

Contents

Introduction	xvii
Chapter 1: Preliminary Concerns	1
The History of Testing Tools	2
The sUnit Testing Framework	2
Testing Terminology	3
Testing Myths	5
Testing Is Expensive	5
Only Junior Developers Should Create Tests	6
Tests Cannot Be Created for Legacy Code	6
Tests Are Only for Use with Agile Software Development	7
Tests Have to Be Created Before the Code Is Written	7
Iterative Processes	8
Why Should I Learn about Testing?	9
For Developers	9
For Managers	10
Where to Start	11
Getting Started with Test Driven Development	11
When Should Testing Be Automated?	11
Introducing the ASP.NET Family	13
Summary	14
Chapter 2: Design and Testability	15
Why Should a Developer Care about Testing?	15
Developer Testing	16
Unit Testing	16
Unit Testing Frameworks	20
Unit Test Runners	21
Test Driven Development	21
Design and Test Driven Development	23
S — The Single Responsibility Principle	23
O — The Open Closed Principle	24
L — The Liskov Substitution Principle	27

Contents

I — Interface Segregation Principle	30
D — The Dependency Inversion Principle	32
Do You Need SOLID?	37
Pair Programming and Technical Code Reviews	38
Test Smells	38
Stubs and Mocks	41
Moving Beyond TDD to BDD	48
What Makes a Good Test?	50
How to Cope with Design Changes	54
Extract Method	55
Move to Class	56
Pull-Up Methods	56
Wax on, Wax Off	59
Summary	60
Chapter 3: Unit Testing and Test Driven Development	61
ASP.NET WebForms	61
Unit Testing ASP.NET WebForms	62
ASP.NET MVC	65
The Model View Controller Pattern	66
Implementing the Pizza Store	67
Downloading and Installing ASP.NET MVC	67
Structuring Your ASP.NET MVC Applications	67
Feature 1: Displaying Products from Database	71
Feature 2: Adding Categories	87
Feature 3: Adding Items to the Shopping Cart	95
Feature 4: Displaying Addresses	109
Feature 5: Displaying Confirmation	114
Applying Unit Tests to Legacy ASP.NET WebForms Code	115
Summary	116
Chapter 4: Integration Testing	117
Integration Tests versus Unit Tests	117
Feature 1: Displaying Products from Database	118
Feature 2: Adding Categories	124
Feature 3: Adding Items to the Shopping Cart	125
Feature 4: Displaying Addresses	131
External Systems	132
Email Servers	132
Summary	134

Chapter 5: Automated User Interface Testing	135
Can UI Automation Be Achieved?	135
Functional Testing	136
Importance of Automated UI Testing	138
Problems with UI Automation	139
Tools for UI Testing	141
Impersonating the Browser	142
Parsing the HTML Ourselves	142
Driving the Browser	143
Automating the UI Using Record and Playback	148
Recorded Tests	149
WatiN Recorder	149
Selenium Suite	158
UI Testing Patterns	166
The Test Monkey	166
Cassini Testing Pattern	167
Randomness	170
How Random Should You Be?	170
Special Characters	171
Tests Should Be Focused	174
Automating the UI as an Object Model	174
Creating UI Tests for Wrox Pizza	175
Creating Tests for Listing Products	176
Producing Test Data Using Test Data Builders	180
Using Known Data to Verify	184
More WatiN Examples	185
Common WatiN Errors	190
Testing JavaScript	191
Automating Cross-Browser Tests	198
How Much Should We Automate?	200
Applying Automated UI Testing to the ASP.NET Family	201
ASP.NET WebForms	201
Silverlight Testing	204
Summary	205
Chapter 6: Acceptance Testing	207
Acceptance Testing Terminology	207
Using Automation	211
FitNesse	211
Setting Up FitNesse Wiki	211

Contents

FitNesse, WatiN and WroxPizza	224
Cucumber	229
Cucumber, Watir and WroxPizza	235
Applying Acceptance Testing to Legacy Code	238
Summary	239
Chapter 7: Manual Testing	241
<hr/>	
Why Is Manual Testing Important?	241
Part Automation	242
Beyond Simply Breaking the Application	243
Usability	243
Documentation	244
Error Messages	245
Exploratory Testing	245
Breaking the Application	247
Session Timeouts	247
External Services	247
Network Testing	248
Edge Cases	248
Authentication	249
Useful Tools for Manual Testing	250
Cross-Browser Testing	251
Testing JavaScript	255
Manual Test Cases	256
Summary	260
Chapter 8: Performance Testing	261
<hr/>	
Performance Testing Basics	261
What to Expect	262
What Are Good Performance Times?	263
Automated Testing Tools	264
The Importance of Performance Testing	265
Capturing Performance Requirements	266
What to Ask First	266
Load Test Architecture	268
Designing an Effective Performance Test Environment	270
Performance Monitoring	272
Performance Analysis	276
Key Performance Indicators	277
Root Cause Analysis	277
Performance Analysis Checklist	277

Capacity Planning	277
Predicting Failure	278
Capacity Planning Goals	278
Bandwidth	278
Load Testing Patterns	278
Code Profiling	278
Log Replaying	279
Performance Testing in the Cloud	279
Tools for Load Testing	280
WCAT	280
IIS Log Parser	282
NetStat	285
Performance Monitor	286
Microsoft Network Monitor	287
Redgate ANTS Profiler	287
Fiddler	292
Firebug	293
YSlow	294
Visual Studio Team Foundation Test Suite	295
Summary	302
Chapter 9: Accessibility Testing	305
Accessibility Myths	306
Creating Accessible Sites Takes More Time	306
Accessible Web Applications Are Dull	306
Testing for Accessibility Should Be Done Last	307
Accessibility Is Hard	308
The Importance of Accessibility Testing	308
Introduction to Disabilities	310
Visual Disabilities	310
Photosensitive Epilepsy	316
Auditory Disabilities	316
Motor Disabilities	317
Cognitive Disabilities	319
Creating Accessible Sites	321
Working with Images	321
When to Add Alternative Text	321
Creating Effective Alternative Text	321
Working with Forms	324
Working with Tables	326
Working with Media	328

Contents

Working with JavaScript	330
Other Accessibility Elements	332
Accessibility Standards	333
WCAG 1.0	334
WCAG 2.0	335
Section 508 Standards	335
Other Countries' Accessibility Standards	336
Testing for Accessibility	338
Involving Others	338
Testing from Day One	339
Tools for Accessibility Testing	340
Assistive Technology	340
Text-Based Browsers	340
Lynx	340
Screen Readers	340
Tools to Help Check Accessibility	342
W3C HTML Validation Service	342
W3C CSS Validation Service	344
WebAIM WAVE	344
Toolbars	347
Web Accessibility Toolbar	347
Section 508 Toolbar	348
WebAIM's WAVE Toolbar	348
Applying Accessibility Testing to the ASP.NET Family	348
WebForms and ASP.NET MVC Applications	348
Summary	352
Chapter 10: Security Testing	353
Security Terms	354
Black Hat Hacker	354
White Hat Hacker	354
Cookie Poisoning/Cookie Manipulation	354
Session Hi-Jacking	355
Brute Force Attacks	355
Dictionary Attacks	355
Rainbow Tables	355
Attacking the Mechanism	355
Attacking the Data	355
Denial of Service Attack (DoS)	355
Spoofing	356
Penetration Testing	356
Man in the Middle Attack (MITM)	356

The Importance of Security Testing	356
A Whole New World	356
Saving Face	357
Liability	357
It's the Tool's Fault	357
What It Boils Down To	357
The Trouble with Security Testing	358
Knowledge Transfer	358
Experience Level	358
Outside Consulting	358
A Unique Problem	359
Compliance and Policy Laws	359
Security Guidance	360
Web Application Security Consortium	360
Open Web Application Security Project (OWASP)	360
Testing for the OWASP Top 10	362
Vulnerability Assessments	386
Discovery	386
Verification	388
Documentation	388
Tools	392
HTTP Proxying/Editing	392
Security Scanners	392
Password Crackers	393
Other Security Tools	393
Exploit Resources	393
Summary	393
Index	395
