Guest Introduction

TMN Today: Challenges and Opportunities xv

Maurizio Decina, Politecnico di Milano/CEFRIEL, Italy

Editors' Introduction

Implement Complexity to Realize Simplicity xix

Salah Aidarous, NEC America, USA

Thomas Plevyak, Bell Atlantic, USA

Chapter 1 Information Modeling and Its Role in Network Management 1

Lakshmi Raman, ADC Telecommunications, USA

1.1 Introduction 1

1.2 Information Modeling Made Easy 3

1.3 Communicating Management Information 4

1.4 Message-Based Paradigm 5

1.5 Object-Oriented Paradigm 6

1.5.1 System Management Architecture 7

1.5.2 Message Structure for Telecommunications NM 7

1.5.3	Message Structure for Data Communications NM	8
1.6	Foundations of Information Modeling	9
1.7	E–R Approach	10
1.8	Object-Oriented Design	11
1.9	Information Modeling Principles	12
1.10	Managed Object Class Definition	12
1.10.1	Package Definition	13
1.10.2	Behavior	15
1.10.3	Attributes	16
1.10.4	Attribute Groups	18
1.10.5	Notifications	19
1.10.6	Actions	20
1.11	Systems Management Operations	21
1.12	Management Information Base (MIB)	23
1.13	Extending Managed Object Class Definition	24
1.14	Allomorphy	26
1.15	Naming Managed Objects	27
1.16	Modeling Relationships	29
1.17	Representing Information Models	30
1.18	Differences in Information Modeling Principles	31
1.19	Examples of Information Models for TMN	32
1.20	TMN Modeling Efforts	32
1.21	Event Report Management	33
1.22	Cross-Connection Model	37
1.23	Performance Monitoring Framework	39
1.24	Information Models in Standards	42
1.25	Example Information Models for Data Communications	47
1.26	Conformance and Interoperability	48
1.27	Conformance Statements	49
1.28	Profiles and Interoperability	50
1.28.1	Network Management Profiles	51
1.28.2	Information Model Ensembles	51
1.29	Considerations for Interoperable TMN Interfaces	52
1.30	Future Directions	52
1.31	Distributed Processing and TMN	53
1.32	Open Distributed Processing	54
1.33	Open Distributed Management Architecture	55
1.34	Common Object Request Broker Architecture (CORBA)	56
1.35	Summary	57
References		58

Chapter 2 **OSI Systems Management, Internet SNMP, and
ODP/OMG CORBA as Technologies for Telecommunications
Network Management 63**

George Pavlou, University College London, UK

2.1	Introduction and Overview	63
2.1.1	Background Information: ASN.1	66

- 2.2 Management Information Models 67
 - 2.2.1 The SNMP Information Model 68
 - 2.2.2 The OSI Management Information Model 70
 - 2.2.3 The ODP/OMG CORBA Information Model 74
- 2.3 Access and Distribution Paradigm 77
 - 2.3.1 The Internet SNMP 78
 - 2.3.2 OSI System Management 81
 - 2.3.3 OMG CORBA 86
 - 2.3.4 Summary and Comparison 89
- 2.4 Various Other Issues 90
 - 2.4.1 Scalability, Flexibility 90
 - 2.4.2 Generic Management Functionality 92
 - 2.4.3 Security 95
- 2.5 Interworking and Coexistence 98
 - 2.5.1 OSI and Internet Management 98
 - 2.5.2 ODP/OMG CORBA and Internet Management 101
 - 2.5.3 ODP/OMG CORBA and OSI Management 102
- 2.6 Summary and the Future 104
 - Acknowledgments 108
 - References 108

Chapter 3 **Management Platforms 111**

George Pauthner, Alcatel Telecom, Germany

Jerry Power, Alcatel Telecom, USA

- 3.1 Introduction 111
- 3.2 The Well-Designed Platform System 116
- 3.3 Methods and Tools 119
 - 3.3.1 GDMO Toolset 119
 - 3.3.2 MIB Data Management 122
 - 3.3.3 GUI Presentation Services 125
 - 3.3.4 Process Management 127
 - 3.3.5 Distributed Communications Services 129
 - 3.3.6 Protocol Support 130
 - 3.3.7 Interworking Applications 130
 - 3.3.8 Application Framework Tools 131
 - 3.3.9 Application Programming Interfaces (APIs) 132
- 3.4 Standards and Platform Building Blocks 134
 - 3.4.1 TMN 135
 - 3.4.2 The NM Forum 137
 - 3.4.3 DCE 138
 - 3.4.4 CORBA 139
- 3.5 Case Study: Openview, ALMAP, and the 1320 140
 - 3.5.1 HP OpenView 140
 - 3.5.2 ALMAP 143
 - 3.5.3 Alcatel 1320 NM 145
- 3.6 Summary and Outlook 147
 - References 149

Chapter 4 **Management of Personal Communications Services (PCS) Networks 150**

Vijay K. Garg, Lucent Technologies, Bell Labs, USA

- 4.1 Introduction 150
- 4.2 Management Approaches for the PCS Network 152
- 4.3 Reference Model for the North American PCS System 154
 - 4.3.1 TIA Reference Model 155
 - 4.3.2 T1 PCS Reference Architecture 158
 - 4.3.3 Open Interfaces 160
- 4.4 Requirements for PCS Network Management 163
- 4.5 Management Goals for PCS Networks 164
- 4.6 Management Functions of PCS Networks 165
 - 4.6.1 Accounting Management 165
 - 4.6.2 Performance Management 167
 - 4.6.3 Fault Management 168
 - 4.6.4 Configuration Management 170
 - 4.6.5 Security Management 173
- 4.7 Summary 173
 - References 174

Chapter 5 **Managing Mobile Networks: From Cellular Systems to Satellite Networks 176**

Yechiam Yemini, Columbia University, USA

Geoffrey Moss, Motorola, USA

- 5.1 Introduction 176
- 5.2 An Overview of Mobile Networks 177
 - 5.2.1 Cellular Systems 178
 - 5.2.2 Satellite Networks 179
- 5.3 Managing the Elements 182
 - 5.3.1 Managing Interactions with the Physical Environment 182
 - 5.3.2 Managing Rapid Changes 183
 - 5.3.3 Managing Constrained Resources 184
 - 5.3.4 The Challenge of Event Correlation 185
 - 5.3.5 An Architecture for Managing Mobile Networks Elements 186
 - 5.3.5.1 How Should Mobile Elements be Instrumented 186
 - 5.3.5.2 How to Monitor, Analyze, and Control Mobile Elements 187
- 5.4 Managing the Network Layer 188
 - 5.4.1 Managing the Impact of Mobility on the Network Layer 189
- 5.5 Managing the Application Services Layer 191
 - 5.5.1 Monitoring the Performance of Services 192
 - 5.5.2 Configuration Management 195
- 5.6 Conclusions 195
 - References 196

Chapter 6 Management of CATV Networks 197

John Brouse, Jones Intercable, USA

Mohamed Beshir, Nortel, Canada

- 6.1 Introduction 197
- 6.2 Industry History 198
- 6.3 The Modern CATV Network 205
 - 6.3.1 The Headend 205
 - 6.3.2 Outside Plant 211
 - 6.3.3 The Drop 214
- 6.4 Management of Existing Networks 214
- 6.5 Future Network Characteristics 215
 - 6.5.1 Future Services 216
 - 6.5.1.1 Movies on Demand (MoD) 216
 - 6.5.1.2 Near Video on Demand (N-VOD) 216
 - 6.5.1.3 Telemedicine 216
 - 6.5.1.4 Home Banking 217
 - 6.5.1.5 Telecommuting 217
 - 6.5.1.6 Teleshopping 217
- 6.6 Implications for the CATV Industry 219
- 6.7 Demand Placed on Network Management 219
- 6.8 Future Network Management Systems 220
- 6.9 Other CATV Management Systems 220
- 6.10 Operations Systems (OSs) 221
 - References 223

Chapter 7 Architectural Integrity as a Countermeasure to Complexity in the Telecommunications Management System Life Cycle 224

Mike Ahrens, Bellcore, USA

- 7.1 Introduction 224
 - 7.1.1 The Quest for a Breakthrough 225
 - 7.1.2 Accidental versus Essential Complexity 226
 - 7.1.3 Complexity Inherent in Software Systems 227
 - 7.1.4 Conway's Law: Linking Organizational to System Architecture 228
- 7.2 TMSs in the Context of the S&NI Life Cycle 229
 - 7.2.1 Market Analysis 230
 - 7.2.2 Technology Assessment 231
 - 7.2.3 Service Definition 231
 - 7.2.4 Network Characterization 232
 - 7.2.5 Network Equipment Supplier Selection 233
 - 7.2.6 Service Requirements 233
 - 7.2.7 Network Requirements 234
 - 7.2.8 Key Learnings for Introducing TMSs in the S&NI Life Cycle 235
- 7.3 Architectural Integrity as a Countermeasure to Complexity 237
 - 7.3.1 Characteristics of Complex Systems 238
 - 7.3.2 The Role of Architecture in Coping with Complexity 240
 - 7.3.2.1 What Is Architecture, and What Do Architects Do? 240

7.3.2.2	Architecture Team Composition	242
7.3.2.3	Architecture Team Charter	243
7.3.2.3.1	Define the Problem, Not the Solution	244
7.3.2.3.2	Disciplined Problem Definition	244
7.3.2.3.3	Detailed Knowledge of System Behavior (Ashby Knowledge)	245
7.3.2.3.4	Architectural Integrity, Shared Mental Models, Common Language	245
7.3.2.3.5	Tools for Creating Shared Mental Models, Common Language	246
7.4	The Role of Learning and Memory in Countering Complexity	247
7.4.1	Individual Learning and Memory	248
7.4.1.1	Models of Individual Learning	248
7.4.1.2	Models of Individual Memory	249
7.4.1.3	Individual Single-Loop Versus Double-Loop Learning	251
7.4.1.4	An Example of Individual Single-Loop Learning	253
7.4.1.5	An Example of Double-Loop Learning	253
7.4.2	Organizational Learning and Memory	254
7.4.3	Organizational SLL and DLL	256
7.5	The Significance of Coupling Operational and Conceptual Learning	257
7.5.1	An Historical Perspective	258
7.5.2	The Importance of Transferring Operational Knowledge	261
7.5.3	Transferring Operational and Conceptual Knowledge	262
7.5.3.1	Operational to Operational (Socialization)	263
7.5.3.2	Operational to Conceptual (Articulation)	263
7.5.3.3	Conceptual to Conceptual (Combination)	263
7.5.3.4	Conceptual to Operational (Internalization)	264
7.5.3.5	A Knowledge Transfer Learning Cycle	264
7.6	Improving Handoffs in the Waterfall Model	266
7.6.1	The Phased Approach	267
7.6.2	The Overlapping Approach	268
7.7	Putting it All Together: The Design for Complexity	269

Chapter 8 **The Impact of Telecommunications in Europe and the Requirement for Network Management 273**

Enrico Bagnasco, CSELT, Italy

Marina Geymonat, CSELT, Italy

8.1	Introduction	273
8.2	The Past and Present Network Management Scenario in Europe	275
8.3	TMN in Europe	276
8.3.1	Increase of Liberalization and Deregulation	277
8.3.2	Increase of Automation	277
8.3.3	Introduction of Cooperative Management	278
8.3.4	Service Management and Customer Control	278
8.3.5	Security of Management	278
8.3.6	Standard Management Interfaces on Future Technology	279
8.4	Initiatives Sponsored by the European Commission	279

8.4.1	RACE	280
8.4.2	ACTS	281
8.4.2.1	MISA	282
8.4.2.2	MOON	283
8.4.2.3	PROSPECT	284
8.4.2.4	TRUMPET	285
8.4.2.5	WOTAN	286
8.5	Initiatives Sponsored by European Operators	287
8.5.1	EURESCOM	287
8.5.1.1	P406-TMN Management of Pan-European IN-Based Freephone Service	290
8.5.1.2	P408-Experiments and Field Trial Support	290
8.5.1.3	P414-TMN Guidelines	291
8.5.1.4	P612-X-Interface for Trouble Ticketing and Freephone Service Management	292
8.5.2	METRAN	293
8.5.3	ATM Pilot, James	294
8.6	The European Telecommunications Standard Institute (ETSI)	295
8.7	Pan-European TMN Laboratories: The EURESCOM Experience	297
8.7.1	Achieving Interoperability (IOP) Between Multivendor Platforms	300
8.7.2	Methodology for Specifications Validation: The EURESCOM Example	303
8.8	Relationships with International Standardization Bodies	306
	References	306
	Index	309
