

Contents

<i>Introduction</i>	<i>xxiii</i>
---------------------------	--------------

Chapter 1 • Overview of Microsoft SQL Server 2008	1
SQL Server in the Enterprise World	1
The Need for an Enterprise System	2
SQL Server Features	3
SQL Server's Place Within Microsoft Architecture	6
SQL Server Licensing	8
Installing SQL Server 2008	10
Defining an Installation Plan	10
SQL Server 2008 Installation Requirements	16
The SQL Server Installation Process	17
Verifying the Installation	26
The SQL Server Tool Set	28
The Microsoft Client Tools	28
Third-Party Tools and Utilities	32
The Bottom Line	33
Chapter 2 • Understanding SQL Server Architecture	35
Essential Internals	35
SQL Server Data Storage Architecture	35
The Data Engine	44
SQL Server and Windows	47
The SQL Server System Catalog	48
The System Databases	48
System Tables, Views, and Functions	49
System Stored Procedures	55
Datotyping	57
System-Defined Datatypes	57
User-Defined Datatypes	60
The Bottom Line	63
Chapter 3 • Databases, Files, and Resource Management	65
Planning a Database	65
Planning for Database Usage	65
Planning for Recovery	66
Capacity Planning	68

Creating Databases	69
Creating the Database	70
Manipulating Database Options	75
Managing Databases, Files, and Filegroups	78
Altering a Database	78
Growing and Shrinking Databases and Files	82
Creating Database Snapshots	86
The Bottom Line	88
Chapter 4 • Tables and CRUD Operations	89
Designing Data Storage	89
Implementing a Normalized Design	90
Denormalization	94
Creating and Dropping SQL Server Tables	96
The Basics of Table Creation	96
Computed Columns in Tables	98
Dropping Tables	100
Table Partitioning	100
Selecting Data from a Table	105
Aggregation and Grouping	106
Joins and Table Correlation	109
Subqueries, Derived, and Temporary Tables	113
Common Table Expressions	118
Modifying Data	122
The <i>INSERT</i> Process	122
The <i>DELETE</i> Process	124
The <i>UPDATE</i> Process	126
The <i>MERGE</i> Process	127
Using the <i>OUTPUT</i> Clause	129
The Bottom Line	130
Chapter 5 • Procedural Programming	133
Procedural Structures	133
Batches	133
Variables	135
Control-of-Flow Statements	136
Error Management	138
Basic Transaction Processing	142
Stored Procedures	144
Designing Effective Stored Procedures	145
Creating and Executing a Simple Stored Procedure	146
Using Parameters	147
Managing Return Values	151
Understanding Compilation	151
Views	153
Why Use Views?	154
Standard Views	154

User-Defined Functions	155
Functions Versus Stored Procedures	156
Built-In Functions Revisited	157
Scalar Functions	157
Table-Valued Functions	159
Using Synonyms	161
Why Use Synonyms?	161
Creating a Synonym	161
The Bottom Line	162
Chapter 6 • Managing Data Integrity	163
Understanding Data Integrity Controls	163
Enforcing Data Integrity	164
Data Integrity Categories	164
Working with Constraints	165
Primary Key and Unique Constraints	165
Foreign Key Constraints	168
Default Definitions	172
Check Constraints	174
Working with DML Triggers	175
Understanding Triggers	176
Using <i>AFTER</i> Triggers	179
Using <i>INSTEAD OF</i> Triggers	183
Special Considerations	185
Rule and Default Objects	186
Default Objects	186
Rules	187
The Bottom Line	187
Chapter 7 • SQL Server and XML	189
Returning XML from SQL Server Using <i>FOR XML</i>	189
Creating XML with RAW Mode Queries	190
Creating XML with AUTO Mode Queries	192
Creating XML with EXPLICIT Mode Queries	195
Creating XML with PATH Mode Queries	198
The <i>xml</i> Datatype	200
Implementing the <i>xml</i> Datatype	201
Shredding XML Data to Relational Output	203
Validating XML with Schemas	205
Using the XML Schema Collection	206
Using Namespaces in Schemas	207
Implementing XQuery	208
Simple XQuery Expressions	208
Structuring Complex XQuery Syntax	209
Creating an XML Structure with XQuery	211
XQuery and Namespaces	212
Other XML Datatype Methods	215

XML Indexes	218
The Bottom Line	221
Chapter 8 • Managing User Security	223
The SQL Server Security Infrastructure	223
SQL Server 2008 Security Architecture	224
Implementing SQL Server Principals and Authentication	231
Implementing Logins	231
Implementing Users	237
Implementing Roles	239
Implementing Permissions in SQL Server	242
Understanding Permission Behavior	243
Setting Permissions	244
Ownership Chains	249
The Bottom Line	250
Chapter 9 • Data Recovery	253
Transaction Architecture	253
Database Recovery Models	254
The Internals of Transaction Logging	254
How Transaction Logging Is Used	255
Backup and Restore Strategies	257
Recovery Models and Backup Strategy	258
Backup Types	260
Performing Backups	260
Full Backups	261
Backup Devices, Media Sets, and Media Families	261
Differential Backups	263
Transaction Log Backups	264
Partial Backups	264
Creating Backups Using Management Studio	265
Performing Restores	267
Retrieving Backup Metadata	267
Performing a Complete Restore	268
Performing Point in Time Recovery	271
Performing a File or Filegroup Restore	273
Performing Page Restore Operations	275
Using SQL Server Management Studio to Restore a Database	275
Other Issues	277
System Database Recovery	277
Backup Security	279
Backup Performance and Optimization	280
Backup Compression	280
The Bottom Line	281

Chapter 10 • Monitoring SQL Server Activity	283
Using System Monitor	283
Basic Monitoring Concepts	284
Graphs, Logs, and Alerts	286
Selecting Resources and Counters	287
Using SQL Profiler & Trace	290
Designing a Good Trace	290
Selecting Data Columns and Events	291
Evaluating Trace Output	297
Replaying Traces for Performance Analysis	301
DDL Triggers	305
DDL Triggers Versus DML Triggers	306
Trigger Events	307
EVENTDATA and Its Schema	311
Event Notifications	314
Event Notifications Versus DDL Triggers	315
Event Classes	315
Implementing Event Notifications	315
The Bottom Line	317
Chapter 11 • Using the SQL Server Agent Service	319
SQL Agent and Automation	319
Reducing Administration Overhead	319
The SQL Server Agent Architecture	320
Configuring the SQL Agent Service	323
Creating Jobs	328
Creating Jobs	328
Creating Job Steps	330
Creating Schedules	335
Executing Jobs	336
Creating Alerts	337
Monitoring the Event Log	338
Responding to Performance Alerts	340
Understanding WMI Alerts	340
Creating Operators	341
Operator Types	341
Configuring Operators	342
Associating Operators with Jobs and Alerts	343
Scripting the SQL Agent	344
Understanding the SQL Agent System Stored Procedures	344
Scripting Existing Jobs	345
The Bottom Line	347

Chapter 12 • Data Availability and Distribution	349
Overview of SQL Server Availability and Distribution Options	349
Hardware Considerations	350
SQL Server Features	352
Database Log Shipping	355
Configuring Log Shipping	356
Failing Over in a Log Shipping Scenario	365
Database Mirroring	366
Configuring Database Mirroring	366
Exploring the Mirroring Solution	373
Replication	374
Replication Overview	374
Configuring Replication	376
The Bottom Line	386
Chapter 13 • SQL Server Data Security	389
Understanding the SQL Server Key Infrastructure	389
The SQL Server Keys	390
Extensible Key Management	399
Backing Up the Keys	400
Using Transparent Data Encryption	401
Creating Keys and Certificates	402
Encrypting Data Using SQL Server	403
Understanding Authenticators	404
Encryption with Passphrases	404
Encryption with Symmetric Keys	405
Encryption with Asymmetric Keys	406
Encryption with Certificates	408
Module Signing	411
The Bottom Line	413
Chapter 14 • Indexing Strategies for Query Optimization	415
Index Architecture	415
Index Basics	416
Data Heaps	418
Clustered Indexes	422
Nonclustered Indexes	424
Planning Clustered and Nonclustered Indexes	426
Creating and Managing Indexes	430
Creating Indexes with SSMS	430
Managing Indexes and Fragmentation with SSMS	432
Creating and Managing Indexes with TSQL	436
Special Index Considerations	439
Covering a Query	439
Logical Operator Processing	440
The Bottom Line	441

Chapter 15 • Transactions and Locking	443
The SQL Server Locking Architecture	443
What Gets Locked	444
Types of Locks	446
Controlling Locks	448
Managing Deadlocks	452
Transaction Management	453
SQL Server Transaction Concepts	453
Implementing Explicit Transactions	454
Using Savepoints	456
Transactions and Errors	458
Concurrency and Performance	459
Distributed Transactions	460
Understanding Distributed Queries	461
Defining Distributed Transactions	466
Getting Transaction and Locking Information	468
Using the Activity Monitor Utility	468
Using Transact-SQL to Monitor Activity	469
The Bottom Line	471
Chapter 16 • Using the Resource Governor and Policy-Based Management	473
The Resource Governor	473
Workload Groups	475
Resource Pools	478
Understanding Policy-Based Management	482
Policy-Based Management Components	483
Creating and Evaluating Policies	491
The Bottom Line	501
Chapter 17 • SQL Server and the .NET Client	503
Understanding ADO.NET	503
Making the Connection	505
Defining the Command	507
Connected Operations	509
Disconnected Operations	512
Special Operations in ADO.NET	515
Multiple Active Result Sets (MARS)	515
Using SQLBulkCopy	516
SQL Query Notifications	518
Introducing Language Integrated Query (LINQ)	522
Different Flavors of LINQ	523
LINQ to SQL	524
The SQL Server Implications of LINQ to SQL	528
LINQ and the Entity Framework	530
Creating and Querying the Entity Data Model	531
The SQL Server Implications of the Entity Framework	533
The Bottom Line	536

Chapter 18 • SQL Server and the Common Language Runtime	539
CLR Concepts	539
CLR Terminology	540
Enabling the CLR	541
Creating Managed Objects in SQL Server	542
Setting Up the Project Environment	543
Creating Managed Functions	545
Creating Managed Stored Procedures	550
Create Managed Datatypes	553
Deploying Managed Objects in SQL Server	555
Creating Assemblies	555
Creating Managed Objects	559
Managing CLR Security	562
Managed Objects and User Security	562
Assemblies and Code Access Security	563
Security Considerations	567
The Bottom Line	568
Chapter 19 • Using Spatial Data	569
Spatial Data Concepts	569
The Foundation	569
Geometry Versus Geography	571
Shapes Supported by Spatial Data	572
Defining Spatial Storage	574
Implementing the <i>Geometry</i> Type	575
Loading Geometry Data	575
Working with Points and MultiPoints	577
Working with LineStrings and MultiLineStrings	579
Working with Polygons and MultiPolygons	581
Using the GeometryCollection	584
Implementing the <i>Geography</i> Type	584
Understanding the Spatial Reference	584
Geometry Versus Geography	586
Spatial Indexes	587
Spatial Index Architecture and Restrictions	588
Creating Spatial Indexes	589
The Bottom Line	592
Chapter 20 • Service-Oriented Architecture and the Service Broker	595
The Essentials of Service-Oriented Architecture	595
SOA Distilled	595
Service Architecture	599
Understanding the Service Broker	602
Service Broker Terminology	602
Service Broker Workflow Scenario	604

Implementing Service Broker	607
Creating Service Broker Components	607
Constructing a Service Broker Dialog	614
The Bottom Line	620
Chapter 21 • Full-Text Search Services	623
Full-Text Architecture	623
Full-Text Terminology	623
Architecture	625
Creating Full-Text Indexes	627
Creating Stoplists	628
Creating a Full-Text Catalog	632
Creating Full-Text Indexes	635
Writing Full-Text Queries	643
Implementing the <i>CONTAINS</i> Predicate	644
Implementing the <i>FREETEXT</i> Predicate	648
Implementing the Full-Text Functions	648
The Bottom Line	651
Appendices	653
Appendix A • The Bottom Line	655
Chapter 1: Overview of Microsoft SQL Server 2008	655
Chapter 2: Understanding SQL Server Architecture	657
Chapter 3: Databases, Files, and Resource Management	659
Chapter 4: Tables and CRUD Operations	660
Chapter 5: Procedural Programming	662
Chapter 6: Managing Data Integrity	663
Chapter 7: SQL Server and XML	664
Chapter 8: Managing User Security	666
Chapter 9: Data Recovery	668
Chapter 10: Monitoring SQL Server Activity	671
Chapter 11: Using the SQL Server Agent Service	672
Chapter 12: Data Availability and Distribution	673
Chapter 13: SQL Server Data Security	675
Chapter 14: Indexing Strategies for Query Optimization	676
Chapter 15: Transactions and Locking	678
Chapter 16: Using the Resource Governor and Policy-Based Management	680
Chapter 17: SQL Server and the .NET Client	680
Chapter 18: SQL Server and the Common Language Runtime	683
Chapter 19: Using Spatial Data	685
Chapter 20: Service-Oriented Architecture and the Service Broker	687
Chapter 21: Full-Text Search Services	690

Appendix B • SQL Server Analysis Services Overview	693
Designing the Data Warehouse	693
Data Warehouse Defined.	694
Dimensional Data Models.	694
Understanding Analysis Services	696
Creating Data Cubes.	697
Creating a Data Source.	698
Creating a Data Source View	700
Creating a Dimension	701
Deploying the Project.	703
Creating a Cube.	704
Browsing a Cube	707
Appendix C • SQL Server 2008 Reporting Services	709
Configuring Reporting Services	709
Starting and Locating Reporting Services Ports	710
Loading the Report Manager	711
Creating a Simple Report	712
Defining the Report Project.	712
Creating a Data Source.	713
Creating a Report	715
Designing the Report	717
Deploying the Report	719
<i>Index</i>	723
