Mutant Pigmentary Genes	51
2.1 Defects of normal melanocyte development: white spotting and graying with age	51
2.2 Defects in normal melanosome development: albinism	52

2.3	Transport of melanosomes to other cells: the ‘dilute’ phenotype	53
2.4	Pigment-type switching: from eumelanogenesis to pheomelanogenesis	54
3	White Spotting and Progressive Graying	57
3.1	Definitions and general background	58
3.2	Pigment-cell development: developmental biology	62
3.3	Cellular signaling pathways for melanocytes	71
3.4	Pigment phenotypes and the classical white-spotting genes	88
3.5	The head, heart, ears, and eyes	127
4	‘Albinism’ and the Failure of Normal Melanosome Development	132
4.1	Background	133
4.2	The melanosomal matrix	140
4.3	The enzymes that catalyze melanogenesis	146
4.4	Membrane proteins that regulate the internal milieu of the melanosome	153
4.5	Protein processing and routing to the maturing melanosome	156
4.6	Melanosome transport	171
5	Pigment-Type Switching	177
5.1	Introduction	178
5.2	Yellow phenotypes	184
5.3	Melanin pigment	189
5.4	Melanogenesis and the eumelanin/pheomelanin switch mechanism	190
5.5	Signaling the switch mechanism at the cellular level	192
5.6	Yellow genes	194
PART III	TECHNOLOGY AND RESOURCES	207
6	Novel Mouse Pigmentary Mutants Generated by Genetic Manipulation	209
6.1	Introduction	209
6.2	Mouse transgenesis: generation of genetically engineered mice	210
6.3	Coat-color transgenic mice	219
6.4	The coat-color mutants generated by gene targeting	224
6.5	Influence of the genetic background	229
6.6	Conclusions	230
7	Other Species and Other Resources	232
7.1	Introduction	232
7.2	Resources	233
7.3	Other species	235
	References	243
	Index	286
