

Contents at a Glance

Introduction	1
Part I: Putting the SAT II Math Test into Perspective	5
Chapter 1: Getting the Lowdown on the SAT II Math Test	7
Chapter 2: Maximizing Your Score on the SAT II Math Test.....	15
Part II: Addition, Subtraction, and Beyond: Arithmetic and Algebra	25
Chapter 3: Mastering the Basics: Numbers and Operations.....	27
Chapter 4: Contemplating the Variables: Algebra	51
Chapter 5: Minding Your Ps and Qs: Functions	77
Part III: It Has Curves, and You Have Angles: Geometry and Trigonometry	107
Chapter 6: Angling Your Perspective: Plane Geometry	109
Chapter 7: Getting Graceful: Coordinate Geometry	133
Chapter 8: Living in 3-D: Three-Dimensional Geometry	159
Chapter 9: Give Me a Sine: Trigonometry	179
Part IV: Highly Unlikely: Statistics, Probability, and Sets	205
Chapter 10: Playing the Numbers: Statistics and Probability.....	207
Chapter 11: Sticking Together: Sets	217
Part V: Practice Makes Perfect	229
Chapter 12: Practice Test 1, Level IC	233
Chapter 13: Explaining the Answers to Practice Test 1, Level IC.....	251
Chapter 14: Practice Test 2, Level IIC	267
Chapter 15: Explaining the Answers to Practice Test 2, Level IIC.....	285
Chapter 16: Practice Test 3, Level IC	305
Chapter 17: Explaining the Answers to Practice Test 3, Level IC.....	323
Chapter 18: Practice Test 4, Level IIC	341
Chapter 19: Explaining the Answers to Practice Test 4, Level IIC.....	359
Part VI: The Part of Tens	377
Chapter 20: Ten Formulas You Need to Know on Test Day.....	379
Chapter 21: Ten Definitions You Shouldn't Leave Home without Knowing	383
Index	387

Table of Contents

Introduction **1**

About This Book.....	1
Conventions Used in This Book.....	2
Foolish Assumptions.....	2
How This Book Is Organized.....	2
Part I: Putting the SAT II Math Test into Perspective.....	3
Part II: Addition, Subtraction, and Beyond: Arithmetic and Algebra.....	3
Part III: It Has Curves, and You Have Angles: Geometry and Trigonometry.....	3
Part IV: Highly Unlikely: Statistics, Probability, and Sets.....	3
Part V: Practice Makes Perfect.....	3
Part VI: The Part of Tens.....	3
Icons Used in This Book.....	3
Where to Go from Here.....	4

Part I: Putting the SAT II Math Test into Perspective **5**

Chapter 1: Getting the Lowdown on the SAT II Math Test **7**

Justification: How Colleges Use the SAT II.....	7
The SAT II as an admissions requirement.....	7
The SAT II as a placement tool.....	8
Decisions, Decisions: Determining Which Subject Test You Should Take.....	9
Figuring out the right subject area tests for you.....	9
Knowing which level of the SAT II Math you should take.....	9
It's All in the Timing: When to Take Your SAT II Math Exam (and What to Bring).....	10
The best time to take the SAT II.....	10
Items to take with you to the SAT II.....	10
First Impressions: The Format and Content of the SAT II Math.....	11
Where You Stand: Scoring Considerations.....	12
How the SAT II testers figure out your score.....	13
How SAT II testers report your score.....	14
All Over Again: Retaking the SAT II.....	14

Chapter 2: Maximizing Your Score on the SAT II Math Test **15**

Knowing When to Skip: Guessing Strategies.....	15
Get the lead out.....	15
X marks the spot.....	16
Eliminating Choices: How to Recognize a Wrong Answer.....	17
Use common sense.....	17
Rely on what you do know.....	17
Winning the Race Against the Clock: Wise Time Management.....	18
Pace yourself.....	18
Use your own timepiece.....	18
Employing Technology: Tips for Using the Calculator.....	19
The right calculator.....	19
The right way to use it.....	19
Playing it Smart: A Few Things You Shouldn't Do.....	20
Don't lose track of the numbers on your answer grid.....	20
Don't lose your focus.....	20

Don't judge your performance by looking around at others	20
Don't waste your time on hard questions	21
Don't stew about how you performed on another test	21
Don't fail to use extra time at the end of the section	21
Don't cheat	21
Curbing a Case of Nerves: Relaxation Techniques	21
Inhale	22
Stretch.....	22
Give yourself a mini massage	22
Take a little vacation.....	23
Think positive thoughts	23

***Part II: Addition, Subtraction, and Beyond: Arithmetic and Algebra* 25**

Chapter 3: Mastering the Basics: Numbers and Operations 27

Type Casting: Types of Numbers	28
Figures you can count on: Natural numbers.....	28
Add the zero: Whole numbers	28
Numbers with a little integrity: Integers	29
Splitting hairs: Rational numbers.....	29
Having it all: Real numbers	29
A league of their own: Prime numbers	29
It never ends: Irrational numbers.....	30
Not all there: Imaginary numbers	30
Scalpel Please: Basic Operations	31
Addition, subtraction, multiplication, and division and properties of real numbers	31
Bases and exponents: Power to the people, but cover your bases!.....	34
Digging in: Roots.....	37
Turning the tables: Reciprocals.....	38
Cutting portions: Fractions, decimals, and percentages.....	39
Ratios: Goin' to surf city 'cause it's 2:1.....	45
Proportions: Trying to relate	46
Scientific notation: Playing the big numbers	46
Order of Operations: Please Excuse My Dear Aunt Sally.....	47
Get the Picture: Graphs	48

Chapter 4: Contemplating the Variables: Algebra 51

Facing the Unknowns: Variables	51
Coming Together: Polynomials	53
Keeping Order: Algebra Operations	53
Adding and subtracting algebraic expressions	54
Multiplying and dividing algebraic expressions.....	56
Extracting Information: Factoring.....	59
Distribution.....	61
Problem Solving	61
Linear equations.....	62
Substitution: Even better than the real thing!	64
Inequalities: All numbers are not necessarily created equal.....	64
Ranges: Not just for the deer and the antelope.....	66
Variation: the spice of life.....	67
16 tons and what do you get: Work problems	68
Going the distance: Going for speed.....	68

Mixing it up: Mixture problems	70
The shell game: Solving simultaneous equations	71
Solving quadratic equations	72
Dressing Up Exponents: Logarithms	74
Low-class lumber: Common logs.....	75
Natural logarithms	76
Chapter 5: Minding Your Ps and Qs: Functions	77
Symbolism: Understanding SAT II Math Symbols	77
Sitting in: Symbols as functions.....	78
Keeping the status quo: “Normal” functions	78
Adding to the Fun: Compound Functions	82
Doing the Opposite: Inverse Functions	83
Setting Limits: Domain and Range	86
Domain.....	86
Range	89
Functions with intervals.....	91
Lining Up: Graphing Functions.....	93
The vertical line test	93
Finding domain and range from a graph of a function	98
Evaluating asymptote lines	99
Finding the roots of a function	102
Symmetry	103
Periodic functions	104
Degrees of Functions	105
 Part III: It Has Curves, and You Have Angles: Geometry and Trigonometry	 107
Chapter 6: Angling Your Perspective: Plane Geometry	109
The Straight and Narrow (and Sometimes Wide): Lines and Angles.....	109
Getting the skinny: Some basic definitions.....	109
Fishing for answers: Some rules for lines and angles	112
A Sturdy Foundation: Triangles.....	113
Thinking in threes: Properties of triangles	113
Finding the area of a triangle	116
Applying the Pythagorean theorem and other cool stuff about right triangles	116
Noticing a resemblance: Similar triangles.....	120
On All Fours: Quadrilaterals	121
Drawing parallels: Parallelograms	122
Raising the roof: Trapezoids	123
Pirates without Parrots: More Polygons	125
Pieces of Pi: The Properties of Circles	126
Rounding up the basics: Radius, diameter, and circumference	126
Assisting Noah: What you should know about arcs	127
Striking a chord: Chords, sectors, and segments.....	128
Staying in the lines: Inscribed and circumscribed figures, tangents, and inscribed angles.....	129
Chapter 7: Getting Graceful: Coordinate Geometry.....	133
Ready for Take-off: The Coordinate Plane	133
A well defined line: Some basic definitions.....	133
Life in the flats: Defining the coordinate plane.....	134

A Slippery Slide: Slope and Linear Equations	136
Formulating lines: The slope-intercept formula	136
A map for lost skiers and boarders: Finding the slope.....	137
Working backward: The point-slope form.....	140
Midpoints and distances	143
All Things Are Not Created Equal: Linear Inequalities	145
Working on the Figure: Other Equations of Shape.....	146
Passing parabolas	146
Exacting the equation of a circle	151
Elucidating the ellipse	152
Highlighting the hyperbola	154
The Third Dimension: Triaxial Coordinates	156

Chapter 8: Living in 3-D: Three-Dimensional Geometry159

A Chip Off the Old Block: Rectangular Solids.....	159
A Perfect Square: Cubes.....	162
Soda Cans and Other Cylinders	165
Not Just for Holding Ice Cream: Cones.....	168
The Shape of the Planet: Spheres	170
Thanks to the Egyptians: Pyramids	172
Captured: Solids within Solids.....	173
Measuring Up: Volume and Dimensions.....	176
Creative Motion: Rotation.....	177

Chapter 9: Give Me a Sine: Trigonometry.....179

Examining Basic Trigonometric Functions	179
Sine, cosine, and tangent.....	180
Arcsin, arccos, and arctan.....	182
Finding Oneself: Basic Trigonometric Identities.....	186
Getting Tricky: More Complex Functions and Identities	187
Picture This: Graphing	190
The unit circle.....	190
Graphing trig functions on a coordinate plane	195
Above and Beyond: Trigonometry in Other Triangles.....	196
The Law of Sines.....	197
The Law of Cosines	198
Matching Snow Suits: Polar Coordinates	200
Labeling polar coordinates	200
Expressing polar coordinates in radians.....	201
Converting polar coordinates	203

Part IV: Highly Unlikely: Statistics, Probability, and Sets205

Chapter 10: Playing the Numbers: Statistics and Probability207

Finding a Middle Ground: Mean, Median, and Mode.....	207
Analyzing the arithmetic mean.....	208
Mastering medians	208
Manipulating modes.....	209
Wondering about weighted means.....	210
Getting the geometric mean.....	210
All Have Strayed: Range and Standard Deviation	210
Scouting out the range.....	211
Watching out for wanderers: Standard deviation	211

It Could Happen: Probability	213
Finding the probability of one event.....	213
Finding the probability of many events.....	214
Chapter 11: Sticking Together: Sets	217
Numerical Socialization: Grouping	217
Crossing Paths: Union and Intersection.....	220
All together now: Unions	220
Looking both ways: Intersections	220
Possible Arrangements: Permutations	222
Safety in Numbers: Combinations.....	226
Number of Positions: Factorials	227
 <i>Part V: Practice Makes Perfect</i>	 229
Chapter 12: Practice Test 1, Level IC	233
Answer Key for Practice Exam 1	247
Scoring Your Exam	248
Chapter 13: Explaining the Answers to Practice Test 1, Level IC	251
Chapter 14: Practice Test 2, Level IIC	267
Answer Key for Practice Exam 2	281
Scoring Your Exam	282
Chapter 15: Explaining the Answers to Practice Test 2, Level IIC	285
Chapter 16: Practice Test 3, Level IC	305
Answer Key for Practice Exam 3	319
Scoring Your Exam	320
Chapter 17: Explaining the Answers to Practice Test 3, Level IC	323
Chapter 18: Practice Test 4, Level IIC	341
Answer Key for Practice Exam 4	355
Scoring Your Exam	356
Chapter 19: Explaining the Answers to Practice Test 4, Level IIC	359
 <i>Part VI: The Part of Tens</i>	 377
Chapter 20: Ten Formulas You Need to Know on Test Day	379
A Formula for Doing Algebraic Work Problems	379
Another Handy Formula to Apply to Some Distance Problems	379
The Equation for Average Mean	380
The Quadratic Formula	380
The Slope-Intercept Formula	380
The Point-Slope Form	380
The Equation for a Circle	380

Two Formulas for the Equation of the Parabola	381
A Formula for the Equation of an Ellipse	381
The Formula for a Hyperbola	381
Chapter 21: Ten Definitions You Shouldn't Leave Home without Knowing.....	383
Absolute Value.....	383
Real Numbers, Integers, and Rational Numbers	383
Real numbers	383
Integers	383
Rational numbers	384
Types of Triangles Defined	384
Equilateral triangle.....	384
Acute triangle.....	384
Obtuse triangle	384
Isosceles triangle.....	384
Coordinates.....	384
Parabola	384
Interior Angles	385
Chord	385
Domain	385
Radian.....	385
Asymptotes	385
Index	387
