Symbian Press Acknowledgments	ix
About this Book	xi
About the Authors	xiii
1 Introducing EKA2	1
1.1 The history of EKA2	1
1.2 Basic OS concepts	3
1.3 Symbian OS design	4
1.4 Summary	16
2 Hardware for Symbian OS	17
2.1 Inside a Symbian OS phone	17
2.2 System-on-Chip (SoC)	20
2.3 Random Access Memory (RAM)	29
2.4 Flash memory	31
2.5 Interrupts	33
2.6 Timers	35
2.7 Direct Memory Access (DMA)	36
2.8 Liquid Crystal Display (LCD)	37
2.9 Audio	39
2.10 Power management	41
2.11 Summary	42
3 Threads, Processes and Libraries	45
3.1 What is a thread?	45
3.2 Nanokernel threads	46
3.3 Symbian OS threads	62
3.4 What is a process?	93
3.5 DProcess class	94
3.6 Scheduling	98

3.7	Dynamically loaded libraries	112
3.8	Summary	115
4	Inter-thread Communication	117
4.1	Client-server ITC	117
4.2	Asynchronous message queues	145
4.3	Kernel-side messages	147
4.4	Publish and subscribe	150
4.5	Shared chunks and shared I/O buffers	160
4.6	Summary	160
5	Kernel Services	161
5.1	Objects and handles	161
5.2	Services provided to user threads	173
5.3	Example user-accessible services	183
5.4	Services provided by the kernel to the kernel	187
5.5	Timers	195
5.6	Summary	206
6	Interrupts and Exceptions	207
6.1	Exception types	207
6.2	Exceptions on real hardware	210
6.3	Interrupts	219
6.4	Aborts, traps and faults	236
6.5	Summary	249
7	Memory Models	251
7.1	The memory model	251
7.2	MMUs and caches	253
7.3	The memory model interface	262
7.4	The memory models	274
7.5	Programmer APIs	298
7.6	Memory allocation	309
7.7	Low memory	311
7.8	Summary	314
8	Platform Security	315
8.1	Introduction	315
8.2	Unit of trust	317
8.3	Capability model	320
8.4	Data caging	327
8.5	Summary	330
9	The File Server	333
9.1	Overview	333

9.2	The file server client API	339
9.3	The file server	347
9.4	File systems	364
9.5	Summary	385
10	The Loader	387
10.1	E32 image file format	387
10.2	ROM image file format	392
10.3	The loader server	393
10.4	Kernel-side code management	412
10.5	Summary	427
11	The Window Server	429
11.1	The kernel's event handler	429
11.2	Different types of events	430
11.3	How WSERV processes events	435
11.4	Processing key events	436
11.5	Processing pointer events	438
11.6	Client queues	440
11.7	A simple handwriting animation DLL	442
11.8	Window objects and classes	456
11.9	Properties of windows	462
11.10	Drawing to windows	466
11.11	Direct screen access	471
11.12	Platform security in WSERV	473
11.13	Summary	474
12	Device Drivers and Extensions	475
12.1	Device drivers and extensions in Symbian OS	476
12.2	Kernel extensions	488
12.3	The hardware abstraction layer	494
12.4	Device drivers	498
12.5	Differences between EKA1 and EKA2	544
12.6	Summary	548
13	Peripheral Support	549
13.1	DMA	549
13.2	Shared chunks	562
13.3	Media drivers and the local media sub-system	574
13.4	Peripheral bus controllers	589
13.5	MultiMediaCard support	594
13.6	USB device support	602
13.7	Summary	612

14 Kernel-Side Debug	613
14.1 Overview	613
14.2 Architecture	615
14.3 The kernel debug interface	625
14.4 Target debugger agents	640
14.5 Stop-mode debug API	643
14.6 Kernel trace channel	652
14.7 Summary	658
15 Power Management	659
15.1 Power states	661
15.2 Power framework	663
15.3 Typical power management	688
15.4 Managing idle time	723
15.5 Advanced power management	727
15.6 Summary	736
16 Boot Processes	737
16.1 Operating system startup	737
16.2 Alternative startup scenarios	747
16.3 Operating system shutdown	750
16.4 Operating system sleep and wakeup events	762
16.5 Summary	764
17 Real Time	765
17.1 What is real time?	765
17.2 Real time operating systems	767
17.3 EKA2 and real time	778
17.4 Real time application – GSM	788
17.5 Personality layers	807
17.6 Summary	823
18 Ensuring Performance	825
18.1 Writing efficient code	826
18.2 Maintaining real-time performance	834
18.3 Summary	850
Appendix 1 Glossary	851
Appendix 2 The E32ImageHeader	855
Appendix 3 The TRomImageHeader	861
Appendix 4 Bibliography	865
Index	867
