

CONTENTS

PREFACE	1
<i>Catherine M. Wehlburg</i>	
1. Integrated General Education: A Brief Look Back	3
<i>Catherine M. Wehlburg</i>	
This chapter is an overview of historical trends that have taken general education from the concept of a unified curriculum with no distinction between “specialized” and “general” education to the current distribution requirement that many institutions use.	
2. Since We Seem to Agree, Why Are the Outcomes So Difficult to Achieve?	13
<i>Terry Rhodes</i>	
The Valid Assessment of Learning in Undergraduate Education (VALUE) project is described and results are presented, along with assessment of outcomes positioned in a national and international context.	
3. Making General Education Matter: Structures and Strategies	23
<i>Joan Hawthorne, Anne Kelsch, Tom Steen</i>	
This chapter focuses on the process used by the University of North Dakota to engage faculty in general education reform by making the program matter to faculty across disciplines. Their process resulted in a new program that is engaging much of the campus community in creation of a vertically integrated general education program.	
4. Unifying the Undergraduate Curriculum Through Inquiry-Guided Learning	35
<i>Virginia S. Lee, Sarah Ash</i>	
This chapter discusses development of a framework for integrating undergraduate curriculum across general education and the major. Participating faculty and staff members agreed on four overarching intended learning outcomes as the distinctive feature of inquiry-guided learning: critical thinking, habits of independent inquiry, taking responsibility for one’s own learning, and intellectual growth and maturity.	
5. University of the Pacific’s Bookend Seminars on a Good Society	47
<i>Lou Matz</i>	
The signature component of the University of the Pacific’s general education program is three required Pacific Seminars (PACS) that focus on the question, “What is a Good Society?”	

6. Core Curriculum Revision at TCU: How Faculty Created and Are Maintaining the TCU Core Curriculum	59
<i>Edward McNertney, Blaise Ferrandino</i>	
This chapter describes the faculty-led, participatory process of creating an outcomes-based core curriculum at Texas Christian University.	
7. Creating an Integrative General Education: The Bates Experience	69
<i>Jill Reich, Judy Head</i>	
The Bates College general education curriculum is used in this chapter to articulate the importance of several integrative goals and processes that make up our new General Education curriculum.	
8. Building an Integrated Student Learning Outcomes Assessment for General Education: Three Case Studies	79
<i>Jo K. Galle, Jeffery Galle</i>	
Looking across three institutions, the authors found that a three-stage process for developing an integrated general education assessment plan allowed for institutional differences. What emerged from their work demonstrates the remarkable ways in which institutions of various kinds adapted the stages to fit their own unique academic culture and necessities.	
9. Meaningful General Education Assessment That Is Integrated and Transformative	89
<i>Catherine M. Wehlburg</i>	
This chapter describes a transformative approach to assessing general education programs, identifies potential obstacles to successful assessment, and outlines necessary steps for creating assessable outcomes-based programs.
