

CONTENTS

| | |
|--|------------|
| Preface | vii |
| 1 Crystallographic and Microstructural Considerations | 1 |
| 1.1 Relationship Between Physical Properties and Crystallographic Symmetry, 4 | |
| 1.2 Morphological Crystallography, 9 | |
| 1.3 Space Lattices, 21 | |
| 1.4 Surface and Interface Structures, 28 | |
| 1.5 Controlled Crystal Growth and Microstructural Evolution, 33 | |
| 1.6 Structures of Glassy and Quasicrystalline Phases, 44 | |
| References, 48 | |
| 2 Chemical Energetics and Atomistics of Reactions and Transformations in Solids | 51 |
| 2.1 Equilibrium Thermodynamics, 53 | |
| 2.2 Structural Energetics, 66 | |
| 2.3 Grain Boundary Energy and Surface Energy Contributions, 73 | |
| 2.4 Mass Transport and Nonequilibrium Thermodynamics, 83 | |
| 2.5 Chemical Reaction and Phase Transformation Kinetics in Solids, 86 | |
| References, 101 | |
| 3 Solid–Vapor Reactions | 105 |
| 3.1 Vapor-Phase Fundamentals, 105 | |
| 3.2 Vapor Absorption and Adsorption, 109 | |
| 3.3 Film Formation Basics, 114 | |
| 3.4 Vapor-Phase Intercalation, 116 | |
| 3.5 Physical Vapor Deposition, 120 | |
| 3.6 Chemical Vapor Deposition, 125 | |
| 3.7 Molecular Beam Epitaxy, 136 | |
| References, 138 | |
| 4 Solid–Liquid Reactions | 141 |
| 4.1 Solid–Liquid Interface, 141 | |
| 4.2 Crystallization, Precipitation, and Solidification, 142 | |

vi CONTENTS

- 4.3 Sol–Gel Processing, 167
- 4.4 Solvothermal and Hydrothermal Techniques, 171
- 4.5 Molten Salts and Room-Temperature Ionic Liquids, 173
- 4.6 Electrochemical Synthesis, 176
References, 179

5 Solid–Solid Reactions 183

- 5.1 Solid–Solid Interface, 183
- 5.2 Ceramic Method, 184
- 5.3 Mechanical Alloying, 196
- 5.4 Combustion Synthesis, 199
- 5.5 Microwave Synthesis, 202
References, 207

6 Nanomaterials Synthesis 211

- 6.1 Top-Down Methods for Fabrication of Nanocrystalline Materials, 213
- 6.2 Bottom-Up Methods for Synthesis of Nanostructured Solids, 216
References, 230

7 Materials Fabrication 233

- 7.1 Influence of Structure on Materials Properties, 234
- 7.2 Deformation and Solidification Methods, 244
- 7.3 Consolidation Methods, 273
- 7.4 Summary, 291
References, 291

Appendix A1: General Mechanical Engineering Terms 295

Appendix A2: Green Materials Synthesis and Processing 297

Index 299
